sponsorship of the race, the division paid the funds to its advertising agency and instructed the agency to pay the non-profit entity. The advertising agency provided no additional administrative support or oversight of the funds. An Office of Administration, Division of Purchasing and Materials Management (DPMM) official said the contract with the advertising agency allowed for these types of expenditures to be paid through the contract. However, the use of the funds did not appear consistent with the purpose of the advertising agency contract and did not allow for appropriate transparency or accountability of the expenditure.

Website development, management, and maintenance

The division paid $480,645 to the advertising agency in fiscal years 2009 and 2010 which was passed through to subcontractors for website development, management, and maintenance services without bidding for the services. An additional $586,056 was paid directly to the advertising agency for website development services without being bid. While the original advertising agency contract was bid, these additional services were not included in the scope of that bid and there was no documentation supporting the billing rates were competitively established. The manner in which these expenditures were processed reduced the overall transparency of the transactions and allowed the division to bypass the Office of Administration's procurement process.

In addition, website services do not appear to be an allowable cost per the contract with the division's advertising agency. The contract states "the contractor shall not be required to perform internet site development, management, or hosting of the VisitMO website." We obtained documented discussions from officials at the DPMM notifying division officials that some of these website costs did not appear allowable through the advertising agency contract. However, according to DPMM officials, the division subsequently entered into the agreements without notifying the DPMM, or ensuring appropriate measures were taken to comply with the contract terms.

Other expenditures

The division paid at least $141,340 for conferences, research, and other services through their advertising agency for fiscal years 2009 and 2010. The advertising agency was not involved in the decision making process or the administration of these services, but simply passed funds through to vendors at the direction of the division. The division indicated a DPMM official said the contract with the advertising agency allowed for these types of expenditures to be paid through the contract. However, the use of the funds did not appear consistent with the purpose of the advertising agency contract and did not allow for appropriate transparency or accountability of the expenditures.

Recommendation

The division establish procedures to ensure future expenditures are conducted in an open, transparent, and accountable manner. In addition, the

division should ensure purchases are competitively bid and authorized in accordance with Office of Administration guidelines.

Auditee's Response

The Commission Chairman and the division provided the following written response:

The advertising contract includes language that allows the division to direct the advertising agency of record to perform additional duties:

2.5.2 "Other Additional Programs – If required by the state agency, the contractor shall perform other additional programs as part of the total advertising campaign effort of the state agency. Examples of such additional programs may include, but not necessarily be limited to promotions of the Civil War in Missouri, State Parks, Governor's Conference on Tourism, and any other promotions or programs that might arise. The state agency shall specify the type of and requirements of any other additional programs at the time of identification of the need for the additional program.

2.5.3 The contractor shall understand and agree that there shall be no additional fee for the performance of any additional programs. "

We agree that all division expenditures should be conducted in an open, transparent, and accountable manner. The division accepts the recommendation and has already implemented procedures to ensure that competitive bids are authorized in accordance with Office of Administration guidelines. Division staff has been reorganized with new management assignments and responsibilities establishing a more cohesive management team with open book and transparent budgeting and expenditures in all departments. In addition, successful bidding procedures have been followed including contracts for research, advertising, strategic planning, search engine optimization/search engine marketing, and (still in the RFP process as of this writing) web development.

4. Oversight

The commission's oversight of division activities should be improved. In addition, the division has not fully ensured compliance with contractual requirements or ensured contracts provide the division adequate oversight of the allocated funds.

4.1 Oversight by the Tourism Commission

The commission has not established procedures to ensure adequate oversight of division budgeting and expenditure activities. Section 620.455, RSMo has charged the commission with determining all matters related to policy and the administration of tourism promotion.

Budget

The commission's oversight of the division's budget needs improvement. Division budgets are not approved or adjusted in a timely manner. For

example, in April 2009, the commission met and approved a fiscal year 2010 budget of $23.7 million. In July 2009, the commission meeting minutes identify the commission became aware of appropriation reductions that reduced the division's budget to $20.6 million; however, the commission did not approve the reduced budget until October 2009. The final budget approved by the commission in November 2009 totaled $19 million. However, additional reductions in funding of approximately $1 million occurred and were acknowledged by the commission's Budget Committee without any action taken by the commission to reduce the budget or to formally direct which budget line items should be reduced.

In addition, the commission's lack of oversight allowed various payments to be made without formal approval from the commission.

- The division paid $709,794 to the non-profit entity responsible for the Tour of Missouri without approval by the commission in fiscal year 2009. In June 2008, the commission approved the fiscal year 2009 budget, which included a generic budget line item for the Governor's Reserve. In August 2008, division records indicate the Governor's office released these funds and directed them to be used for the Tour of Missouri. However, the commission did not specifically approve these funds be used for the Tour of Missouri.

- The division paid $114,209 to its advertising agency in fiscal year 2009 for marketing at the Major League Baseball All-Star Game in St. Louis. The Governor had requested division funds be used for marketing of the All-Star Game and the commission was aware of this request. However, the commission did not specifically approve funding for this transaction.

- The division paid $50,000 to a subcontractor of the division's advertising agency for marketing various athletic events. However, the commission did not vote to approve funds for this transaction.

- The division paid $27,167 in fiscal year 2009 for office furniture and other equipment at Welcome Centers; however, the commission did not approve funds for these transactions. The commission had only approved $5,000 in the budget for Office Equipment.

- The division paid approximately $5,400 in fiscal year 2009 and $12,700 in fiscal year 2010 in excess of the amount budgeted to vendors responsible for domestic and international travel. The commission had approved specific budgets for these vendors.

Periodic reviews of expenditures and timely approval of the division's budget would help ensure all transactions are accounted for properly, adequately supported, and for reasonable and appropriate uses.

Advertising agency administrative fee

The delays in the commission's approval of the fiscal year 2010 budget, discussed above, resulted in unnecessary administrative fees being paid to the division's advertising agency. The advertising agency contract stipulates the administrative fee be paid based on the initial marketing budget, using fee thresholds specified in the contract. Although the division and the commission were made aware of significant withholdings in July 2009, the commission failed to adopt the adjusted budget until October 2009. As a result, the division's administrative fee to the advertising agency was set at $159,900 per month rather than $148,900 per month that would have been due had the division's revised budget been approved on a timely basis. Although the advertising agency eventually agreed to reduce the fee to $148,900 in January 2010, the division paid a total of $66,000 in unnecessary administrative fees as a result of the delay in approving the annual budget.

Payroll expenditures

The budget approved by the commission does not include sufficient detail to monitor the allocation of payroll expenditures. A payroll expenditure amount is approved in total without any breakdown by program or purpose. For fiscal year 2010, the total approved was approximately $1.4 million, with an additional $200,000 for part-time contractors. Our review noted the following examples where additional oversight of the payroll budget would be beneficial:

- The division paid personnel costs totaling at least $87,000 for an individual to perform coordination duties for the Tour of Missouri. Commission minutes from November 2009 indicate not all members of the commission were aware these costs were being incurred. Since the commission had separately approved funding to a non-profit entity to administer the Tour of Missouri, some commissioners believed the division's support of the race was limited to the payment made to the non-profit entity. A review of payroll costs by the commission could have identified the additional personnel costs.

- The division paid personnel costs for Welcome Center staff totaling $1,152,883l (or 41 percent of the division's personnel costs) in fiscal years 2009 and 2010, of which $968,671 related to state employees and $184,212 related to contracted personnel. However, the budget approved by the commission does not include any mention of the Welcome Centers.

Having more detailed information regarding the allocation of personnel costs will allow the commission to have a better understanding of where and how personnel dollars are being expended and allow the commission to make more informed decisions.

4.2 Contractual oversight by the division

The division has not fully ensured compliance with contractual requirements. In addition, certain contracts did not provide the division adequate oversight of the allocated funds.

Tour of Missouri

The division did not receive financial reports in accordance with the contracts with the non-profit entity responsible for the Tour of Missouri in fiscal years 2009 and 2010. During those years, the division paid a total of $3.21 million[3] to fund the race and did not ensure the contract allowed for adequate oversight of the funds. The contract did not:

- Require division funds be paid on a reimbursement basis. Large payments were made in advance without requiring documentation of expenditures.
- Require a line-by-line budget be established prior to payment of funds to the non-profit.
- Stipulate the types of costs that were considered allowable or unallowable.
- Require a detailed list of actual expenditures by budget line item be provided on a regular basis.
- Include any repercussions in the event the non-profit entity did not comply with contract terms.

At the direction of the Governor, the Office of Administration contracted for a third-party review of the expenses of the fiscal year 2009 race. The review identified various concerns, including some similar to those listed above regarding the contract and documentation as well as the lack of a fiscal policy and procedure manual. Without the above stipulations in the contract, the division is unable to determine if state funds were expended properly and appropriately.

Advertising agency

The division does not ensure compliance with contractual requirements related to the division's advertising agency.

- The contract requires the advertising agency provide the division an annual report that includes, but is not necessarily limited to: (1) budget and media breakdown by market, type, and campaign, (2) documentation measuring the results of current projects, (3) an assessment of the year's programs, and (4) an evaluation of potential future opportunities. A division official said a formal report has not been required or received from the advertising agency for fiscal years

[3] The division made payments of $1 million, and $709,794 during fiscal year 2009 to the Tour of Missouri, Inc., and three payments of $500,000 each during fiscal year 2010 to Tour of Missouri, Inc. via the advertising agency. The Missouri Wine and Grape Board also paid $40,000 to the division for the Tour of Missouri, who then paid the Tour of Missouri, Inc. through the advertising agency during fiscal year 2010.

2009 or 2010. This official said the division has informally received the information satisfactory to meet these requirements. However, the division could not provide formal documentation from the advertising agency to support how these requirements were met.

- The contract requires the advertising agency provide weekly status reports of the accomplishments achieved, projects completed, and status of future projects. However, the division has not received weekly status reports. A division official said the division informally agreed to receive monthly status reports from the division's advertising agency; however, the contract terms were not adjusted nor was there any formal agreement maintained to support this change.

Contract monitoring and documentation of compliance with contractual requirements are necessary to ensure division funds are used for necessary, reasonable, and appropriate purposes, and to ensure the contractor complied with contract terms.

Recommendations

4.1 The commission establish procedures to improve oversight of the division's operations. These procedures should ensure the division's budget is approved in a timely manner, all changes in allocated funding are reflected in the budget, and additional detail is presented regarding the allocation and purpose of personal service expenditures.

4.2 The division establish procedures and require documentation to allow adequate monitoring and oversight of contract requirements and expenditures, and ensure monitoring efforts are adequately documented.

Auditee's Response

The Commission Chairman and the division provided the following written response:

The division accepts the recommendation and has already implemented procedures to provide timely and detailed divisional expenditures and to ensure that all contracts are based on the status of contract deliverables.

5. Performance Measurement

The commission and the division have not fully established performance goals and measures to guide the direction of the division. In addition, the commission and the division have not fully integrated performance data into its resource allocation process for tourism investments.

5.1 Performance goals

The commission has not established formal performance goals or measures to guide the direction of the division. Division officials said the division established a 5-year strategic plan for fiscal years 2008 to 2012 which included performance measures. However, the commission did not formally

approve these measures for fiscal years 2009 or 2010 and there is limited evidence the commission considered performance goals or measures in the funding decision process.

The performance measures included in the Annual Report prepared by the division do not include specific targets or goals. Without pre-established targets, the division is less able to measure the effectiveness of the strategies in place or identify deficiencies. For example, if an agency's goal is to simply increase overnight stays, any incremental increase could be considered a success, but by setting a realistic, specific goal, the division and commission can more easily determine the effectiveness of strategies.

Establishing and measuring performance goals on a periodic basis can assist in determining whether pre-determined targets are achieved or if deficiencies exist. A system of monitoring and measuring performance also increases accountability by assisting decision makers in the resource allocation process.

5.2 Performance evaluation

The commission and the division do not appear to fully utilize performance data to evaluate the effectiveness of individual programs. As a result, the effectiveness of individual programs is not adequately considered during the resource allocation process. Our review of the commission minutes for fiscal years 2009 and 2010 did not show performance data was used to evaluate specific strategies. Our review of available performance data, including return on investment data, identified issues with the following programs:

Advertising agency

The commission and the division did not establish specific performance goals or measures for the funding allocated to the division's advertising agency. The division paid $19.4 million to the advertising agency for services provided or subcontracted for fiscal years 2009 and 2010, according to division records.

Division officials said annual statewide economic impact studies conducted by a third party provide input on the contractor's performance. Division officials said they consider the contractor's performance to have met the division's needs and also noted the contractor won awards for their campaign. However, without pre-established goals for the advertising agency, it is difficult to measure how effective the performance was or to hold the contractor accountable in the event the performance does not meet desired expectations.

Cooperative marketing program

The commission and the division have not established overall performance measures or targets for the Cooperative Marketing Program or used performance results data as a basis for funding, or denying funding, for specific projects. In addition, each local non-profit entity awarded funding

for increasing tourism to local tourist destinations is not held accountable for its performance estimates. Some projects provided information regarding the return on investment while other funded projects did not. As a result, evaluating cooperative marketing projects against one another is difficult, and the division cannot be assured the most effective projects are selected. The division paid a total of $7.94 million for cooperative marketing projects in fiscal years 2009 and 2010, according to division records.

Tour of Missouri

The commission and the division did not establish performance goals or measures for the funding allocated to the Tour of Missouri. In addition, the commission and the division did not determine the economic impact to the state or the return on investment generated from the Tour of Missouri prior to funding the Tour of Missouri in fiscal years 2009 and 2010 or denying funding for the Tour of Missouri in fiscal year 2011. Although the non-profit entity in charge of promoting the race had obtained an economic benefit study, division officials said they did not rely on the study and did not perform an independent economic impact analysis. According to a division news release, the Tour of Missouri was not funded in 2011 because the division's other priorities produced a higher return on investment. However, it does not appear the division had adequate documentation to support how the economic impact from the Tour of Missouri compared to other tourism projects. The division paid a total of $3.3 million to fund the Tour of Missouri in fiscal years 2009 and 2010.

Welcome Centers

The commission and the division are unable to fully support funding decisions for the Welcome Centers. While state law[4] requires the division to maintain travel offices at major entry points in the state, the division's level of financial support for the centers is at the commission's discretion. The division paid $704,000 and $641,000 for its seven Welcome Centers in fiscal years 2009 and 2010, respectively, according to division records. The fiscal year 2011 budget approved by the commission does not specify the Welcome Center budget, but costs are expected to be consistent with prior years.

The division's economic impact data identified the division's return on investment from the Welcome Centers was substantially less than other division programs. However, no significant cuts to Welcome Center funds were made during fiscal years 2009 through 2011.

Integrating performance data in the resource allocation process requires management to be more accountable for their decisions. Linking the budget and strategic planning processes is a key component in ensuring

[4] Section 620.465, RSMo

accountability because it allows management to evaluate performance and allocate limited department resources in the most effective manner.

Recommendations

The commission and the division:

5.1 Establish formal performance goals and measures to guide the division's overall direction and periodically monitor the results against the pre-established goals.

5.2 Establish procedures to use performance data in the resource allocation process for individual tourism programs.

Auditee's Response

The Commission Chairman and the division provided the following written response:

The division agrees that performance goals and measures are helpful to guide direction, to monitor results, and to determine resource allocation decisions. As such, the division develops statistical and analytical information and conducts special research on Missouri's visitor industry that helps aid state marketing and product development efforts, industry planning and tourism policy-making. Its research publications further enable and empower stakeholders to make informed decisions in support of our tourism economy.

In the fall of 2010, division staff participated in a series of strategic planning sessions to review the current position of the tourism industry in Missouri and to set the direction for the tourism marketing outreach efforts going forward. Current and former commission members were involved in those sessions. The annual marketing plan that outlines how the division will execute these goals was presented to the Missouri General Assembly during the annual joint presentation to the members of the appropriate committees and the members of the commission on February 14, 2011.

Further, the division has established a 3-year strategic plan (2011-2013), which outlines measurable goals and objectives for the division. The strategic plan addresses challenges and assets both internally and externally that impact the success of the division. The plan serves as a road map and barometer, measuring the activities of the division and providing metered benchmarks for performance.

The fiscal year 2011 overall budget for the division is $13,422,576. Of that, the division is expending $10,199,853, or 78.3 percent on marketing the state, and using $2,820,046 or 21.7 percent for operating expenses, including staffing the seven welcome centers at key entry points to the state. Division staff work for new and creative, research supported marketing efforts that allow us to take full advantage of Missouri's natural beauty,

four-season outdoor opportunities, world-class meeting and convention sites and a myriad of sports, entertainment and family friendly options.

Auditor's Comment

Our review of the 3-year strategic plan referenced in the division's above response shows the plan does contain goals and objectives, but does not clearly indicate how those goals and objectives can, or will be, measured. For example, one of the stated goals is to 'enhance the effectiveness' of the division, without designating a measurable criteria or how the goal will be measured.

6. Payment of Flight Costs of the Governor's Office

In fiscal years 2010 and 2009, the division paid flight costs totaling $3,072 relating to travel of the Governor's office, thus circumventing the appropriation process established by the General Assembly. For one flight, totaling $842, the division did not receive documentation supporting the purpose of the flight or who was on the flight. We determined the flight was for travel to St. Louis to promote the 2009 Major League Baseball All-Star game and included no division officials. A second flight, totaling $1,130, related to the 50th Anniversary of Silver Dollar City, a private entity in Branson, and no division officials were on the flight. Documentation for a third flight, totaling $1,100, shows it was to Branson and included the Division Director. However, the trip did not appear to be related to tourism, but was for honoring soldiers.

While some of these flights may have related to tourism, it appears the primary purposes of these flights were for functions associated with the Governor's office. It does not appear appropriate for state agencies to bear the cost of such flights that provide no clear benefit to the applicable agencies. These funding practices distort the actual costs of operating the division and the Governor's office.

Recommendation

The division work with the Governor's office to discontinue the practice of using division appropriations to pay flight costs of the Governor's office.

Auditee's Response

The Commission Chairman and the division provided the following written response:

The Office of Administration, Division of Budget and Planning determines the allocation of expenses incurred by the Governor's office by providing services to state departments. The Division of Budget and Planning informed the division of its share of those expenses. Travel expenses benefitting state departments and their constituents are allocated to the departments. The division believes the costs are an appropriate expense.

Department of Economic Development
Division of Tourism
Organization and Statistical Information

The Missouri Tourism Commission is responsible for determining all matters relating to policy and the administration of tourism promotion, according to state law.[5] The Department of Economic Development, Division of Tourism is the administrative arm of the commission.

The division is responsible for the promotion of tourism in Missouri. The division's primary goal is to draw new and repeat visitors year-after-year, thus increasing tourism expenditures in the state. State law[6] grants the division the following powers: (1) developing a program for the promotion of tourism in Missouri, (2) cooperating with entities in encouraging educational tourism and developing programs, (3) publishing tourist promotional material such as brochures and booklets, (4) promoting tourism in Missouri through articles, advertisements, or promotional exhibits, (5) establishing and maintaining travel offices at major entries of the state, (6) accepting funds for the promotion of tourism in Missouri, and (7) other duties necessary in carrying out the purposes of the division.

The division is administered by a director who is appointed by the commission. Kathleen Steele Danner has served as director of the division since November 2009 (she also previously served as Interim Director and Deputy Director of the Department of Economic Development). Previously, Robert Smith served as Interim Director for the division from March 2008 to November 2009, following the departure of the prior director, Blaine Luetkemeyer. At June 30, 2010, the division had 33 full time employees, 29 of whom were under the State Merit System. At June 30, 2009, the division had 33 full time employees and 16 part-time employees.

The commission consists of ten members appointed for four-year terms without compensation. The members consist of (1) the Lieutenant Governor, (2) two members of the Senate of different political parties appointed by the President Pro Tem of the Senate, (3) two members of the House of Representatives of different political parties appointed by the Speaker of the House of Representatives, and (4) five other persons appointed by the Governor, including persons engaged in the tourism industry.

[5] Section 620.455, RSMo
[6] Section 620.465, RSMo

The members of the commission as of June 30, 2010 were:

Appointed Members	Term Expires
Marcia Bennett-Hazelrigg, Chairman	January 2011
Scott Hovis, Vice Chairman	January 2013
Lieutenant Governor Peter Kinder	No Term*
Senator Jack Goodman	No Term**
Senator Ryan McKenna	No Term**
Representative Maynard Wallace	No Term**
Representative Regina Walsh	No Term**
John Joslyn	January 2014
Kelly Swanson	January 2011
Eric Rhone	January 2012

* Lieutenant Governor is automatically a member of the commission.
** Appointed by the Speaker of the House or the President Pro Tem of the Senate at the beginning of each new session.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The division spent American Recovery and Reinvestment Act of 2009 monies of $3.1 million during the year ended June 30, 2010. These monies were appropriated to the Division of Tourism Supplemental Revenue Fund from the Federal Budget Stabilization - Medicaid Reimbursement Fund and were used to fund the general operations of the division.

A summary of the division's financial activity is presented in the following appendixes.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Phelps County, Missouri

The Office of the State Auditor is responsible under Section 29.230, RSMo, for auditing certain operations of Phelps County, and issues a separate report on that audit. In addition, in cooperation with the county, the Office of the State Auditor has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2010, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Daniel Jones & Associates, Certified Public Accountants, is attached.

INDEPENDENT AUDITOR'S REPORT

To the County Commission
The County of Phelps, Missouri

We have audited the accompanying financial statements of the County of Phelps ("County"), Missouri, as of and for the years ended December 31, 2010 and 2009, which collectively comprise the County's financial statements as listed in the table of contents. These financial statements are the responsibility of the County's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards,* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described more fully in Note I, these financial statements were prepared using accounting practices prescribed or permitted by Missouri law, which practices differ from accounting principles generally accepted in the United States of America. The effects on the financial statements of the variances between these regulatory accounting practices and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

In our opinion, because of the effects of the matter discussed in the preceding paragraph, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of the County of Phelps, Missouri, as of December 31, 2010 and 2009, or the changes in its financial position for the years then ended.

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash and investment balances of the governmental and agency funds of the County of Phelps, Missouri, as of December 31, 2010 and 2009, and the receipts, disbursements and budgetary results of the governmental funds for the years then ended, on the basis of accounting described in Note I.

As described in Note XI, the County of Phelps has converted from a modified cash (GASB 34) basis of accounting to the regulatory basis of accounting which differs from accounting principles generally accepted in the United States of America, as of and for the years ended December 31, 2010 and December 31, 2009.

In accordance with *Government Auditing Standards*, we have also issued our report dated June 15, 2011 on our consideration of the County's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

Our audit was conducted for the purpose of forming an opinion on the financial statements, taken as a whole that are referred to in the first paragraph. The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by the U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profits Organizations*, and is not a required part of the financial statements. Such information has been subjected to the auditing procedures applied in the audit of the financial statements and, in our opinion, is fairly stated in all material respects in relation to the financial statements taken as a whole, that were prepared on the basis of accounting described in Note I.

The accompanying notes to the financial statements are an integral part of this statement.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The County of Phelps, Missouri ("the Primary Government"), which is governed by a three-member board of commissioners, was established in 1857 by an Act of the Missouri Territory. In addition to the three Commissioners, there are eleven elected Constitutional Officers: County Clerk, Collector, Treasurer, Circuit Clerk, Recorder of Deeds, Sheriff, Assessor, Coroner, Public Administrator, Prosecuting Attorney and County Surveyor.

As discussed further in Note I, these financial statements are presented on the regulatory basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP).

A. Reporting Entity

As required by generally accepted accounting principles, as applicable to the regulatory basis of accounting, these financial statements present financial accountability of the County.

The County's operations include tax assessments and collections, state/county courts, county recorder, police protection, transportation, economic development, and social and human services.

The financial statements referred to above include only the primary government of Phelps County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that comprise the County's legal entity. The financial statements do not include financial data for the County's legally separate component unit, which accounting principles generally accepted in the United States of America, as applicable to the regulatory basis of accounting require to be reported with the financial data of the County. In accordance with accounting principles generally accepted in the United States of America, as applicable to the regulatory basis of accounting, the Phelps County Regional Medical Center has issued separate reporting entity financial statements. For information on this component unit, please contact the Phelps County Regional Medical Center at (573) 458-8899 (or write to 1000 West Tenth Street Rolla, MO 65401).

B. Basis of Presentation

The financial statements are presented using accounting practices prescribed or permitted by Missouri law, which include a Statement of Receipts, Disbursements and Changes in Cash and Investment Balances – All Governmental Funds, a Comparative Statement of Receipts and Disbursements – Budget and Actual – All Governmental Funds, and a Statement of Assets and Liabilities Arising from Cash Transactions – Agency Funds.

Governmental resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled. A fund is considered a separate accounting entity with self-balancing accounts. The following fund types are used by the County:

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

B. Basis of Presentation (concluded)

Governmental Fund Types

Governmental funds are those through which most governmental functions are financed. The County's expendable financial resources are accounted for through governmental funds. The measurement focus is upon determination of and changes in financial position rather than upon net income.

Fiduciary Fund Types

Agency – Agency funds are used to account for assets held by the County in a trustee capacity as an agent of individuals, private organizations, other funds or other governmental units. Agency funds are accounted for and reported similar to the governmental funds. Agency funds are custodial in nature (assets equal liabilities) and do not involve the measurement of results of operations. These funds account for activities of collections for other taxing units by the Collector of Revenue and other agency operations.

C. Basis of Accounting

Basis of accounting determines when transactions are recorded in the financial records and reported on the financial statements.

The financial statements are prepared on the regulatory basis of accounting. This basis of accounting recognizes amounts when received or disbursed in cash and differs from accounting principles generally accepted in the United States of America.

As a result of the use of this regulatory basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

If the County utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while the fund financial statements for proprietary fund types, if applicable, would use the accrual basis of accounting. All government-wide financials would be presented on the accrual basis of accounting.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

D. Budget and Budgetary Accounting

The County follows these procedures in establishing the budgetary data reflected in the financial statements:

1. In accordance with Chapter 50 RSMo, the County adopts a budget for each governmental fund.

2. On or before January 15th, each elected officer and department director will transmit to the County Clerk, who serves as budget officer, the budget request and revenue estimates for their office or department for the budget year.

3. The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning January 1. The proposed budget includes estimated revenues and proposed expenditures for all budgeted funds. Budgeted expenditures cannot exceed beginning available monies plus estimated revenues for the year. Budgeting of appropriations is based upon an estimated unencumbered fund balance at the beginning of the year as well as estimated revenues to be received. The budget to actual comparisons in these financial statements, however, do not present encumbered fund balances, but only compare budgeted and actual revenues and expenditures.

4. A public hearing is conducted to obtain public comment. Prior to its approval by the County Commission, the budget document is available for public inspection.

5. Prior to February 1, the budget is legally enacted by a vote of the County Commission.

6. Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget information in the financial statements.

   Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year. Individual amendments were not material in relation to the original appropriations which were adopted.

7. Budgets are prepared and adopted on the cash basis of accounting.

E. Property Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1, of the following year.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

E. Property Taxes (concluded)

The assessed valuation of the tangible taxable property, included within the County's boundaries for the calendar year 2010 and 2009, for purposes of taxation was:

	2010	2009
Real Estate	$ 415,231,730	$ 408,183,050
Personal Property	104,035,549	101,103,990
Railroad and Utilities	20,669,138	20,521,644
	$ 539,936,417	$ 529,808,684

During 2010 and 2009, the County Commission approved a $.3068 and $.3157, respectively, tax levy per $100 of assessed valuation of tangible taxable property for the calendar year 2010 and 2009, for purposes of County taxation, as follows:

	2010	2009
General Revenue Fund	$ .1466	$ .1521
Special Road and Bridge Fund	.0899	.0933
Developmentally Disabled	.0703	.0703
	$ .3068	$ .3157

F. Cash Deposits and Investments

Deposits and investments are stated at cost, which approximates market. Cash balances for all the County Treasurer Funds are pooled and invested to the extent possible. Interest earned from such investments is allocated to each of the funds based on a weighted average of cash balance. Cash equivalents include any instruments with an original maturity of ninety days or less. State law authorizes the deposit of funds in banks and trust companies or the investment of funds in bonds or treasury certificates of the United States, other interest bearing obligations guaranteed as to both principal and interest by the United States, bonds of the State of Missouri or other government bonds, or time certificates of deposit, provided, however, that no such investment shall be purchased at a price in excess of par. Funds in the form of cash on deposit or time certificates of deposit are required to be insured by the Federal Deposit Insurance Corporation (FDIC) or collateralized by authorized investments held in the County's name at third-party banking institutions. Details of these cash balances are presented in Note II.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (concluded)

G. Interfund Transactions

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables, if applicable, are eliminated due to reporting the financial statements on the regulatory basis of accounting.

Legally required transfers are reported as “transfers in” by the recipient fund and as “transfers out” by the disbursing fund.

II. DEPOSITS AND INVESTMENTS

The County maintains a cash and temporary investment pool that is available for use by all funds. Deposits with maturities greater than three months are considered investments. Each fund type's portion of this pool is displayed as "Cash and Equivalents" under each fund's caption.

Deposits - Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. At December 31, 2010 and 2009, the carrying amount of the County's deposits was $5,063,575.79 and $5,291,728.69, the bank balance was $5,333,688.42 and $5,647,019.91 respectively. As of December 31, 2010 and 2009, 100% of the County’s investments were guaranteed by the U. S. Government.

SUMMARY OF CARRYING VALUES

The carrying values of deposits and investments shown above are included in the financial statements at December 31, 2010, as follows:

Included in the following fund financial statement captions:

Statements of Receipts, Disbursements and Changes in Cash and Investments – Governmental Funds:	
Deposits	$ 5,063,575.79
Investments	-
Total Governmental Funds	5,063,575.79
Statement of Assets and Liabilities Arising From Cash Transactions – Agency Funds:	
Deposits	11,647,218.90
Investments	-
Total Deposits & Investments as of December 31, 2010	$ 16,710,794.99

II. DEPOSITS AND INVESTMENTS (continued)

The carrying values of deposits and investments at December 31, 2009, are as follows:

Included in the following fund financial statement captions:	
Statements of Receipts, Disbursements and Changes in Cash and Investments – Governmental Funds:	
Deposits	$ 5,066,728.69
Investments	225,000.00
Total Governmental Funds	5,291,728.69
Statement of Assets and Liabilities Arising From Cash Transactions – Agency Funds:	
Deposits	11,395,220.84
Investments	-
Total Deposits & Investments as of December 31, 2009	$ 16,686,949.53

Custodial Credit Risk – Deposits

For a deposit, custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. The County's investment policy does include custodial credit risk requirements. The County's deposits were not exposed to custodial credit risk for the year end December 31, 2010 & 2009.

Custodial Credit Risk – Investments

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by the party who sold the security to the County or its agent but not in the government's name. The County does have a policy for custodial credit risk relating to investments.

All investments, evidenced by individual securities, are registered in the name of the County or of a type that are not exposed to custodial credit risk.

Investment Interest Rate Risk

Investment interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The County does have a formal investment policy that limits investments maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Concentration of Investment Credit Risk

Concentration of credit risk is required to be disclosed by the County for any single investment that represents 5% or more of total investments (excluding investments issued by or explicitly guaranteed by the U.S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments). The County has a policy in place to minimize the risk of loss resulting from over concentration of assets in specific maturity, specific issuer or specific class of securities.

II. DEPOSITS AND INVESTMENTS (concluded)

The County's deposits were not exposed to concentration of investment credit risk for the year end December 31, 2010 & 2009.

III. LONG-TERM DEBT

2003 Medical Center Bonds – The Component Unit of Phelps County – Phelps County Medical Center has a $40,000,000 bond that was entered into on 10/27/03. The County is only responsible for the bonds if the Medical Center would happen to default on them. The balance at 12/31/09 was $30,895,000.00 and the Balance at 12/31/10 was $29,160,000.00. Amortizations are not shown since these are the responsibility of the Medical Center.

The following are the descriptions and balances for the 2010 Capital Leases:

2010 CAPITAL LEASES

IV. INTERFUND TRANSFERS

Transfers between funds for the year ended December 31, 2010 and 2009 are as follows:

	2010		2009	
	Transfers In	Transfers Out	Transfers In	Transfers Out
MAJOR FUNDS				
General Fund	$ 10,000.00	$ 730,717.00	$ 10,000.00	$ 736,136.00
Special Road and Bridge Fund	-	50,000.00	137,000.00	187,000.00
Assessment Fund	75,000.00	-	75,000.00	-
Road & Bridge Debt Service	50,000.00	-	50,000.00	-
Unemployment Fund	-	10,000.00	-	10,000.00
Health Dept Fund	95,072.00	-	100,491.00	-
Law Enforcement Sales Tax Fund	560,645.00	-	560,645.00	10,000.00
Law Enforcement Bldg. Maint. Fund	-	-	10,000.00	-
TOTAL	**$ 790,717.00**	**$ 790,717.00**	**$ 943,136.00**	**$ 943,136.00**

Transfers are used to (1) move receipts from the fund that statute or budget requires to collect them to the fund that statute or budget requires to disburse them, and (2) use unrestricted receipts in the General Fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

V. COUNTY EMPLOYEES' RETIREMENT FUND (CERF)

The County Employees' Retirement Fund was established by the State of Missouri to provide pension benefits for County officials and employees.

A. Plan Description

The Retirement Fund is a mandatory cost-sharing multiple employer retirement system for each county in the state of Missouri, except any city not within a county (which excludes the City of St. Louis) and counties of the first classification with a charter form of government. CERF covers county elective or appointive officers or employees whose position requires actual performance of duties not less than 1,000 hours per calendar year; including employees of circuit courts located in a first class, non-charter county which is not participating in the Local Government Employees Retirement System (LAGERS); and does not cover circuit clerks, deputy circuit clerks, county prosecuting attorneys, and county sheriffs. Until January 1, 2000, employees hired before January 1, 2000 could opt out of the system. CERF is a defined benefit plan providing retirement and death benefits to its members.

V. COUNTY EMPLOYEES' RETIREMENT FUND (CERF) (continued)

B. Pension Benefits

All benefits vest after 8 years of creditable service. Employees who retire on or after 62 are entitled to an allowance for life based on the form of payment selected. The normal form of payment is a single life annuity. Optional Joint and survivor annuity and 10-year certain life annuity payments are also offered to members in order to provide benefits to a named survivor annuitant after their death. Employees who have a minimum of 8 years of creditable service may retire with an early retirement benefit and receive a reduced allowance after attaining age 55. Annual cost of living adjustments, not to exceed 1%, are provided for eligible retirees and survivor annuitants, up to a lifetime maximum of 50% of the initial benefit which the member received upon retirement. Benefit provisions are fixed by state statute and may be amended only by action of the Missouri Legislature. Administrative expenses for the operation of CERF are paid out of the funds of the system.

The County Employees' Retirement Fund issues audited financial statements. Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, P.O. Box 2271, 2121 Schotthill Road, Jefferson City, MO 65101, or by calling 1-573-632-9203.

C. Funding Policy

Prior to January 1, 2003, participating county employees, except for those who participated in LAGERS, were required to make contributions equal to 2% of gross compensation. Effective January 1, 2003, participating county employees hired on or after February 25, 2002 are required to make contributions of 4% if they are in a LAGERS county and contributions of 6% if they are in a non-LAGERS county. If an employee leaves covered employment before attaining 8 years of creditable service, accumulated employee contributions are refunded to the employee. The contribution rate is set by state statute and may be amended only by action of Missouri Legislature. During 2010 and 2009, the Primary Government collected and remitted to CERF, employee contributions of approximately $222,636.12 and $230,248.73, respectively, for the years then ended.

VI. LOCAL GOVERNMENT EMPLOYEES RETIREMENT SYSTEM (LAGERS)

A. Plan Description

Phelps County participates in the Missouri Local Government Employees Retirement System (LAGERS), an agent multiple-employer public employee retirement system that acts as a common investment and administrative agent for local government entities in Missouri. LAGERS is a defined benefit pension plan which provides retirement, disability, and death benefits to plan members and beneficiaries.

LAGERS was created and is governed by statute, section RSMO. 70.600 - 70.755. As such, it is the system's responsibility to administer the law in accordance with the expressed intent of the General Assembly. This plan is qualified under the Internal Revenue Code Section 401(a) and it is tax exempt.

VI. LOCAL GOVERNMENT EMPLOYEES RETIREMENT SYSTEM (LAGERS) (continued)

A. Plan Description

The Missouri Local Government Employees Retirement System issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to LAGERS, P.O. Box 1665, Jefferson City, MO 65102 or by calling 1-800-447-4334.

B. Funding Status

Phelps County's full time employees contribute 4% of their gross pay to the pension plan. The political subdivision is required by state statute to contribute at an actuarially determined rate; the current rate is 8.3% (general) and 6.8% (police) of annual covered payroll for 2010. The 2009 rate was 7.3 % (general) and 5.8% (police). The contribution requirements of plan members are determined by the governing body of the political subdivision. The contribution provisions of the political subdivision are established by state statute.

C. Annual Pension Cost

For 2010, the subdivision's annual pension cost and net pension obligation for the current year were as follows:

Annual required contribution	$	431,995
Interest on net pension obligation		-
Adjustment to annual required contribution		-
Annual pension cost		431,995
Actual contributions		369,788
Increase (decrease) in NPO		62,207
NPO beginning of year		-
NPO end of year	$	62,207

The annual required contribution (ARC) was determined as part of the February 29, 2008 and February 28, 2009 annual actuarial valuation using the entry age actuarial cost method. For 2009, the political subdivision's annual pension cost of $520,582 was equal to the required and actual contributions. The required contribution was determined as part of the February 28, 2007 and/or February 29, 2008 annual actuarial valuation using the entry age actuarial cost method. The actuarial assumptions included (a) a rate of return on the investment of present and future assets of 7.5 percent per year, compounded annually, (b) projected salary increases of 4.0 percent per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0 percent to 6.0 percent per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on RP-2000 Combined Healthy Table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on the 1971 Group Annuity Mortality Table for males projected to 2000 set back 1 year for men and 7 years for women.

VI. LOCAL GOVERNMENT EMPLOYEES RETIREMENT SYSTEM (LAGERS) (continued)

C. Annual Pension Cost (continued)

The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period as of February 29, 2008, was 15 years for the General division and 15 years for the Police division. The amortization period as of February 28, 2009, was 30 years for the General division and 30 years for the Police division. The amortization period at February 28, 2009, was 15 years.

2010 Three Year Trend Information

Fiscal Year Ending June 30	Annual Pension Cost (APC)	Percentage Of APC Contributed	Net Pension Obligation
2008	$ 302,820	100%	$ 0

VII. PROSECUTING ATTORNEY RETIREMENT FUND

In accordance with state statute Chapter 56.807 RSMo, the County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys and Circuit Attorney Retirement System Fund. Once remitted, the State of Missouri is responsible for administration of this plan. The County has settled litigation regarding these mandated contributions on April 13, 2010. A settlement amount of $25,840 was paid for January 1, 2007 through April 30, 2010 contributions ($646 for 40 months). The County has contributed $31,008 and $0, respectively, for the years ended December 31, 2010 and 2009.

VIII. POST EMPLOYMENT BENEFITS

The County does provide post-employment benefits including, as mandated, the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by the County. Retirees may remain on the health insurance plan until they are Medicare eligible. If an employee has over 25 years of service with the County, the County will continue to pay the same portion of health insurance that they paid before the person retired, until the person becomes Medicare eligible.

IX. CLAIMS COMMITMENTS AND CONTINGENCIES

A. Litigation

The County is involved in pending litigation at December 31, 2010, but believes that any claims against the county would be covered by their insurance carrier.

B. Compensated Absences

The County provides employees with up to four weeks of paid vacation based upon the number of years of continuous service. Upon termination from county employment, an employee is reimbursed for unused vacation and overtime, if applicable but not sick time. These have not been subjected to auditing procedures.

C. Federal and State Assisted Programs

The County has received proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned as not appropriate expenditures under the grant agreements. Such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds, if determined necessary, will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

X. RISK MANAGEMENT

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is a member participant in a public entity risk pool which is a corporate and political body created pursuant to state statute (Chapter 537.70 RSMo. 1986). The purpose of the risk pool is to provide liability protection to participating public entities, their officials, and employees. Annual contributions are collected based on actuarial projections to produce sufficient funds to pay losses and expenses. Should contributions not produce sufficient funds to meet its obligations, the risk pool is empowered with the ability to make special assessments. Members are jointly and severally liable for all claims against the risk pool.

X. RISK MANAGEMENT (concluded)

The County is also a member of the Missouri Association of Counties Self-Insured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this Fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The Fund is self-insured up to $450,000 per occurrence for 2010 and $400,000 per occurrence for 2009, it is then reinsured up to the statutory limit through excess insurance.

XI. ACCOUNTING CHANGE

For the years ended December 31, 2010 and December 31, 2009, the County has elected to change its accounting method from a modified cash basis to the regulatory basis of accounting. This basis recognizes assets, liabilities, fund balance, receipts, and disbursements when they result from cash transactions with a provision for investments and settlements pending (if applicable). The regulatory basis differs from the accounting principles generally accepted in the United States of America and is described in Note I of the notes to the financial statements.

XII. SUBSEQUENT EVENTS

The County is currently involved in two pending litigation suits. Amounts are not determinable at this time.

XIII. CHANGE IN FUND PRESENTATION

In April, 2010, the voters of Phelps County approved a sales tax issue for Phelps County 911. With passage of the ¼ cent sales tax, the statute places financial control of the 911 with the Phelps County Emergency Services Board. The initial Board was appointed by the Phelps County Commission. In April, 2011, the Board was elected by the voters of Phelps County. The telephone tariff was ended on December 31, 2010. All funds have been transferred to the Phelps County Emergency Services Board.

SUPPLEMENTARY SCHEDULES AND AUDITOR'S REPORT

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission
The County of Phelps, Missouri

We have audited the financial statements of the County of Phelps ("County"), Missouri, as of and for the years ended December 31, 2010 and December 31, 2009, and have issued our report thereon dated June 15, 2011. The financial statements were prepared using accounting practices prescribed or permitted by Missouri law, which differ from accounting principles generally accepted in the United States of America. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the County's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the County's internal control over financial reporting.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be deficiencies, significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above. However, we identified certain deficiencies in internal control over financial reporting, described in the accompanying schedule of findings and questioned costs that we consider to be significant deficiencies in internal control over financial reporting. (FS 10/09-01, FS 10/09-02, FS 10/09-03 and FS 10/09-04) A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the County's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

We noted certain matters that we reported to management of the County in a separate letter dated June 15, 2011.

The County's response to the findings identified in our audit is described in the accompanying schedule of findings and questioned costs. We did not audit the County's response and, accordingly, we express no opinion on it.

This report is intended solely for the information and use of the County Commission, County Officeholders, Missouri State Auditor, the Federal awarding agencies and pass-through entities and is not to be and should not be used by anyone other than those specified parties.

REPORT ON COMPLIANCE WITH REQUIREMENTS THAT COULD HAVE A DIRECT AND MATERIAL EFFECT ON EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE IN ACCORDANCE WITH OMB CIRCULAR A-133

Independent Auditor's Report

To The County Commission
The County of Phelps
Rolla, Missouri

Compliance

We have audited the County of Phelp's ("County") compliance with the types of compliance requirements described in the OMB *Circular A-133 Compliance Supplement* that could have a direct and material effect on each of the County's major federal programs for the years ended December 31, 2010 and December 31, 2009. The County's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts, and grants applicable to each of its major federal programs is the responsibility of the County's management. Our responsibility is to express an opinion on the County's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations.* Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the County's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination of the County's compliance with those requirements.

In our opinion, the County complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the years ended December 31, 2010 and December 31, 2009.

3510 JEFFCO BOULEVARD • SUITE 200 • ARNOLD, MISSOURI 63010-3999 • 636-464-1330 • FAX 636-464-3076

Internal Control Over Compliance

Management of the County is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audit, we considered the County's internal control over compliance with the requirements that could have a direct and material effect on a major federal program to determine the auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the County's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be deficiencies, significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over compliance that we consider to be *material weaknesses*, as defined above.

This report is intended solely for the information and use of management, the County Commission, County Officeholders, Missouri State Auditor, others within the entity, other auditing agencies, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

Total Expenditures of Federal Awards			**$ 3,290,683.00**	**$ 4,099,259.00**

NOTE 1 – BASIS OF PRESENTATION

A. Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of OMB Circular A-133. This circular requires a schedule that provides total federal awards expended for each major program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA information is not available.

The schedule includes all federal awards administered by Phelps County, Missouri.

B. Basis of Presentation

OMB Circular A-133 includes these definitions, which govern the contents of the schedule:

*Federal financial assistanc*e means assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals.

Federal award means Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from Federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants or contracts, used to buy goods or services from vendors.

Accordingly, the schedule includes expenditures of both cash and noncash awards.

C. Basis of Accounting

The schedule is presented on the regulatory basis of accounting, which recognizes amounts only when disbursed in cash.

NOTE 2 – SUBRECIPIENTS

Of the federal expenditures presented in the accompanying schedule of expenditures of federal awards, the County provided federal awards to subrecipients as follows:

Program Title	Subrecipient	Federal CFDA Number		Amount Provided to Subrecipient
ARRA-Homeless Prevention and Rapid Re-Housing, passed through the State and Department of Social Services	Meramec Community Enhancement Corporation	14.257	2010	$ 418,770.00
			2009	79,059.00
Secure our Schools Grant, passed through the State and Missouri Sheriff's Association	St. James R-1 School District	16.710	2010	143,856.00
	Total Provided to Subrecipients			$ 641,685.00

THE COUNTY OF PHELPS
ROLLA, MISSOURI
SCHEDULE OF FINDINGS AND QUESTIONED COSTS
YEARS ENDED DECEMBER 31, 2010 AND 2009

I. SUMMARY OF AUDITOR'S RESULTS

A. Financial Statements

1. Type of auditor's report issued: Unqualified - Regulatory Basis

2. Internal control over financial reporting:

a. Material weakness(es) identified?	2010 ___	Yes	X No
	2009 ___	Yes	X No
b. Significant deficiencies identified?	2010 X	Yes	___ None Reported
	2009 X	Yes	___ None Reported

3. Noncompliance material to financial statements noted?

	2010 ___	Yes	X No
	2009 ___	Yes	X No

B. Federal Awards

1. Internal control over major programs:

a. Material weakness(es) identified?	2010 ___	Yes	X No
	2009 ___	Yes	X No
b. Significant deficiencies identified?	2010 ___	Yes	X None Reported
	2009 ___	Yes	X None Reported

2. Type of auditor's report issued on compliance for major programs:

2010 - Unqualified

2009 - Unqualified

3. Any audit findings disclosed that are required to be reported in accordance with section 510 (a) of *Circular A-133*?

2010 ___	Yes	X No
2009 ___	Yes	X No

I. SUMMARY OF AUDITOR'S RESULTS (concluded)

B. Federal Awards (concluded)

4. Identification of major programs:

Year	CFDA Number(s)	Name of Federal Program or Cluster
2010/2009	10.557	Special Supplemental Nutrition Program for Women, Infants and Children (WIC)
2010/2009	14.257	ARRA – Homelessness Prevention and Rapid Re-Housing
2010/2009	15.226	PILT – Payment in Lieu of Taxes
2010/2009	16.XXX	Federal Marshall Prisoner Holding
2010/2009	16.XXX	Equitable Sharing of Seized and Forfeited Property
2009	16.804	ARRA – Recovery Act Justice Assistance Grant
2010/2009	97.036	Disaster Grant – Public Assistance Grant (Presidentially Declared Disasters)

5. Dollar threshold used to distinguish between type A and type B programs: $ 300,000

6. Auditee qualified as low-risk auditee? 2010 ___ Yes X No
2009 ___ Yes X No

II. FINANCIAL STATEMENT FINDINGS

10/09-01 Criteria: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, under Statement on Auditing Standards (SAS) No. 115, Communicating Internal Control Related Matters Identified in an Audit, which is effective for periods ending on or after December 15, 2009, conditions necessitating the entity's auditor to provide such assistance is at least indicative of a significant deficiency. SAS No. 115 supersedes SAS No. 112.

Condition: During the current year, auditors of the County assisted with the preparation of the financial statements and the notes to financial statements.

Context: During discussions with management, we noted that we will be assisting the County with the preparation of their audited financial statements and footnotes.

Effect: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, SAS 115 indicates that conditions necessitate the entity's auditor to provide such assistance is at least indicative of a significant deficiency in internal control over financial reporting.

Cause: Management did not prepare the financial statements or the notes to financial statements.

II. FINANCIAL STATEMENT FINDINGS (continued)

10/09-01 Recommendation: Due to the changing standards, the County may wish to consider alternatives available that would eliminate this situation.

Views of responsible officials and planned corrective actions: The County is currently complying with all state statutes relating to the preparation of the financial statements with the preparation of the County's annual budget document and annual Financial Statement. The County will pursue remedy for SAS 115 compliance if it is determined that it is required for a county of this size and whether this is an unfunded mandate. However, the Commission disagrees with the term "significant deficiency" and notes that in the "Report on Internal Control Over Financial Reporting and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards" which is a part of this audit, it was noted "we did not identify any deficiencies in internal control over financial reporting that we consider to be a material weakness" and "the results of our tests disclosed no instances of noncompliance that are required to be reported under Government Auditing Standards".

10/09-02 Criteria: Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During discussions with management, we noted that internal control documentation has not been prepared.

Effect: SAS 115 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of responsible officials and planned corrective actions: The County is currently complying with all state statutes relating to the preparation of the financial statements with the preparation of the County's annual budget document and annual Financial Statement. The County will pursue remedy for SAS 115 compliance if it is determined that it is required for a county of this size and whether this is an unfunded mandate. However, the Commission disagrees with the term "significant deficiency" and notes that in the "Report on Internal Control Over Financial Reporting and Other

II. FINANCIAL STATEMENT FINDINGS (continued)

10/09-02 Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards" which is a part of this audit, it was noted "we did not identify any deficiencies in internal control over financial reporting that we consider to be a material weakness" and "the results of our tests disclosed no instances of noncompliance that are required to be reported under Government Auditing Standards".

10/09-03 Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During our audit, we noted there is no formal fraud risk assessment in place.

Context: During discussions with management, we noted there were no formal fraud risk assessments implemented.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Views of responsible officials and planned corrective actions: The Commission will encourage all elected officials to review and document antifraud risk assessments.

10/09-04 Criteria: Sheriff's commissary account reconciliation does not provide supporting documentation.

Condition: During our audit, we noted that the reconciliation of the commissary account does not provide supporting documentation that ties to the reconciliation.

Context: Supporting documentation for the commissary reconciliations for December 31, 2010 and 2009 do not match the bank reconciliation.

Effect: Lack of proper reconciliation and monitoring of accounts may lead to errors that may not be found in a timely manner.

II. FINANCIAL STATEMENT FINDINGS (concluded)

10/09-04 Cause: The Sheriff's commissary account reconciliation does not have supporting documentation for its reconciliations.

Recommendation: We recommend that the Sheriff's office reconcile the commissary account on a monthly basis and monitor the reconciliations to be sure supporting documentation is provided to support the reconciliations. These reconciliations will ensure meaningful and accurate financial statements. Unreconciled differences that appear immaterial can obscure significant but offsetting items that would be a cause for investigation if the items were apparent.

Views of responsible officials and planned corrective actions: The Sheriff has implemented new controls for the commissary account effective March, 2011. The account will be reconciled on a monthly basis and the Jail Administrator will monitor the reconciliations to be sure that supporting documentation is provided.

III. FEDERAL AWARD FINDINGS AND QUESTIONED COSTS

There were no audit findings related to internal control, compliance, questioned costs, or fraud that related to federal awards for the years ended December 31, 2010 and 2009.

THE COUNTY OF PHELPS
ROLLA, MISSOURI
SUMMARY SCHEDULE OF PRIOR YEAR FINDINGS
YEARS ENDED DECEMBER 31, 2010 AND 2009

I. PRIOR YEAR FINANCIAL STATEMENT FINDINGS

FS 07/08-01 Criteria: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, under Statement on Auditing Standards (SAS) No. 112, Communicating Internal Control Related Matters in an Audit, which is effective for periods ending on or after December 15, 2007, conditions necessitating the entity's auditor to provide such assistance is at least indicative of a significant deficiency.

Status: It appears no corrective action plan has been implemented, therefore, this finding has been re-issued in the current year as FS 10/09-01.

FS 07/08-02 Criteria: Statement on Auditing Standards (SAS) No. 112, *Communicating Internal Control Related Matters in an Audit*, which is effective for period ending on or after December 15, 2007, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Status: It appears no corrective action plan has been implemented, therefore, this finding has been re-issued in the current year as FS 10/09-02.

FS 07/08-03 Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Status: It appears no corrective action plan has been implemented, therefore, this finding has been re-issued in the current year as FS 10/09-03.

FS 09-01 Criteria: During our fieldwork we were informed that the Prosecuting Attorney's office did not prepare bank reconciliations on a regular basis between February 2009 and June 2009.

Status: It appears this finding has been resolved in the current year.

II. PRIOR YEAR FEDERAL AWARD FINDINGS

SA 07/08-01 The schedule of expenditures of federal awards contained errors.

Status: It appears this finding has been resolved in the current year.

Daniel Jones
& Associates
CERTIFIED PUBLIC ACCOUNTANTS

MEMBERS OF
MISSOURI SOCIETY OF CPA'S
AMERICAN INSTITUTE OF CPA'S

To the County Commissioners
Phelps County, Missouri

In planning and performing our audit of the financial statements of the County of Phelps ("County") as of and for the years ended December 31, 2010 and 2009, in accordance with auditing standards generally accepted in the United States of America, we considered the County's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control. Accordingly, we do not express an opinion on the effectiveness of the County's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be significant deficiencies or material weaknesses and therefore there can be no assurance that all such deficiencies have been identified. In addition, because of inherent limitations in internal control, including the possibility of management override of controls, misstatements due to error or fraud may occur and not be detected by such controls. However, as discussed below, we identified certain deficiencies in internal control that we consider to be significant deficiencies.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the deficiencies in the County's internal control listed below to be significant deficiencies.

Our comments concerning internal control and other significant matters are presented as follows:

I. Deficiencies Considered to be Significant
II. Changes Impacting Governmental Entities
III. Information Required by Professional Standards

Phelps County's management has provided written responses to the comments in this report that were identified in our audit. These responses have not been subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on them.

This communication is intended solely for the information and use of management, County Commissioners, and others within the County, and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Daniel Jones & Associates

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT

10/09-01 Criteria: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, under Statement on Auditing Standards (SAS) No. 115, Communicating Internal Control Related Matters Identified in an Audit, which is effective for periods ending on or after December 15, 2009, conditions necessitating the entity's auditor to provide such assistance is at least indicative of a significant deficiency. SAS No. 115 supersedes SAS No. 112.

Condition: During the current year, auditors of the County assisted with the preparation of the financial statements and the notes to financial statements.

Context: During discussions with management, we noted that we will be assisting the County with the preparation of their audited financial statements and footnotes.

Effect: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, SAS 115 indicates that conditions necessitate the entity's auditor to provide such assistance is at least indicative of a significant deficiency in internal control over financial reporting.

Cause: Management did not prepare the financial statements or the notes to financial statements.

Recommendation: Due to the changing standards, the County may wish to consider alternatives available that would eliminate this situation.

Views of responsible officials and planned corrective actions: The County is currently complying with all state statutes relating to the preparation of the financial statements with the preparation of the County's annual budget document and annual Financial Statement. The County will pursue remedy for SAS 115 compliance if it is determined that it is required for a county of this size and whether this is an unfunded mandate. However, the Commission disagrees with the term "significant deficiency" and notes that in the "Report on Internal Control Over Financial Reporting and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards" which is a part of this audit, it was noted "we did not identify any deficiencies in internal control over financial reporting that we consider to be a material weakness" and "the results of our tests disclosed no instances of noncompliance that are required to be reported under Government Auditing Standards".

10/09-02 Criteria: Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During discussions with management, we noted that internal control documentation has not been prepared.

Effect: SAS 115 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT (continued)

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of responsible officials and planned corrective actions: The County is currently complying with all state statutes relating to the preparation of the financial statements with the preparation of the County's annual budget document and annual Financial Statement. The County will pursue remedy for SAS 115 compliance if it is determined that it is required for a county of this size and whether this is an unfunded mandate. However, the Commission disagrees with the term "significant deficiency" and notes that in the "Report on Internal Control Over Financial Reporting and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards" which is a part of this audit, it was noted "we did not identify any deficiencies in internal control over financial reporting that we consider to be a material weakness" and "the results of our tests disclosed no instances of noncompliance that are required to be reported under Government Auditing Standards".

10/09-03 Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During our audit, we noted there is no formal fraud risk assessment in place.

Context: During discussions with management, we noted there were no formal fraud risk assessments implemented.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Views of responsible officials and planned corrective actions: The Commission will encourage all elected officials to review and document antifraud risk assessments.

10/09-04 Criteria: Sheriff's commissary account reconciliation does not provide supporting documentation.

Condition: During our audit, we noted that the reconciliation of the commissary account does not provide supporting documentation that ties to the reconciliation.

Context: Supporting documentation for the commissary reconciliations for December 31, 2010 and 2009 do not match the bank reconciliation.

Effect: Lack of proper reconciliation and monitoring of accounts may lead to errors that may not be found in a timely manner.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT (concluded)

Cause: The Sheriff's commissary account reconciliation does not have supporting documentation for its reconciliations.

Recommendation: We recommend that the Sheriff's office reconcile the commissary account on a monthly basis and monitor the reconciliations to be sure supporting documentation is provided to support the reconciliations. These reconciliations will ensure meaningful and accurate financial statements. Unreconciled differences that appear immaterial can obscure significant but offsetting items that would be a cause for investigation if the items were apparent.

Views of responsible officials and planned corrective actions: The Sheriff has implemented new controls for the commissary account effective March, 2011. The account will be reconciled on a monthly basis and the Jail Administrator will monitor the reconciliations to be sure that supporting documentation is provided.

II. CHANGES IMPACTING GOVERNMENTAL ENTITIES

a. SAS 115, *Communicating Internal Control Related Matters Identified in an Audit*, is effective for periods ending on or after December 15, 2009 and supersedes SAS No. 112. This standard defines the terms *deficiency in internal control, significant deficiency*, and *material weakness*. It provides guidance on evaluating the severity of deficiencies in internal control identified in an audit of financial statements.

b. SAS 117, *Compliance Audits*, which supersedes SAS No. 74, is effective for compliance audits for periods ending on or after June 15, 2010. This SAS identifies the AU sections that are not applicable to a compliance audit, defines terms related to compliance audits and used in the SAS, and identifies the elements to be included in an auditor's report on a compliance audit. It reflects changes in the compliance audit environment and incorporates the risk assessment standards.

c. SAS 118, *Other Information in Documents Containing Audited Financial Statements*, is effective for audits of financial statements for periods beginning on or after December 15, 2010. This section addresses the auditor's responsibility in relation to other information in documents containing audited financial statements and the auditor's report thereon.

d. SAS 119, *Supplementary Information in Relation to the Financial Statements as a Whole*, is effective for audits of financial statements for periods beginning on or after December 15, 2010. This section addresses the auditor's responsibility when engaged to report on whether supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole.

III. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS

Our Responsibilities under U.S. Generally Accepted Auditing Standards and *OMB Circular A-133*

Professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards, *Government Auditing Standards* and OMB Circular A-133, as well as certain information related to the planned scope and timing of our audit. We have communicated such information in our letter to you dated February 28, 2011. Professional standards also require that we communicate to you the following information related to our audit.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the County are described in Note I to the financial statements. The County adopted the regulatory basis of accounting to report its financial statements for the years ended December 31, 2010 and 2009. We noted no transactions entered into by the County during the years for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

III. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS (Concluded)

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. In addition, none of the misstatements detected as a result of audit procedures and corrected by management were material, either individually or in the aggregate, to the financial statements taken as a whole.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated June 15, 2011.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the governmental unit's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the governmental unit's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Stone County, Missouri

The Office of the State Auditor is responsible under Section 29.230, RSMo, for auditing certain operations of Stone County, and issues a separate report on that audit. In addition, in cooperation with the county, the Office of the State Auditor has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2010, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Daniel Jones & Associates, Certified Public Accountants, is attached.

INDEPENDENT AUDITOR'S REPORT

To the County Commission
The County of Stone, Missouri

We have audited the accompanying financial statements of the County of Stone ("County"), Missouri, as of and for the years ended December 31, 2010 and 2009, which collectively comprise the County's financial statements as listed in the table of contents. These financial statements are the responsibility of the County's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards,* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described more fully in Note I, these financial statements were prepared using accounting practices prescribed or permitted by Missouri law, which practices differ from accounting principles generally accepted in the United States of America. The effects on the financial statements of the variances between these regulatory accounting practices and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

In our opinion, because of the effects of the matter discussed in the preceding paragraph, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of the County of Stone, Missouri, as of December 31, 2010 and 2009, or the changes in its financial position for the years then ended.

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash and investment balances of the governmental and agency funds of the County of Stone, Missouri, as of December 31, 2010 and 2009, and the receipts, disbursements and budgetary results of the governmental funds for the years then ended, on the basis of accounting described in Note I.

As described in Note XI, the County of Stone has converted from a modified cash (GASB 34) basis of accounting to the regulatory basis of accounting which differs from accounting principles generally accepted in the United States of America, as of and for the years ended December 31, 2010 and December 31, 2009.

In accordance with *Government Auditing Standards*, we have also issued our report dated July 22, 2011 on our consideration of the County's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

Our audit was conducted for the purpose of forming an opinion on the financial statements, taken as a whole that are referred to in the first paragraph. The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by the U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profits Organizations*, and is not a required part of the financial statements. Such information has been subjected to the auditing procedures applied in the audit of the financial statements and, in our opinion, is fairly stated in all material respects in relation to the financial statements taken as a whole, that were prepared on the basis of accounting described in Note I.

The accompanying notes to the financial statements are an integral part of this statement.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The County of Stone, Missouri ("County"), which is governed by a three-member board of commissioners, was established in 1845 by an Act of the Missouri Territory. In addition to the three Commissioners, there are nine elected Constitutional Officers: County Clerk, Collector, Treasurer, Circuit Clerk and ex officio Recorder of Deeds, Sheriff, Assessor, Coroner, Public Administrator and Prosecuting Attorney.

As discussed further in Note I, these financial statements are presented on the regulatory basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP).

A. Reporting Entity

As required by generally accepted accounting principles, as applicable to the regulatory basis of accounting, these financial statements present financial accountability of the County.

The County's operations include tax assessments and collections, state/county courts, county recorder, public safety, transportation, economic development, and social and recreation services.

The financial statements referred to above include only the primary government of Stone County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that comprise the County's legal entity.

B. Basis of Presentation

The financial statements are presented using accounting practices prescribed or permitted by Missouri law, which include a Statement of Receipts, Disbursements and Changes in Cash and Investment Balances – All Governmental Funds, a Comparative Statement of Receipts and Disbursements – Budget and Actual – All Governmental Funds, and a Statement of Assets and Liabilities Arising from Cash Transactions – Agency Funds.

Governmental resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled. A fund is considered a separate accounting entity with self-balancing accounts. The following fund types are used by the County:

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

B. Basis of Presentation (concluded)

Governmental Fund Types

Governmental funds are those through which most governmental functions are financed. The County's expendable financial resources are accounted for through governmental funds. The measurement focus is upon determination of and changes in financial position rather than upon net income.

Fiduciary Fund Types

Agency – Agency funds are used to account for assets held by the County in a trustee capacity as an agent of individuals, private organizations, other funds or other governmental units. Agency funds are accounted for and reported similar to the governmental funds. Agency funds are custodial in nature (assets equal liabilities) and do not involve the measurement of results of operations. These funds account for activities of collections for other taxing units by the Collector of Revenue and other officeholders.

C. Basis of Accounting

Basis of accounting determines when transactions are recorded in the financial records and reported on the financial statements.

The financial statements are prepared on the regulatory basis of accounting. This basis of accounting recognizes amounts when received or disbursed in cash and differs from accounting principles generally accepted in the United States of America. Those principles require revenues to be recognized when they become available and measurable or when they are earned, and expenditures or expenses to be recognized when the related liabilities are incurred.

As a result of the use of this regulatory basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

D. Budget and Budgetary Accounting

The County follows these procedures in establishing the budgetary data reflected in the financial statements:

1. In accordance with Chapter 50 RSMo, the County adopts a budget for each governmental fund.

2. On or before January 15th, each elected officer and department director will transmit to the County Clerk, who serves as budget officer, the budget request and revenue estimates for their office or department for the budget year.

3. The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning the following January 1. The proposed budget included estimated revenues and proposed expenditures for all budgeted funds. Budgeted expenditures cannot exceed beginning available monies plus estimated revenues for the year. Budgeting of appropriations is based upon an estimated unencumbered fund balance at the beginning of the year as well as estimated revenues to be received. The budget to actual comparisons in these financial statements, however, do not present encumbered fund balances, but only compare budgeted and actual revenues and expenditures.

4. A public hearing is conducted to obtain public comment. Prior to its approval by the County Commission, the budget document is available for public inspection.

5. Prior to February 1, the budget is legally enacted by a vote of the County Commission.

6. Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget information in the financial statements.

   Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year. Individual amendments were not material in relation to the original appropriations which were adopted.

7. Budgets are prepared and adopted on the cash basis of accounting.

   State law requires that budgeted expenditures not exceed budgeted revenues plus anticipated beginning fund balance. Section 50.740 RSMo prohibits expenditures in excess of the approved budgets.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

E. Property Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1, of the following year.

The assessed valuation of the tangible taxable property, included within the County's boundaries for the calendar year 2010 and 2009, for purposes of taxation was:

	2010	2009
Real Estate	$ 411,721,151	$ 405,671,220
Personal Property	103,309,272	104,707,014
Railroad and Utilities	11,127,808	11,206,251
	$ 526,158,231	$ 521,584,485

During 2010 and 2009, the County Commission approved a $.1300 and $.1300, respectively, tax levy per $100 of assessed valuation of tangible taxable property for the calendar year 2010 and 2009, for purposes of County taxation, as follows:

	2010	2009
General Revenue Fund	$ .1300	$ .1300

F. Cash and Investments

The County pools cash and investment resources of various funds in the County Treasurer's office in order to facilitate the management of cash and investments. Cash and investments applicable to a particular fund are readily identifiable. Some County offices also hold cash and investments in their own separate bank accounts as required by state statute. The balance in the pooled cash account is available to meet current operating requirements.

G. Interfund Transactions

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables, if applicable, are eliminated due to reporting the financial statements on the regulatory basis of accounting.

Legally required transfers are reported as "transfers in" by the recipient fund and as "transfers out" by the disbursing fund.

II. CASH AND INVESTMENTS

The County maintains a cash and temporary investment pool that is available for use by all funds. Each fund type's portion of this pool is displayed as "Cash and Equivalents" under each fund's caption. Deposits with maturities greater than three months are considered investments. In addition, cash and investments are separately held by several of the County's funds. Investments of the County consist of certificates of deposit with local banking institutions.

Deposits - Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. At December 31, 2010 and 2009, the carrying amount of the County's deposits was $4,272,131.95 and $3,237,874.23, and the bank balance was $18,960,217.44 and $17,779,433.04, respectively. As of December 31, 2010 and 2009, 100% of the County's investments were guaranteed by the U.S. Government.

SUMMARY OF CARRYING VALUES

The carrying values of deposits and investments shown above are included in the financial statements at December 31, 2010, as follows:

Included in the following fund financial statement captions:

Statement of Receipts, Disbursements and Changes in Cash and Investment Balances -		
Deposits	$	4,015,330.88
Investments		256,801.07
Total Deposits & Investments as of December 31, 2010	$	4,272,131.95

The carrying values of deposits and investments at December 31, 2009, are as follows:

Included in the following fund financial statement captions:

Statement of Receipts, Disbursements and Changes in Cash and Investment Balances -		
Deposits	$	2,325,248.77
Investments		912,625.46
Total Deposits & Investments as of December 31, 2009	$	3,237,874.23

Custodial Credit Risk – Deposits

For a deposit, custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. The County's investment policy provides the statutory safeguards and standards for the County's investments in accordance with Sections 110.010, 110.020 and 110.060. The County and its depository bank comply with the statutes. The County's deposits were not exposed to custodial credit risk for the years ended December 31, 2010 & 2009.

II. DEPOSITS AND INVESTMENTS (concluded)

Custodial Credit Risk – Investments

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by the party who sold the security to the County or its agent but not in the government's name. The County does not have a policy for custodial credit risk relating to investments. All investments, evidenced by individual securities, are registered in the name of the County or of a type that are not exposed to custodial credit risk.

Investment Interest Rate Risk

Investment interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The County does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Concentration of Investment Credit Risk

Concentration of credit risk is required to be disclosed by the County for any single investment that represents 5% or more of total investments (excluding investments issued by or explicitly guaranteed by the U.S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments). The County has no policy in place to minimize the risk of loss resulting from over concentration of assets in specific maturity, specific issuer or specific class of securities. The County's investments were not exposed to concentration of investment credit risk for the year end December 31, 2010 & 2009.

III. LONG-TERM DEBT

The County has $3,655,000 Stone County Certificates of Participation Series 1998 (Stone County, Missouri Law Enforcement Center Improvement Project) dated July 1, 1998. Principal Payments are due on December 1 annually and interest payments are due June 1 and December 1 semi-annually with annual interest rates varying from 4.25% to 5.00%. Refinanced as COPS 2009 during the 2009 year.

Balance – December 31, 2008	$ 2,155,000
Additions	-
Payments	(2,155,000)
Balance – December 31, 2009	$ -

The County issued $3,690,000 as Refunding Certificates of Participation Series 2009 for the purpose of refinancing COPS 1998 in the amount of $2,155,000 and NID 2000 in the amount of $1,710,000. Principal payments are due on December 1 annually and interest payments are due June 1 and December 1 semi-annually with annual interest rates varying from 3.00% to 4.10%.

Balance – December 31, 2010	$	4,992

V. INTERFUND TRANSFERS

Transfers between funds for the year ended December 31, 2010 and 2009 are as follows:

	2010		2009	
	Transfers In	Transfers Out	Transfers In	Transfers Out
MAJOR FUNDS				
General Fund	$ 8,466.81	$ 252,313.58	$ 10,649.16	$ 408,993.51
Special R&B Fund	538,896.32	-	602,669.04	-
Assessment Fund	144,668.00	-	75,000.00	-
Election Grant Fund	-	-	13.00	-
LE Block Grant Fund	33,358.00	-	-	-
Capital Improv. Fund	-	-	220,000.00	-
LETF	-	-	1,749.00	-
Inmate Security Fund	288.45	-	735.00	-
Sheriff's Revolving Fund	-	-	-	2,484.00
Election Services Fund	-	-	-	13.00
D.A.R.E.	1,000.00	-	2,000.00	-
LE – Civil Fees Fund	-	1,288.45	-	2,000.00
Agency Funds	74,287.58	547,363.13	113,993.51	613,318.20
TOTAL	$ 800,965.16	$ 800,965.16	$ 1,026,808.71	$ 1,026,808.71

Transfers are used to (1) move receipts from the fund that statute or budget requires to collect them to the fund that statute or budget requires to disburse them, and (2) use unrestricted receipts in the General Fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

VI. COUNTY EMPLOYEES' RETIREMENT FUND (CERF)

A. Plan Description

CERF was established by an act of the Missouri General Assembly effective August 28, 1994. Laws governing the retirement fund are found in Sections 50.1000-50.1300 of the Missouri Revised Statutes (RSMo). The Board of Directors consists of eleven members, nine of whom are county employee participants. Two members, who have no beneficiary interest in CERF, are appointed by the Governor of Missouri. The Board of Directors has the authority to adopt rules and regulations for administering the system.

CERF is a mandatory cost-sharing multiple employer retirement system for each county in the state of Missouri, except any city not within a county (which excludes the City of St. Louis) and counties of the first classification with a charter form of government.

VI. COUNTY EMPLOYEES' RETIREMENT FUND (CERF) (concluded)

A. Plan Description (concluded)

CERF covers county elective or appointive officers or employees whose position requires the actual performance of duties not less than 1,000 hours per year; including employees of circuit courts located in a first class, non-charter county which is not participating in the Local Government Employees Retirement System (LAGERS); and does not cover circuit clerks, deputy circuit clerks, county prosecuting attorneys, and county sheriffs. Until January 1, 2000, employees hired before January 1, 2000 could opt out of the system.

CERF is a defined benefit plan providing retirement and death benefits to its members. All benefits vest after 8 years of creditable service. Employees who retire on or after age 62 are entitled to an allowance for life based on the form of payment selected. The normal form of payment is a single life annuity. Optional joint and survivor annuity and 10-year certain and life annuity payments are also offered to members in order to provide benefits to a named survivor annuitant after their death. Employees who have a minimum of 8 years of creditable service may retire with an early retirement benefit and receive a reduced allowance after attaining age 55. Annual cost-of-living adjustments, not to exceed 1%, are provided for eligible retirees and survivor annuitants, up to a lifetime maximum of 50% of the initial benefit which the member received upon retirement. Benefit provisions are fixed by state statute and may be amended only by action of the Missouri Legislature. Administrative expenses for the operation of CERF are paid out of the funds of the system.

The County Employees' Retirement Fund issues audited financial statements. Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, P.O. Box 2271, Jefferson City, MO 65102-2271, or by calling 1-573-632-9203.

B. Contributions

Prior to January 1, 2003, participating county employees, except for those who participated in LAGERS, were required to make contributions equal to 2% of gross compensation. Effective January 1, 2003, in addition to the prior contributions requirements, participating county employees hired on or after February 25, 2002 are required to make contributions of 4% if they are in a LAGERS county and contributions of 6% if they are in a non-LAGERS county. If an employee leaves covered employment before attaining 8 years of creditable service, accumulated employee contributions are refunded to the employee. The contribution rate is set by state statute and may be amended only by action of the Missouri Legislature. During 2010 and 2009, the County collected and remitted to CERF, employee contributions of approximately for $177,941.32 and $178,570.27, respectively, for the years then ended.

VII. OTHER RETIREMENT PLAN

Stone County does not participate in the Missouri Local Government Employees' Retirement System. Contributions to a voluntary plan are paid by a voluntary deduction from employees' salary. These contributions qualify under the Internal Revenue Code and are tax exempt. These contributions are then remitted to Great West who administers the 401a Plan and 457 Plan. Employee contributions were $108,539.52 and $110,755.96 for the 2010 and 2009, respectively.

VIII. POST EMPLOYMENT BENEFITS

The County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by the County. The County had one Cobra participant at December 31, 2010 and 2009.

IX. PROSECUTING ATTORNEY RETIREMENT FUND

In accordance with state statute Chapter 56.807 RSMo, the County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys and Circuit Attorney Retirement System Fund. Once remitted, the State of Missouri is responsible for administration of this plan. The County has contributed $7,752 and $7,752, respectively, for the years ended December 31, 2010 and 2009.

X. CLAIMS COMMITMENTS AND CONTINGENCIES

A. Litigation

The County is involved in pending litigation at December 31, 2010.

B. Compensated Absences

The County provides employees with up to four weeks of paid vacation based upon the number of years of continuous service. Vacation days do not carry forward if they are unused. Upon termination, an employee is reimbursed for any unused vacation days. Employees accrue on sick day per month. The County allows employees to carry forward six days a year to a maximum of thirty days. These have not been subjected to auditing procedures.

C. Federal and State Assisted Programs

The County has received proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned as inappropriate expenditures under the grant agreements. Such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds, if determined necessary, will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

XI. RISK MANAGEMENT

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. Insurance is obtained from commercial insurance companies. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County purchases workers' compensation and employers' liability insurance and is insured up to $1,000,000 per occurrence. The County's general liability insurance is insured up to $2,000,000 per occurrence.

XII. ACCOUNTING CHANGE

For the years ended December 31, 2010 and December 31, 2009, the County has elected to change its accounting method from a modified cash basis to the regulatory basis of accounting. This basis recognizes assets, liabilities, fund balance, receipts, and disbursements when they result from cash transactions with a provision for investments and settlements pending (if applicable). The regulatory basis differs from the accounting principles generally accepted in the United States of America and is described in Note I of the notes to the financial statements.

XIII. SUBSEQUENT EVENTS

There are no subsequent events to report up to the date of the audit report.

XIV. FUTURE REPORTING CHANGE

The Stone County Emergency Services Board is a separate political subdivision and functions under Section 190.339.2. Effective August 28, 2010, it is no longer reported under the County. Due to the effective date, the Emergency Services Board is included with the County for the year ended 2010 but will no longer be reported under the County in future audits.

SUPPLEMENTARY INFORMATION

STATE COMPLIANCE SECTION

SCHEDULE OF STATE FINDINGS

A. For the year ended December 31, 2009, expenditures exceeded those budgeted for the following: special roads project, capital improvements, law enforcement training, sheriff's revolving, election services, PA delinquent tax, D.A.R.E., law enforcement – civil fees and the PA bad check funds.

B. For the year ended December 31, 2010, expenditures exceeded those budgeted for the following: LE block grant, insurance claims proceeds, inmate security, election services, PA delinquent tax, D.A.R.E., law enforcement – civil fees and PA bad check funds.

C. For the year ended December 31, 2009, revenue was not budgeted for the following fund: D.A.R.E. fund.

D. For the year ended December 31, 2010, revenue was not budgeted for the following funds: PA delinquent tax and PA bad check funds.

E. For the year ended December 31, 2009, expenditures were not budgeted for the following funds: D.A.R.E., PA delinquent tax, law enforcement – civil fees and PA bad check funds.

F. For the year ended December 31, 2010, expenditures were not budgeted for the following funds: D.A.R.E., PA delinquent tax, law enforcement – civil fees and PA bad check funds.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission
The County of Stone, Missouri

We have audited the financial statements of the County of Stone ("County"), Missouri, as of and for the years ended December 31, 2010 and 2009, and have issued our report thereon dated July 22, 2011. The financial statements were prepared using accounting practices prescribed or permitted by Missouri law, which differ from accounting principles generally accepted in the United States of America. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the County's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the County's internal control over financial reporting.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be deficiencies, significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above. However, we identified certain deficiencies in internal control over financial reporting, described in the accompanying schedule of findings and questioned costs that we consider to be significant deficiencies in internal control over financial reporting. (FS 10/09-01, FS 10/09-02, FS 10/09-03, FS 10/09-04, FS 10/09-05, FS 10/09-06, FS 10/09-07 and SA 10/09-01) A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the County's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

We noted certain matters that we reported to management of the County in a separate letter dated July 22, 2011.

The County's responses to the findings identified in our audit are described in the accompanying schedule of findings and questioned costs. We did not audit the County's responses and, accordingly, we express no opinion on them.

This report is intended solely for the information and use of the County Commission, County Officeholders, Missouri State Auditor, the Federal awarding agencies and pass-through entities and is not to be and should not be used by anyone other than those specified parties.

REPORT ON COMPLIANCE WITH REQUIREMENTS THAT COULD HAVE A DIRECT AND MATERIAL EFFECT ON EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE IN ACCORDANCE WITH OMB CIRCULAR A-133

Independent Auditor's Report

To The County Commission
The County of Stone
Galena, Missouri

Compliance

We have audited the County of Stone's ("County") compliance with the types of compliance requirements described in the OMB *Circular A-133 Compliance Supplement* that could have a direct and material effect on each of the County's major federal programs for the years ended December 31, 2010 and December 31, 2009. The County's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts, and grants applicable to each of its major federal programs is the responsibility of the County's management. Our responsibility is to express an opinion on the County's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations.* Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the County's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination of the County's compliance with those requirements.

In our opinion, the County complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the years ended December 31, 2010 and December 31, 2009. However, the results of our auditing procedures disclosed instances of noncompliance with those requirements, which are required to be reported in accordance with OMB Circular A-133 and which are described in the accompanying schedule of findings and questioned costs as items SA10/09-02 and SA10/09-03.

3510 JEFFCO BOULEVARD • SUITE 200 • ARNOLD, MISSOURI 63010-3999 • 636-464-1330 • FAX 636-464-3076

Internal Control Over Compliance

Management of the County is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audit, we considered the County's internal control over compliance with the requirements that could have a direct and material effect on a major federal program to determine the auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the County's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be deficiencies, significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above. However, we identified a certain deficiency in internal control over compliance that we consider to be a significant deficiency as described in the accompanying schedule of findings and questioned costs as item SA 10/09-01. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Management's responses to the findings identified in our audit are described in the accompanying schedule of findings and questioned costs. We did not audit management's responses and, accordingly, we express no opinion on the responses.

This report is intended solely for the information and use of management, the County Commission, County Officeholders, Missouri State Auditor, others within the entity, other auditing agencies, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

TOTAL EXPENDITURES OF FEDERAL AWARDS			$ 1,079,696.42	$ 1,538,195.43

NOTE 1 – BASIS OF PRESENTATION

A. Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of OMB Circular A-133. This circular requires a schedule that provides total federal awards expended for each major program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA information is not available.

The schedule includes all federal awards administered by Stone County, Missouri.

B. Basis of Presentation

OMB Circular A-133 includes these definitions, which govern the contents of the schedule:

*Federal financial assistanc*e means assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals.

Federal award means Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from Federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants or contracts, used to buy goods or services from vendors.

Accordingly, the schedule includes expenditures of both cash and noncash awards.

C. Basis of Accounting

The schedule is presented on the regulatory basis of accounting, which recognizes amounts only when disbursed in cash.

NOTE 2 – SUBRECIPIENTS

The County provided federal awards to the following subrecipients during the years ended December 31, 2010 and 2009:

Subrecipients	Program	CFDA #	2010	2009
Reeds Spring R-4 School District	Dept. of Defense - PILT	12.112	$ 80,998.06	$ 90,399.62
Blue Eye R-5 School District	Dept. of Defense - PILT	12.112	$ 37,612.06	$ 41,977.75
Shell Knob #78 School District	Dept. of Defense - PILT	12.112	$ 5,673.31	$ 6,331.82
Galena R-2 School District	Dept. of Defense - PILT	12.112	$ 426.48	$ 475.98
Total			$ 124,709.91	$ 139,185.17

THE COUNTY OF STONE
GALENA, MISSOURI
SCHEDULE OF FINDINGS AND QUESTIONED COSTS
YEARS ENDED DECEMBER 31, 2010 AND 2009

I. SUMMARY OF AUDITOR'S RESULTS

A. Financial Statements

1. Type of auditor's report issued: Unqualified - Regulatory Basis

2. Internal control over financial reporting:

a. Material weakness(es) identified?	2010	___ Yes	_X_ No	
	2009	___ Yes	_X_ No	
b. Significant deficiencies identified?	2010	_X_ Yes	___ None Reported	
	2009	_X_ Yes	___ None Reported	

3. Noncompliance material to financial statements noted?

2010	___ Yes	_X_ No	
2009	___ Yes	_X_ No	

B. Federal Awards

1. Internal control over major programs:

a. Material weakness(es) identified?	2010	___ Yes	_X_ No	
	2009	___ Yes	_X_ No	
b. Significant deficiencies identified?	2010	_X_ Yes	___ None Reported	
	2009	_X_ Yes	___ None Reported	

2. Type of auditor's report issued on compliance for major programs:

2010 - Unqualified – Regulatory Basis

2009 - Unqualified – Regulatory Basis

3. Any audit findings disclosed that are required to be reported in accordance with section 510 (a) of *Circular A-133*?

2010	_X_ Yes	___ No	
2009	_X_ Yes	___ No	

I. SUMMARY OF AUDITOR'S RESULTS (concluded)

B. Federal Awards (concluded)

4. Identification of major programs:

Year	CFDA Number(s)	Name of Federal Program or Cluster
2010/2009	12.112	Department of Defense – PILT (Payment in Lieu of Taxes)
2010/2009	20.205	Department of Transportation – Highway Planning and Construction

5. Dollar threshold used to distinguish between type A and type B programs: $ 300,000

6. Auditee qualified as low-risk auditee? 2010 ___ Yes X No
2009 ___ Yes X No

II. FINANCIAL STATEMENT FINDINGS

10/09-01

Criteria: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, under Statement on Auditing Standards (SAS) No. 115, Communicating Internal Control Related Matters Identified in an Audit, which is effective for periods ending on or after December 15, 2009, conditions necessitating the entity's auditor to provide such assistance is at least indicative of a significant deficiency. SAS No. 115 supersedes SAS No. 112.

Condition: During the current year, auditors of the County assisted with the preparation of the financial statements and the notes to financial statements.

Context: During discussions with management, we noted that we will be assisting the County with the preparation of their audited financial statements and footnotes.

Effect: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, SAS 115 indicates that conditions necessitate the entity's auditor to provide such assistance is at least indicative of a significant deficiency in internal control over financial reporting.

Cause: Management did not prepare the financial statements or the notes to financial statements.

Recommendation: Due to the changing standards, the County may wish to consider alternatives available that would eliminate this situation.

Views of responsible officials and planned corrective actions: The County is currently complying with all state statutes relating to the preparation of the financial statements with the preparation of the County's annual budget document and annual Financial Statement. The County will pursue remedy for SAS 115 compliance if it is determined that it is required for a county of this size.

II. FINANCIAL STATEMENT FINDINGS (continued)

10/09-02

Criteria: Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During discussions with management, we noted that internal control documentation has not been prepared.

Effect: SAS 115 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of responsible officials and planned corrective actions: The County is currently complying with all state statutes relating to the preparation of the financial statements with the preparation of the County's annual budget document and annual Financial Statement. Each official has their own internal controls within their office.

10/09-03

Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During our audit, we noted there is no formal fraud risk assessment in place.

Context: During discussions with management, we noted there were no formal fraud risk assessments implemented.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

II. FINANCIAL STATEMENT FINDINGS (continued)

10/09-03 Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Views of responsible officials and planned corrective actions: The Commission will encourage all elected officials to review and document antifraud risk assessments.

10/09-04 Criteria: The Treasurer's reconciliation did not account for held checks by the accounts payable clerk in the County Clerk's office at December 31, 2010 for AFLAC and Allstate checks.

Condition: During our audit, we noted that the accounts payable clerk held checks written in December 2010 and were not mailed until January 2011.

Context: The bank reconciliation did not include held checks at December 2010.

Effect: Lack of proper reconciliation may lead to improper book balances.

Cause: The Treasurer's account reconciliation did not include held checks by the accounts payable clerk in the County Clerk's office at December 31, 2010.

Recommendation: We recommend that the Treasurer's office include any held checks in future reconciliations or the County Clerk not cut checks until payment is ready to be mailed. This process will ensure more accurate book balances.

Views of responsible officials and planned corrective actions: The County Clerk will work on implementing procedures to include notification of held checks for future reconciliations or not cut checks until payment is ready to be mailed. Treasurer states these checks are out of her control once they are delivered to the Clerk's Office. These are employees' payroll withholdings which are directed by the employee to make payable for insurance premiums and not County money. Although these funds are held in the County's account, the Treasurer believes that adding these checks into the book balance would be misleading to the taxpayer because they are a cashable check at the point they are delivered from the Treasurer therefore considered an outstanding check on the books.

10/09-05 Criteria: Account balances should be properly and timely reconciled on a monthly basis in the Prosecuting Attorney's office for 2010 and 2009.

Condition: During our audit, we noted that the reconciliations of the prosecuting attorney's accounts are not being properly reconciled on a monthly basis due to the software being used and its report format setup for 2010 and 2009.

Context: Bank statement reconciliations are not being properly prepared due to the software report format being used.

II. FINANCIAL STATEMENT FINDINGS (continued)

10/09-05 Effect: Lack of proper reconciliation and monitoring of accounts may lead to errors that may not be found in a timely manner.

Cause: The Prosecuting Attorney's account reconciliation is not being properly prepared.

Recommendation: We recommend that the Prosecuting Attorney's office properly reconcile its accounts on a monthly basis and monitor the reconciliations to be sure they are being properly prepared. These reconciliations will ensure meaningful and accurate financial statements.

Views of responsible officials and planned corrective actions: The Prosecuting Attorney's office is currently working with Dennis Jones and Associates Bad Check Prosecution System Software to correct the reconciliation reports.

10/09-06 Criteria: The Sheriff's office December 2010 reconciliation should include all checks written up to and including December 31, 2010.

Condition: During our audit, we noted that the Sheriff's account reconciliation did not include eight checks that were written in December 2010.

Context: The bank reconciliation did not include eight checks written in December 2010.

Effect: Book balances in the Sheriff's office were overstated by $1,245.50.

Cause: The Sheriff's December 2010 bank reconciliation did not include eight checks that were written in December 2010.

Recommendation: Preparation of complete and accurate bank reconciliations is a key to maintaining adequate control over both cash receipts and disbursements. We recommend that the reconciliations be reviewed for accuracy and completeness by an individual not involved in the bank reconciliation preparation.

Views of responsible officials and planned corrective actions: Procedures will be reviewed to implement monitoring of bank reconciliations on a monthly basis.

10/09-07 Criteria: The Recorder's office should prepare complete and accurate bank reconciliations.

Condition: During our audit, we noted that the Recorder's bank reconciliations are not being prepared completely and accurately for 2010 and 2009.

Context: The bank reconciliations are not being prepared completely and accurately and have unknown discrepancies.

II. FINANCIAL STATEMENT FINDINGS (concluded)

10/09-07 Effect: Incomplete and inaccurate bank reconciliations can lead to cash balances being over/under stated.

Cause: The Recorder's office December 2010 and 2009 bank reconciliations have unknown discrepancies.

Recommendation: Preparation of complete and accurate bank reconciliations is a key to maintaining adequate control over both cash receipts and disbursements. We recommend that procedures be implemented to prepare complete and accurate bank reconciliations and that the reconciliations be reviewed for accuracy and completeness by an individual not involved in the bank reconciliation preparation.

Views of responsible officials and planned corrective actions: The Recorder's Office has implemented a new procedure to have one person review the electronic funds transfers on a daily basis now instead of monthly.

III. FEDERAL AWARD FINDINGS AND QUESTIONED COSTS FOR THE FISCAL YEAR ENDED DECEMBER 31, 2010 & 2009

The following findings, recommendations, and questioned costs are the results of the single audit of Stone County, Missouri for the fiscal year ended December 31, 2010 and 2009. Each finding is referenced with a two-digit number representing the fiscal years audited, an "SA" to indicate that it is a single audit finding, and a sequential number. The findings are presented by federal program and are classified according to federal and state department, type of compliance requirement, category of internal control weakness, and category of noncompliance.

A. Category of Internal Control Weakness

If the finding represents a weakness in internal control, one of the following designations will appear:

1. Significant Deficiency: A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

2. Material Weakness: A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis.

III. FEDERAL AWARD FINDINGS AND QUESTIONED COSTS FOR THE FISCAL YEAR ENDED DECEMBER 31, 2010 & 2009 (continued)

B. Category of Noncompliance Findings

If the finding represents an instance of noncompliance, one of the following designations will appear:

1. Material Noncompliance: A material noncompliance finding is a finding related to a major federal program which discusses conditions representing noncompliance with federal laws, regulations, contracts, or grants, the effects of which have a material effect in relation to a type of compliance requirement or audit objective identified in OMB Circular A-133 *Compliance Supplement*.

2. Questioned Cost Finding: A questioned cost finding is a finding which discusses known or likely questioned costs that are greater than $10,000 for a type of compliance requirement, unless the conditions giving rise to the questioned costs are otherwise reported as a material noncompliance finding.

C. Federal Award Findings and Questioned Costs

SA10/09-01 All Programs except CFDA numbers 14.231, 16.575, 90.401 and 39.011.

Significant Deficiency

Information on the federal programs: The schedule of expenditures of federal awards contained errors.

Criteria: Section .310(b) of Circular A-133, Audits of States, Local Governments and Non-Profit Organizations, requires the County to prepare a SEFA for the period covered by the County's financial statements.

Condition: The County did not comply with OMB Circular A-133 section .310(b).

Questioned Costs: Not applicable.

Context: During our audit of the schedule of expenditures of federal awards, we noted numerous errors in the amounts reported on the schedule.

Effect: Without an accurate and complete SEFA, federal financial activity may not be audited and reported in accordance with federal audit requirements which could result in future reductions of federal funds.

Cause: The County did not implement prior year corrective action plans.

Recommendation: We recommend that County officials receive training in preparing the schedule of expenditures of federal awards.

Views of responsible officials and planned corrective actions: The County Clerk will work with all agencies receiving federal money to prepare an accurate schedule of expenditures of federal awards.

III. FEDERAL AWARD FINDINGS AND QUESTIONED COSTS FOR THE FISCAL YEAR ENDED DECEMBER 31, 2010 & 2009 (continued)

C. Federal Award Findings and Questioned Costs (continued)

SA10/09-02 Highway Planning and Construction – CFDA No. 20.205

Significant Deficiency

Information on the federal programs: Required contracting procedures were not followed.

Criteria: OMB Circular A-133 Compliance Supplement and 41 CFR 105-71.135 prohibit entities from contracting with parties that are on the prohibited list.

Condition: The County does not have procedures in place to ensure that it complies with OMB Circular A-133 and 41 CFR 105-71.135 by not contracting with prohibited parties in administering federal funds.

Questioned Costs: Not applicable.

Context: During our audit of the schedule of expenditures of federal awards, we noted that the County did not check the Excluded Parties List System maintained by the General Services Administration to verify that parties it contracted with were not on the prohibited list.

Effect: As a result of not following required contracting procedures, there is an increased risk of federal funds being spent in violation of grant requirements.

Cause: The County did not perform required contracting procedures nor implement prior year corrective action plans.

Recommendation: We recommend that the County implement procedures to ensure that parties they contract with are not on the prohibited list.

Views of responsible officials and planned corrective actions: The County will work on implementing the required procedures to meet this compliance requirement.

SA10/09-03 Highway Planning and Construction – CFDA No. 20.205
Payment in Lieu of Taxes (Dept. of Defense) – CFDA No. 12.112

Significant Deficiency

Information on the federal programs: Noncompliance with Single Audit Requirements in control over expenditures.

Criteria: The County is required to properly maintain separate expense accounts to account for federal expenditures.

III. FEDERAL AWARD FINDINGS AND QUESTIONED COSTS FOR THE FISCAL YEAR ENDED DECEMBER 31, 2010 & 2009 (continued)

SA10/09-03
Significant
Deficiency
(concluded)

Condition: The County did not properly maintain separate expense accounts to account for federal expenditures to prepare the schedule of expenditures of federal awards.

Questioned Costs: Not applicable.

Context: During our audit of the schedule of expenditures of federal awards, we noted that the County did not properly maintain separate expense accounts to account for federal expenditures.

Effect: As a result of not following required compliance controls over expenditures, the schedule of expenditures contained errors.

Cause: The County did not implement prior year corrective action plans.

Recommendation: We recommend that the County implement procedures to track all federal expenditures in the general ledger system by adding a grant code at the end of the account code.

Views of responsible officials and planned corrective actions: The County will work on implementing the required procedures to meet this compliance requirement.

THE COUNTY OF STONE
GALENA, MISSOURI
SUMMARY SCHEDULE OF PRIOR YEAR FINDINGS
YEARS ENDED DECEMBER 31, 2010 AND 2009

I. PRIOR YEAR FINANCIAL STATEMENT FINDINGS

FS 07/08-01 Criteria: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, under Statement on Auditing Standards (SAS) No. 112, Communicating Internal Control Related Matters in an Audit, which is effective for periods ending on or after December 15, 2007, conditions necessitating the entity's auditor to provide such assistance is at least indicative of a significant deficiency.

Status: It appears no corrective action plan has been implemented, therefore, this finding has been re-issued in the current year as FS 10/09-01.

FS 07/08-02 Criteria: Statement on Auditing Standards (SAS) No. 112, *Communicating Internal Control Related Matters in an Audit*, which is effective for period ending on or after December 15, 2007, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Status: It appears no corrective action plan has been implemented, therefore, this finding has been re-issued in the current year as FS 10/09-02.

FS 07/08-03 Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Status: It appears no corrective action plan has been implemented, therefore, this finding has been re-issued in the current year as FS 10/09-03.

FS 07/08-04 Criteria: Pursuant to subsection 137.115.6, RSMo, a manufactured home is considered real property if it is located on land owned by the manufactured home owner.

Status: It appears this finding has been resolved in the current year.

II. PRIOR YEAR FEDERAL AWARD FINDINGS

SA 07/08-01 The schedule of expenditures of federal awards contained errors.

Status: It appears no corrective action plan has been implemented, therefore, this finding has been re-issued in the current year as SA10/09-01.

SA 07/08-02 Required contracting procedures were not followed.

Status: It appears no corrective action plan has been implemented, therefore, this finding has been re-issued in the current year as SA10/09-02.

II. PRIOR YEAR FEDERAL AWARD FINDINGS (concluded)

SA 07/08-03 Weakness in control over expenditures in compliance with Single Audit Requirements.

Status: It appears no corrective action plan has been implemented, therefore, this finding has been re-issued in the current year as SA10/09-03.

SA 07/08-04 Documentation was not provided to support major program expenditures and internal control procedures.

Status: It appears this finding has been resolved in the current year.

MISSOURI SOCIETY OF CPA'S
AMERICAN INSTITUTE OF CPA'S

To the County Commissioners
Stone County, Missouri

In planning and performing our audit of the financial statements of the County of Stone ("County") as of and for the years ended December 31, 2010 and 2009, in accordance with auditing standards generally accepted in the United States of America, we considered the County's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control. Accordingly, we do not express an opinion on the effectiveness of the County's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be significant deficiencies or material weaknesses and therefore there can be no assurance that all such deficiencies have been identified. In addition, because of inherent limitations in internal control, including the possibility of management override of controls, misstatements due to error or fraud may occur and not be detected by such controls. However, as discussed below, we identified certain deficiencies in internal control that we consider to be significant deficiencies.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the deficiencies in the County's internal control listed below to be significant deficiencies.

Our comments concerning internal control and other significant matters are presented as follows:

I. Deficiencies Considered to be Significant
II. Changes Impacting Governmental Organizations
III. Information Required by Professional Standards

Stone County's management has provided written responses to the comments in this report that were identified in our audit. These responses have not been subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on them.

This communication is intended solely for the information and use of management, County Commissioners, and others within the County, and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Daniel Jones & Associates

Daniel Jones & Associates, P.C.
Certified Public Accountants

July 22, 2011

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT

10/09-01

Criteria: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, under Statement on Auditing Standards (SAS) No. 115, Communicating Internal Control Related Matters Identified in an Audit, which is effective for periods ending on or after December 15, 2009, conditions necessitating the entity's auditor to provide such assistance is at least indicative of a significant deficiency. SAS No. 115 supersedes SAS No. 112.

Condition: During the current year, auditors of the County assisted with the preparation of the financial statements and the notes to financial statements.

Context: During discussions with management, we noted that we will be assisting the County with the preparation of their audited financial statements and footnotes.

Effect: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, SAS 115 indicates that conditions necessitate the entity's auditor to provide such assistance is at least indicative of a significant deficiency in internal control over financial reporting.

Cause: Management did not prepare the financial statements or the notes to financial statements.

Recommendation: Due to the changing standards, the County may wish to consider alternatives available that would eliminate this situation.

Views of responsible officials and planned corrective actions: The County is currently complying with all state statutes relating to the preparation of the financial statements with the preparation of the County's annual budget document and annual Financial Statement. The County will pursue remedy for SAS 115 compliance if it is determined that it is required for a county of this size.

10/09-02

Criteria: Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During discussions with management, we noted that internal control documentation has not been prepared.

Effect: SAS 115 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT(Continued)

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of responsible officials and planned corrective actions: The County is currently complying with all state statutes relating to the preparation of the financial statements with the preparation of the County's annual budget document and annual Financial Statement. Each official has their own internal controls within their office.

10/09-03 Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During our audit, we noted there is no formal fraud risk assessment in place.

Context: During discussions with management, we noted there were no formal fraud risk assessments implemented.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Views of responsible officials and planned corrective actions: The Commission will encourage all elected officials to review and document antifraud risk assessments.

10/09-04 Criteria: The Treasurer's reconciliation did not account for held checks by the accounts payable clerk in the County Clerk's office at December 31, 2010 for AFLAC and Allstate checks.

Condition: During our audit, we noted that the accounts payable clerk held checks written in December 2010 and were not mailed until January 2011.

Context: The bank reconciliation did not include held checks at December 2010.

Effect: Lack of proper reconciliation may lead to improper book balances.

Cause: The Treasurer's account reconciliation did not include held checks by the accounts payable clerk in the County Clerk's office at December 31, 2010.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT(Continued)

Recommendation: We recommend that the Treasurer's office include any held checks in future reconciliations or the County Clerk not cut checks until payment is ready to be mailed. This process will ensure more accurate book balances.

Views of responsible officials and planned corrective actions: The County Clerk will work on implementing procedures to include notification of held checks for future reconciliations or not cut checks until payment is ready to be mailed. Treasurer states these checks are out of her control once they are delivered to the Clerk's Office. These are employees' payroll withholdings which are directed by the employee to make payable for insurance premiums and not County money. Although these funds are held in the County's account, the Treasurer believes that adding these checks into the book balance would be misleading to the taxpayer because they are a cashable check at the point they are delivered from the Treasurer therefore considered an outstanding check on the books.

10/09-05 Criteria: Account balances should be properly and timely reconciled on a monthly basis in the Prosecuting Attorney's office for 2010 and 2009.

Condition: During our audit, we noted that the reconciliations of the prosecuting attorney's accounts are not being properly reconciled on a monthly basis due to the software being used and its report format setup for 2010 and 2009.

Context: Bank statement reconciliations are not being properly prepared due to the software report format being used.

Effect: Lack of proper reconciliation and monitoring of accounts may lead to errors that may not be found in a timely manner.

Cause: The Prosecuting Attorney's account reconciliation is not being properly prepared.

Recommendation: We recommend that the Prosecuting Attorney's office properly reconcile its accounts on a monthly basis and monitor the reconciliations to be sure they are being properly prepared. These reconciliations will ensure meaningful and accurate financial statements.

Views of responsible officials and planned corrective actions: The Prosecuting Attorney's office is currently working with Dennis Jones and Associates Bad Check Prosecution System Software to correct the reconciliation reports.

10/09-06 Criteria: The Sheriff's office December 2010 reconciliation should include all checks written up to and including December 31, 2010.

Condition: During our audit, we noted that the Sheriff's account reconciliation did not include eight checks that were written in December 2010.

Context: The bank reconciliation did not include eight checks written in December 2010.

Effect: Book balances in the Sheriff's office were overstated by $1,245.50.

Cause: The Sheriff's December 2010 bank reconciliation did not include eight checks that were written in December 2010.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT(Concluded)

Recommendation: Preparation of complete and accurate bank reconciliations is a key to maintaining adequate control over both cash receipts and disbursements. We recommend that the reconciliations be reviewed for accuracy and completeness by an individual not involved in the bank reconciliation preparation.

Views of responsible officials and planned corrective actions: Procedures will be reviewed to implement monitoring of bank reconciliations on a monthly basis.

10/09-07 Criteria: The Recorder's office should prepare complete and accurate bank reconciliations.

Condition: During our audit, we noted that the Recorder's bank reconciliations are not being prepared completely and accurately for 2010 and 2009.

Context: The bank reconciliations are not being prepared completely and accurately and have unknown discrepancies.

Effect: Incomplete and inaccurate bank reconciliations can lead to cash balances being over/under stated.

Cause: The Recorder's office December 2010 and 2009 bank reconciliations have unknown discrepancies.

Recommendation: Preparation of complete and accurate bank reconciliations is a key to maintaining adequate control over both cash receipts and disbursements. We recommend that procedures be implemented to prepare complete and accurate bank reconciliations and that the reconciliations be reviewed for accuracy and completeness by an individual not involved in the bank reconciliation preparation.

Views of responsible officials and planned corrective actions: The Recorder's Office has implemented a new procedure to have one person review the electronic funds transfers on a daily basis now instead of monthly.

II. CHANGES IMPACTING GOVERNMENTAL ORGANIZATIONS

a. SAS 115, *Communicating Internal Control Related Matters Identified in an Audit*, is effective for periods ending on or after December 15, 2009 and supersedes SAS No. 112. This standard defines the terms *deficiency in internal control, significant deficiency*, and *material weakness*. It provides guidance on evaluating the severity of deficiencies in internal control identified in an audit of financial statements.

b. SAS 117, *Compliance Audits*, which supersedes SAS No. 74, is effective for compliance audits for periods ending on or after June 15, 2010. This SAS identifies the AU sections that are not applicable to a compliance audit, defines terms related to compliance audits and used in the SAS, and identifies the elements to be included in an auditor's report on a compliance audit. It reflects changes in the compliance audit environment and incorporates the risk assessment standards.

c. SAS 118, *Other Information in Documents Containing Audited Financial Statements*, is effective for audits of financial statements for periods beginning on or after December 15, 2010. This section addresses the auditor's responsibility in relation to other information in documents containing audited financial statements and the auditor's report thereon.

II. CHANGES IMPACTING GOVERNMENTAL ORGANIZATIONS (Concluded)

d. SAS 119, *Supplementary Information in Relation to the Financial Statements as a Whole*, is effective for audits of financial statements for periods beginning on or after December 15, 2010. This section addresses the auditor's responsibility when engaged to report on whether supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole.

III. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS

Our Responsibilities under U.S. Generally Accepted Auditing Standards and *OMB Circular A-133*

Professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards, *Government Auditing Standards* and OMB Circular A-133, as well as certain information related to the planned scope and timing of our audit. We have communicated such information in our letter to you dated May 23, 2011. Professional standards also require that we communicate to you the following information related to our audit.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the County are described in Note I to the financial statements. The County adopted the regulatory basis of accounting to report its financial statements for the years ended December 31, 2010 and 2009. We noted no transactions entered into by the County during the years for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. In addition, none of the misstatements detected as a result of audit procedures and corrected by management were material, either individually or in the aggregate, to the financial statements taken as a whole.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated July 22, 2011.

III. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS (Concluded)

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the governmental unit's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the governmental unit's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

During the course of our audit, we noted that the County was compliant with the Davis Bacon compliance requirement; however, the County is using state wage rates instead of Davis Bacon rates. If state wage rates are ever different, the County runs the risk of being noncompliant with the Davis Bacon rates. We recommend the County use the Department of Labor standard forms and use the Federal Wage Rates for the Davis Bacon compliance requirement.

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Department of Revenue, Taxation Division Security Controls

Background

This audit reviewed security and other internal controls established and managed by the Department of Revenue (DOR), Taxation Division and the Office of Administration, Information Technology Services Division (OA-ITSD). The OA-ITSD provides technical support to the DOR, Taxation Division, which is responsible for collecting Missouri taxes and administering state tax laws. The section of OA-ITSD responsible for supporting the DOR is referred to as the ITSD in this summary and report.

Service Level Agreement

The DOR and the OA-ITSD do not have a current written agreement adequately documenting the terms of the partnership between the two entities. The memorandum of understanding, in place since 2006, is not up-to-date and lacks critical information, such as defining: operational responsibilities for each organization, qualitative or quantitative measures of services to be provided, or responsibilities for third-party software, backup, disaster recovery and continuity planning.

The OA-ITSD did not have a contract for disaster recovery facilities for some critical mainframe resources, including certain Taxation Division systems, for almost a year. Instead of renewing the existing disaster recovery contract when it expired in June 2010, the OA-ITSD decided to explore other more cost-effective options, but it took eleven months to get the new disaster recovery capability in place, leaving the state vulnerable in the interim in the event of a disaster.

The DOR has not told ITSD how long the Taxation Division systems could be down before significant losses would occur. ITSD needs this information to determine whether the current recovery plan is sufficient. In addition, the ITSD has not conducted recovery testing to ensure that backups are complete and accurate and contain all data necessary to recover critical systems in the event of a disaster.

User Account Management

The ITSD database administrators are able to add, edit or delete data directly in the DOR, Taxation Division databases without management review, which increases the risk of unauthorized changes going undetected. Such direct database revisions are not subject to system validation and edit checks.

DOR and ITSD do not periodically review user access rights to the network or the DOR, Taxation Division systems and data. DOR security policies require division directors to review reports of user access at least twice a year, but we were told by a DOR official this review is not conducted. When we reviewed user accounts with access to DOR systems, we discovered 24 former employees still had active user accounts (one of whom left the DOR in 2001); 9 accounts were active in the system but not assigned to specific users; and 807 active user accounts had not been accessed in over

	90 days, calling into question whether these users continue to need this access. As noted in our 2003 and 2006 reports, the ITSD maintains unassigned user accounts for DOR systems (2,700 at the time of the present audit), which increases the risk of unauthorized access to confidential data. The DOR also lacks a policy for granting system access to temporary employees.
Risk Assessment Program	The DOR lacks a comprehensive risk assessment and management program. A risk assessment helps identify potential threats, vulnerabilities and weaknesses and determines what steps should be taken to prevent losses.
Browsing of Taxpayer Records	Although the DOR uses security controls to limit access to tax systems, management does not have procedures in place to monitor employee access to ensure only appropriate access to tax return information is occurring.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	Not applicable.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Alana M. Barragán-Scott, Director
Department of Revenue
and
Doug Young, Chief Information Officer
Office of Administration, Information Technology Services Division
Jefferson City, Missouri

We have audited the Department of Revenue (DOR) and the Office of Administration Information Technology Services Division (ITSD) general controls related to the overall security of DOR Taxation Division computer systems and certain security controls related specifically to the Missouri Individual Income Tax System. This audit was conducted to evaluate the effectiveness of security controls and other related internal controls designed to secure confidential citizen information and tax-related data, and because most state general revenues are processed through the DOR Taxation Division systems. The objectives of our audit were to:

1. Evaluate the security controls designed to ensure the confidentiality, integrity, and availability of data and information maintained by the Taxation Division systems.

2. Evaluate compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and information system control activities.

Certain information contained in DOR records was not provided to us based on the Director of Revenue's interpretation of the decision rendered by the Missouri Supreme Court in the case of Director of Revenue v. State Auditor 511 S.W.2d 779 (Mo. 1974). Other information was not readily available due to the age, design, and complexity of the Taxation Division computer systems and underlying technology. As a result, we could not audit certain information because of these limitations imposed on the scope of our audit.

Our audit determined DOR and ITSD management have not taken some measures necessary to maintain effective security controls to ensure the confidentiality, integrity, and availability of data and information maintained by the Taxation Division systems. We determined DOR management, while in compliance with certain legal provisions we reviewed, could implement additional controls to protect the privacy of taxpayer data. We also determined certain weaknesses in management practices and information system control activities exist, which increase the risk of confidential information being compromised.

Except as discussed in the second paragraph, we conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Jeffrey Thelen, CPA
In-Charge Auditor:	Lori Melton, M.Acct., CPA
Audit Staff:	Patrick M. Pullins, M.Acct.

Department of Revenue
Taxation Division Security Controls
Introduction

Background

Data security is a critical consideration for any organization dependent on information systems and networks to meet its mission or business objectives. Data security is especially important for state agencies, where the public's trust is essential for the efficient delivery of services. Security can be a significant investment, which adds to an already long list of administrative duties. Managing secure networks, developing and implementing new system functionality, maintaining thousands of system users, and other day-to-day security tasks can strain limited administrative resources. However, agency management must understand proper protection of citizen information is a requirement and not a luxury in the current interconnected cyber environment. Without proper safeguards and controls, computer systems and confidential data are vulnerable to individuals with malicious intentions who can use access to obtain sensitive data or disrupt operations.

The Department of Revenue (DOR) was created by Article IV, Section 12, of the 1945 Missouri Constitution and serves as the central collection agency for state revenues.

The DOR Taxation Division is responsible for collecting Missouri taxes and administering state tax laws. During fiscal year 2010, the Taxation Division processed tax receipts of approximately $11.9 billion, according to DOR records. The Taxation Division administers and collects personal taxes, including individual income, partnerships, fiduciary, and estate taxes and also administers the Property Tax Credit and Homestead Tax Credit programs. In addition, the Taxation Division also collects various business taxes including sales/use, financial institution, insurance premium, franchise, excise, cigarette and other tobacco products, motor fuel, corporate income, and withholding taxes.

To administer and process the collection of individual income taxes, the Taxation Division uses the Missouri Individual Income Tax System (MINITS). This system was established in 1989 and has been updated at least yearly to account for tax law and other necessary changes. The MINITS is based on dated technology for which the pool of skilled personnel with the ability to maintain the system continues to decline. This dated technology platform limits management data analytical capabilities and the ability of the MINITS to interface with other more modern Taxation Division systems.

In the fiscal year 2012 budget proposal, released January 2011, the Governor proposed a $5 million appropriation to the DOR to fund implementation of "a modern, efficient collections information technology system" for the department. This proposed system is expected to replace the MINITS as well as other systems used to administer and collect personal and business taxes. The $5 million appropriation was included in the DOR

2012 budget as introduced in the legislature. However, only $1 million was appropriated in the final budget. The state issued a request for proposals in May 2011, for this consolidated system. The estimated total cost of the project is approximately $62 million. Benefit studies conducted by potential vendors found a new integrated tax system could result in additional revenue due to opportunities for improvement in collections and additional processing efficiencies.

The mission of the Office of Administration, Information Technology Services Division (OA-ITSD)[1] is to provide technology services and solutions to state agencies, including assistance to support DOR technology resources. The DOR maintains ownership of its information systems and data, while the ITSD provides technical support. As part of the technology support function, the OA-ITSD established the Missouri Adaptive Enterprise Architecture (MAEA)[2] to guide information technology decisions. The DOR is required to follow MAEA standards and policies.

According to accepted standards, security controls are the management, operational, and technical safeguards or countermeasures prescribed for an information system to protect the confidentiality, integrity, and availability of the system and its information. Confidentiality refers to preserving authorized restrictions on information access and disclosure, including the means for protecting personal privacy and proprietary information. Integrity relates to guarding against improper information modification or destruction, and availability ensures timely and reliable access to and use of information.

Scope and Methodology

The scope of our audit included security controls and other related internal controls established and managed by the DOR and OA-ITSD; policies and procedures; and other management functions and compliance issues in place during the 2 years ended June 30, 2011.

Our methodology included conducting interviews with appropriate officials and staff; obtaining and reviewing available policies and procedures, federal laws, and other applicable information; and performing testing.

We obtained data files from the ITSD of user accounts having access to DOR systems as of January and March 2011. To ensure completeness of the

[1] In this report, OA-ITSD refers to the entire division, while ITSD refers to the section within the OA-ITSD assigned specific responsibility for supporting DOR technology resources.

[2] The MAEA includes standards, policies, and guidelines established by the OA-ITSD. The MAEA is made up of several information technology domains, including domains dedicated to security and information. The domains define the principles needed to help ensure the appropriate level of protection for the state's information and technology assets.

data, we reviewed the accounts for reasonableness and scanned the names of employees. Although we used computer-processed data from DOR systems to identify and test user accounts and related information, we did not rely on the results of any processes performed by these systems in arriving at our conclusions. Our conclusions were based on our review and testing of controls over user accounts.

We obtained the employment records of all DOR and ITSD employees for fiscal years 2001 to 2011 from the statewide accounting system for human resources. We matched these records to user accounts with access to DOR systems to determine if any terminated employees had active user accounts. We provided DOR officials a list of all terminated employees we found who had active access to DOR systems. Although we used computer-processed data from the human resources system for our audit work, we did not rely on the results of any processes performed by this system in arriving at our conclusions. Our conclusions were based on our review of the issues specific to the audit objectives.

We obtained individual state income tax data, excluding confidential personally identifiable data, for taxpayers who filed paper tax returns for tax year 2009. We performed basic reasonableness tests on this data and did not find any reportable issues. However, due to the design and age of the system and technology platform the system operates in, we were not able to review all system controls because records of processing edits[3] applied to certain data or processing events are not maintained after tax returns are processed. Although we used computer processed data from the MINITS for our audit work, we did not rely on the results of any processes performed by this system in arriving at our conclusions.

We based our evaluation on accepted state, federal, and international standards and best practices related to information technology security controls from the following sources:

- Missouri Adaptive Enterprise Architecture (MAEA)
- National Institute of Standards and Technology (NIST)
- Government Accountability Office (GAO)
- IT Governance Institute Control Objectives for Information and related Technology (COBIT)

[3] An edit, also known as a data validity check, is program code that tests the input for correct and reasonable conditions; such as account numbers falling within a range; numeric data being all digits; dates having a valid day, month, and year; etc.

1. Service Level Agreement

The Department of Revenue (DOR) and the Office of Administration Information Technology Services Division (OA-ITSD) do not have a current agreement documenting the terms of the partnership between the two entities. As a result, DOR management does not have minimum performance targets for information technology (IT) services and cannot determine if the services delivered meet targeted levels.

A Service Level Agreement (SLA) is a document used by organizations entering into a partnership for the provision of IT services. According to accepted standards, the SLA should document the agreements reached regarding:

- Technical and administrative support to be provided by the service provider
- Service support requirements, including availability, reliability, performance, and capacity for growth
- Roles and responsibilities of each party, including responsibility for oversight
- Backup, recovery, and security responsibilities of each party
- Quantitative and/or qualitative metrics for measuring service
- Funding arrangements
- Customer commitments

1.1 Current agreement

The DOR and OA-ITSD management do have a signed memorandum of understanding for IT services in place. However, the memorandum is not current and does not include provisions of a SLA necessary to protect the DOR and ensure alignment of business requirements for all critical IT services.

Review and update of agreement

The memorandum of understanding between the DOR and OA-ITSD has not been updated since it was signed in 2006. We found one of the Information Technology Services Division (ITSD) contacts listed in the memorandum is no longer employed by the state. Given the speed of technological innovation, failure to regularly review and update the IT service agreement leaves both organizations at risk of relying on an outdated agreement and expectations to perform the DOR's critical business tasks.

The memorandum of understanding documents financial issues related to the transfer of IT services from the DOR to the OA-ITSD, which was completed in 2007. The memorandum also specifies that limited administrative support responsibilities will continue after the transfer. Operational responsibilities, which are necessary for each organization to understand expectations, are not included in the memorandum. In addition, the memorandum does not include any qualitative or quantitative measures of services to be provided to the DOR by ITSD, does not stipulate who is responsible for funding or maintenance of customized third-party software,

does not state what level of service is expected by the DOR, and does not assign responsibility for backup, disaster recovery, and continuity planning. As a result, the DOR is at risk of not receiving the services necessary to achieve the department's mission.

Responsibility for security

DOR management, as owner of DOR information systems and data, is responsible for ensuring data maintained in the systems is secure and adequately protected. Although the DOR has partnered with the ITSD to provide IT services, the DOR has not ensured the ITSD is providing adequate security to protect DOR information.

For instance, DOR staff do not have access to system security logs and rely on ITSD staff to monitor the logs. According to ITSD officials, audit trail records for Taxation Division systems are available. An OA-ITSD official said the logs are not reviewed regularly, and only limited monitoring of the audit trail records is performed to identify reports of incidents compromising security or data integrity. ITSD officials said resources are not available to regularly monitor security activity or events. Since the memorandum does not delineate responsibility for monitoring the logs, DOR management does not have assurance this critical security function is performed.

Audit trail records should be reviewed for inappropriate or unusual activity, suspicious activity should be investigated, and appropriate actions should be taken, according to accepted standards. Failure to document responsibility for security functions could leave both the DOR and the ITSD at risk of a security incident compromising established controls, including disclosure or use of confidential data, without detection.

Agreement measurements

The memorandum of understanding does not include expected service level performance criteria or measurements to ensure the ITSD is providing IT services based on DOR business requirements.

ITSD staff prepare a report each quarter documenting the status of certain service level measurements. This report categorizes ITSD actions as promoting two outcomes: efficiently manage IT resources and maintain availability of IT resources. For each outcome, the report states several performance measures used to determine if the ITSD is meeting the desired outcomes. However, there is no documentation establishing the stated outcomes and measures and how the stated outcomes relate to the mission of the DOR, or indicating if DOR management agreed to the stated outcomes and measures. Further, for those measurements the ITSD did not meet, no corrective action plan was provided to address the failure and bring the ITSD into compliance with expected performance goals.

By not documenting the level of service expected from the ITSD or any corrective actions required to meet performance criteria, DOR management does not have reasonable assurance the department is receiving the level of service expected in return for the budgetary authority transferred to the OA-ITSD.

1.2 Disaster recovery contract

The OA-ITSD did not have a contract in place for disaster recovery facilities for some critical mainframe resources, including certain critical Taxation Division systems, during fiscal year 2011. The OA-ITSD elected to request bids for a new contract as a cost saving measure instead of exercising the renewal clause when the contract expired in June 2010. After almost a full year and two rounds of bidding and negotiations with vendors, OA-ITSD management determined the bids were still too expensive and elected to not award a new contract. Instead, OA-ITSD management decided to acquire the technological resources to establish a state owned disaster recovery capacity. The new recovery capacity become operational in July 2011. As a result, for the period July 2010 through June 2011, a contract for use of a disaster recovery facility was not in place, leaving the state vulnerable in the event of a major disaster.

The memorandum of understanding does not require the OA-ITSD to ensure appropriate disaster recovery facilities are available. Without a provision for disaster recovery facilities, the DOR faces a significant risk that critical IT systems will not be restored to operational status in the event of a disaster, subjecting the DOR to severe operational difficulties.

1.3 Maximum tolerable downtime

DOR management has not formally documented and communicated to ITSD management a maximum tolerable downtime expectation for Taxation Division systems. According to accepted standards, the maximum tolerable downtime is the maximum period of time an entity is able to tolerate a critical system being unavailable for use before the entity suffers significant losses. This time should be calculated by entity management based on an analysis of business functions. IT system management should be informed of the expectation to ensure the systems can be restored within the established limits.

Although DOR management has not established a maximum tolerable downtime, the department's continuity of operations plan acknowledges a risk that several critical functions could be difficult to restore in a 12 hour period. ITSD documentation of the 2009 disaster recovery test indicates restoring the operating system, before any applications could be restored, would take a full day, after traveling to the alternate location. Without documenting a maximum tolerable downtime and ensuring applications and systems can be restored within this time, the DOR faces an increased risk that critical functions may not be restored within a reasonable amount of time after a disaster.

1.4 Recovery testing

The memorandum of understanding between the DOR and OA-ITSD does not sufficiently address each organization's responsibility for ensuring DOR data can be recovered in the event of a disaster. DOR management has no assurance critical data and applications are backed up appropriately and can be recovered in the event of a disaster because the ITSD has not tested the restoration procedures for certain systems. An ITSD official said DOR staff are responsible for ensuring all necessary data is backed up while ITSD staff are responsible for performing the backups. In addition, the completeness of some backups is not tested because of the limited amount of time for recovery testing available under the previous disaster recovery contract. ITSD officials said recovery testing may also be performed on state equipment dedicated for testing purposes, but certain critical systems cannot be recovered in this location due to a lack of available space.

Without performing complete data recovery testing, DOR management cannot ensure backups are complete and accurate and contain all data necessary to recover critical systems in the event of a disaster.

Recommendations

The DOR, in conjunction with the OA-ITSD:

1.1 Establish a service level agreement for the provision of IT services, which identifies measurements and performance criteria to ensure service requirements are met. The agreement should be regularly monitored to ensure specified service level performance criteria remain relevant.

1.2 Ensure the service level agreement addresses the availability of disaster recovery facilities providing the capacity for the DOR to restore critical computing systems in the event of a disaster.

1.3 Formally document the methodology and determination of maximum tolerable downtimes for critical systems in the event of a disaster.

1.4 Perform a test of the data recovery procedures for all critical systems to ensure the systems can be recovered in the event of a disaster.

Auditee's Response

1.1 The department agrees with this recommendation and has begun developing a Service Level Agreement (SLA) that will include performance expectations to ensure service requirements are met. The department expects to complete the SLA by December 31, 2011.

1.2 The department agrees with this recommendation and will include the availability of disaster recovery facilities in the SLA.

1.3 The department agrees with this recommendation and will include tolerable downtimes for critical systems in the SLA.

1.4 The department agrees with this recommendation and will include testing of data recovery in the SLA.

2. User Account Management

DOR and ITSD management had not established or documented adequate user account management policies and procedures. User account management includes requesting, establishing, issuing, suspending, modifying, closing, and periodically reviewing user accounts and related user privileges, according to accepted standards. User account management policies and procedures should be established for all user accounts, including system administrators and other privileged users.

2.1 Database administrator access

ITSD database administrator access to databases supporting Taxation Division systems is not monitored by management. As a result, certain database administrators can add, edit, or delete data directly in the databases without the changes being reviewed by management or being subject to system processing edits. System data is periodically scanned to detect invalid or corrupt data, according to an ITSD official. However, these scans will not detect unauthorized data entered directly into the database.

According to accepted standards, logging and monitoring functions are critical to enable the early prevention and/or detection and subsequent timely reporting of unusual and/or abnormal activities that may need to be addressed. An ITSD official said database monitoring is performed on a statewide basis by the state Information Security Management Office (ISMO). However, the ISMO Chief Information Security Officer said monitoring of internal system activity is only performed as requested and most monitoring efforts are directed at external threats.

Failure to monitor the actions of database administrators results in an increased risk of unauthorized changes to tax data without being detected. In addition, direct database changes are not subject to system validation and edit checks, potentially allowing the recording of inaccurate data in the databases.

2.2 Management review of user accounts

DOR and ITSD management have not implemented procedures for periodically reviewing user access rights to the network or to Taxation Division systems and data to ensure access rights remain appropriate. The DOR security policies require division directors to review reports of user access to information systems at least semi-annually. However, this review is not performed, according to a DOR official. According to the Missouri Adaptive Enterprise Architecture (MAEA), agencies must periodically review user accounts. Accepted standards also support regular review of all accounts and related privileges.

During our review of user accounts with access to DOR systems, we found 24 former employees still had active user accounts. One of these former employees had left the DOR in 2001. In addition, we found nine accounts that were active in the system, but had not been assigned to specific users. We also found 807 active user accounts that had not been accessed in over 90 days.

Without a review of user access rights, management faces an increased risk that unauthorized alterations of these rights will go undetected or access rights may not be aligned with current job duties.

2.3 Revoked accounts

The ITSD has a pool of approximately 2,700 revoked user accounts for DOR systems that are not assigned to specific users. This pool of user accounts includes new accounts created for the convenience of having pre-established user accounts assigned with basic access rights and accounts of former users available for re-assignment to new users.

Accepted standards require unique user accounts be assigned to individual users. All user accounts created should have an associated request and approval from appropriate administrators of information resources. According to the MAEA, agencies must periodically review user accounts, including identification of inactive, idle, or orphaned accounts.

By allowing unassigned accounts to exist in the information system, management may increase the risk of unauthorized access and compromise the confidentiality and integrity of data maintained by the DOR.

Similar conditions previously reported

Maintaining a pool of user accounts was addressed in our 2003 audit of the DOR Security,[4] and again in a follow-up audit in 2006.[5] In both cases, DOR and/or ITSD management said corrective action would be taken. The number of unused accounts currently outstanding is greater than at the time of either of our prior reports, indicating DOR and ITSD management have not made a dedicated effort to correct the situation by implementing our prior recommendation.

2.4 Temporary employee accounts

Although DOR management has a policy for granting computer access to permanent employees, management has not established a policy for granting access to temporary employees. According to DOR personnel, the procedure for granting access to temporary employees is not the same process as

[4] SAO Audit Report 2003-16, *Department of Revenue - Information Resource Security Management*, issued in February 2003.

[5] SAO Audit Report 2006-14, *Information Technology - Information Security Management in State Agencies*, issued in March 2006.

granting access to permanent employees. In March 2011, the DOR employed approximately 100 temporary employees during tax season to input and process tax returns. Without documented policies or procedures, DOR management does not have assurance user accounts assigned to temporary employees are consistently or correctly controlled, which increases the risk of unauthorized access to data and information maintained in Taxation Division systems.

Recommendations

The DOR, in conjunction with the ITSD:

2.1 Regularly monitor database administrator access to ensure data is not changed without authorization.

2.2 Perform periodic reviews of user access rights to ensure access rights are commensurate with job duties and responsibilities.

2.3 Discontinue the practice of maintaining a pool of user accounts not associated with active system users.

2.4 Establish policy and procedures for granting system access to temporary employees.

Auditee's Response

2.1 OA-ITSD agrees with this recommendation and will develop procedures to regularly audit database administrator activity. OA-ITSD expects this process will be in place by December 31, 2011.

2.2 The department has requested a list of all users with access to department systems. ITSD will provide the department with this information by system. A list of priority systems to review user access has been submitted to ITSD.

2.3 OA-ITSD agrees with this finding. OA-ITSD will disable all inactive pool of user accounts and remove authorization to all production systems. OA-ITSD will provide the department a list of all user accounts to ensure all inactive accounts are disabled. OA-ITSD expects this process will be in place by December 31, 2011.

2.4 The department agrees with this recommendation and will add specific language to address granting system access to temporary employees to the current policy.

3. Risk Assessment Program

DOR management has not established a comprehensive risk assessment and management program. DOR officials perform an audit risk assessment when creating the internal audit plan each year; however, this assessment is not a substitute for an overall business risk assessment.

A risk assessment helps identify potential threats, vulnerabilities, and weaknesses which could be exploited and determines what controls are required and what level of resources should be expended on controls to prevent losses. According to accepted standards, an effective risk management process is an important component of a successful IT security program. The principal goal of an organization's risk management process should be to protect the organization and its ability to achieve the mission, not just protect IT assets, making risk management an essential management function of the organization.

Without an established risk management and assessment framework in place, unidentified risks or threats may expose an unknown system vulnerability; resulting in lost information, lost privacy, loss of availability, or loss of system integrity. In addition, DOR management has less assurance that established security controls are cost-effectively addressing programmatic risks.

Recommendation

The DOR, in conjunction with the ITSD, should implement and document a business risk assessment and management framework, which includes policies, standards, and procedures for performing periodic risk assessments so management can better protect department resources and the ability to cost-effectively address risk and accomplish the DOR's mission.

Auditee's Response

The department agrees with this recommendation and will develop policies and perform periodic risk assessments.

4. Browsing of Taxpayer Records

DOR management has established policies to comply with the federal Taxpayer Browsing Protection Act of 1997[6] and with state law; however, additional controls could be implemented to further secure the privacy of taxpayer data.

The Taxpayer Browsing Protection Act states tax returns and return information shall be confidential. Specifically, the Act requires states receiving federal return information restrict access to the information to only those persons whose duties or responsibilities require access. Additionally, under state law,[7] any person with access to taxpayer data may not disclose the data or information, with certain exceptions. Although there is no provision of state law limiting access, DOR policy prohibits users from accessing tax return information not necessary to carry out official duties.

[6] 26 USC Sections 7213, 7213A, and 7431
[7] Section 32.057, RSMo

DOR management uses certain security controls to limit access to tax systems, but has not established procedures to monitor employee access to ensure only appropriate access is occurring. The DOR Internal Audit Bureau has planned a review of employee access to taxpayer accounts; however, this is the first audit of this type.

Recommendation

The DOR should continue current efforts to further strengthen procedures and determine if additional opportunities exist, such as monitoring employee access to certain tax return information, to improve security and ensure the confidentiality of taxpayer information.

Auditee's Response

The department agrees with this recommendation and the Compliance and Investigations Bureau will work with ITSD to identify verification opportunities.

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Department of Higher Education, Separation and Retention Contracts of University Officials

Background	In a prior audit report, Report No. 2000-24, we concluded while most high-ranking university officials' contracts reviewed contained reasonable provisions, some did not adequately protect the university and contained provisions that appeared excessive or unwarranted. In the current audit, we looked at the employment contracts of the four chancellors of the four University of Missouri campuses and the nine presidents of the other Missouri public 4-year institutions. We determined five of the agreements contained provisions that may not comply with state law and/or may not be in the best interest of the university.
Missouri Southern State University (MSSU)	MSSU entered a separation agreement with then-President Dr. Julio S. Leon in August 2007 which entitled Dr. Leon to a payment of $168,518 upon his resignation with no obligation to perform any future tasks, duties or obligations for the university. Dr. Leon, who had been with MSSU for 38 years, 25 of which he was President, was also to be named "President Emeritus" and be provided a faculty office and computer in the Business School. Dr. Leon had the option of teaching part-time at the prorated compensation rate as the highest paid professor, but Dr. Leon did not exercise this option. The August 2007 agreement was a modification of Dr. Leon's existing employment contract which provided for a 6 month sabbatical at his monthly base pay upon his resignation, provided that he gave a full year's notice of his intention to resign. In addition, he would have the right to teach at a salary equal to 115 percent of the highest paid professor's salary, and, if he were terminated for any reason other than for cause, he would received his base pay for 12 months. Neither agreement explains the purpose of the contemplated post-employment payments, and MSSU did not provide an explanation upon our request.
Northwest Missouri State University (NWMSU)	NWMSU executed an employment agreement with then-President Dr. Dean L. Hubbard which entitled him to the same annual presidential salary ($224,762) for the year after he resigned as President, but did not identify any specific duties to be performed by him during that year. In addition to the salary, Dr. Hubbard received health and accident insurance for himself and his spouse for 2 years after his resignation, and the university spent $8,930 to relocate Dr. Hubbard to Kansas City. It is not clear whether the services Dr. Hubbard performed on behalf of NWMSU during this transition year, warranted the compensation and benefits he received. Dr. Hubbard served as President of NWMSU for 25 years. A more complete explanation of Dr. Hubbard's employment agreement is available in our recently issued audit report of NWMSU, Report No. 2011-47.

Harris Stowe State University (HSSU)	In August 2010, HSSU entered into a contract with then-President Dr. Henry Givens, Jr. which provided he would serve as an advisor for 2 years after his resignation for $70,000 a year, during which time he would research and write a partial history of HSSU, assist in fund raising, and provide advice on legislative matters and campus expansion projects. Dr. Givens told us this compensation would come from private or other sources, rather than university funds. In addition, Dr. Givens was provided lifetime participation in the university's medical, dental, and vision and long-term care insurance programs, and lifetime $100,000 term life insurance, in recognition of Dr. Givens' 30 years of service and his willingness to forego other employment opportunities. Dr. Givens is also entitled to a paid partial sabbatical leave, but he said he did not expect to have time to take it.
Truman State University (TSU)	After 5 years as President of TSU, Dr. Barbara B. Dixon expressed a desire to resign, and she and the Board of Governors entered into a separation agreement under which she received a salary of $205,050 to serve as a consultant to the Board of Governors for a year. In addition, she was entitled to receive $10,000 at the end of that year if she performed satisfactorily and to receive an additional 6 months of health insurance. According to TSU officials, the $10,000 payment was paid, but payment for the additional 6 months of health insurance was not made. The only documented task or duty Dr. Dixon performed during this paid year was to document her thoughts and recommendations regarding cost saving measures.
Missouri State University (MSU)	Dr. Michael T. Nietzel resigned as President of MSU after 5 years. Dr. Nietzel's contract entitled him to become a tenured professor in the Department of Psychology at an annual salary of $160,423, which is approximately $68,000 more per year than the highest paid faculty member in the department. In addition, Dr. Nietzel's contract with MSU entitled him to a semester of leave at his new full salary rate or 1 year off at one-half pay; Dr. Nietzel chose to take one semester off and was compensated $80,211 for his paid leave of absence during the fall of 2010. During at least part of this time, Dr. Nietzel served as an unpaid advisor to the Governor on higher education matters. A more complete explanation of Dr. Nietzel's contract is available in Report No. 2010-125, *Missouri State University*, issued in October 2010.

Because of the limited objective of this review, no overall rating is provided.

State Auditor's Report 2

Introduction
- Background 4
- Scope and Methodology 5

Management Advisory Report - State Auditor's Findings
- Contract Provisions 6

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly
and
Dr. David R. Russell, Ph.D., Commissioner
Department of Higher Education
Jefferson City, Missouri

We have performed an audit of separation and retention contracts of university officials. Objectives of this audit were to determine whether:

1. Public universities have entered into separation and retention contracts with top university officials which are in compliance with the Missouri Constitution and contain provisions that are in the best interest of the institution.

2. Section 173.003, RSMo, has been effective in eliminating questionable provisions contained in separation and retention agreements.

During the audit, we determined some of the agreements reviewed included reasonable and standard provisions and practices. However, we determined (1) some recent agreements may not be in compliance with the Missouri Constitution and/or may not be in the best interest of the institution, and (2) Section 173.003, RSMo, has not been completely effective in eliminating questionable provisions contained in separation and retention agreements.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

Thomas A. Schweich
State Auditor

Separation and Retention Contracts of University Officials Introduction

Background

The Missouri Department of Higher Education (MDHE), headed by a coordinating board, carries out various planning, budgeting, and other administrative responsibilities related to the state's system of higher education. Each state-funded college or university is under the general control and management of its governing board. Under state law[1], the governing board of each institution has the authority to appoint and remove the president and other institution employees, assign powers and duties, and fix compensation. The MDHE has no approval or oversight responsibilities regarding the compensation provided to top officials of the state's colleges and universities.

In Report No. 2000-24, *Audit of Separation and Retention Contracts Entered Into by Public Institutions of Higher Education,* issued in April 2000, the State Auditor's Office (SAO) reported the results of an audit of separation and retention contracts for college and university presidents or chancellors, and other high-ranking officials. The objectives of that audit were to determine if colleges and universities were consistent in the types of contracts they entered into with high-ranking officials and determine if the college and university boards properly considered their fiduciary responsibilities when entering into agreements with departing officials.

That audit concluded most of the contracts reviewed contained reasonable provisions; however, some contracts did not properly protect the university from risk of nonperformance and/or contained provisions that appeared excessive or unwarranted. Subsequent to the release of our prior audit, in 2000 the General Assembly passed legislation which was incorporated in Section 173.003, RSMo, which states:

> "Retirement, severance, and associated salary continuance policies and plans of approved public institutions…shall be applied uniformly, consistently and fairly to all similarly situated officials and employees of …public institutions; and no employee or official shall be singled out for retirement or severance benefits which are inconsistent with the formally adopted policies and plans of such approved public institution."

[1] Article IX, Section 9(a), Missouri Constitution, and Section 172.010, RSMo, provide that a university (the University of Missouri) is hereby instituted in this state, the government whereof shall be vested in a board of curators. Also, Section 174.120, RSMo, provides that each state teachers college shall be under the general control and management of its board of regents. Further, Sections 172.300 and 174.140, RSMo, provide the governing board of each institution may appoint and remove, at its discretion, the president and other employees of the state college or university and may fix the terms, conditions, and compensation of their employment.

Scope and Methodology

Our audit focused on the employment contracts of the chancellors of the four campuses of the University of Missouri system and the presidents of the other nine 4-year public institutions. The 13 public 4-year institutions included:

- University of Missouri-Columbia
- University of Missouri-Kansas City
- University of Missouri-St. Louis
- Missouri University of Science and Technology (formerly the University of Missouri-Rolla)
- Lincoln University (in Jefferson City)
- Harris Stowe University (in St. Louis)
- Truman State University (in Kirksville)
- Northwest Missouri State University (in Maryville)
- Southeast Missouri State University (in Cape Girardeau)
- Missouri State University (in Springfield)
- Missouri Southern State University (in Joplin)
- Missouri Western State University (in St. Joseph)
- University of Central Missouri (in Warrensburg)

To determine whether the contracts with these university officials were in compliance with the Missouri Constitution and/or in the best interest of the institution, we reviewed the related policies and contracts covering the period from fiscal year 2005 through fiscal year 2010. As part of our audit. we considered related matters reported in recent SAO university audits involving former and current presidents and chancellors.

To determine the effectiveness of Section 173.003, RSMo, we reviewed relevant policies and procedures and discussed provisions of the statute with MDHE and institution officials. We also reviewed other relevant statutory and constitutional provisions to determine the authority granted institution governing boards and any oversight responsibilities of the MDHE. We also communicated with various institution officials, including members of the governing boards in some instances, to determine the reason(s) for certain actions and/or to obtain an explanation for certain contract provisions.

Contract Provisions

The governing boards of some public 4-year universities provided separation and retention compensation and benefits to current or outgoing top-ranking officials which may not comply with the Missouri Constitution and/or may not be in the best interest of the institution. In addition, legislation passed after our 2000 audit has not been completely effective in limiting or controlling questionable severance, separation, and retention contracts with top outgoing university officials.

University contracts

Our review of the employment contracts of presidents and appointment letters of chancellors of the 13 public 4-year institutions disclosed many separation or retention provisions that appeared reasonable and/or represented standard practices in the event the official resigned or terminated. Those contracts generally provided for no further compensation or benefits beyond the effective date of the official's resignation. If terminated without cause, the contracts generally provided the official with severance payments of salary and benefits ranging from 6 to 12 months (or the time remaining on the contract, whichever was less). For three of the four campuses of the University of Missouri system, the appointment letters indicated the respective chancellors were considered administrative "at-will" appointments and no severance payments were contractually provided in the event of termination.

However, the governing boards of 5 of the 13 public 4-year institutions entered into contracts with institution presidents which included provisions that may not comply with the Missouri Constitution and/or may not be in the best interest of the institution.

Missouri Southern State University

In August 2007, the Board of Governors of Missouri Southern State University entered into a separation agreement with then University President Julio S. Leon. According to the agreement, Dr. Leon had expressed a desire to resign as President of the university. The agreement noted he had served with distinction in that position for 25 years and as an employee for a total of 38 years (he was previously a professor and dean).

According to the August 2007 agreement, the President's resignation was effective September 1, 2007. The agreement provided that no later than December 31, 2008, on a date or dates to be determined by Dr. Leon, the university would pay him, or his estate should he be deceased, $168,518 (his annual base salary as President) less withholding tax and any other deductions required by law or authorized by the President. This payment was not contingent upon the performance of any tasks, duties or obligations. The agreement also stated that Dr. Leon would be named "President Emeritus" by resolution of the Board of Governors and be provided a faculty office and computer in the Business School.

Under the terms of the agreement, the outgoing President could also elect to teach part-time beginning in the fall semester of 2008. If he elected to teach,

his compensation would be prorated based upon the number of hours actually worked as compared to the number of hours worked by the highest paid full-time professor. University officials indicated Dr. Leon did not exercise this option.

This agreement indicated it was a modification of the President's existing employment contract. That July 2006 contract provided that Dr. Leon could resign as University President and be relieved of his duties at the end of any fiscal year, providing he had given a full year's notice of his intention to resign. In such event, he would be entitled to a 6 month sabbatical at his monthly base pay and at the end of the sabbatical, he would have the right to return to the university as a professor at a salary equal to 115 percent of the highest paid professor then employed at the university. The July 2006 contract also provided that if the President's employment was terminated for any reason, except for cause, the university would pay him the base salary for the next 12 months.

The purpose of the $168,518 payment in the August 2007 agreement or the 6 month sabbatical (at full pay) in the July 2006 employment contract were not disclosed in either document. In November 2010, we asked board officials why the university believed these provisions were in the best interest of the university. In response, the board's attorney acknowledged our request letter, but provided no explanation other than to note the agreement speaks for itself. Considering the former President was under no legal obligation to perform any services for this compensation, it is not clear why the university agreed to these contract provisions.

Northwest Missouri State University

As similarly reported in Report No. 2011-47, *Northwest Missouri State University*, issued in September 2011, in July 2004, the Northwest Missouri State University Board of Regents and then President Dean L. Hubbard executed an employment contract which covered a 6-year period ending June 30, 2010. The contract indicated Dr. Hubbard intended to retire as the university's President after June 30, 2009, and it provided that if the board was successful in finding a suitable replacement by that date, the former President would be employed by the university to serve in a transition role during the year ended June 30, 2010. Dr. Hubbard did subsequently step down as University President effective July 1, 2009, after serving in that position for 25 years. The former President then subsequently served in a transition role for a year as provided by the contract.

The employment contract approved by the Board of Regents in 2004 provided the former President's salary during the transition year was to be no less than the salary paid him during the last year he served as President of the university. As a result, the former President received a salary of $224,762 during the transition year (his base salary as President). The 2004 employment contract did not specify duties to be performed by the former President during the transition year, but provided he would perform such

duties as outlined by the new President and approved by the Board of Regents.

The Board of Regents hired a new President who assumed the duties of that position effective July 1, 2009. During the transition year the former President submitted monthly activity reports to the new University President which summarized activities he had been involved in on behalf of the university. While some of the activities appeared to benefit the university directly, others did not. Some of the activities reported included:

- Teaching at least two classes, one class for NWMSU and a graduate-level class for an out-of-state university
- Performing statistical and financial analysis for the university
- Seeking additional grants and external funding
- Writing an education-related blog and/or articles for the Kansas City Star
- Serving on a higher education-related foundation board
- Speaking at various engagements

The new President indicated a primary benefit of the former President's services/activities during the transition year was to help maintain and/or build current and future relationships between outside parties (particularly donors) and the university's new leadership.

In addition to the salary paid during the transition year, the 2004 employment contract provided the former President would receive hospitalization, major medical, travel risk, and long-term disability insurance during the transition year and for a year following the transition year. In addition, the contract provided the university would provide health and accident insurance for the former President's dependents (his wife) during this 2-year period. The insurance and other benefits cost the university $30,140.

The 2004 employment contract also provided the university would 1) pay for suitable housing for the former President during the transition year if the former President lived in Maryville, and 2) pay all necessary moving and relocation expenses in vacating the university-provided home. When the former President retired in July 2009, he was not required to live in Maryville. As a result, the university incurred costs of $8,930 to move the personal property and furnishings of the former President to his new place of residence in Kansas City.

While it is apparent the former President provided some services to the university during the transition year of his contract, it is not clear to what extent those services benefited or assisted the university's new leadership or whether the services justified the salary and benefits provided.

Harris Stowe State University

In January 2009, the Board of Regents of Harris Stowe State University entered into a new employment contract with President Henry Givens, Jr., who had served in that position for approximately 30 years. According to the contract, Dr. Givens was to be employed as President of the university for a period of 12 months commencing on January 1, 2009, at a salary of $209,634, and then be subsequently employed as a consultant commencing on July 1, 2010, for a period of 3 years. The agreement also provided for a partial sabbatical leave during the 2009-2010 fiscal year at the same salary and benefits he received as President. The agreement also provided Dr. Givens would be named "President Emeritus of the Institution" upon his retirement.

According to the contract, he was to receive compensation of $95,000 during each of the 3 years he was to serve as consultant and his duties would include the following.

- Research and write the history of Harris Stowe State University from 1979 to the present
- Advise the regents on legislative matters
- Assist in fund raising
- Advise on campus expansion projects

The contract also provided that in recognition of the President's willingness to forego other employment opportunities and the President's 30 years of distinctive service, the university would provide the President lifetime participation in the university's medical, dental, and vision insurance programs, lifetime long-term individual care insurance, and lifetime term life insurance in the amount of $100,000. The cost of these benefits in fiscal year 2009 was $19,167.

In August 2010, a new contract was entered into between the Board of Regents and Dr. Givens which provided that he continue to serve as President through June 30, 2011, at a salary of $210,000, and then serve as an advisor for 2 years commencing on July 1, 2011. The contract provides Dr. Givens will perform duties similar to those in the previous contract and will receive annual compensation of $70,000 for his advisory services. Under this new contract, Dr. Givens will still receive the partial sabbatical and lifetime health, long-term care, and life insurance benefits provided in the earlier contract. In May 2011, Dr. Givens told us the compensation he would receive as an advisor to the board would be paid from private or other sources rather than from university funds. In addition, he indicated he would

likely not have time to take the paid sabbatical as provided for in the January 2009 and August 2010 contracts.

While it appears the President will provide some services to the university during the 2-year consultant period, it is not clear if those services will justify the compensation to be paid or lifetime benefits of health, long-term care, and life insurance to be provided at university expense.

Truman State University

In September 2008, the Board of Governors of Truman State University entered into a separation agreement with then University President Barbara B. Dixon. According to the agreement, Dr. Dixon had expressed a desire to resign from employment with the university and the President and board desired to maintain an amicable relationship and resolve any and all issues pending or that might arise. Dr. Dixon had served as President for over 5 years and her employment contract was not due to expire until June 30, 2009.

Dr. Dixon resigned effective October 15, 2008, and as provided by the agreement continued employment with the university serving in the role of consultant to the Board of Governors for a period of a year. During this period, the former President received a total salary of $205,050, her base salary as President. The agreement also provided that if at the end of the 1 year period the board determined the former President had performed satisfactorily, an additional $10,000 would be paid into a deferred compensation account, and the university would pay health insurance costs for 6 additional months. According to university officials, the $10,000 payment was paid to the former President, but payment for 6 additional months of health insurance was not made.

The agreement did not require the former President to perform any specific tasks, duties, or obligations while serving as consultant to the board. However, it indicated Dr. Dixon might be requested to attend various mutually agreed upon university functions and activities, and to assist in fundraising, the search for a new President, and such other activities as the board may deem appropriate. The agreement did not require Dr. Dixon to live in Kirksville (the site of the university). Based on discussions with university officials, the only documented task or duty the former President performed during the 1 year period she served as a consultant was to document her thoughts and recommendations regarding actions that might be taken as cost saving measures.

The previously existing August 2006 employment contract did not obligate the university to pay any further salary or benefits beyond the effective date of the President's resignation. If the university chose to terminate the contract without cause, Dr. Dixon could either retain a tenured professor position at an annual salary of 60 percent of the President salary or elect to

resign her tenure, in which case, the university would be required to pay her "liquidated damages" in an amount equal to 6 months of her annual salary.

University officials told us the board and the former President had disagreed on the direction to take the university, and since the university was in the midst of a capital campaign they wanted to avoid negative publicity, Dr. Dixon agreed to resign from her position as President. Because of these circumstances and to avoid future issues, the board entered into the resulting separation agreement with the former President. However, considering the limited duties the former President was asked to provide as consultant, it is not clear whether the decision by the Board of Governors to compensate her (at her base salary) for an additional year was appropriate.

Missouri State University

As similarly reported in Report No. 2010-125, *Missouri State University*, issued in October 2010, that university's contract with former President Michael T. Nietzel included a tenure and retreat clause. Under this clause, the former President was granted the option to retreat to a tenured professorship within the Department of Psychology and be compensated 60 percent of his current salary as President. The contract also provided the option to take a leave of absence for either the first academic semester at full pay or for the first academic year at 50 percent pay, either option would be paid at the reduced salary.

In November 2009, then President Nietzel announced his intentions to resign from his position as President and on April 1, 2010, became an unpaid advisor to the Governor regarding matters related to higher education. Effective July 31, 2010, the former President resigned and went on a leave of absence from the university for one semester at full pay. Dr. Nietzel had served as President of the university since 2005. After the paid leave of absence, which included the fall semester of 2010, the former President returned to the university to accept a professorship at 60 percent of his President's salary.

The former President's fiscal year 2010 contract stated his annual compensation would be $267,372. Therefore, the former President was compensated at the rate of $160,423 (60 percent of his President's salary) annually as a faculty member, which is approximately $68,000[2] more than the highest paid faculty member in the Department of Psychology, for assuming teaching duties equal to other tenured professors. The former President was also compensated $80,211 (50 percent of his new tenured professor salary) for the paid leave of absence during the Fall 2010 academic semester.

[2] ($267,372 x 60% = $160,423 - $92,240 = $68,123) $92,240 represents the highest compensation paid to a faculty member of the Department of Psychology during the year ended June 30, 2010.

The purpose of the leave of absence and the tenure and retreat clause was not disclosed in the contract provisions. Although the President might have been involved in activities benefiting the university during the leave of absence, he was under no legal obligation to perform any services. In addition, the salary paid to the former President when he assumed his new professorship duties appears to have been excessive.

Legal compliance

In three of the instances discussed above, the President had served in that position for an extended period (ranging from 25 to 31 years), and it appears the related separation and/or retention compensation and benefits paid to those individuals may have been provided, at least in part, in appreciation for past service. While it is understandable the respective boards would appreciate and might want to recognize the past contributions of a long-term president in a monetary way, it does not appear legal to do so. Article III, Section 39, Missouri Constitution[3], prohibits the payment of compensation for services previously rendered.

Effectiveness

The legislative intent of Section 173.003, RSMo, could not be readily determined because its provisions are ambiguous and not clearly applicable to top university officials. As a result, most of the 4-year public institutions have not formally adopted plans and policies specifically addressing severance, separation, and/or retention payments or benefits for top university officials, with only two (Missouri State University and Southeast Missouri State University) having done so.

If the intent of Section 173.003, RSMo, was to limit or control questionable severance, separation, and retention contracts with top outgoing university officials, the examples cited in this report would indicate that statute has not been completely effective in doing so.

Recommendations

1. The MDHE work with the governing boards of the state's public colleges and universities to help ensure the terms of employment or separation contracts entered into by those boards with current or outgoing top officials only include separation and/or retention provisions that comply with Article III, Section 39, Missouri Constitution and does not constitute additional compensation for services previously rendered. Such provisions should be clear as to their purpose and intent and identify the specific duties or services, if any, to be performed by the official after stepping down as the institution's chief executive officer. Any additional compensation should be reflective of the services performed after leaving office.

[3] Attorney General's Letter No. 114, 1987 to Jacob, determined this section of the constitution applies to any government agency which derives its power and authority from the constitution and laws of this state. This would include public colleges and universities.

2. The General Assembly review the matters discussed in this report, and determine whether additional legislative changes are needed to limit severance, separation, and retention compensation and other benefits to outgoing top university officials.

Auditee's Response

1. The MDHE provided the following response:

As we noted in our prior discussion and emphasize again here: this department simply has no authority over an institution's personnel decisions. By constitution and statute in the case of the University of Missouri System and by statute in the case of the other public institutions, their governing boards are vested with complete authority in these matters. See e.g., MO Constitution, Article IX, Section 9(a); Sections 172.300, 174.120 and 174.140 RSMo. Not only is this division of authorities very clear, the MDHE would have no basis for substituting its judgment for that of the governing board in determining what matters of compensation are reasonable in a given circumstance. Those boards have command of the facts and extenuating circumstances and are charged with the fiduciary responsibility to act in the institutions' best interests. Moreover, they have their own legal counsel to ensure that all contractual provisions are in compliance with applicable law. In sum, the coordinating role of the department should not be extended to areas that are not contemplated by our statutes and fall under the exclusive purview of the institutional boards.

Auditor's Comment

We are not suggesting the MDHE has authority over an institution's personnel decisions. However, according to Section 173.030(2), RSMo, it is the MDHE's responsibility to make recommendations for policy changes to the governing board of any public higher education institution in the state when such action is deemed by the coordinating board to be in the best interests of the institutions and/or the general requirements of the state.

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Missouri Health and Educational Facilities Authority (MOHEFA)

Expenditures	MOHEFA has not established travel policies in compliance with Executive Order No. 92-6 and does not adequately control travel costs for its board members, employees, or contractors. MOHEFA reimbursed some personal incidental expenses and some expenses which exceeded costs allowable under state regulations. Some MOHEFA expenses did not appear prudent or necessary, and MOHEFA did not always retain adequate supporting documentation. MOHEFA paid contractors over $239,000 in fiscal year 2010 but failed to file Forms 1099, as required by the IRS.
Fund Balance and Fees	MOHEFA has not modified its fee structure since 2007 and collected over $990,000 in annual service fees in fiscal year 2010. MOHEFA has a fund balance of over $10 million with limited plans for its use. If MOHEFA does not have plans to expand its existing programs or develop new programs, it should re-evaluate its fees to ensure they are reasonable and necessary to carry out its purposes.
Procurement and Contracts	MOHEFA has not adopted a formal procurement policy as required by Executive Order No. 92-6 and has not always solicited competitive proposals for goods and services. MOHEFA has not periodically solicited competitive proposals for professional services and did not solicit bids for the purchase of its copier or the publication of its annual report. MOHEFA should receive, review and retain adequate supporting documentation for amounts billed for auditing, accounting and legal services. We identified a $591 overpayment by MOHEFA because its legal services provider billed at the higher 2009 rate for services performed in 2008; MOHEFA subsequently received a credit for that amount.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The Missouri Health and Educational Facilities Authority did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the Board of Directors
and
Michael Stanard, Executive Director
Missouri Health and Educational Facilities Authority
Chesterfield, Missouri

We have audited certain operations of the Missouri Health and Educational Facilities Authority in fulfillment of our duties under Chapter 29, RSMo. The authority engaged Schmersahl Treloar and Company, Certified Public Accountants (CPAs), to audit the authority's financial statements for the years ended December 31, 2010, 2009, and 2008. To minimize duplication of effort, we reviewed the reports and substantiating working papers of the CPA firm. The scope of our audit included, but was not necessarily limited to, the years ended December 31, 2010, 2009, and 2008. The objectives of our audit were to:

1. Evaluate the authority's internal controls over significant management and financial functions.

2. Evaluate the authority's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the authority, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contracts or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the authority's management and was not subjected to the procedures applied in our audit of the authority.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with certain legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Missouri Health and Educational Facilities Authority.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Dennis Lockwood, CPA
In-Charge Auditor:	Travis Owens, MBA, CFE
Audit Staff:	Janielle Robinett

1. Expenditures

Concerns were noted regarding travel costs, unnecessary purchases, failure to retain supporting documentation, and failure to file IRS Form 1099s as required.

1.1 Travel costs

The Missouri Health and Educational Facilities Authority (MOHEFA) does not adequately control travel costs of board members, employees, or contracted professional service providers. The MOHEFA has not established travel policies that are substantially equivalent to travel policies for state agencies, as required by Executive Order No. 92-6.

Executive Order No. 92-6 requires all state boards and commissions to maintain a policy governing travel rules and regulations equivalent to or substantially equivalent to rules established by the Missouri Office of Administration (OA). The state travel policy (SP-6) issued by OA establishes standard policies and limits for lodging and meals and requires agencies to select the most cost effective mode of travel. Out-of-state travel costs for lodging and meals are generally limited to rates for the continental United States (CONUS) established by the U.S. General Services Administration. The MOHEFA travel policy was outlined in a memo dated August 21, 2003, drafted by the Board Chair at that time and allows for any expense necessary for a board member or staff to attend events including training sessions, conferences, and meetings. The policy does not establish monetary limits on meals and lodging and does not require a determination of the most economical mode of travel or guidelines for making that determination.

During the 3 years ended December 31, 2010, MOHEFA costs for conferences and conventions totaled just under $25,000 and costs for meetings totaled over $18,000. All travel costs were charged to these two categories. These categories also include a small amount of other expenses such as conference registration fees and miscellaneous board meeting expenses. Of the $43,000 spent in these categories we reviewed expenditures totaling about $13,000 and identified costs totaling approximately $7,200 that exceeded costs allowable under state travel regulations or were unnecessary. The questionable expenditures identified represent approximately 55 percent of the costs reviewed in these categories.

Employee and contractor travel costs

The MOHEFA travel policy does not provide per meal or per diem limits. Our audit noted other costs were incurred that would not be allowable under state travel regulations. MOHEFA employees and the financial advisor incurred travel expenses for airfare, mileage, meals, and lodging for at least two out-of-state conferences each year and other training sessions and meetings. We reviewed meal costs incurred by employees while attending three out-of-state conferences in 2008 and 2009. In total, we reviewed meal costs for 9 travel days totaling about $518 and noted costs exceeded the

CONUS rates for 5 of those days by a total of $299. One employee charged $145 for meals for himself and his spouse on the day after an April 2009 conference ended and there did not appear to be any business purpose for those costs. Another employee attending the same conference returned the day the conference ended and incurred no additional costs. We also noted personal incidental expenses totaling $205 for laundry, long distance, and parking for the board's financial advisor while attending a conference were reimbursed. The Executive Director agreed these were personal charges which should not have been reimbursed. In total, for the 9 days reviewed we identified $649 in employee and contractor costs that exceeded costs allowable under state travel regulations.

Board travel costs

MOHEFA policy does not provide for effective control of board member travel costs. Board members may attend monthly meetings in person or via conference call and some members incur travel expenses for mileage, meals, and lodging when attending monthly meetings. We noted instances where lodging and meal reimbursements and related travel costs exceeded state limits or appeared unreasonable including:

- We tested credit card expenditures of approximately $952 related to three 2-day trips by a board member for attendance at board meetings. The nightly lodging costs exceeded the CONUS limits by $98, $14, and $38. The board member also charged meals of $158, $125, and $101 per trip. MOHEFA officials indicated meals for the board member's spouse were included; however, no itemized receipts were provided. MOHEFA policies allow reimbursement of meals for spouses of board members while attending MOHEFA functions. Due to the lack of itemized receipts and documentation regarding departure and return times, we were unable to determine if the meal costs exceeded the state per diem or CONUS limits.

- On two occasions the MOHEFA incurred costs for chartered flights and car service for board members to attend board meetings. One board member incurred expenses of $2,886 for a chartered flight and $132 for car service to attend the July 2008 meeting. The same board member and another member incurred expenses of $1,061 for a chartered flight and $129 for car service to attend the April 2010 meeting. Had the board members driven their own vehicles and been reimbursed mileage, the MOHEFA would have realized a cost savings of approximately $2,600 for the 2008 trip and $650 for the 2010 trip, including estimated additional lodging and meal costs. The MOHEFA travel policy does not require members or employees to determine the most economical mode of travel.

To better control travel costs and comply with Executive Order No. 92-6, the MOHEFA should establish travel policies for employees, board

members, and contractors that are substantially equivalent to state travel policies including limits for lodging and meals, and ensure the most economical mode of travel is used.

1.2 Unnecessary expenditures

We noted expenditures which did not appear to be prudent or necessary uses of MOHEFA funds:

- The annual sponsorship of a convention for a hospital industry association totaling $37,500 for the 3 years ended December 31, 2010. The annual convention sponsorship includes about $9,500 for food and $3,000 for beverages (including alcohol) for an estimated 500 attendees. In addition, the MOHEFA provided $6,000 over the 3 years for a sponsorship of the association's annual leadership forum. The MOHEFA indicated the members of the association include entities participating in MOHEFA bond financing activities. MOHEFA officials also indicated such sponsorships provide a positive benefit to the MOHEFA including an increased demand for MOHEFA services.

- Three annual dinners totaling about $2,700 which averaged $72, $74, and $50 per person during the years ended December 31, 2008, 2009, and 2010, respectively. The annual dinners are hosted for board members, employees, and their spouses. No documentation was available to support whether authority business was conducted at the annual dinner, and itemized receipts were not retained. The dinners took place in March on the same date as a board meeting during which new officers were elected for the subsequent year.

These expenditures, totaling about $46,200, do not appear to be necessary costs required to support the MOHEFA's mission and maintain its operations and activities.

1.3 Supporting documentation

Adequate supporting documentation was not retained to support some items purchased. We reviewed the supporting documentation for 15 journal entries totaling about $14,000 related to credit card transactions. Itemized invoices were not retained for 4 credit card transactions totaling $2,171. Purchases included picture framing services of $1,110; lodging charges of $701; a cell phone purchase of $182 by the Executive Director; and an employee training course costing $178. Proper document retention is necessary to demonstrate compliance with internal policies and procedures.

1.4 IRS Form 1099

The MOHEFA does not have adequate procedures in place to ensure a Form 1099 is filed with the Internal Revenue Service (IRS) when required. As a result, the MOHEFA did not file Form 1099s with the IRS for payments to the financial advisor, legal counsel, or legislative consultant for any of the 3 years ended December 31, 2010, as required. Total payments to these contractors in 2010 exceeded $239,000.

Sections 6041 through 6051 of the Internal Revenue Code require payments of at least $600 or more in a year to an individual for professional services or for services performed as a trade or business by nonemployees (other than corporations, unless legal services were provided) be reported to the federal government on Form 1099-MISC.

Recommendations

The MOHEFA:

1.1 Establish travel policies that are substantially equivalent to those for state agencies as required by Executive Order No. 92-6, including limits for lodging and meals, and ensure the most economical mode of travel is used.

1.2 Ensure all expenditures are reasonable and necessary to support the operations of the authority.

1.3 Ensure all invoices and receipts are retained with the billing statement for credit card purchases.

1.4 Prepare and submit IRS Form 1099-MISC as required by the Internal Revenue Code.

Auditee's Response

1.1 MOHEFA agrees that a more detailed travel policy should be adopted for Board Members, staff and advisors. We will endeavor to enhance and revise our policies as such. We will continue our level of limited travel, seek to achieve substantial and reasonable compliance with limits set forth in Executive Order No. 92-6 (even though its applicability to the Authority may be uncertain) and ensure the best and most economical mode of travel, lodging and meals are used.

1.2 We believe expenditures have been reasonable and beneficial to Authority operations and will continue to monitor all expenses to ensure the Authority's resources are used in best achieving its mission. In addition, we will continue to monitor the need for Authority Member participation in certain dinners.

1.3 We agree and even more care will be taken to ensure that proper receipts and invoices are retained with the statements.

1.4 We are seeking professional advice on proper filing of Forms 1099 and will file in the future if so advised.

2. Fund Balance and Fees

The MOHEFA has accumulated an unrestricted fund balance of approximately $10.1 million with only limited plans for its use. The MOHEFA has not adjusted its fee structure since 2007.

As of December 31, 2010, MOHEFA assets included about $6,600,000 in cash and cash equivalents, $200,000 in investments, and $3,500,000 in notes receivable and other assets. The MOHEFA has not developed any additional plans to use the available funds to develop new programs to further its public mission.

The MOHEFA issues bonds which are are conduit debt and the MOHEFA has no liability for repayment of the debt, which is the responsibility of program participants. MOHEFA officials indicated they have attempted, with limited success, to expand the Health and Educational Loan Program (HELP). They also offer the School District Advance Funding Program and the Higher Education Working Capital Loan Program. Additionally, the MOHEFA administers the School District Direct Deposit Program in coordination with Missouri Department of Elementary and Secondary Education. MOHEFA officials indicated that statutory restrictions severely limit their ability to develop new programs. The MOHEFA collects related application and issuance fees for these programs and collects interest on loans and notes receivable. The revenues from fees and interest earnings on loans and notes receivables during the 3 years ended December 31, 2010, totaled approximately $3.4 million.

During the 3 years ended December 31, 2010, the MOHEFA also received revenues of about $449,000 from investments. The unrestricted fund balance has increased from $8,816,139 at December 31, 2007, to $10,133,416 as of December 31, 2010, an increase of $1,317,277 (15 percent). Annual disbursements averaged about $842,000 during the 3 years ended December 31, 2010. The unrestricted fund balance at December 31, 2010, is about 12 times greater than the 3 year average annual expenditures.

Pursuant to Section 360.095(1), RSMo, the MOHEFA is authorized to collect an annual service fee in an amount fixed from time to time by the authority, not exceeding one-tenth of one percent of the outstanding principal amount of any bonds issued by the authority. The fees shall be used for necessary administrative expenses and for necessary expenses incurred in determining the need for facilities in the area concerned.

Application fees for a bond issuance are set at $1,000. Annual service fees are .02 percent of the amount outstanding for each bond issue up to $40 million and .01 percent for the portion of bonds outstanding over $40 million. As of December 31, 2010, MOHEFA reported a total of approximately $7.2 billion in bonds were outstanding and for the year ended December 31, 2010, reported annual service fee revenues of over $992,000.

The MOHEFA last modified the fee structure in 2007. Prior to 2007, the annual service fee was set at .03 percent.

The current MOHEFA fee structure is comparable to other similar entities that issue bonds, such as the Missouri Development Finance Board and the Environmental Improvement and Energy Resources Authority. Given the substantial fund balance, it appears the MOHEFA could reduce fees without impairing its financial stability. A reduction of fees would reduce the cost of financing to the entities using MOHEFA services.

Accumulating an excessive fund balance without adequate long-term plans for the use of the monies does not further the public mission of the MOHEFA. The MOHEFA should examine its current fee structure to ensure fees are reasonable and necessary to carry out its purposes as established in state law and to benefit entities using MOHEFA services.

Recommendation

The MOHEFA re-evaluate its fee structure to ensure fees are reasonable and necessary to carry out its purposes.

Auditee's Response

We agree MOHEFA's fund balance has grown and, as a result, reduced our annual service fee by 1/3 in 2007. Currently MOHEFA's fees are less than 20 percent of what is allowed by statute and are the 4th lowest nationally among 39 similar state authorities. We will continue to periodically consider the fee structure with respect to the Authority's operations, value to the borrowing institution and potential industry and financial uncertainties in the future. The fund balance is used to make loans to small borrowers under the HELP Program and to serve as a reserve fund of three times annual expenses. Since the HELP Program's inception in 1996, MOHEFA has made 28 loans totaling $6.9 million with an outstanding balance as of June 30, 2011, of $3.3 million. Numerous other programs, program enhancements and potential uses have been regularly considered by MOHEFA.

3. Procurement and Contracts

The MOHEFA has not adopted a formal procurement policy and has not always solicited competitive proposals for goods and services. Additionally, the MOHEFA did not always ensure vendor billings complied with all terms and conditions of contracts.

3.1 Procurement policies

The MOHEFA does not have a formal procurement policy. As a result, the decision whether or not to solicit competitive proposals for a particular purchase is made on an item-by-item basis.

Bond issuance services

The MOHEFA has not periodically solicited competitive proposals for legal, legislative, and financial consulting services related to MOHEFA bond issuances. Officials stated competitive proposals for these services were solicited in 2004 and the initial contracts were awarded for a period of

5 years. The contracts expired in 2009 and the MOHEFA did not solicit competitive proposals prior to extending the contracts for an additional 5 years. The MOHEFA agreed to minimal price increases and no other significant changes to the contract terms were noted. Payments to the general counsel, legislative consultant, and financial advisor totaled about $728,000 during the 3 years ended December 31, 2010.

After the extension of the financial advisor's initial contract through 2014, the MOHEFA subsequently solicited competitive proposals for a new financial advisor in 2010, after the death of the former advisor. The new contract was awarded to the lowest and best bidder under similar terms and conditions as the previous financial advisor contract.

Other goods and services

The MOHEFA has not periodically solicited competitive proposals for banking, auditing, and accounting services and does not always solicit proposals for other goods and services.

The MOHEFA utilizes one primary checking account for deposits and disbursements. This overnight repurchase account has been held at the same bank since approximately 1997. According to MOHEFA officials, the bank deducts a portion of the monthly service fees from the interest earned on the account. The MOHEFA has not solicited proposals for banking services since 1997 and has not performed an analysis of fees at other local banks to determine if it receives a competitive rate.

The MOHEFA contracts with a local accounting firm for completion of the annual financial audit, preparation of monthly bank reconciliations, and an annual review of the school district direct deposit program. Officials stated competitive proposals for these services were solicited in 2004 and the initial contracts were awarded for a period of 5 years. The contracts for these services expired in 2009 and the MOHEFA did not solicit competitive proposals prior to extending the contracts for an additional 5 years. The MOHEFA agreed to minimal price increases and no other significant changes to the contract terms were noted. Payments to the accounting firm totaled about $25,000 for the 3 years ended December 31, 2010.

During our review of expenditures we noted other goods and services which were not competitively selected, including publication costs and purchase of a copier. Each year the MOHEFA publishes an annual report to send to potential stakeholders. Publication costs for the 3 years ended December 31, 2010, totaled approximately $8,000 annually. Additionally, the MOHEFA purchased a new copier in 2009 for about $12,000. MOHEFA officials stated they were satisfied with the services of these vendors and, although they requested price quotes in advance, they did not solicit competitive proposals from other vendors.

Per Executive Order No. 92-6 all state boards and commissions are to implement purchasing policies equivalent to or substantially equivalent to state purchasing guidelines outlined in Chapter 34, RSMo. Section 34.040.1, RSMo, requires competitive bids on all expenditures in excess of $3,000.

Formal procurement policies would provide a framework for the economical management of resources of the MOHEFA and help ensure competitive proposals are obtained when appropriate. By periodically soliciting competitive proposals for goods and services, the MOHEFA could help ensure it receives fair value by contracting with the lowest and best bidders and also help ensure all parties are given equal opportunity to participate in MOHEFA business. Documentation of bids should be retained and include, at a minimum, a listing of vendors from whom bids were requested, a copy of the request for proposal, newspaper publication notices when available, bids received, the basis and justification for awarding bids, and documentation of all discussions with vendors.

3.2 Contracts and invoices

Concerns were noted regarding documentation required to support charges for auditing and accounting services and contract pricing for legal services.

Auditing and accounting services

The MOHEFA did not require adequately detailed contracts and did not always receive adequate supporting documentation prior to payment of invoices for auditing and accounting services. While the contracts with the accounting firm specify an annual maximum for the annual financial audit, preparation of monthly bank reconciliations, and annual review of the direct deposit program, the contracts do not specify the hourly rate for the services performed. The contracts indicate charges will be based on hours required to perform the services. The invoices submitted by the accounting firm do not provide sufficient detail of the charges and charges appear to be based on a flat monthly rate which conflicts with the language in the contract.

Legal services

The MOHEFA did not always ensure the charges for legal services complied with the terms of the contract. Payments to the law firm totaled about $216,000 for the 3 years ended December 31, 2010. The contract specifies separate hourly rates for partners and associates which increase annually. The invoice for services incurred between August and December 2008 was calculated using the higher 2009 pricing which resulted in an overpayment of $591. After we brought this matter to the attention of MOHEFA officials, they requested and subsequently received a credit for the overbilled amount.

Detailed supporting documentation is necessary to allow the MOHEFA to adequately review services performed and ensure the reasonableness of amounts billed. Invoices should be compared to all terms and conditions of the contract to ensure compliance prior to payment to the vendor.

Recommendations

The MOHEFA:

3.1 Establish a formal procurement policy to ensure competitive proposals for goods and services are solicited on a periodic basis.

3.2 Ensure all invoices agree to contract terms and contain sufficient detail, including actual hours incurred and hourly rates billed.

Auditee's Response

3.1 We will endeavor to formalize our policy for procurement of goods and services and will competitively solicit quotes when possible and reasonable. Contracts with advisors are reviewed annually and have been bid periodically in the past. We will continue to do so when appropriate and in the best interest of the Authority and its borrowers. Exceptions will be better documented in the future.

3.2 Contracts and invoices for professional services have almost always agreed with rare exceptions. The contract with the Authority's independent auditor will be adjusted to better reflect the intent of both parties.

Missouri Health and Educational Facilities Authority
Organization and Statistical Information

The Missouri Health and Educational Facilities Authority (MOHEFA) was created by an act of the General Assembly and established in 1975 pursuant to Section 360.020, RSMo. The authority issues conduit debt for the financing of capital improvement projects for nonprofit health and educational facilities located in Missouri. The MOHEFA is governed by seven members appointed by the Governor. The authority is a self-supporting entity administratively assigned to the Office of Administration of the State of Missouri. The MOHEFA receives no state support or appropriations.

The MOHEFA's mission is to provide access to the capital markets in an effort to lower the cost of health and educational services in Missouri by providing high quality, readily available, low cost financing alternatives for Missouri public and private, nonprofit health and educational institutions. In addition to issuing bonds, the MOHEFA offers the Health and Educational Loan Program, the School District Advance Funding Program, and the Higher Education Working Capital Loan Program. The MOHEFA also serves as program trustee for the Missouri School District Direct Deposit Program administered in conjunction with the Missouri School Boards' Association.

Members of the authority at December 31, 2010, were:

Appointed Board members	Term Expires
Judith Scott, Chairman	July 30, 2011
Nadia Cavner, Vice-Chairman (1)	July 30, 2007
Kevin Thompson, Treasurer (1)	July 30, 2009
Donald Thompson (1)	July 30, 2008
Thomas Carlson (1)	July 30, 2010
Sarah Maguffee	July 30, 2013
Vacant	n/a

(1) Member continues to serve until a replacement is named.

Michael Stanard has served as the MOHEFA's Director since approximately May 1998. Additionally, the authority employs two staff to conduct the day to day business of the MOHEFA.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The MOHEFA did not receive any federal stimulus monies during the 3 years ended December 31, 2010.

A summary of the MOHEFA's financial activity is presented in the following appendixes.

INDEPENDENT AUDITORS' REPORT ON THE BASIC FINANCIAL STATEMENTS, REQUIRED SUPPLEMENTARY INFORMATION, AND SUPPLEMENTARY SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS

To the County Commission
and
Officeholders of Pemiscot County, Missouri

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of Pemiscot County, Missouri as of and for the years ended December 31, 2010 and 2009, which collectively comprise the basic financial statements of the County's primary government as listed in the table of contents. These financial statements are the responsibility of the county of Pemiscot's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

As discussed in Note 1, Pemiscot County, Missouri, prepares its financial statements on the cash basis which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

The financial statements do not include financial data for a county legally separate component unit (the Health Center). In addition, several immaterial court funds have not been included. Accounting principles generally accepted in the United States of America require the financial data for those units to be reported with the financial data of the County's primary government unless the County also issues financial statements for Pemiscot County, Missouri that include the financial data for these units. The County has not issued such reporting entity financial statements. Because of this departure from accounting principles generally accepted in the United States of America, the assets, liabilities, net assets, revenues, and expenses do not include the omitted funds. In addition, the assets, liabilities, fund balances, revenues, and expenditures of the aggregate remaining fund information does not include the omitted funds.

In our opinion, because of the omission discussed previously, the financial statements referred to previously do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of Pemiscot County, Missouri as of December 31, 2010 and 2009 or the changes in financial position thereof for the years then ended.

Further, in our opinion, the financial statements referred to previously present fairly, in all material respects, the respective financial position cash basis of the governmental activities and each major fund of Pemiscot County, Missouri as of December 31, 2010 and 2009, and the respective changes in financial position cash basis thereof for the years then ended in conformity with the basis of accounting described in Note 1.

In accordance with *Government Auditing Standards*, we also have issued our report dated June 3, 2011, on our consideration of the County's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The County has not presented the Management's Discussion and Analysis that accounting principles generally accepted in the United States of America, as applicable to the cash basis of accounting, has determined is necessary to supplement, although not required to be part of the basic financial statements.

The budgetary comparison schedules and other supplementary information on pages 31 through 59 are not required parts of the basic financial statements, but are supplementary information required to accompany those financial statements by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. We did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements, referred to in the first paragraph, taken as a whole. The accompanying Schedules of Expenditures of Federal Awards are presented for purposes of additional analysis as required by U.S. Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and are not a required part of the basic financial statements. The accompanying Schedules of Expenditures of Federal Awards are the responsibility of the County. Such information has been subjected to the auditing procedures applied in our audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects when considered, in relation to the basic financial statements, taken as a whole, that were prepared on the basis of accounting discussed in Note 1.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED UPON AN AUDIT PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission
and
Officeholders of Pemiscot County, Missouri

We have audited the accompanying financial statements of Pemiscot County, Missouri as of and for the years ended December 31, 2010 and 2009, which collectively comprise the County's basic financial statements as identified in the table of contents and have issued our report thereon dated June 3, 2011. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the County's internal control over financial reporting as a basis for determining our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of Pemiscot County, Missouri's internal control over financial reporting.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the County's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of the internal control over financial reporting was for the limited purpose described in the first paragraph of this section and not designed to identify all deficiencies in internal control over financial reporting that might be deficiencies, significant deficiencies, or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above. However, we identified certain deficiencies in internal control over financial reporting, described in the accompanying Schedule of Findings and Questioned Costs items 10-1 and 10-3 that we consider to be significant deficiencies in internal control over financial reporting. A *significant deficiency* is a deficiency, or combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the financial statements of various funds of Pemiscot County, Missouri, are free of material misstatements, we performed tests of the County's compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed instances of noncompliance and other matters that are required to be reported under *Government Auditing Standards* and which are described in the accompanying Schedule of Findings and Questioned Costs as finding numbers 10-1 through 10-3.

There are no other matters reported in the accompanying Management Advisory Report.

The County's responses to the findings identified in our audit are described in the accompanying Schedule of Findings and Questioned Costs. We did not audit the County's responses and, accordingly, we express no opinion on them.

This report is intended solely for the information and use of management, audit committee, others within the entity, federal awarding agencies, and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

Notes to the Financial Statements

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The County of Pemiscot, Missouri ("County") is governed by a three-member board of commissioners, established in 1851. In addition to the three board members, there are six elected Constitutional Officers: County Clerk, Collector, Treasurer, Circuit Clerk, Sheriff, and Prosecuting Attorney.

These financial statements are presented on the cash basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP). Generally accepted accounting principles include all relevant Government Accounting Standards Board (GASB) pronouncements. In the government-wide financial statements, Financial Accounting Standards Board (FASB) pronouncements and Accounting Principles Board (APB) opinions issued on or before November 30, 1989, have been applied, to the extent they are applicable to the cash basis of accounting, unless those pronouncements conflict with or contradict GASB pronouncements, in which case GASB prevails.

A. Reporting Entity

These financial statements present financial accountability of Pemiscot County, Missouri as applied using the cash basis of accounting.

The County's operations include tax assessments and collections, state/county courts, county recorder, police and fire protection, transportation, economic development, social and human services, and cultural and recreation services.

The financial statements referred to above include only the primary government of Pemiscot County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that comprise the County's legal entity.

The financial statements do not include financial data for a County legally separate component unit (the Health Center). In addition, several immaterial court funds have not been included.

B. Basis of Presentation

Government-wide Financial Statements:

The Statement of Net Assets – Cash Basis and the Statement of Activities – Cash Basis present financial information about the primary government of Pemiscot County, Missouri only and not any of its component units. These statements include the financial activities of the primary government. Governmental activities generally are financed through taxes, intergovernmental revenues, and other nonexchange transactions. Business-type activities are financed in whole or in part by fees charged to external parties for goods or services. The County does not have any business type activities. These Government-Wide Financial Statements exclude fiduciary activities.

The Statement of Net Assets – Cash Basis presents the financial condition of the governmental activities of the primary government of Pemiscot County, Missouri at year-end. The Statement of Activities – Cash Basis presents a comparison between direct expenditures and program revenues for each function of the County's governmental activities. Direct expenses are those that are specifically associated with and are clearly identifiable to a particular function. Amounts reported as program revenues include: (a) charges to customers or applicants who purchase, use or directly benefit from goods, services or privileges provided by a given function, and (b) grants and contributions that are

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

B. Basis of Presentation (continued)

restricted to meeting the operational or capital requirements of a particular program. Taxes, unrestricted interest earnings, gains, and other miscellaneous revenue not properly included among program revenues are presented instead as general revenues. The comparison of direct expenses with program revenues identifies the extent to which each governmental function is self-financing or draws from the general revenues of the County.

Fund Financial Statements:

Following the government-wide financial statements are separate financial statements for governmental funds and fiduciary funds. The County does not have proprietary funds. Fiduciary funds are excluded from the government-wide financial statements. Major individual governmental funds are reported as separate columns in the fund financial statements. The County has determined that the General Revenue Fund, Special Road and Bridge Fund, Drainage Districts Fund, and Capital Improvement Sales Tax Fund are major governmental funds. All other governmental funds are reported in one column labeled "Non-major Governmental Funds." If applicable, the total fund balances for all governmental funds are reconciled to total net assets. The net change in fund balance for all governmental funds, if applicable, is reconciled to the total change in net assets as shown on the Government-Wide Statement of Activities – Cash Basis in the basic financial statements.

The fund financial statements of the County are organized on the basis of funds, each of which is considered a separate accounting entity with self-balancing accounts that comprise its assets, liabilities, fund balances/net assets, revenues and expenditures.

Governmental resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled. The various funds, summarized by type, are in the basic financial statements. The following fund types are used by the County:

Governmental Fund Types

Governmental funds are those through which most governmental functions are financed. The County's expendable financial resources and the related liabilities are accounted for through governmental funds. The measurement focus is upon determination of and changes in financial position rather than upon net income.

The following are the County's governmental major funds:

General Revenue Fund – The General Revenue Fund is the general operating fund of the County. It is used to account for all financial resources except those required to be accounted for in another fund.

Special Road and Bridge Fund – A special revenue fund is used to account for receipts of the County property tax levy and related expenditures for road maintenance and improvement projects.

Drainage Districts Fund – The Drainage District Funds are established for irrigation purposes. Funds are generally property tax revenues and in the current period, federal watershed dollars. Expenditures are to maintain irrigation of farm lands.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

B. Basis of Presentation (continued)

Capital Improvement Sales Tax Fund – The fund receives the sales tax dollars for the sales tax levy for capital improvements.

The other governmental funds of the County are considered non-major funds. They include special revenue funds, which account for the proceeds of specific revenue sources that generally are legally restricted to expenditures for specific purposes.

Fiduciary Fund Types

Agency – Agency funds are used to account for assets held by the County in a trustee capacity as an agent of individuals, private organizations, other funds or other governmental units. Agency funds are accounted for and reported similar to the governmental fund. Agency funds are custodial in nature (assets equal liabilities) and do not involve the measurement of results of operations. These funds account for activities of collections for other taxing units by the Collector of Revenue and other agency operations. Fiduciary funds ending cash balances are as follows:

	2010	2009
County School	$ 89,576	$ 88,346
Land Tax Surplus	9,740	9,663
Unclaimed Fee	9,561	9,491
School Building Revenue	66,189	61,023
General Revenue Capital	132	132
CERF	1,097	0
General School	13,945	0
Inmate Security	1,288	1,774
Fines and Forfeitures	40,327	(25,966)
Bank Interest	5	2,890
Private Car Tax	53,549	22,196
Public Utilities	(126,501)	(22,201)
City RR and Utility	72,947	0 .
Totals	$ 231,855	$ 147,348 .

C. Basis of Accounting

Basis of accounting determines when transactions are recorded in the financial records and reported on the financial statements. Government-wide financial statements and fund financial statements are prepared using the cash basis of accounting. This basis of accounting recognizes assets, liabilities, net assets/fund equity, revenues, and expenditures when they result from cash transactions except that the purchase of investments are recorded as assets; and as receivables and revenue in the fund statements as applicable; and receipts of proceeds of tax anticipation notes are recorded as liabilities. This basis is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

C. Basis of Accounting (continued)

As a result of the use of this cash basis of accounting, assets (such as accounts receivable and capital assets), revenues (such as revenue for billed or provided services not yet collected), liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and expenditures (such as expenses for goods or services received but not yet paid) are not recorded in these financial statements.

If the County utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while the fund financial statements for proprietary fund types, if applicable, would use the accrual basis of accounting. All government-wide financials would be presented on the accrual basis of accounting.

D. Property Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1, of the following year.

The assessed valuation of the tangible taxable property, included within the County's boundaries for the calendar year 2010 and 2009, for purposes of taxation were:

	2010	2009
Real Estate	$106,477,457	$106,794,261
Personal Property	$ 41,436,832	$ 41,488,288
Railroad and Utilities	$ 29,493,886	$ 29,978,478

The County Commission approved tax levies per $100 of assessed valuation of tangible taxable property for the calendar years for purposes of County taxation, as follows.

	2010	2009
General Revenue Fund	.1893	.1792
Road and Bridge	.2969	.2946
Hospital Maintenance	.3400	.3400
M & M Replacement	.2600	.2600

E. Deposits and Investments

Disclosures are provided below to comply with GASB Statement No. 40, ***Deposit and Investment Risk Disclosures.*** For the purposes of these disclosures, deposits with financial institutions are demand, time, and savings accounts, including certificates of deposit and negotiable order of withdrawal accounts, in banks, savings institutions, and credit unions. Investments are securities and other assets acquired primarily for the purpose of obtaining income or profit.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

E. Deposits and Investments (continued)

Deposits

In addition to depositing in demand accounts, political subdivisions such as counties have the authority to place excess funds in certificates of deposit. To protect the safety of county deposits, depositaries are required to pledge collateral securities to secure deposits not insured by the Federal Deposit Insurance Corporation (FDIC). The securities must be of the types specified by Missouri statutes, for the collateralization of state funds and held by either the county or a financial institution other than the depositary bank. Certificates of deposit must also be insured by the FDIC for 100 percent of their principal and accrued interest. Custodial credit risk is the risk that, if a depositary bank fails, Pemiscot County, Missouri will not be able to recover its deposits or recover collateral securities that are in an outside party's possession.

Investments

Section 110.270, RSMo, based on Article IV, Section 15, Missouri Constitution authorizes counties to place their funds, either outright or by repurchase agreement, in U.S. Treasury and agency obligations. At December 31, 2010 and 2009, the County had no such investments. In addition, Section 30.950, RSMo, requires political subdivisions with authority to invest in instruments other than depositary accounts at financial institutions to adopt a written investment policy. Among other things, the policy is to commit a political subdivision to the principles of safety, liquidity, and yield (in that order) when managing public funds and to prohibit purchase of derivatives (either directly or through repurchase agreements), use of leveraging (through either reverse repurchase agreements or other methods), and use of public funds for speculation. The County has adopted such a policy.

F. Interfund Transactions

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables, if applicable, are classified as "Due from other funds" or "Due to other funds" on the Governmental Funds Balance Sheet-Cash Basis.

Legally required transfers are reported as "transfers in" by the recipient fund and as "transfers out" by the disbursing fund.

Elimination of interfund activity has been made for governmental activities in the government-wide financial statements.

G. Restricted Fund Balance

Restricted fund balance represents the portion of fund balance that is not available for appropriation or are legally restricted for a specific purpose.

H. Net Assets

Net assets represent the difference between assets and liabilities. Net assets are reported as restricted when there are limitations imposed on their use either through the enabling legislation adopted by the County or through external restrictions imposed by creditors, grantors or laws or regulations of other governments. All other net assets are reported as unrestricted. The County applies restricted resources first when an expense is incurred for purposes for which both restricted and unrestricted net assets are available.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

I. Use of Estimates in Financial Statements

Preparation of these financial statements requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

J. Budgets and Budgetary Practices

The County Commission and other applicable boards are responsible for the preparation and approval of budgets for various county funds in accordance with Sections 50.525 through 50.745, RSMo, the county budget law. These budgets are adopted on the cash basis of accounting.

Although adoption of a formal budget is required by law, the County did not adopt a formal budget for Tax Maintenance Fund for December 31, 2010 and 2009.

Section 50.740, RSMo, prohibits expenditures in excess of the approved budgets. However, actual expenditures exceeded budgeted amounts for the following funds:

Fund	Years Ended December 31,
Special Road and Bridge	2010 and 2009
Drainage Districts (9)	2010
Assessment	2010
Federal Forfeiture	2009
Bootheel Drug Task Force	2009
Law Enforcement Sales Tax	2010 and 2009
Sheriff's Civil Fees	2010

Section 50.740, RSMo, requires a balanced budget. State law requires that, at the individual fund level, budgeted expenditures not exceed budgeted revenues plus anticipated beginning fund balance. The County reported deficit budget balances for the following funds:

Fund	Years Ended December 31,
General Revenue	2010 and 2009
Special Road and Bridge	2010
Drainage Districts (9)	2009
Assessment	2010 and 2009
Johnson Grass	2010 and 2009
Emergency 911	2009
Firing Range	2010 and 2009
Bootheel Drug Task Force	2010 and 2009
Election Service	2010 and 2009
MO Smart	2009

Also, because a budget was not adopted for the Tax Maintenance Fund, for the years ended December 31, 2010 and 2009, expenditures in that fund exceeded budgetary authority to the extent that the budget was not adopted.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

K. Published Financial Statements

Under Sections 50.800 and 50.810, RSMo, the County Commission is responsible for preparing and publishing in a local newspaper a detailed annual financial statement for the County. The financial statement is required to show receipts or revenues, disbursements or expenditures, and beginning and ending balances for each fund. Pemiscot County, Missouri has published all funds as of December 31, 2010 and 2009.

2. DEPOSITS AND INVESTMENTS

The County maintains a cash and temporary investment pool that is available for use by all funds. Each fund type's portion of this pool is displayed on the Governmental Funds Balance Sheet – Cash Basis arising from cash transactions as "Cash and Equivalents" under each fund's caption.

Deposits – Missouri statues require all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. At December 31, 2010, the carrying amount of the County's deposits are $599,447, the bank balance was $1,308,807. At December 31, 2009, the carrying amount of the County's deposits was $1,296,446, the bank balance was $1,529,511.

Custodial Credit Risk - Deposits

The carrying values of deposits and investments shown above are included in the financial statements at December 31, 2010 and 2009, as follows:

	2010 and 2009 Maturity	2010 Book Balance	2009 Book Balance
Deposits:			
Checking and Now Accounts	N/A	$599,447	$1,296,446
Investments	N/A	-	-
Total Deposits		$599,447	$1,296,446
Included in the following fund financial statement captions:			
Governmental Funds Balance Sheet-Cash Basis			
Cash and Cash Equivalents		$599,447	$1,296,446
Investments		-	- .
Total		$599,447	$1,296,446

Custodial Credit Risk – Deposits

Custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be guaranteed. The County's investment policy does not include custodial credit risk requirements. The County's deposits were not exposed to custodial credit risk at year end.

2. DEPOSITS AND INVESTMENTS (continued)

Custodial Credit Risk – Investments

Investment securities are exposed to custodial credit risk if the securities are uninsured, not registered in the name of the government, or held by the party who sold the security to the County or its agent but not in the government's name. The County does not have a policy for custodial credit risk relating to investments. The County's investments are not exposed to custodial credit risk at December 31, 2010 and 2009.

Investment Interest Rate Risk

The County does not have a policy in place that minimizes the risk that the market value of securities in the portfolio will decline due to changes in interest rates. Structuring the investments portfolio so that securities mature to meet cash requirements for ongoing operations would avoid the need to sell securities on the open market prior to maturity. Maturities of investments held at December 31, 2010 and 2009 are provided in the above schedules.

Investment Credit Risk

The County does not have a policy in place to minimize credit risk or the risk of loss due to the failure of the security.

Concentration of Investment Credit Risk

Concentration of credit risk must be disclosed for any single investment that represents 5% or more of total investments (excluding investments issued by or guaranteed by the U.S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments).

The County does not have a policy in place to minimize the risk of loss resulting from over concentration of assets.

3. INTERFUND TRANSFERS

Transfers between funds for the years ended December 31, 2010 and 2009 are as follows:

	2010 Transfers In (Out)	2009 Transfers In (Out)
Major Funds		
General Fund	$ 346,889	$ 253,538
Special Road and Bridge	(438,000)	(385,000)
Drainage Districts	438,000	385,000
Non-major Funds	(346,889)	(253,538)
Total	$ -	$ - .

4. COUNTY EMPLOYEES' RETIREMENT FUND (CERF)

The County Employees' Retirement Fund was established by the State of Missouri to provide pension benefits for County officials and employees.

A. Plan Description

The Retirement Fund is a cost-sharing multiple employer defined benefit pension plan covering any county elected or appointed officer or employee whose performance requires the actual performance of duties during not less than (1,000) one thousand hours per calendar year in any county of the state, except for any city not within a county and any county of the first classification having a charter form of government. It does not include county prosecuting attorneys covered under Sections 56,800 to 56.840, RSMo, circuit clerks and deputy circuit clerks covered under the Missouri State Retirement System, county sheriffs covered under Sections 57.949 to 57.997, RSMo and certain personnel not defined as an employee per Section 50.1000(8), RSMo. The Fund was created by an act of the legislature and was effective August 28, 1994. The general administration and the responsibility for the proper operation of the fund and the investment of the fund are vested in a board of directors of nine persons.

B. Pension Benefits

Beginning January 1, 1997, employees attaining the age of sixty-two years of age and with eight or more years of creditable service may retire with full benefits. The monthly benefit for County employees is determined by selecting the highest benefit calculated using three different prescribed formulas (flat-dollar formula, targeted replacement ratio formula, and prior plan's formula). A death benefit of $10,000 will be paid to the designated beneficiary of any active member upon the member's death.

Upon termination of employment, any member who is vested is entitled to a deferred annuity, payable at age sixty-two. Early retirement at age fifty-five, with reduced benefit, is allowed for the police department, and the age of sixty for all other departments in the County. Any member with less than eight years of creditable service forfeits all rights in the fund but will be paid his or her accumulated contributions.

The County Employees' Retirement Fund issues audited financial statements. Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, P.O. Box 2271, Jefferson City, MO 65102-2271, or by calling 1-573-632-9203.

C. Funding Policy

In accordance with State Statutes, the Plan is funded through fees collected by counties and remitted to the CERF. Eligible employees hired before February 2002 have an option to contribute 2% of their annual salary, while employees hired after February 2002 are required to contribute 6% of their annual salary in order to participate in the CERF. During 2010 and 2009, the County collected and remitted to CERF, employee contributions of $38,876 for 2010 and $27,078 for 2009.

5. PROSECUTING ATTORNEY RETIREMENT FUND

In accordance with State Statute Chapter 56.807 RSMo, the County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys and Circuit Attorney Retirement System Fund. Once remitted, the State of Missouri is responsible for administration of this plan. The County has contributed $2,244 for the year ended December 31, 2010 and $2,244 for 2009.

6. POST-EMPLOYMENT BENEFITS

The County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by the County.

7. CLAIMS, COMMITMENTS AND CONTINGENCIES

A. Litigation

The County does not have any material litigation issues for years ended December 31, 2010 and 2009.

B. Compensated Absences

The County provides employees with up to three weeks of paid vacation based upon the number of years of continuing service. Upon termination from county employment, an employee is not reimbursed for unused vacation and overtime if applicable. Sick time is accrued at one half day per month after the first 90 days of employment. These have not been subjected to auditing procedures.

C. Federal and State Assisted Programs

The County has received proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned as not appropriate expenditures under the grant agreements. Such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds, if determined necessary, would be immaterial. A provision has not been made in the accompanying financial statements for any potential refund of grant monies.

8. RISK MANAGEMENT

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have not been any significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is a member participant in a public entity risk pool which a corporate and political body created pursuant to State Statute (Chapter 537.70 RSMo. 1986). The purpose of the risk pool is to provide liability protection to participating public entities, their officials, and employees. Annual contributions are collected based on actuarial projections to produce sufficient funds to pay losses and expenses. Should contributions not produce sufficient funds to meet its obligations, the risk pool is empowered with the ability to make special assessments. Members are jointly and severally liable for all claims against the risk pool.

8. RISK MANAGEMENT (continued)

The County is also a member of the Missouri Association of Counties Self-Insured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this Fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The Fund is self-insured up to $2,000,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

9. PROPERTY TAX

Through December 31, 2010, Pemiscot County, Missouri collected excess property taxes. Section 67.505 RSMo, requires the County to reduce property taxes for a percentage of sales tax collected. Pemiscot County, Missouri voters enacted a one-half cent sales tax with a provision to reduce property taxes by 50 percent of sales taxes collected. Tax levies were reduced for actual sales tax collections.

10. SUBSEQUENT EVENTS

The County evaluates subsequent events through the date that the County's financial statements are issued. As of June 3, 2011, there were no subsequent events. The adoption of FASB ASC 855-10-50-1 did not have a material impact on the County's financial statements.

11. COMPLIANCE AND ACCOUNTABILITY

The County incurred no material violations of finance related legal and contractual provisions.

12. PRIOR ADJUSTMENT FINDING

Opening balances of the following funds have been corrected for new information related to insurance proceeds.

	General Fund	Special Road and Bridge Fund	Drainage Districts (9) Fund
Balance as reported 12/31/08	$(633,633)	$(152,186)	$ 162,878
Adjustment	221,310	(153,479)	(67,831)
Balance as restated at 12/31/08	$(412,323)	$(305,665)	$ 95,047

Notes to the Required Supplementary Information

PEMISCOT COUNTY, MISSOURI
NOTES TO THE REQUIRED SUPPLEMENTARY INFORMATION
DECEMBER 31, 2010 AND 2009

1. Summary of Significant Accounting Policies

   A. Purpose of Schedule and Reporting Entity

      The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of OMB Circular A-133. This circular requires a schedule that provides total federal awards expended for each federal program and that Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA information is not available.

      The schedule includes all federal awards administered by Pemiscot County, Missouri.

   B. Basis of Presentation

      OMB Circular A-133 includes these definitions, which govern the contents of the schedule:

      > *Federal financial assistance* means assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals . . .
>
> *Federal award* means Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants, or contracts, used to buy goods or services from vendors.

   Accordingly, the schedule includes expenditures of both cash and noncash awards.

   C. Basis of Accounting

      The schedule is presented on the cash basis of accounting, which recognizes amounts only when disbursed in cash.

2. Subrecipients

   The County provided no federal awards to subrecipients during the years ended December 31, 2010 and 2009.

INDEPENDENT AUDITORS' REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE TO EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE IN ACCORDANCE WITH OMB CIRCULAR A-133

To the County Commission
and
Officeholders of Pemiscot County, Missouri

Compliance

We have audited the compliance of Pemiscot County, Missouri, with the types of compliance requirements described in *U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement* that could have a direct and material effect on each of Pemiscot County, Missouri's major federal programs for the years ended December 31, 2010 and 2009. The County's major federal programs are identified in the summary of auditor's results section of the accompanying Schedule of Findings and Questioned Costs. Compliance with the requirements of laws, regulations, contracts and grants applicable to each of its major federal programs is the responsibility of the County's management. Our responsibility is to express an opinion on the County's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America, the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the County's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination on the County's compliance with those requirements.

In our opinion, Pemiscot County, Missouri complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the years ended December 31, 2010 and 2009.

Internal Control Over Compliance

The management of Pemiscot County, Missouri is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audit, we considered the County's internal control over compliance with the requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance, and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the County's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control* over compliance is a deficiency, or a combination of deficiencies in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis.

Our consideration of the County's internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be deficiencies, significant deficiencies, or material weaknesses. We did not identify any deficiencies in internal control over compliance that we considered material weaknesses, as defined above.

This report is intended solely for the information and use of the County Commission, management, audit committee, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

Auditee qualified as a low-risk auditee? _____ yes ___X___ no

Section II – Financial Statement Findings

This section includes the audit finding that *Government Auditing Standards* requires to be reported for an audit of financial statements.

10-1 Financal Condition

The General Revenue Fund has continued its deterioration. Cash balances were expected to improve in 2009, however this improvement has not been realized. In 2010, there has been further erosion in the fund balance.

The Special Road and Bridge Fund cash balance improved significantly during 2009; however , it declined somewhat during 2010.

The County Commission needs to address the financial position of the above funds and other funds of the County both short and long-term. Close monitoring of all financial activities is essential.

This is a repeat finding.

We Recommend:

The County Commission monitor the County's financial position and take appropriate and necessary steps to increase revenue and reduce spending to attempt to stabilize the General Revenue and Special Road and Bridge Funds.

Auditee's Response and Plan for Corrective Action:

The County Commission will continue to monitor the County's financial position and take whatever actions they are able to implement.

10-2 Budgetary Practices

In addition to being required by State law, complete and accurate budgets are essential for the County Commission and County Clerk to evaluate County operations and to project the anticipated needs of the County for the upcoming year. Complete and accurate budgets are also necessary to properly inform the County's citizens about the County's finances.

The County Commission approved deficit budgets for several funds, allowed disbursements to exceed budgeted amounts in a number of funds, and a fund was not budgeted. There was no evidence the disbursements were adequately monitored to ensure actual disbursements did not exceed budgeted amounts.

PEMISCOT COUNTY, MISSOURI
SCHEDULE OF FINDINGS AND QUESTIONED COSTS
(INCLUDING MANAGEMENT'S PLAN FOR CORRECTIVE ACTION)
YEARS ENDED DECEMBER 31, 2010 AND 2009

A. Budgeted deficit balances were in the following funds:

Fund	Years Ended December 31,
General Revenue	2010 and 2009
Special Road and Bridge	2010
Drainage Districts (9)	2009
Assessment	2010 and 2009
Johnson Grass	2010 and 2009
Emergency 911	2009
Firing Range	2010 and 2009
Bootheel Drug Task Force	2010 and 2009
Election Service	2010 and 2009
MO Smart	2009

Also, because a budget was not adopted for the Tax Maintenance Fund, for the years ended December 31, 2010 and 2009, expenditures in that fund exceeded budgetary authority to the extent that the budget was not adopted.

Disbursements exceeded final budgeted amounts in the following funds:

Fund	Years Ended December 31,
Special Road and Bridge	2010 and 2009
Drainage Districts (9)	2010
Assessment	2010
Federal Forfeiture	2009
Bootheel Drug Task Force	2009
Law Enforcement Sales Tax	2010 and 2009
Sheriff's Civil Fees	2010

The above findings are repeat findings.

If there are valid reasons which necessitate excess disbursements, budget amendments should be made following the same process by which the annual budget is approved, including holding public hearings and filing the amended budget with the State Auditor's office. In addition Section 50.622, RSMo 2000, provides that counties may amend the annual budget during any year in which the County receives additional funds, which could not be estimated when the budget was adopted and that the County shall follow the same procedures required for adoption of the annual budget to amend the budget.

To allow the budgets to be used as a planning tool and to ensure compliance with State law, budget amendments should be made prior to incurring the actual expenditures, valid reasons, which necessitate excess disbursements, should be provided to support amendments, and public hearings should be held prior to the adoption of all budget amendments.

We Recommend:

The County Commission:

A. Discontinue deficit budgeting.

B. Reduce spending and increase revenue to obtain positive cash balance in all funds.

C. Not authorize disbursements in excess of budgeted amounts. If a necessity exists to exceed a budget, the appropriate procedures should be followed to amend the appropriate budget.

D. Ensure that all funds, regardless of size, are budgeted.

Auditee's Response and Plan for Corrective Action:

A,B They will discontinue practices as soon as possible.
C,D Both will be implemented.

10-3 Payroll and Related Matters

Some employees do not prepare a timesheet, some timesheets are not provided or maintained in the County Clerk's office, and some timesheet information is based on estimated hours worked. Overtime and compensatory time policies are not adequate and do not appear to comply with the Fair Labor Standards Act of 1938 (FLSA). The County accrues straight time off (compensatory time) to employees who work more than the County's normal 40-hour work period, although the FLSA requires compensatory time to be accrued at time and one-half. In addition, timesheets were not always signed by employees or reviewed and signed by the supervisor.

Payrolls are processed twice a month, and the County policy is to have each department submit timesheets or total hours worked for each employee to the County Clerk's office from two to five days in advance of the pay date to enable the payroll to be processed. The time reported for each employee represents actual hours worked from the beginning of the pay period through the date the information is submitted and estimated hours to be worked during the last two to five days of the pay period. No documentation was available to indicate the hours actually worked were subsequently compared to the hours estimated.

Paying County employees for estimated hours may lead to errors, inconsistencies in the calculation of overtime and accumulated leave balances, and the potential for employees to be over/under paid. In addition, detailed timesheets signed by the employee and approved by a supervisor are necessary to monitor overtime, leave, and compensatory time, and are beneficial in demonstrating compliance with County policies and the requirements of the Fair Labor Standards Act of 1938 (FLSA).

The County does not adequately maintain accrued vacation or sick leave for all employees for all departments.

We Recommend:

A. All employees of all departments should submit a timesheet that bears the signature of the employee and reviewed and signed by the supervisor before payment is rendered. In addition, copies of all timesheets should be maintained in the County Clerk's office for safekeeping.

B. If the County continues to use estimated hours worked for the last days of the pay period, the County should establish procedures to obtain documentation from the employees' supervisors for any differences between estimated and actual time worked, and fully document any applicable adjustments to the employees' pay or leave records when actual time worked is different from estimated time worked.

C. The County should adopt overtime and compensatory time policies which comply with the FLSA, and ensure employee overtime and compensatory time calculations do not include nonworking time such as leave and compensatory time used.

D. The County should maintain adequate and accurate records regarding accrued vacations and sick leave and vacation time and sick leave used by employees.

Auditee's Response and Plan for Corrective Action:

A-D All will be implemented.

Section III – Federal Award Findings and Questioned Costs

There are no findings and there are no questioned costs for December 31, 2010 and 2009.

Follow-Up on Prior Audit Findings for an
Audit of Financial Statements Performed in Accordance
With *Government Auditing Standards*

PEMISCOT COUNTY, MISSOURI
FOLLOW-UP ON PRIOR AUDIT FINDINGS FOR AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*
DECEMBER 31, 2010 AND 2009

In accordance with *Government Auditing Standards*, this section reports the auditors' follow-up on action taken by Pemiscot County, Missouri, on the applicable findings in the prior audit report issued for the two years ended December 31, 2008.

08-1 Financial Condition

The County has a poor financial condition in both its General Revenue and Special Road and Bridge Funds. Both funds are at deficit balances and have experienced poor budgeting. In addition the County did not properly roll back the property tax levy as required to reflect excess property tax collections in previous years.

Recommendation:

The County Commission takes appropriate actions (both short term and long term) to correct the poor financial conditions. Additionally, the Commission should take appropriate actions to properly reduce the property tax levy reflecting excess property taxes collected in previous years.

Status:

Not resolved. See finding No. 10-1.

08-2 Budgetary Practices

The County Commission approved deficit budgets for several funds and approved expenditures in excess of budgeted amounts for numerous funds. In addition, numerous fund budgets were not prepared and interest income and fund transfers were not properly classified.

Recommendation:

A. Discontinue deficit budgeting.
B. Ensure budgets are prepared for all county funds.
C. Ensure interest income and fund transfers are properly classified.

Status:

Not resolved. See finding No. 10-2.

Summary Schedule of Prior Audit Findings
in Accordance With OMB Circular A-133.

PEMISCOT COUNTY, MISSOURI
SUMMARY SCHEDULE OF PRIOR AUDIT FINDINGS
IN ACCORDANCE WITH OMB CIRCULAR A-133
DECEMBER 31, 2010 AND 2009

Section .315 of OMB Circular A-133 requires the auditee to prepare a Summary Schedule of Prior Audit Findings to report the status of all findings that are relative to federal awards and included in the prior audit report's Schedule of Findings and Questioned Costs. The summary schedule also must include findings reported in the prior audit's Summary Schedule of Prior Audit Findings, except those listed as corrected, no longer valid, or not warranting further action.

Section .500(e) of OMB Circular A-133 requires the auditor to follow up on these prior audit findings; to perform procedures to assess the reasonableness of the Summary Schedule of Prior Audit Findings; and to report, as a current year finding, when the auditor concludes that the schedule materially misrepresents the status of any prior findings.

The prior audit report issued for the two years ended December 31, 2008, included several audit findings that Section .510(a) of OMB Circular A-133 requires to be reported for an audit of federal awards.

08-3 Schedule of Expenditures of Federal Awards

The County does not have adequate procedures in place to track federal awards resulting in errors and omissions on the Schedule of Expenditures of Federal Awards (SEFA).

Recommendation:

The County Commission and County Clerk ensure complete and accurate schedule of expenditures of federal awards.

Status:

Implemented

MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report-
Auditors' Findings

PEMISCOT COUNTY, MISSOURI
MANAGEMENT ADVISORY REPORT
DECEMBER 31, 2010 AND 2009

We have audited the accompanying Government-Wide Statements of Net Assets-Cash Basis, Government-Wide Statements of Activities-Cash Basis, Governmental Funds Balance Sheets-Cash Basis, Governmental Funds Statements of Receipts, Disbursements, and Changes in Cash Balances, and Statements of Fiduciary Net Assets-Cash Basis of Pemiscot County, Missouri as of and for the years ended December 31, 2010 and 2009, and have issued our report thereon dated June 3, 2011. We also have audited the compliance of Pemiscot County, Missouri, with the types of compliance requirements described in the *U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement* that are applicable to its major federal program for the years ended December 31, 2010 and 2009, and have issued our report thereon dated June 3, 2011.

We obtained an understanding of internal controls significant to the audit objectives and considered whether specific controls have been properly designed and placed in operation. However, providing an opinion on internal controls was not an objective of our audit and accordingly, we do not express such an opinion.

We also obtained an understanding of legal provisions significant to the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting significant instances of noncompliance with the provisions. However, providing an opinion on internal controls was not an objective of our audit and accordingly, we do not express such an opinion.

Our audit was conducted in accordance with applicable standards contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, and included such procedures as we considered necessary in the circumstances.

This Management Advisory Report (MAR) presents any findings arising from our audit of the elected county officials and the county board referred to above. In addition, this report includes any findings other than those, if any, reported in the accompanying Schedule of Findings and Questioned Costs. These MAR Findings resulted from our audit of the financial statements of Pemiscot County, Missouri or of its compliance with the types of compliance requirements applicable to its major federal program but do not meet the criteria for inclusion in the written reports on compliance (and other matters, if applicable) and on internal control over financial reporting or compliance that are required for audits performed in accordance with *Government Auditing Standards* and OMB Circular A-133, *Audits of States, Local Government, and Non-Profit Organizations.* There are no findings to report.

Follow-Up on Prior Audit Findings

PEMISCOT COUNTY, MISSOURI
MANAGEMENT ADVISORY REPORT
DECEMBER 31, 2010 AND 2009

In accordance with *Government Auditing Standards*, this section reports the auditors' follow-up on action taken by Pemiscot County, Missouri, on findings in the Management Advisory Report (MAR) of the audit report issued for the two years ended December 31, 2008. Any prior recommendations which have not been implemented, but are considered significant, are repeated in the current MAR. Although the remaining unimplemented recommendations are not repeated, the County should consider implementing those recommendations. There were no findings reported on the audit report issued for the two years ended December 31, 2008 to follow up.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Dunklin County, Missouri

The Office of the State Auditor is responsible under Section 29.230, RSMo, for auditing certain operations of Dunklin County, and issues a separate report on that audit. In addition, in cooperation with the county, the Office of the State Auditor has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2010, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Devereux and Krauss LLP, Certified Public Accountants, is attached.

INDEPENDENT AUDITORS' REPORT ON THE BASIC FINANCIAL STATEMENTS, REQUIRED SUPPLEMENTARY INFORMATION, AND SUPPLEMENTARY SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS

To the County Commission
and
Officeholders of Dunklin County, Missouri

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of Dunklin County, Missouri as of and for the years ended December 31, 2010 and 2009, which collectively comprise the basic financial statements of the County's primary government as listed in the table of contents. These financial statements are the responsibility of the county of Dunklin's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

As discussed in Note 1, Dunklin County, Missouri, prepares its financial statements on the cash basis which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

The financial statements do not include financial data for a county legally separate component unit (the Health Center). In addition, several immaterial court funds have not been included. Accounting principles generally accepted in the United States of America require the financial data for those units to be reported with the financial data of the County's primary government unless the County also issues financial statements for Dunklin County, Missouri that include the financial data for these units. The County has not issued such reporting entity financial statements. Because of this departure from accounting principles generally accepted in the United States of America, the assets, liabilities, net assets, revenues, and expenses do not include the omitted funds. In addition, the assets, liabilities, fund balances, revenues, and expenditures of the aggregate remaining fund information does not include the omitted funds.

In our opinion, because of the omission discussed previously, the financial statements referred to previously do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of Dunklin County, Missouri as of December 31, 2010 and 2009 or the changes in financial position thereof for the years then ended.

Further, in our opinion, the financial statements referred to previously present fairly, in all material respects, the respective financial position cash basis of the governmental activities and each major fund of Dunklin County, Missouri as of December 31, 2010 and 2009, and the respective changes in financial position cash basis thereof for the years then ended in conformity with the basis of accounting described in Note 1.

In accordance with *Government Auditing Standards*, we also have issued our report dated June 30, 2011, on our consideration of the County's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The County has not presented the Management's Discussion and Analysis that accounting principles generally accepted in the United States of America, as applicable to the cash basis of accounting, has determined is necessary to supplement, although not required to be part of the basic financial statements.

The budgetary comparison schedules and other supplementary information on pages 32 through 59 are not required parts of the basic financial statements, but are supplementary information required to accompany those financial statements by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. We did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements, referred to in the first paragraph, taken as a whole. The accompanying Schedules of Expenditures of Federal Awards are presented for purposes of additional analysis as required by U.S. Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and are not a required part of the basic financial statements. The accompanying Schedules of Expenditures of Federal Awards are the responsibility of the County. Such information has been subjected to the auditing procedures applied in our audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects when considered, in relation to the basic financial statements, taken as a whole, that were prepared on the basis of accounting discussed in Note 1.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED UPON THE AUDIT PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission
and
Officeholders of Dunklin County, Missouri

We have audited the accompanying financial statements of Dunklin County, Missouri as of and for the years ended December 31, 2010 and 2009, which collectively comprise the County's basic financial statements as identified in the table of contents and have issued our report thereon dated June 30, 2011. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit we considered the County's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of Dunklin County, Missouri's internal control over financial reporting.

Our consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over financial reporting that might be significant deficiencies, or material weaknesses and therefore, there can be no assurance that all deficiencies, significant deficiencies, or material weaknesses have been identified. However, as described in the accompanying Schedule of Findings and Questioned Costs, we identified a deficiency in internal control over financial reporting that we consider to be a material weakness, and other deficiencies that we consider to be significant deficiencies.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or combination of control deficiencies in internal control such that there is a reasonable possibility that a material misstatement of the County's financial statements will not be prevented, or detected and corrected on a timely basis. We consider the deficiency described in the accompanying Schedule of Findings and Questioned Costs as item 10-1 to be a material weakness.

A *significant deficiency* is a deficiency, or combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the deficiencies described in the accompanying Schedule of Findings and Questioned Costs as items 10-2 and 10-3 to be significant deficiencies.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the financial statements of various funds of Dunklin County, Missouri, are free of material misstatements, we performed tests of the County's compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards* and which are described in the accompanying Schedule of Findings and Questioned Costs as finding numbers 10-2 and 10-3.

There are no other matters reported in the accompanying Management Advisory Report.

The County's responses to the findings identified in our audit are described in the accompanying Schedule of Findings and Questioned Costs. We did not audit the County's responses and, accordingly, we express no opinion on them.

This report is intended solely for the information and use of County Commission, management, audit committee, others within the entity, federal awarding agencies, and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

Notes to the Financial Statements

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The County of Dunklin, Missouri ("County") is governed by a three-member board of commissioners, established in 1845. In addition to the three board members, there are six elected Constitutional Officers: County Clerk, Collector, Treasurer, Circuit Clerk, Sheriff, and Prosecuting Attorney.

These financial statements are presented on the cash basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP). Generally accepted accounting principles include all relevant Government Accounting Standards Board (GASB) pronouncements. In the Government-Wide Financial Statements, Financial Accounting Standards Board (FASB) pronouncements and Accounting Principles Board (APB) opinions issued on or before November 30, 1989, have been applied, to the extent they are applicable to the cash basis of accounting, unless those pronouncements conflict with or contradict GASB pronouncements, in which case GASB prevails.

A. Reporting Entity

These financial statements present financial accountability of Dunklin County, Missouri as applied using the cash basis of accounting.

The County's operations include tax assessments and collections, state/county courts, county recorder, police and fire protection, transportation, economic development, social and human services, and cultural and recreation services.

The financial statements referred to above include only the primary government of Dunklin County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that comprise the County's legal entity.

The financial statements do not include financial data for a County legally separate component unit (the Health Center). In addition, several immaterial court funds have not been included.

B. Basis of Presentation

Government-wide Financial Statements:

The Statement of Net Assets-Cash Basis and the Statement of Activities-Cash Basis present financial information about the primary government of Dunklin County, Missouri only and not any of its component units. These statements include the financial activities of the primary government. Governmental activities generally are financed through taxes, intergovernmental revenues, and other nonexchange transactions. Business-type activities are financed in whole or in part by fees charged to external parties for goods or services. The County does not have any business type activities. These Government-Wide Financial Statements exclude fiduciary activities.

The Statement of Net Assets-Cash Basis presents the financial condition of the governmental activities of the primary government of Dunklin County, Missouri at year-end. The Statement of Activities-Cash Basis presents a comparison between direct expenses and program revenues for each function of the County's governmental activities. Direct expenses are those that are specifically associated with and are clearly identifiable to a particular function. Amounts reported as program revenues include: (a) charges to customers or applicants who purchase, use or directly benefit from goods, services or privileges provided by a given function, and (b) grants and contributions that are restricted to meeting

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

B. Basis of Presentation (continued)

the operational or capital requirements of a particular program. Taxes, unrestricted interest earnings, gains, and other miscellaneous revenue not properly included among program revenues are presented instead as general revenues. The comparison of direct expenses with program revenues identifies the extent to which each governmental function is self-financing or draws from the general revenues of the County.

Fund Financial Statements:

Following the government-wide financial statements are separate financial statements for governmental funds and fiduciary funds. The County does not have proprietary funds. Fiduciary funds are excluded from the government-wide financial statements. Major individual governmental funds are reported as separate columns in the fund financial statements. The County has determined that the General Revenue Fund, Special Road and Bridge Fund, Law Enforcement Sales Tax Fund, and Emergency Management Fund are major governmental funds. All other governmental funds are reported in one column labeled "Non-major Governmental Funds." If applicable, the total fund balances for all governmental funds are reconciled to total net assets. The net change in fund balance for all governmental funds, if applicable, is reconciled to the total change in net assets as shown on the Government-Wide Statement of Activities-Cash Basis in the basic financial statements.

The fund financial statements of the County are organized on the basis of funds, each of which is considered a separate accounting entity with self-balancing accounts that comprise its assets, liabilities, fund balances/net assets, revenues and expenditures.

Governmental resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled. The various fund, summarized by type, are in the basic financial statements. The following fund types are used by the County:

Governmental Fund Types

Governmental funds are those through which most governmental functions are financed. The County's expendable financial resources and the related liabilities are accounted for through governmental funds. The measurement focus is upon determination of and changes in financial position rather than upon net income.

The following are the County's governmental major funds:

General Revenue Fund – The General Revenue Fund is the general operating fund of the County. It is used to account for all financial resources except those required to be accounted for in another fund.

Special Road and Bridge Fund – A special revenue fund used to account for receipts of the County property tax levy and related expenditures for road maintenance and improvement projects.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

B. Basis of Presentation (continued)

Law Enforcement Sales Tax Fund – A special fund used to account for receipts of the County property tax levy and related expenditures.

Emergency Management Fund – This fund was created to handle the federal funds related to primarily the ice storm of 2008.

The other governmental funds of the County are considered non-major funds. They include special revenue funds, which account for the proceeds of specific revenue sources that generally are legally restricted to expenditures for specific purposes.

The remaining funds cash balances consist of:

	2010	2009
Prosecuting Attorney Undispursed Restitution	$ 90	$ 90
Crime Victims Compensation	42,426	42,015
Financial Institution	104,566	98,906
Surplus Certificate Bids	211	211
Total	$147,293	$141,222

Fiduciary Fund Types

Agency – Agency funds are used to account for assets held by the County in a trustee capacity as an agent of individuals, private organizations, other funds or other governmental units. Agency funds are accounted for and reported similar to the governmental fund. Agency funds are custodial in nature (assets equal liabilities) and do not involve the measurement of results of operations. These funds account for activities of collections for other taxing units by the Collector of Revenue and other agency operations. The Principal County and Schools Fund is the only fiduciary fund with ending cash balances of $99,360 in 2010 and $106,064 in 2009.

C. Basis of Accounting

Basis of accounting determines when transactions are recorded in the financial records and reported on the financial statements. Government-wide financial statements and fund financial statements are prepared using the cash basis of accounting. This basis of accounting recognizes assets, liabilities, net assets/fund equity, revenues, and expenditures when they result from cash transactions except that the purchase of investments are recorded as assets; and as receivables and revenue in the fund statements as applicable; and receipts of proceeds of tax anticipation notes are recorded as liabilities. This basis is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

As a result of the use of this cash basis of accounting, assets (such as accounts receivable and capital assets), revenues (such as revenue for billed or provided services not yet collected), liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

C. Basis of Accounting (continued)

If the County utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while the fund financial statements for proprietary fund types, if applicable, would use the accrual basis of accounting. All government-wide financials would be presented on the accrual basis of accounting.

D. Property Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1, of the following year.

The assessed valuation of the tangible taxable property, included within the County's boundaries for the calendar year 2010 and 2009, for purposes of taxation were:

	2010	2009
Real Estate	$201,469,660	$200,549,040
Personal Property	$ 74,157,659	$ 74,247,886
Railroad and Utilities	$ 17,531,581	$ 17,409,634
Locally Assess RE & PP	$ 263,362	$ 268,382

The County Commission approved tax levies per $100 of assessed valuation of tangible taxable property for the calendar years for purposes of County taxation, as follows.

	2010	2009
General Revenue Fund	.6157	.6156
Road and Bridge	.5857	.5856

E. Deposits and Investments

Disclosures are provided below to comply with GASB Statement No. 40, *Deposit and Investment Risk Disclosures.* For the purposes of these disclosures, deposits with financial institutions are demand, time, and savings accounts, including certificates of deposit and negotiable order of withdrawal accounts, in banks, savings institutions, and credit unions. Investments are securities and other assets acquired primarily for the purpose of obtaining income or profit.

Deposits

In addition to depositing in demand accounts, political subdivisions such as counties have the authority to place excess funds in certificates of deposit. To protect the safety of county deposits, depositaries are required to pledge collateral securities to secure deposits not insured by the Federal Deposit Insurance Corporation (FDIC). The securities must be of the types specified by Missouri statutes, for the collateralization of state funds and held by either the county or a financial institution other than the depositary bank. Certificates of deposit must also be insured by the FDIC for 100 percent of their principal and accrued interest. Custodial credit risk is the risk that, if a depositary bank fails, Dunklin County, Missouri will not be able to recover its deposits or recover collateral securities that are in an outside party's possession.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

E. Deposits and Investments (continued)

Investments

Section 110.270, RSMo, based on Article IV, Section 15, Missouri Constitution authorizes counties to place their funds, either outright or by repurchase agreement, in U.S. Treasury and agency obligations. At December 31, 2010 and 2009, the County had no such investments. In addition, Section 30.950, RSMo, requires political subdivisions with authority to invest in instruments other than depositary accounts at financial institutions to adopt a written investment policy. Among other things, the policy is to commit a political subdivision to the principles of safety, liquidity, and yield (in that order) when managing public funds and to prohibit purchase of derivatives (either directly or through repurchase agreements), use of leveraging (through either reverse repurchase agreements or other methods), and use of public funds for speculation. The County has adopted such a policy.

F. Interfund Transactions

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables, if applicable, are classified as "Due from other funds" or "Due to other funds" on the Governmental Funds Balance Sheet-Cash Basis.

Legally required transfers are reported as "transfers in" by the recipient fund and as "transfers out" by the disbursing fund.

Elimination of interfund activity has been made for governmental activities in the government-wide financial statements.

G. Restricted Fund Balance

Restricted fund balance represents the portion of fund balance that is not available for appropriation or are legally restricted for a specific purpose.

H. Net Assets

Net assets represent the difference between assets and liabilities. Net assets are reported as restricted when there are limitations imposed on their use either through the enabling legislation adopted by the County or through external restrictions imposed by creditors, grantors, laws or regulations of other governments. All other net assets are reported as unrestricted. The County applies restricted resources first when an expense is incurred for purposes for which both restricted and unrestricted net assets are available.

I. Use of Estimates in Financial Statements

Preparation of these financial statements requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

J. Budgets and Budgetary Practices

The County Commission and other applicable boards are responsible for the preparation and approval of budgets for various County funds in accordance with Sections 50.525 through 50.745, RSMo, the county budget law. These budgets are adopted on the cash basis of accounting.

Although adoption of a formal budget is required by law, the County did not adopt formal budgets for the following funds:

Fund	Years Ended December 31,
Emergency Management	2009
DC Sheriff Revolving	2010 and 2009
HAVA	2009

Although Section 50.740, RSMo, requires a balanced budget, state law requires that, at the individual fund level, budgeted expenditures not exceed budgeted revenues plus anticipated beginning fund balances. The County reported a deficit budget balance in the Sheriff's Commissions Fund at December 31, 2009.

Section 50.740, RSMo, prohibits expenditures in excess of the approved budgets. However, expenditures exceeded budgeted amounts for the following funds:

Fund	Years Ended December 31,
General Revenue	2010 and 2009
Special Road and Bridge	2010
Law Enforcement Sales Tax	2010 and 2009
Senate Bill 40	2009
Recorders Users	2009
Prosecuting Attorney Training	2010
Emergency 911	2010
Victims of Domestic Violence and Domestic Violence Shelters	2009
Prosecuting Attorney Bad Check	2009
DC Law Enforcement Restitution	2010 and 2009
Prosecuting Attorney Delinquent Tax	2010
Pilot Program	2010
County Clerk Discretionary	2010
Sheriff's Civil Fees	2010
Drainage and Levee District	2009
Off System Bridge	2010
Sheriff's Commissions	2010 and 2009
Remaining	2010 and 2009
CERF Collection	2010
Tax Maintenance	2010 and 2009

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

J. Budgets and Budgetary Practices (continued)

Also, because a budget was not adopted for several funds, expenditures in that fund exceeded budgetary authority to the extent that the budget was not adopted. These funds are as follows:

Fund	Years Ended December 31,
Emergency Management	2009
DC Sheriff Revolving	2010 and 2009
HAVA	2009

K. Published Financial Statements

Under Sections 50.800 and 50.810, RSMo, the County Commission is responsible for preparing and publishing in a local newspaper a detailed annual financial statement for the County. The financial statement is required to show receipts or revenues, disbursements or expenditures, and beginning and ending balances for each fund. Dunklin County, Missouri published all funds for 2010 and 2009.

2. DEPOSITS AND INVESTMENTS

The County maintains a cash and temporary investment pool that is available for use by all funds. Each fund type's portion of this pool is displayed on the Governmental Funds Balance Sheet-Cash Basis arising from cash transactions as "Cash and Equivalents" under each fund's caption.

Deposits – Missouri statues require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. At December 31, 2010, the carrying amount of the County's deposits was $5,010,641, the bank balance was $5,391,278. At December 31, 2009, the carrying amount of the County's deposits was $5,223,875, the bank balance was $5,435,578.

Custodial Credit Risk - Deposits

The carrying values of deposits and investments shown above are included in the financial statements at December 31, 2010 and 2009, as follows:

	2010 and 2009 Maturity	2010 Book Balance	2009 Book Balance
Deposits:			
Checking and Now Accounts	N/A	$5,010,641	$5,223,875
Investments	N/A	-	-
Total Deposits		$5,010,641	$5,223,875
Included in the following fund financial statement captions:			
Governmental Funds Balance Sheet-Cash Basis			
Cash and Cash Equivalents		$5,010,641	$5,223,875
Investments		-	-
Total		$5,010,641	$5,223,875

2. DEPOSITS AND INVESTMENTS (continued)

Custodial Credit Risk – Deposits

Custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be guaranteed. The County's investment policy does not include custodial credit risk requirements. The County's deposits were not exposed to custodial credit risk at year end.

Custodial Credit Risk – Investments

Investment securities are exposed to custodial credit risk if the securities are uninsured, not registered in the name of the government, or held by the party who sold the security to the County or its agent but not in the government's name. The County does not have a policy for custodial credit risk relating to investments. The county's investments are not exposed to custodial credit risk at December 31, 2010 and 2009.

Investment Interest Rate Risk

The County does not have a policy in place that minimizes the risk that the market value of securities in the portfolio will decline due to changes in interest rates. Structuring the investments portfolio so that securities mature to meet cash requirements for ongoing operations would avoid the need to sell securities on the open market prior to maturity. Maturities of investments held at December 31, 2010 and 2009 are provided in the above schedules.

Investment Credit Risk

The County does not have a policy in place to minimize credit risk or the risk of loss due to the failure of the security.

Concentration of Investment Credit Risk

Concentration of credit risk must be disclosed for any single investment that represents 5% or more of total investments (excluding investments issued by or guaranteed by the U.S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments).

The County does not have a policy in place to minimize the risk of loss resulting from over concentration of assets.

3. INTERFUND TRANSFERS

Transfers between funds for the years ended December 31, 2010 and 2009 are as follows:

	2010 Transfers In (Out)	2009 Transfers In (Out)
Major Funds		
General Revenue	$429,870	$478,597
Special Road and Bridge	(30,000)	(35,000)
Law Enforcement Sales Tax	(475,913)	(500,000)
Emergency Management	0	18,780
Non-major Funds	76,043	37,623
Total	$ -	$ - .

4. COUNTY EMPLOYEES' RETIREMENT FUND (CERF)

The County Employees' Retirement Fund was established by the State of Missouri to provide pension benefits for County officials and employees.

A. Plan Description

The Retirement Fund is a cost-sharing multiple employer defined benefit pension plan covering any county elected or appointed officer or employee whose performance requires the actual performance of duties during not less than (1,000) one thousand hours per calendar year in any county of the state, except for any city not within a county and any county of the first classification having a charter form of government. It does not include county prosecuting attorneys covered under Sections 56,800 to 56.840, RSMo, circuit clerks and deputy circuit clerks covered under the Missouri State Retirement System, county sheriffs covered under Sections 57.949 to 57.997, RSMo and certain personnel not defined as an employee per Section 50.1000(8), RSMo. The Fund was created by an act of the legislature and was effective August 28, 1994. The general administration and the responsibility for the proper operation of the fund and the investment of the fund are vested in a board of directors of nine persons.

B. Pension Benefits

Beginning January 1, 1997, employees attaining the age of sixty-two years may retire with full benefits with eight or more years of creditable service. The monthly benefit for County employees is determined by selecting the highest benefit calculated using three different prescribed formulas (flat-dollar formula, targeted replacement ratio formula, and prior plan's formula). A death benefit of $10,000 will be paid to the designated beneficiary of any active member upon the member's death.

Upon termination of employment, any member who is vested is entitled to a deferred annuity, payable at age sixty-two. Early retirement at age fifty-five, with reduced benefit, is allowed for the police department, and the age sixty for all other departments in the County. Any member with less than eight years of creditable service forfeits all rights in the fund but will be paid his or her accumulated contributions.

The County Employees' Retirement Fund issues audited financial statements. Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, P.O. Box 2271, Jefferson City, MO 65102-2271, or by calling 1-573-632-9203.

C. Funding Policy

In accordance with State Statutes, the Plan is funded through fees collected by counties and remitted to the CERF. Eligible employees hired before February 2002 have an option to contribute 2% of their annual salary, while employees hired after February 2002 are required to contribute 6% of their annual salary in order to participate in the CERF. During 2010 and 2009, the County collected and remitted to CERF, employee contributions of $0 for 2010 and $0 for 2009.

5. PROSECUTING ATTORNEY RETIREMENT FUND

In accordance with State Statute Chapter 56.807 RSMo, the County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys and Circuit Attorney Retirement System Fund. Once remitted, the State of Missouri is responsible for administration of this plan. The County has contributed $7,752 for the year ended December 31, 2010 and $7,752 for 2009.

6. POST EMPLOYMENT BENEFITS

The County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by the County.

7. CLAIMS, COMMITMENTS AND CONTINGENCIES

A. Litigation

The County does not have any material litigation issues for years ended December 31, 2010 and 2009.

B. Compensated Absences

The County provides employees with up to three weeks of paid vacation based upon the number of years of continuing service. Upon termination from county employment, an employee is not reimbursed for unused vacation and overtime if applicable. Sick time is accrued at one half day per month after the first 90 days of employment. These have not been subjected to auditing procedures.

C. Federal and State Assisted Programs

The County has received proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned as not appropriate expenditures under the grant agreements. Such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds, if determined necessary, would be immaterial. A provision has not been made in the accompanying financial statements for any potential refund of grant monies.

8. RISK MANAGEMENT

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have not been any significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is a member participant in a public entity risk pool which a corporate and political body created pursuant to state statute (Chapter 537.70 RSMo. 1986). The purpose of the risk pool is to provide liability protection to participating public entities, their officials, and employees. Annual contributions are collected based on actuarial projections to produce sufficient funds to pay losses and expenses. Should contributions not produce sufficient funds to meet its obligations, the risk pool is empowered with the ability to make special assessments. Members are jointly and severally liable for all claims against the risk pool.

The County is also a member of the Missouri Association of Counties Self-Insured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this Fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The Fund is self-insured up to $2,000,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

9. Justice Center Lease

The County and UMB Bank (the "Trustee") have a lease/purchase agreement whereby Dunklin County, Missouri leases the Justice Center and contents from the Trustee for lease payments through 2024. The County Commission must renew the lease annually. Additionally, the County has a purchase option that essentially follows an amortization table of the Trustee to retire the Certificate of Participation Bonds issued to fund the Justice Center.

The original amount of bonds total $9,260,000. Lease payments are as follows:

	Bonds to be retired		Interest Rate
2011	$ 385,000	plus	3.40
2012	$ 400,000	plus	3.60
2013	$ 415,000	plus	3.50
2014	$ 430,000	plus	3.70
2015	$ 445,000	plus	3.75
2016	$ 460,000	plus	5.00
2017	$ 485,000	plus	5.00
2019	$1,035,000	plus	5.00
2021	$1,150,000	plus	5.00
2024	$1,945,000	plus	5.00

The County and Kennett National Bank (the "Bank") have a lease/purchase agreement whereby Dunklin County, Missouri leases the remaining Justice Center costs $1,250,000 from the Bank for lease payments through 2024. The County Commission must renew the lease annually. Additionally the County has a purchase option that essentially follows an amortization table of the Bank to retire the Certification of Participation Bonds issued to fund the Justice Center's additional costs. Lease payments include funds to retire the bonds plus interest.

Lease payments including interest are as follows:

Year	Payment
2011	$713,363
2012	$715,273
2013	$715,873
2014	$716,348
2015	$715,438
2016	$713,750
2017	$715,750
2018	$711,500
2019	$711,250
2020	$719,750
2021	$711,500
2022	$712,250
2023	$716,500
2024	$714,000

10. Subsequent Events

The County evaluates subsequent events through the date that the County's financial statements are issued. As of June 30, 2011, there were no subsequent events. The adoption of FASB ASC 855-10-50-1 did not have a material impact on the County's financial statements.

Notes to the Supplementary Schedule

DUNKLIN COUNTY, MISSOURI
NOTES TO THE REQUIRED SUPPLEMENTARY INFORMATION
DECEMBER 31, 2010 AND 2009

1. Summary of Significant Accounting Policies

   A. Purpose of Schedule and Reporting Entity

      The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of OMB Circular A-133. This circular requires a schedule that provides total federal awards expended for each federal program and that Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA information is not available.

      The schedule includes all federal awards administered by Dunklin County, Missouri.

   B. Basis of Presentation

      OMB Circular A-133 includes these definitions, which govern the contents of the schedule:

      > *Federal financial assistance* means assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals . . .
>
> *Federal award* means Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants, or contracts, used to buy goods or services from vendors.

   Accordingly, the schedule includes expenditures of both cash and noncash awards.

   C. Basis of Accounting

      The schedule is presented on the cash basis of accounting, which recognizes amounts only when disbursed in cash.

2. Subrecipients

   The County provided no federal awards to subrecipients during the years ended December 31, 2010 and 2009.

INDEPENDENT AUDITORS' REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE TO EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE IN ACCORDANCE WITH OMB CIRCULAR A-133

To the County Commission
and
Officeholders of Dunklin County, Missouri

Compliance

We have audited the compliance of Dunklin County, Missouri, with the types of compliance requirements described in *U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement* that could have a direct and material effect on each of Dunklin County, Missouri's major federal programs for the years ended December 31, 2010 and 2009. The County's major federal programs are identified in the summary of auditors' results section of the accompanying Schedule of Findings and Questioned Costs. Compliance with the requirements of laws, regulations, contracts and grants applicable to each of its major federal programs is the responsibility of the County's management. Our responsibility is to express an opinion on the County's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the County's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination on the County's compliance with those requirements.

In our opinion, Dunklin County, Missouri complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the years ended December 31, 2010 and 2009.

Internal Control Over Compliance

The management of Dunklin County, Missouri is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audit, we considered the County's internal control over compliance with the requirements that could have a direct and material effect on a major federal program to determine our auditing procedures for the purpose of expressing our opinion on compliance, and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the County's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis.

Our consideration of the County's internal control over compliance was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over compliance that might be significant deficiencies or material weaknesses and therefore, there can be no assurance that all deficiencies, significant deficiencies, or material weaknesses have been identified. We did not identify any deficiencies in internal control over compliance that we consider to be a material weakness, as defined above.

This report is intended solely for the information and use of the County Commission, management, audit committee, federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

Auditee qualified as a low-risk auditee? _____ yes ___X___ no

Section II – Financial Statement Findings

This section includes the audit finding that *Government Auditing Standards* requires to be reported for an audit of financial statements.

10-1 Classification Issue

The County misclassified advances as federal revenues and repayments of those advances as expenditures. The County engaged the services of a vendor to provide services resulting from a severe storm. Financially, the vendor found it advantageous to advance Dunklin County, Missouri funds to cover the services rather than purchase a bond guaranteeing those services. The County erroneously treated the advance as additional funds and the repayment as additional expense.

We Recommend:

The County seek appropriate advice whenever they question as to how a transaction should be recorded.

Auditee's Response and Plan for Corrective Action:

The County will seek advice whenever there is a question as to how to record a transaction.

10-2 Budgetary Procedures and Published Financial Statements

In addition to being required by State law, complete and accurate budgets are essential for the County Commission and County Clerk to evaluate County operations and to protect the anticipated needs of the County for the upcoming year. Complete and accurate budgets are also necessary to properly inform the County's citizens about the County's finances.

The County Commission approved a deficit budget balance for a fund, allowed disbursements to exceed budgeted amounts in a number of funds and some funds were not budgeted. There was no evidence the County Commission or the County Clerk, monitored disbursements adequately to ensure actual disbursements did not exceed budgeted amounts.

A. State law requires that, at the individual fund level, budgeted expenditures not exceed budgeted revenues plus anticipated beginning fund balances. The County budgeted a deficit balance in the Sheriff's Commissions Fund at December 31, 2009.

10-2 Budgetary Procedures and Published Financial Statements (continued)

B. Actual disbursements exceeded final budgeted amounts in the following funds:

Fund	Years Ended December 31,
General Revenue	2010 and 2009
Special Road and Bridge	2010
Law Enforcement Sales Tax	2010 and 2009
Senate Bill 40	2009
Recorders Users	2009
Prosecuting Attorney Training	2010
Emergency 911	2010
Victims of Domestic Violence and Domestic Violence Shelters	2009
Prosecuting Attorney Bad Check	2009
DC Law Enforcement Restitution	2010 and 2009
Prosecuting Attorney Delinquent Tax	2010
Pilot Program	2010
County Clerk Discretionary	2010
Sheriff's Civil Fees	2010
Drainage and Levee Districts	2009
Off System Bridge	2010
Sheriff's Commissions	2010 and 2009
Remaining	2010 and 2009
CERF Collection	2010
Tax Maintenance	2010 and 2009

Also, because a budget was not adopted for several funds, expenditures in that fund exceeded budgetary authority to the extent that the budget was not adopted. These funds are as follows:

Fund	Years Ended December 31,
Emergency Management	2009
DC Sheriff Revolving	2010 and 2009
HAVA	2009

C. The following funds were not budgeted:

Fund	Years Ended December 31,
Emergency Management	2009
DC Sheriff Revolving	2010 and 2009
HAVA	2009

The above findings are repeat findings.

10-2 Budgetary Procedures and Published Financial Statements (continued)

If there are valid reasons which necessitate excess disbursements, budget amendments should be made following the same process by which the annual budget is approved, including public hearings and filing the amended budget with the State Auditor's office. In addition Section 50.622, RSMo 2000, provides that counties may amend the annual budget during any year in which the County receives additional funds, which could not be estimated when the budget was adopted and that the County shall follow the same procedures required for adoption of the annual budget to amend the budget.

To allow the budgets to be used as a planning tool and to ensure compliance with State law, budget amendments should be made prior to incurring the actual expenditures, valid reasons, which necessitate excess disbursements, should be provided to support amendments, and public hearings should be held prior to the adoption of all budget amendments.

We Recommend:

The County Commission:

A. Discontinue deficit budgeting and reduce spending and increase revenue to obtain a positive cash balance in all funds.

B. And all County officials ensure disbursements not be authorized in excess of budgeted amounts. If a necessity exists to exceed a budget, the appropriate procedures should be followed to amend the appropriate budget.

C. And all County officials should ensure that all funds, regardless of size, are budgeted.

Auditee's Response and Plan for Corrective Action:

A. They will discontinue deficit budgeting as soon as possible.
B-C. All will be implemented.

10-3 Payroll and Related Matters

Some employees do not prepare a timesheet, and some timesheet information is based on estimated hours worked. Overtime and compensatory time policies are not adequate and do not appear to comply with the Fair Labor Standards Act of 1938 (FLSA). The County accrues straight time off (compensatory time) to employees who work more than the County's normal 40-hour work period, although the FLSA requires compensatory time to be accrued at time and one-half. In addition, timesheets were not always signed by employees or reviewed and signed by the supervisor. The timesheets turned in by the clean up personnel were not signed by a supervisor.

Payrolls are processed once a month, and the County policy is to have each department submit timesheets or total hours worked for each employee to the County Clerk's office from two to five days in advance of the pay date to enable the payroll to be processed. The time reported for each employee represents actual hours worked from the beginning of the pay period through the date the information is submitted and estimated hours to be worked during the last two to five days of the pay period. No documentation was available to indicate the hours actually worked were subsequently compared to the hours estimated.

10-3 Payroll and Related Matters (continued)

Paying County employees for estimated hours may lead to errors, inconsistencies in the calculation of overtime and accumulated leave balances, and the potential for employees to be over/under paid. In addition, detailed timesheets signed by the employee and approved by a supervisor are necessary to monitor overtime, leave, and compensatory time, and are beneficial in demonstrating compliance with County policies and the requirements of the Fair Labor Standards Act of 1938 (FLSA).

Certain County departments are not using the same methods of paying employees in their department. The majority of the departments prorate the employee's monthly salary per the hours worked for the period. For example, if there are 170 hours in the pay period and an employee works only 85 hours, the employee would be paid for only half of their normal monthly salary. However, there are several instances where employees are being paid for the entire month for only working a small percentage of the required hours. In these cases, the County is overpaying these employees and not utilizing public funds in a prudent manner.

The County Clerk's office does not adequately maintain accrued vacation or sick leave for all employees for all departments.

We Recommend:

A. All employees of all departments should submit a timesheet that bears the signature of the employee and reviewed and signed by the supervisor before payment is rendered. In addition, copies of all timesheets should be maintained in the County Clerk's office for safekeeping.

B. If the County continues to use estimated hours worked for the last days of the pay period, the County should establish procedures to obtain documentation from the employees' supervisors for any differences between estimated and actual time worked, and fully document any applicable adjustments to the employees' pay or leave records when actual time worked is different from estimated time worked.

C. The County should adopt overtime and compensatory time policies which comply with the FLSA, and ensure employee overtime and compensatory time calculations do not include nonworking time such as leave and compensatory time used.

D. The County Clerk should maintain adequate and accurate records regarding accrued vacations and sick leave and vacation time and sick leave used by employees.

E. The proper proration of monthly payrolls should be adopted by all departments in the County as the proper method of payment of all employees.

Auditee's Response and Plan for Corrective Action:

A-E All will be implemented.

Section III – Federal Award Findings and Questioned Costs

There are no findings and there are no questioned cost for December 31, 2010 and 2009.

Follow-Up on Prior Audit Findings for an
Audit of Financial Statements Performed in Accordance
With *Government Auditing Standards*

DUNKLIN COUNTY, MISSOURI
FOLLOW-UP ON PRIOR AUDIT FINDINGS FOR AN
AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE
WITH *GOVERNMENT AUDITING STANDARDS*
DECEMBER 31, 2010 AND 2009

In accordance with *Government Auditing Standards*, this section reports the auditor's follow-up on action taken by Dunklin County, Missouri, on the applicable findings in the prior audit report issued for the two years ended December 31, 2008.

08-1 Budgetary Procedures and Published Financial Statements

Budgets were not prepared for several county funds, actual disbursements exceeded the budget in several funds, and the budgets for some funds did not reasonably reflect the anticipated financial activity and balances.

Recommendation:

The County Commission:

A. And other County officials need to discontinue deficit budgeting.

B. And other County officials review budget to actual reports carefully and refrain from approving disbursements which exceed budgeted amounts. If valid reasons necessitate excess disbursements, the original budget should be formally amended and filed with the State Auditor's office.

C. And other county officials ensure budgets are prepared for all county funds.

Status:

A-C Not resolved. See finding No. 10-2.

Summary Schedule of Prior Audit Findings
in Accordance With OMB Circular A-133.

DUNKLIN COUNTY, MISSOURI
SUMMARY SCHEDULE OF PRIOR AUDIT FINDINGS
IN ACCORDANCE WITH OMB CIRCULAR A-133
DECEMBER 31, 2010 AND 2009

Section .315 of OMB Circular A-133 requires the auditee to prepare a Summary Schedule of Prior Audit Findings to report the status of all findings that are relative to federal awards and included in the prior audit report's Schedule of Findings and Questioned Costs. The summary schedule also must include findings reported in the prior audit's Summary Schedule of Prior Audit Findings, except those listed as corrected, no longer valid, or not warranting further action.

Section .500(e) of OMB Circular A-133 requires the auditor to follow up on these prior audit findings; to perform procedures to assess the reasonableness of the Summary Schedule of Prior Audit Findings; and to report, as a current year finding, when the auditor concludes that the schedule materially misrepresents the status of any prior findings.

The prior audit report issued for the two years ended December 31, 2008, included no audit findings that Section .510(a) of OMB Circular A-133 requires to be reported for an audit of federal awards.

MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report-
Auditors' Findings

DUNKLIN COUNTY, MISSOURI
MANAGEMENT ADVISORY REPORT
DECEMBER 31, 2010 AND 2009

We have audited the accompanying Government-Wide Statements of Net Assets - Cash Basis, Government-Wide Statements of Activities - Cash Basis, Governmental Funds Balance Sheets - Cash Basis, Governmental Funds Statements of Receipts, Disbursements, and Changes in Cash Balances, and Statements of Fiduciary Net Assets - Cash Basis of Dunklin County, Missouri as of and for the years ended December 31, 2008 and 2007, and have issued our report thereon dated June 30, 2011. We also have audited the compliance of Dunklin County, Missouri, with the types of compliance requirements described in the *U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement* that are applicable to its major federal program for the years ended December 31, 2010 and 2009, and have issued our report thereon dated June 30, 2011.

We obtained an understanding of internal controls significant to the audit objectives and considered whether specific controls have been properly designed and placed in operation. However, providing an opinion on internal controls was not an objective of our audit and accordingly, we do not express such an opinion.

We also obtained an understanding of legal provisions significant to the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting significant instances of noncompliance with the provisions. However, providing an opinion on internal controls was not an objective of our audit and accordingly, we do not express such an opinion.

Our audit was conducted in accordance with applicable standards contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, and included such procedures as we considered necessary in the circumstances.

This Management Advisory Report (MAR) presents any findings arising from our audit of the elected county officials and the county board referred to above. In addition, this report includes any findings other than those, if any, reported in the accompanying Schedule of Findings and Questioned Costs. These MAR Findings resulted from our audit of the financial statements of Dunklin County, Missouri or of its compliance with the types of compliance requirements applicable to its major federal program but do not meet the criteria for inclusion in the written reports on compliance (and other matters, if applicable) and on internal control over financial reporting or compliance that are required for audits performed in accordance with *Government Auditing Standards* and OMB Circular A-133, *Audits of States, Local Government, and Non-Profit Organizations.* There are no findings to report.

Follow-Up on Prior Audit Findings

DUNKLIN COUNTY, MISSOURI
FOLLOW-UP ON PRIOR AUDIT FINDINGS
DECEMBER 31, 2010 AND 2009

In accordance with *Government Auditing Standards*, this section reports the auditors' follow-up on action taken by Dunklin County, Missouri, on findings in the Management Advisory Report (MAR) of the audit report issued for the two years ended December 31, 2008. Any prior recommendations which have not been implemented, but are considered significant, are repeated in the current MAR. Although the remaining unimplemented recommendations are not repeated, the county should consider implementing those recommendations. There were no findings reported on the audit report issued for the two years ended December 31, 2008 to follow up.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Carroll County, Missouri

The Office of the State Auditor, in cooperation with Carroll County, has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2010, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by McBride, Lock & Associates, Certified Public Accountants, is attached.

INDEPENDENT AUDITORS' REPORT

To the County Commission and
Officeholders of Carroll County, Missouri

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Carroll County, Missouri, as of and for the years ended December 31, 2010 and 2009, which collectively comprise the County's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the Carroll County, Missouri's management. Our responsibility is to express opinions on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and the significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinions.

As described in Note 1, the basic financial statements of Carroll County, Missouri were prepared on the cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

The financial statements do not include financial data for the Carroll County Health Center, a legally separate component unit of the County. Accounting principles generally accepted in the United States of America require the financial data for this component unit to be reported with the financial data of the County's primary government unless the County also issues financial statements for the financial reporting entity that include the financial data for its component units. The County has not issued such reporting entity financial statements. The assets, liabilities, net assets, revenues, and expenses of the aggregate discretely presented component unit are not reasonably determinable.

In our opinion, except for the effect of the omission of the discretely presented component unit, as discussed above, the financial statements referred to above present fairly, in all material respects, the respective financial position — cash basis of the governmental activities, each major fund, and the aggregate remaining fund information of Carroll County, Missouri, as of December 31, 2010 and 2009 and for the years then ended in conformity with the basis of accounting described in Note 1.

In accordance with *Government Auditing Standards*, we have also issued a report dated May 6, 2011 on our consideration of Carroll County, Missouri's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and budgetary comparison information on pages iv through viii and 17 through 19 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statement, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Carroll County, Missouri's financial statements as a whole. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated, in all material respects, in relation to the financial statements as a whole.

CARROLL COUNTY, MISSOURI
MANAGEMENT'S DISCUSSION AND ANALYSIS
YEARS ENDED DECEMBER 31, 2010 AND 2009

This discussion and analysis of Carroll County's financial performance provides an overview of the County's financial activity for the years ended December 31, 2010 and 2009. The information below, prepared by the County's management, should be read in conjunction with the financial statements that immediately follow.

OVERVIEW OF THE FINANCIAL STATEMENTS

The contents of this report comply with the presentation requirements of Statement No. 34 of the Governmental Accounting Standards Board, *Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments*, as applicable to the cash basis of accounting. The County's basic financial statements consist of government-wide financial statements, fund financial statements, and notes to the financial statements. The notes are an integral part of the government-wide and fund financial statements and provide more detail about the information presented in the statements. This report also contains other financial information in addition to the basic financial statements.

The county has elected to present its financial statements on the cash basis of accounting, a basis of accounting other than accounting principles generally accepted in the United States of America. "Basis of accounting" refers to when financial events are recorded. Under the cash basis of accounting, revenues are recorded when received rather than when earned, and expenses are recorded when paid rather than when the related liabilities are incurred. Therefore, when reviewing the financial information and discussion in this report, the reader should recall the limitations resulting from use of the cash basis of accounting.

Government-Wide Financial Statements

The Government-Wide Statement of Net Assets and the Government-Wide Statement of Activities report information about the County as a whole. These statements present the County's net assets and show how they have changed. Over time, increases or decreases in the County's net assets are one indicator of whether its financial health or position is improving or deteriorating. However, to assess the County's overall financial health, the reader needs to consider additional non-financial factors. The government-wide financial statements report only governmental activities—activities such as general government operations, public safety, and health and welfare that are usually financed through taxes and intergovernmental receipts. The County has no business-type activities—activities financed wholly or partially by fees charged to external parties for goods or services.

Fund Financial Statements

The fund financial statements provide detailed information about the most significant funds—not the County as a whole. Some funds are required to be established by state law or by bond covenants. However, the County Commission establishes other funds to help it control and manage money for particular purposes or to show that it is meeting legal responsibilities for using certain taxes, grants, or other sources of receipts. The fund financial statements include only governmental funds, which

focus on the flow of money into and out of those funds and the balances left at year-end that are available for spending. The governmental fund statements provide a detailed view of the County's general government operations and the basic services it provides. Governmental fund information helps the reader determine whether more or fewer financial resources can be spent in the near future to finance the County's programs.

The County as Trustee

The County is the trustee, or fiduciary, for its trust and agency funds that are used to account for assets held by the County's elected officials in a trustee capacity or as an agent for individuals, private organizations, other governments, or other funds. The County's fiduciary assets are reported in a separate Statement of Fiduciary Net Assets. Fiduciary funds are excluded from the County's other financial statements because the County cannot use these assets to finance its operations. The County is responsible for ensuring that the assets reported in these funds are used for their intended purposes.

Other Information

The report also includes, as required supplementary information, this Management's Discussion and Analysis and the Budgetary Comparison Schedule - General Fund and Major Special Revenue Funds - Cash Basis. Such information is intended to supplement the government-wide financial statements, fund financial statements, and notes to the financial statements, but is not a part of those statements.

In addition, the report includes the Schedule of Expenditures of Federal Awards, required for audits of federal program expenditures conducted in accordance with Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*.

FINANCIAL HIGHLIGHTS

The County’s net assets continue to remain stable or increase. The net assets in total governmental funds on December 31, 2010 increased by a grand total of $396,126 in the one-year from December 31, 2009.

THE COUNTY AS A WHOLE

	2010	2009	2008
Net Assets	$ 3,201,400	$ 2,805,274	$ 2,675,546
Program Receipts	2,509,424	2,357,016	2,641,023
General Receipts	2,007,375	1,766,602	2,206,883
Disbursements	4,120,673	3,977,379	4,546,959
Change in Net Assets	396,126	146,239	300,947

THE COUNTY'S FUNDS

Highlights from 2010

In January of 2010 it looked like the County's budget was one of shrinking assessed valuation of approximately five million dollars due to the diversion of State-assessed value from KCP&L, an anticipated reduction in local sales tax of $100,000 reflecting fewer taxable goods being purchased in the County; an unprecedented appropriation for funding of the Federal Government and State of Missouri's August Primary and November General elections that included inflated costs due to equipment mandated by the Help America Vote Act (HAVA) as well as numerous other State and Federal unfunded mandates. However on a good note, the TransCanada Keystone Pipeline project infused County General Revenue with an additional $19,639,561 from Locally Assessed Construction Work in Progress valuation. The closing of the Carroll County Jail allowed for a total savings in excess of $100,000 by eliminating salaries and benefits of jailers, utility costs and ongoing jail maintenance. Therefore at year-end, things were not as bad as anticipated and the County ended the year with a positive change in net assets of nearly $ 400,000.

Road and Bridge

Federal Bridge Replacement Off-System program (BRO) monies are federal fuel tax dollars allocated for replacement of bridges. The amount budgeted in 2010 on specific previously obligated bridge projects was $650,000, an estimated reduction of $515,000 with future funding of the program unknown. Funding of the estimated expenditures of $1,637,624 versus the estimated revenues of $1,464,485 was made possible by the cost saving measures taken in previous years that allowed a carry-over balance in the fund.

Highlights from 2009

A significant change in revenues collected through the State Assessed Railroad and Utilities tax was due to the increased valuation for the new Rockies Express pipeline that was completed in 2008. An increase of $855,047 in valuation brought in a total of $27,966 to County General Revenue. In addition to that, the collection of local use tax was boosted significantly during the time the company purchased items and bought goods in the County. The anticipated revenue for the Use Tax in the 2008 budget was $150,000, with actual tax collected being $562,391. This positive difference of $412,391 certainly went a long way in helping to balance the 2009 budget.

The significant change in the Assessment fund in 2009 was a settlement and release of claim agreement by and between Assessor Devin Ford Frazier and the County in the amount of $26,569 as un-liquidated back pay to settle in full all claims for the dispute over the proper level of pay due to an Official as a result of the application of the elected officials' pay principles determined in the Court of Appeals case of Goodwin vs. Carroll County.

A significant change in County Revenue in 2009 was the decision to house prisoners from the Carroll County Jail to the 222 bed facility in Henrietta, Missouri operated by Ray County. The Carroll County Commission and the newly elected Sheriff took a look at the rising costs and diminishing revenues associated with operating the facility along with the suggestions of MOPERM, the Counties liability insurance carrier, to reach this decision.

In December 2009 the Circuit Clerk and Associate Division II offices were consolidated by the Supreme Court. This consolidation affected all clerical functions of the Circuit Court into a single office to include the Office of the Circuit Clerk, Associate Division, Probate Division and Juvenile Division which will now be known as "Circuit Court". The appointing authority exercising control over these State-paid deputies and Division clerks is the Associate Circuit Judge Kevin Walden. Very little change to the revenues or expenditures of the Carroll County 2010 budget was noted other than the elimination of redundant funds that were combined. Other redundant departmental revenues and expenditures combined for budgetary purposes were the Sheriff and Jail departments which are now combined together as one.

CAPITAL ASSET AND DEBT ADMINISTRATION

The County continues to pay quarterly payments of $9,299 on a lease/purchase plan with Baystone Financial services for a Hyundai Excavator. The total cost was $134,600 in 2006 and was completed in April of 2010. The County paid off the energy loan for the courthouse windows with the Department of Natural Resources in 2010.

The Carroll County Clerk, Assessor and Collector-Treasurer continue to make payments on a lease purchase for the upgrade of hardware and software associated with a computer system purchased in 2007. The total cost of the equipment and software was $80,000 paid to Tyler Technologies. Quarterly payments of $4,050 continue to be required until June of 2013.

ECONOMIC FACTORS AND NEXT YEAR'S BUDGETS AND RATES

County Revenue
The second pipeline project, Keystone/TransCanada Line, began in 2009 with locally assessed value for new construction being put on the books for 2010 and State assessed valuation to be added to the State-assessed values in 2011. This valuation is expected to increase our State-assessed valuation considerably.

Road and Bridge
The Road and Bridge funds are anticipated to be majorly affected by the Federal cuts and withholding of State funds. Until the fate of the Bridge Replacement Off-System program is known, fewer federal bridges will be programmed and further reductions may be necessary.

Assessment Fund
The Assessment fund will most likely be the hardest fund hit proportionately due to the State of Missouri General Assembly slashing the per parcel reimbursement of the expenses of the Assessor's office from $5.99 per parcel to $4.00 per parcel in 2010 and confirmed to be $3.84 per parcel for fiscal year 2011-12. This level of funding does not begin to meet fifty percent of the expenditures in the office of the Assessor.

CONTACTING THE COUNTY'S FINANCIAL MANAGEMENT

Questions about this report or requests for additional information should be addressed to Peggy McGaugh, Carroll County Clerk, 8 South Main, Suite 6, Carrollton, Missouri 64633, Phone 660-542-0615.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Carroll County, Missouri ("County"), is governed by a three-member board of commissioners. In addition to the three board members, there are eight elected Constitutional Officers: Assessor, County Clerk, Circuit Clerk/Recorder, Collector-Treasurer, Coroner, Prosecuting Attorney, Public Administrator, and Sheriff.

As discussed further in Note 1, these financial statements are presented on the cash basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP). Generally accepted accounting principles include all relevant Government Accounting Standards Board (GASB) pronouncements. In the government-wide financial statements, except as described in Note 1.A., Financial Accounting Standards Board (FASB) pronouncements and Accounting Principle Board (APB) opinions issued on or before November 30, 1989, have been applied, to the extent they are applicable to the cash basis of accounting, unless those pronouncements conflict with or contradict GASB pronouncements, in which case GASB prevails.

A. Reporting Entity

The County's operations include tax assessments and collections, state/county courts, county recorder, public safety, economic development, social and human services, and cultural and recreation services.

The financial statements referred to above include the primary government of Carroll County, Missouri which, except as described in the following paragraph, consists of all funds, organizations, institutions, agencies, departments, and offices that are considered by the Missouri State Auditor's Office to comprise the County's legal entity.

The financial statements do not include financial data for the Carroll County Health Center, a legally separate component unit of the County, as required by accounting principles generally accepted in the United States of America.

B. Basis of Presentation

Government-wide Financial Statements:

The statements of net assets and the statements of activities present financial information about Carroll County, Missouri. All County activities are governmental activities generally financed through taxes, intergovernmental revenues, and other non-exchange transactions.

The statement of net assets presents the financial condition of the governmental activities of the County at year-end. The statement of activities presents a comparison between direct expenses and program revenues for each function of the County's governmental activities. This comparison identifies the extent to which each governmental function is self-financing or draws from the general revenues of the County.

Direct expenses are those that are specifically associated with a particular function. *Program revenues* are (a) charges to those who purchase, use, or directly benefit from goods, services or privileges provided by a given function, and (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Taxes, unrestricted interest earnings and other miscellaneous revenue not properly included among program revenues are presented instead as *general revenues.*

Fund Financial Statements:

Following the government-wide financial statements are separate financial statements for governmental funds and fiduciary funds. Fiduciary funds are excluded from the government-wide financial statements. Major individual governmental funds are reported as separate columns in the fund financial statements. The County has determined that the General Fund, Road and Bridge, Courthouse Restoration, and Emergency Enhanced 911 are major governmental funds. All other governmental funds are reported in one column labeled "Non-major Governmental Funds".

The fund financial statements of the County are organized on the basis of funds, each of which is considered a separate accounting entity with self-balancing accounts that comprise its assets, liabilities, fund balances/net assets, revenues and expenditures.

Governmental resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled. The various funds are summarized by type are in the basic financial statements. The following fund types are used by the County:

Governmental Fund Types

Governmental funds are those through which most governmental functions are financed. The measurement focus is upon determination of and changes in financial position. The following are the County's governmental major funds:

General Fund — The General Fund is the general operating fund of the County. It is used to account for all financial resources except those required to be accounted for in another fund.

Road and Bridge Fund — A special revenue fund used to account for receipts of State distributions and Federal grants and related expenditures for road maintenance and improvement projects.

Courthouse Restoration Fund – A special revenue fund used to account for receipts of sales tax monies that are restricted to major restoration and improvement projects of the County Courthouse building and grounds.

Emergency Enhanced 911 – A special revenue fund used to account for receipts of sales tax monies that are restricted to the operations of the emergency response system.

The other governmental funds of the County are considered non-major funds and are primarily special revenue funds, which account for the proceeds of specific revenue sources that generally are legally restricted to expenditures for specific purposes.

Fiduciary Fund Types

Agency — Agency funds are used to account for assets held by the County in a trustee capacity as an agent of individuals, private organizations, other funds or other governmental units. Agency funds are custodial in nature (assets equal liabilities) and do not involve the measurement of results of operations. These funds account for activities of collections for other taxing units by the Collector of Revenue and other agency operations.

C. Basis of Accounting

Basis of accounting determines when transactions are recorded in the financial records and reported on the financial statements. Government-wide financial statements and fund financial statements are prepared using the cash basis of accounting.

This basis of accounting recognizes assets, liabilities, net assets/fund equity, revenues, and expenditures when they result from cash transactions except that purchases of investments are recorded as assets; funds collected through the agency funds and not yet remitted are recorded as liabilities in the agency funds; and receipts of proceeds of short-term debt are recorded as liabilities. This basis is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

As a result of the use of this cash basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation bonds, and obligations under capital leases) and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

If the County utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while all government-wide financials would be presented on the accrual basis of accounting.

D. Budgets and Budgetary Accounting

The County follows these procedures in establishing the budgetary data reflected in the financial statements:

1. In accordance with Chapter 50 RSMo, the County adopts a budget for each governmental fund.

2. On or before the second Monday in January, each elected officer and department director will transmit to the County Commission and County Clerk, who serves as budget officer, the budget request and revenue estimates for their office or department for the budget year.

3. The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning January 1. The proposed budget includes estimated revenues and proposed expenditures, on the cash basis of accounting, for all budgeted funds. Budgeting of appropriations is based upon an estimated fund balance at the beginning of the year as well as estimated revenues to be received.

4. State law requires that, at the individual fund level, budgeted expenditures not exceed budgeted revenues plus anticipated beginning fund balance.

5. A public hearing is conducted to obtain public comment on the budget. Prior to its approval by the County Commission, the budget document is available for public inspection, which usually takes place the third and fourth weeks of January.

6. Prior to February 1 the budget is legally enacted by a vote of the County Commission.

7. Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by a formal vote of the Commission. Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year.

8. Adoption of a formal budget is required by law, and the County adopted a formal budget for all funds.

9. Section 50.740 RSMo. prohibits expenditures in excess of the approved budgets. Actual expenditures exceeded budgeted amounts for the following funds.

Fund	2010	2009
Assessment	X	N/A
Community Development Block Grant	X	X
Johnson Grass	N/A	X
Emergency Watershed Protection	N/A	X

E. Property taxes are based on the voter-approved tax levy applied to the real and personal assessed property values. Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on September 1 and tax bills are mailed to taxpayers in October and November, at which time they are payable. All unpaid property taxes become delinquent as of January 1 of the following year.

The assessed valuation of the tangible taxable property, included within the County's boundaries for the calendar year 2010 and 2009, for purposes of taxation was:

	2010	2009
Real Estate	$ 144,501,500	$ 118,796,831
Personal Property	35,637,896	34,104,490

During 2010 and 2009 the County Commission approved a tax levy per $100 of assessed valuation of tangible taxable property for the calendar year 2010 and 2009, for purposes of County taxation, as follows:

	2010	2009
General Revenue	0.2497	0.2542
Johnson Grass	0.0100	0.0100
Senate Bill 40	0.0963	0.0968

The Special Road and Bridge fund does not have a tax levy, however, the fund keeps a commission equal to 5 cents per $100 of assessed valuation from each of the townships' Road and Bridge levy.

F. Cash Deposits and Investments

Deposits and investments are stated at cost, which approximates market. Cash balances for all the County Treasurer funds are pooled and invested to the extent possible. Interest earned from such investments is allocated to each of the funds based on the fund's average daily cash balance. Cash equivalents may include repurchase agreements and any other instruments with an original maturity of ninety days or less.

State law authorizes the deposit of funds in banks and trust companies or the investment of funds in bonds or treasury certificates of the United States, other interest bearing obligations guaranteed as to both principal and interest by the United States, bonds of the State of Missouri or other government bonds, or time certificates of deposit, purchased at a price at or below par. Funds in the form of cash on deposit or time certificates of deposit are required to be insured by the Federal Deposit Insurance Corporation (FDIC) or collateralized by authorized investments held in the County's name at third-party banking institutions. Details of these cash balances are presented in Note 2.

G. Interfund Activity

During the course of operations, interfund activity occurs for purposes of providing supplemental funding, reimbursements for goods provided or services rendered, or short and long-term financing.

Interfund activities are reported as “transfers in” by the recipient fund and as “transfers out” by the disbursing fund. However, interfund reimbursements have been eliminated from the financial statements so that reimbursed expenditures are reported only in the funds incurring the costs.

H. Net Assets/Fund Equity

On the Government-wide financial statements, equity is classified as net assets and displayed in two-components: restricted and unrestricted. Net assets represent the difference between assets and liabilities. Under the cash basis of accounting, liabilities other than loans from other funds and short-term borrowings are not recorded. Therefore, net assets generally equal the cash and cash equivalents balance. Net assets are reported as restricted when there are limitations imposed on their use either through the enabling legislation adopted by the County or through external restrictions imposed by creditors, grantors, or laws or regulations of other governments. All other net assets are reported as unrestricted.

On the fund financial statements, equity is classified as fund balance and displayed in two components: reserved and unreserved. Any portion of a fund balance that is not appropriate for expenditure or is legally segregated for a specific future use is reported as reserved. All other fund balances are reported as unreserved.

2. CASH AND INVESTMENTS

The County maintains a cash and temporary investment pool that is available for use by all funds. Each fund type's portion of this pool is displayed on the financial statements as "Cash and Cash Equivalents" under each fund's caption.

Deposits - Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. At December 31, 2010 and 2009, the carrying amounts of the County's deposits were $3,201,400 and $2,805,274, respectively, and the bank balances were $8,202,264 and $7,536,507, respectively. Of the bank balances, $572,488 and $637,566 for December 31, 2010 and 2009, respectively, were covered by federal depository insurance and the remainder was covered by collateral held at the Federal Reserve Bank and the County’s safekeeping bank agent in the County’s name.

At December 31, 2010 and 2009, the County Collector held cash representing collections of property taxes on behalf of various taxing districts in the County, including the Senate Bill 40 Board. These amounts, all of which were secured by pledged collateral, amounted to $4,649,449 and $4,368,063 at December 31, 2010 and 2009, respectively.

3. INTERFUND TRANSFERS

The County made the following interfund transfers during 2010 and 2009:

	Year Ended December 31, 2010	
	Transfers In	
Transfers Out	General	Non-Major
General	$ -	$ 5,325
Road and Bridge	65,011	-
Non-Major Governmental Funds	11,655	-

	Year Ended December 31, 2009	
	Transfers In	
Transfers Out	General	Non-Major
General	$ -	$ 5,777
Road and Bridge	55,000	-
Non-Major Governmental Funds	1,711	-

4. COUNTY EMPLOYEES' RETIREMENT FUND - CERF

The County Employees' Retirement Fund was established by the State of Missouri to provide pension benefits for County officials and employees.

A. Plan Description

The Retirement Fund is a cost-sharing multiple employer defined benefit pension plan covering any county elective or appointed officer or employee whose performance requires the actual performance of duties during not less than one thousand (1,000) hours per calendar year in each county of the state, except for any city not within a county and any county of the first classification having a charter form of government. It does not include county prosecuting attorneys covered under Sections 56.800 to 56.840, RSMo, circuit clerks and deputy circuit clerks covered under the Missouri State Retirement System, county sheriffs covered under Sections 57.949 to 57.997, RSMo and certain personnel not defined as an employee per Section 50.1000(8), RSMo. The Fund was created by an act of the legislature and was effective August 28, 1994.

The general administration and the responsibility for the proper operation of the fund and the investment of the fund are vested in a board of directors of nine persons.

B. Pension Benefits

Beginning January 1, 1997, employees attaining the age of sixty-two years may retire with full benefits with eight or more years of creditable service. The monthly benefit for County Employees is determined by selecting the highest benefit calculated using three different prescribed formulas (flat-dollar formula, targeted replacement ratio formula, and prior plan's formula). A death benefit of $10,000 will be paid to the designated beneficiary of every active member upon his or her death.

Upon termination of employment, any member who is vested is entitled to a deferred annuity, payable at age sixty-two. Early retirement is at age sixty. Any member with less than eight years of creditable service forfeits all rights in the fund but will be paid his or her accumulated contributions.

The County Employees' Retirement Fund issues audited financial statements. Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, P.O. Box 2271, Jefferson City, MO 65102-2271, or by calling 1-573-632-9203.

C. Funding Policy

In accordance with State Statutes, the Plan is partially funded through various fees collected by Counties and remitted to CERF. Further, a contribution to CERF of 2% of annual salary is required for eligible employees hired before February 2002, while a contribution of 6% of annual salary is required of employees hired after February 2002, in order to participate in CERF. The County employees fund these contributions. During 2010 and 2009, the County collected and remitted to CERF employee contributions of approximately $37,629 and $37,960, respectively, for the years then ended.

5. DEFINED CONTRIBUTION AND DEFERRED COMPENSATION PLANS

A. Plan Description

Carroll County offers employees the opportunity to participate in the CERF defined contribution plan and Internal Revenue Code (IRC) Section 457 deferred compensation plan. The plans' provisions and contribution requirements were established by and may be amended only by the Missouri General Assembly. Pension plan members are eligible to participate.

B. Contributions

Pension plan members are required to contribute 0.7 percent of gross compensation to the defined contribution plan. Contributions of $34,230 and $31,180 were made during the years ended December 31, 2010 and 2009, respectively. Participation in the deferred compensation plan is voluntary, and the employee elects the contribution level, subject to the limitations of IRC Sections 401(a) and 457. The CERF Board of Directors decides if matching contributions from the pension plan trust funds for a calendar year will be made to the defined contribution plan accounts of those who participated in the deferred compensation plan. The amount of any matching contribution is determined by the Board and is limited to 50 percent of a member's voluntary contributions to the deferred compensation plan, up to 3 percent of the member's compensation.

C. Administration

Maintenance of individual member accounts and custody of assets have been contracted to a third-party administrator and investment custodian, respectively. The County sends member contributions directly to the third-party administrator. Members may select from several options for investing their contributions and their share of matching contributions.

6. POST EMPLOYMENT BENEFITS

The County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by the County.

7. CLAIMS, COMMITMENTS, AND CONTINGENCIES

A. Compensated Absences

The County provides regular full-time employees with up to fifteen days of sick time – to accrue at 1.25 days for each calendar month worked. Upon termination, the employee is not compensated for accrued sick time. Vacation time is accrued for full-time employees at the rate of ten days per year for employees with one to five years of service; eleven days per year with six years of service; twelve days per year with seven years of service; thirteen days with eight years of service; fourteen days with nine years of service; and fifteen days with ten or more years of service, up to a maximum of 30 days. Upon termination, the employee is compensated for accrued vacation time up to a maximum of 30 days.

B. Federal and State Assisted Programs

The County has received proceeds from several federal and state grants. Periodic audits of these grants, when performed, could result in the disallowance of certain costs. Accordingly, such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds, if determined necessary, will be immaterial and, therefore, no provision has been made in the accompanying financial statements for the potential refund of grant monies.

C. Taxable Industrial Revenue Bonds

In April 2008, the County issued $88,500,000 in taxable industrial revenue bonds to finance the acquisition, construction, and equipping of a dry-mill ethanol plant to be leased to Show Me Ethanol, LLC. The bonds will be repaid in various installments beginning in April 2009 from lease payments pursuant to the terms of a Lease Agreement dated April 1, 2008, between the County and Show Me Ethanol. Because the bonds are secured and paid solely from lease payments generated by the project, the bonds do not constitute a liability of the County.

8. RISK MANAGEMENT

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is a member participant in a public entity risk pool which is a corporate and political body. The purpose of the risk pool is to provide liability protection to participating public entities, their officials, and employees. Annual contributions are collected based on actuarial projections which are intended to produce sufficient funds to pay losses and

expenses. Should contributions not produce sufficient funds to meet its obligations, the risk pool is empowered with the ability to make special assessments. Members are jointly and severally liable for all claims against the risk pool.

The County is also a member of the Missouri Association of Counties Self-Insured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this Fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The Fund is self-insured up to $2,000,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

9. CHANGE IN REPORTING ENTITY

The County has changed its definition of the reporting entity, as of January 1, 2009, to exclude the Law Library, Time Payment Fee, Circuit Court Interest, Associate Circuit Court Interest, Deputy Sheriff Salary Supplemental, and Law Enforcement Training - POST funds. The effect of the aforementioned change in reporting entity is to decrease cash balances of the governmental funds as previously reported at December 31, 2008 by the amount representing cash balances of the excluded funds.

The E-911 fund included within the report is effected by Missouri House Bill 1492 that revised the State statutes regarding emergency service boards. This Board is currently defined as a political subdivision of the state. Therefore, they will not subsequently be included in the scope of the County for reporting purposes. The change was effective as of August 28, 2010. In accordance with this consideration, the emergency service board should not be included as part of the Carroll County reporting entity subsequent to December 31, 2010.

10. LONG TERM DEBT

The County had the following long-term debt outstanding at December 31, 2010:

A. $37,232 in loans from a bank to finance a lease agreement for the acquisition of a new computer system. The lease is paid in equal quarterly installments of $4,050 through June 1, 2013, with interest at 6.243% annually. The schedule of remaining payments and interest is listed below:

Payment Date	Principal Due	Interest Due	Total Due
March 1, 2011	$ 3,469	$ 581	$ 4,050
June 1, 2011	3,523	527	4,050
September 1, 2011	3,578	472	4,050
December 1, 2011	3,634	416	4,050
March 1, 2012	3,691	359	4,050
June 1, 2012	3,749	301	4,050
September 1, 2012	3,807	243	4,050
December 1, 2012	3,866	184	4,050
March 1, 2013	3,927	123	4,050
June 1, 2013	3,988	62	4,050

11. COOPERATIVE VENTURES

The County has representatives on the governing board of the Carroll County Economic Development Board, which was created to promote the growth and stability of the local economy in Carroll County. The Board also consists of members from the town of Carrollton, Carrollton Municipal Utilities, and the Carrollton Area Chamber of Commerce. The County disbursed $2,500 to the Board in 2010, and $7,000 in 2009.

12. SUBSEQUENT EVENTS

The County has evaluated events subsequent to December 31, 2010 to assess the need for potential recognition or disclosure in the financial statements. Such events were evaluated through May 6, 2011, the date the financial statements were available to be issued. Based upon this evaluation, it was determined that no subsequent events occurred that require recognition or additional disclosure in the financial statements.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission and
Officeholders of Carroll County, Missouri

We have audited the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of Carroll County, Missouri, as of and for the years ended December 31, 2010 and 2009, which collectively comprise Carroll County, Missouri's basic financial statements and have issued our report thereon dated May 6, 2011. The report on the basic financial statements was qualified because of the omission of the Health Center, a legally separate component unit of the County. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards,* issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audits, we considered Carroll County, Missouri's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Carroll County, Missouri's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the Carroll County, Missouri's internal control over financial reporting.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be deficiencies, significant deficiencies, or material weaknesses, as defined above. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above. However, we identified certain deficiencies in internal control over financial reporting, described in the accompanying schedule of findings and recommendations as items 1 through 4, that we consider to be significant deficiencies in internal control over financial reporting. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Carroll County, Missouri's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audits, and accordingly, we do not express such an opinion. The results of our tests disclosed certain instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards* and which are described in the accompanying schedule of findings and recommendations as items 5 and 6.

We also noted a certain matter that we reported to management of Carroll County, Missouri, in the findings and recommendations section as item 7.

Carroll County, Missouri's response to the findings identified in our audit is described in the accompanying schedule of findings and recommendations. We did not audit Carroll County, Missouri's response and, accordingly, we express no opinion on it.

This report is intended solely for the information and use of the County Commission, County Officeholders, the Missouri State Auditor, and federal and state awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

INDEPENDENT AUDITORS' REPORT ON COMPLIANCE WITH REQUIREMENTS THAT COULD HAVE A DIRECT AND MATERIAL EFFECT ON EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE IN ACCORDANCE WITH OMB CIRCULAR A-133

To the County Commission and
Officeholders of Carroll County, Missouri

Compliance

We have audited Carroll County, Missouri's compliance with the types of compliance requirements described in the *OMB Circular A-133 Compliance Supplement* that could have a direct and material effect on each of Carroll County, Missouri's major federal programs for the years ended December 31, 2010 and 2009. Carroll County, Missouri's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of federal findings and questioned costs. Compliance with the requirements of laws, regulations, contracts, and grants applicable to each of its major federal programs is the responsibility of Carroll County, Missouri's management. Our responsibility is to express an opinion on Carroll County, Missouri's compliance based on our audits.

We conducted our audits of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards,* issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations.* Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about Carroll County, Missouri's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinion. Our audits do not provide a legal determination of Carroll County, Missouri's compliance with those requirements.

In our opinion, Carroll County, Missouri complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the years ended December 31, 2010 and 2009.

Internal Control Over Compliance

Management of Carroll County, Missouri, is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audits, we considered Carroll County, Missouri's internal control over compliance with the requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of Carroll County, Missouri's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be deficiencies, significant deficiencies, or material weaknesses. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above.

This report is intended solely for the information and use of the County Commission, County Officeholders, the Missouri State Auditor, federal and state awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

CARROLL COUNTY, MISSOURI
NOTES TO THE SCHEDULE OF EXPENDITURE OF FEDERAL AWARDS
YEARS ENDED DECEMBER 31, 2010 AND 2009

NOTE A - SIGNIFICANT ACCOUNTING POLICIES

The accompanying Schedule of Expenditures of Federal Awards (the Schedule) summarizes activity of the County's federal award programs. The schedule has been prepared on the cash basis of accounting.

NOTE B – MATCHING REQUIREMENTS

Certain Federal programs require that the County contribute non-Federal funds (matching funds) to support the Federally-funded programs. The County has complied with the matching requirements. The expenditure of non-Federal matching funds is not included on the Schedule.

NOTE C – SUBRECIPIENTS

During the years ended December 31, 2010 and 2009 the County passed through federal funds under the Emergency Watershed Protection Program (CFDA #10.923) to subawardees consisting of County levee districts in the amounts of $48,300 and $ 4,540, respectively.

CARROLL COUNTY, MISSOURI
SCHEDULE OF FEDERAL FINDINGS AND QUESTIONED COSTS
(INCLUDING MANAGEMENT'S PLAN FOR CORRECTIVE ACTION)
YEARS ENDED DECEMBER 31, 2010 AND 2009

SECTION I – SUMMARY OF AUDITORS' RESULTS

Financial Statements:

Type of Auditors' Report Issued: Unqualified

Internal Control Over Financial Reporting:

- Material weakness(es) identified? ___ Yes _X_ No

- Significant deficiencies identified that are not considered to be material weaknesses? _X_ Yes ___ None Reported

- Noncompliance material to financial statements noted? _X_ Yes ___ No

Federal Awards:

Internal Control Over Major Programs:

- Material weakness(es) identified? ___ Yes _X_ No

- Significant deficiencies identified that are not considered to be material weaknesses? ___ Yes _X_ None Reported

Type of Auditor's Report Issued on Compliance For Major Programs: Unqualified

Any audit findings disclosed that are required to be reported in accordance with section 510(A) of Circular A-133? ___ Yes _X_ No

Identification of Major Programs:

CFDA Number(s)	Name of Federal Program or Cluster
20.205	Highway and Transportation – Highway Planning and Construction

Dollar Threshold Used to Distinguish Between Type A and Type B Programs: $300,000

Auditee Qualified as low-risk: ___ Yes _X_ No

SECTION II – FINANCIAL STATEMENTS FINDINGS

Financial Statement Findings Required to be Reported in Accordance with Generally Accepted Governmental Auditing Standards:

1. Fee Office Receipts
2. Sheriff's Internal Controls
3. Transfers
4. E-911 Cash Balances and Interest Revenues
5. Investment Policy
6. Budgetary Controls
7. Custody of E-911 Records

Summary Schedule of Prior Audit Findings:

1. Fee Office Receipts
2. County Clerk's Controls and Procedures
3. Sheriff's Internal Controls
4. Sheriff's Bank Reconciliation Procedures
5. Investment Policy
6. Budgetary Controls
7. Transfers
8. Custody of E-911 Records

SECTION III – FEDERAL AWARD FINDINGS AND QUESTIONED COSTS

None

SECTION IV – FOLLOW-UP ON PRIOR YEAR'S FEDERAL AWARD FINDINGS AND QUESTIONED COSTS

None

FINDINGS AND RECOMMENDATIONS

MATERIAL WEAKNESS IN INTERNAL CONTROL

None

SIGNIFICANT INTERNAL CONTROL DEFICIENCIES

1. Fee Office Receipts

Condition: Several County fee offices use a form of "One Write" system which is intended to provide both a receipt for the customer and a record of receipts written, in journal form, with only one "writing" of the transaction. However, this system requires the receipt number to be copied from the receipt onto a receipt ledger, allowing for the possibility of defalcation or errors such as transposing numbers that could lead to duplicate or missing receipt numbers on the receipt ledgers. Once a receipt is issued, there is no copy of the pre-numbered receipt kept by the fee offices in order to follow up on any discrepancies noted on a receipt ledger.

The integrity of receipt numbers allows an independent party to account for the numerical sequence of receipts and verify that all dollars recorded on receipts are transmitted for deposit in the bank. It is a key internal control over the collection and deposit of revenues.

Recommendation: We recommend that all offices which issue receipts use a system that either includes pre-printed receipt numbers on both the ledger sheet and the receipt, or requires the receipt number to be hand-written and simultaneously recorded on both the receipt and ledger.

County Response: The Treasurer's Office has not experienced any problem in balancing with the monthly bank statement and the County Clerk's Office by using the "One Write Receipt System". The employees in the Treasurer's Office take pride in keeping track of receipts in numerical sequence, and the office currently has a good supply of the costly "One Write Receipts" on hand, however, copies of the receipts issued will be made prior to distribution to the client until the supply of unused receipts are exhausted. Both the Assessor and County Clerk also have a large amount of unused receipts on hand.

Auditor's Evaluation: The response is appropriate to correct the concern.

2. Sheriff's Internal Controls

Condition: Internal controls help to prevent and detect misappropriation of funds. One type of internal control that can detect misappropriation of funds is the separation of various aspects of a transaction. For example, a person who has access to blank checks and the ability to write checks should not also reconcile the bank account. This is because, in the event of a check forgery, the person reconciling the bank account may notice the unauthorized disbursement and forged signature. However, if this person is in a position to have committed the forgery, this detective internal control will not be effective.

During our audit procedures at the Sheriff's Department, we noted that accounting duties are not segregated as described above. The office manager is primarily responsible for preparing checks, bank reconciliations, and maintaining the accounting records for the Sheriff's fee account.

The Sheriff reviews the bank statements at the end of the month. However, this review does not include reviewing supporting documentation related to the checks written by the office manager to ensure that the check was written for the correct amount, to a legitimate payee, and for goods or services that are necessary and have been received.

Recommendation: We recommend that the Sheriff's office implement procedures to segregate the functions of authorizing purchases, maintaining the accounting records, and reconciling the bank account. This could be accomplished by having the Sheriff become the authorized signer on the Sheriff's fee account, which would give him the duty of authorizing expenditures while the office manager records them in the accounting records and reconciles the bank account.

County Response: I concur that I will now approve the information prior to the Office Manager issuing checks.

Auditor's Evaluation: The response is appropriate to correct the concern.

3. Transfers

Condition: As recorded in the financial statements published with the County's annual budget, transfers from other funds did not equal transfers to other funds during either 2009 or 2010. In 2009, a receipt of a worker's compensation refund was recorded as a transfer in to the Johnson Grass fund with no accompanying transfer out of a County fund. In 2010, a transfer out of the General Revenue fund was recorded for a payroll deduction error that occurred in 2009 with no accompanying transfer in from a County fund. Transfers in and out should only be recorded for transactions between County funds and should agree at year end.

Recommendation: We recommend that the County only record transfers for transactions between County funds and ensure that all transfers to a fund are accompanied by a recorded transfer from the sending fund.

County Response: The two entries reported as transfers were receipts and not transfers and were reported in the wrong place on the Budget. The County will record a Journal Entry for the minor transfers between funds rather than a formal Court Order and the entries will be reported in the proper locations in the future.

Auditor's Evaluation: The response is appropriate to correct the concern.

4. E-911 Cash Balances and Interest Revenues

Condition: The cash balances reported by the E-911 Board on their annual budgets did not agree to supporting documentation at December 31, 2009 and December 31, 2010. The Board reported a cash balance of $322,484 at December 31, 2009, while only $322,110 was supported by bank records, a variance of $374. The Board reported a cash balance of $237,377 at December 31, 2010, while only $236,937 was supported by bank records, a variance of $440. The differences appear to have been caused by issues with recording interest revenue from the Board's various Certificates of Deposit.

There were also variances between the cash balances and interest revenue reported by the Board on their 2010 budget and the published financial statements for the year ended December 31, 2009. The Board reported interest revenue during 2009 of $5,660 and a cash balance of $322,484 on their 2010 budget, however, their financial statements reported interest revenue of $5,725 and a cash balance of $322,550. The December 31, 2009 cash balance was corrected to agree with the budget on the 2010 financial statements.

Recommendation: We recommend that the E-911 Board ensure that cash balances and interest revenues are properly supported by bank records and that the amounts reported in the annual budgets and the published financial statements are consistent.

E-911 Board Response: The Carroll County E-911 Board will work closely with banks to obtain exact cash balances and interest revenues thereby reflecting these figures in the annual budget and published financial statement.

Auditor's Evaluation: The response is appropriate to correct the concern.

ITEMS OF NONCOMPLIANCE

5. Investment Policy

Condition: The County has not adopted an investment policy. The purpose of an investment policy is to establish the investment scope, objectives, delegation of authority, internal controls, standards of prudence, authorized investments and transactions, diversification mandate, risk tolerance, safekeeping and custodial procedures, and reporting requirements for the investment of cash funds. At the County, such a policy may establish criteria to determine when the investment of cash deposits should be considered, assigning responsibility for monitoring collateral, addressing procedures for overseeing and securing deposits in bond reserve accounts, procedures for bidding bank depositories, as well as policies and procedures specific to individual investment decisions. Section 110.270, RSMo 2007, based on Article IV, Section 15, Missouri Constitution, authorizes counties to place their funds, either outright or by repurchase agreement, in U.S. Treasury and agency obligations. In addition, Section 30.950, RSMo 2007, requires political subdivisions with authority to invest in instruments other than depository accounts at financial institutions to adopt a written investment policy. Among other things, the policy should commit the County to the principles of safety, liquidity, and yield (in that order) when managing public funds and to prohibit purchase of derivatives (either directly or through

repurchase agreements), use of leveraging (through either reverse repurchase agreements or other methods), and use of public funds for speculation.

We recognize that the County has no investments, however, creating an investment policy is an effort best accomplished with due consideration to all relevant factors, and not in a limited amount of time when the need is finally recognized. Such a policy also provides guidance for incoming Treasurers and can foster continuity in the County's investment strategies and self-imposed limits.

Adopting an investment is not only a prudent business practice, it is also required by state statutes.

Recommendation: We recommend the County adopt an investment policy and review compliance with this policy at least annually.

County Response: An Investment Policy was adopted by the Commissioners in May of 2011.

Auditor's Evaluation: The response is appropriate to correct the concern.

6. Budgetary Controls

Condition: The expenditures of the Johnson Grass, Community Development Block Grant, and Emergency Watershed Protection funds exceeded their budgeted amounts during 2009. The expenditures of the Assessment and Community Development Block Grant funds exceeded their budgeted amounts during 2010.

Recommendation: We recommend that the County Commission amend the budget when circumstances arise that were unforeseen during the budgeting process in order to maintain strict compliance with budgetary law.

County Response: The agreement to administer the pass through funds for both CDBG and EWP projects between the agencies and the commission was done without knowing how many projects and the dollar amount required to be budgeted, but were deemed to be worthy projects.

Auditor's Evaluation: The response is not appropriate to correct the concern. Expenditure budgets should be monitored throughout the year and budget amendments should be adopted if necessary to comply with budgetary law.

OTHER MATTERS

7. Custody of E-911 Records

Condition: The Board Treasurer's custody of Enhanced 911 invoices and bank records is not appropriate. The Treasurer stores invoices and bank records at his personal residence and transports documents to County E-911 facilities as needed. The procedure does not provide for adequate safekeeping of county documents. RSMo 67.1937 states the governing body of the county shall provide for the proper and safekeeping of its permanent records. Furthermore, the procedure prohibits the documents from being readily available for annual audits.

Recommendation: We recommend that the Enhanced 911 Board and staff store all E-911 documents at county facilities, ensuring safe and proper storage.

E-911 Board Response: The Carroll County E-911 Board will store all E-911 documents at the Carroll County E-911 facility located at 2 N. Monroe, Carrollton, MO.

Auditor's Evaluation: The response is appropriate to correct the concern.

CARROLL COUNTY, MISSOURI
FOLLOW-UP ON PRIOR AUDIT FINDINGS FOR AN AUDIT OF FINANCIAL STATEMENTS
PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

In accordance with Government Auditing Standards, this section reports the auditors' follow-up on action taken by Carroll County, Missouri, on the applicable findings in the prior audit report issued for the two years ended December 31, 2008 and 2007.

1. The Treasurer's and Assessor's offices use a OneWrite system for recording receipts which requires receipt number to be manually entered into a receipt log rather than leaving a carbon copy of the pre-numbered receipts that have been issued. An instance was noted where the Assessor's receipt ledger included the same receipt number twice, with different amount and payer's.

   Status – Not resolved. This system is still in use in several County fee offices, however, no issues were noted with duplicate receipt numbers in the current audit. See Finding 1.

2. The reconciliation of the County Clerk's bank account does not identify deposits in transit or outstanding checks.

   Status – Resolved.

3. The duties of receipt of cash, check writing, and reconciling bank accounts are not properly segregated in the Sheriff's office. The office manager is primarily responsible for all of these duties.

   Status – Partially resolved. The Sheriff's office implemented a procedure to have the Sheriff review the office manager's receipt ledger on a monthly basis and reconcile it to deposit slips. The Sheriff also reviews the bank statements each month. However, controls can still be strengthened over the disbursement process. See Finding 2

4. The Sheriff's account bank reconciliations include deposits in transit that are several years old as well as checks that have already cleared the bank but have not been removed.

   Status – Resolved.

5. The County has not adopted a proper investment policy in accordance with state statutes.

   Status – Not resolved. See Finding 5.

6. The actual expenditure of the EDA 98 Grant fund exceeded the budgeted amount for 2008.

   Status – Not resolved. Although the EDA 98 Grant fund had no activity during the current audit period, other funds were determined to have exceeded their budgets. See Finding 6.

7. Transfers in recorded on the budget did not equal transfers out in 2007 or 2008.

   Status – Partially resolved. Significant improvement was made in the recording of interfund transfers in the County's budgets in 2009 and 2010, however, transfers in did not equal transfers out in either year. See Finding 3.

8. The Treasurer of the Enhanced 911 Board maintains invoices and bank records at his personal residence.

   Status – Partially resolved. Copies of invoices are maintained at the E-911 facility, however, the original invoices and all bank records are still maintained by the Treasurer at his personal residence. See Finding 7.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Laclede County, Missouri

The Office of the State Auditor, in cooperation with Laclede County, has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2010, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Davis, Lynn & Moots, P.C., Certified Public Accountants, is attached.

INDEPENDENT AUDITORS' REPORT

Laclede County Commission
Laclede County
Lebanon, Missouri

We have audited the accompanying financial statements of the governmental activities, the discretely presented component unit, each major fund, and the aggregate remaining fund information of Laclede County, Missouri, as of and for the years ended December 31, 2010 and 2009, which collectively comprise the County's basic financial statements as listed in the table of contents. These financial statements are the responsibility of Laclede County, Missouri's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

As described in Note A, the basic financial statements of the Primary Government of Laclede County, Missouri and the Developmentally Disabled Board were prepared on the modified cash basis, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

The financial statements do not include financial data for Laclede County Health Center, a legally separate component unit of the County. Accounting principles generally accepted in the United States of America require the financial data for those component units to be reported with the financial data of the County's primary government unless the County also issues financial statements for the financial reporting entity that include the financial data for its component units. The County has not issued such reporting entity financial statements. The assets, liabilities, net assets, revenues, and expenses of the aggregate discretely presented component units are not reasonably determinable.

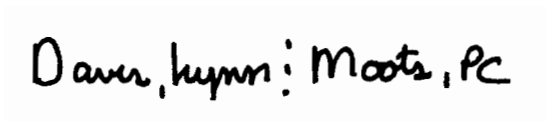
In our opinion, because of the omission of the discretely presented component unit, as discussed above, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of the aggregate discretely presented component units of Laclede County, Missouri, as of December 31, 2010 and 2009, or the changes in financial position thereof for the years then ended.

Further, in our opinion, the basic financial statements referred to above present fairly, in all material respects, the modified cash basis financial position of the governmental activities, the discretely presented component unit, each major fund, and the aggregate remaining fund information of Laclede County, Missouri, as of December 31, 2010 and 2009, and the respective changes in modified cash basis financial position and cash flows, where applicable, thereof for the years then ended, in conformity with the basis of accounting described in Note A.

In accordance with *Government Auditing Standards*, we have also issued our report dated June 27, 2011, on our consideration of the County's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The Budgetary Comparison Schedules are not a required part of the basic financial statements but are supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures that consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it. Laclede County, Missouri has not presented the Management Discussion and Analysis (MD&A) that the Governmental Accounting Standards Board has determined is necessary to supplement, although not required to be a part of, the basic financial statements.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Laclede County, Missouri's basic financial statements. The accompanying other financial information is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects, in relation to the basic financial statements taken as a whole on the basis of accounting described in Note A.



DAVIS, LYNN & MOOTS, P.C.

NOTE A – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Laclede County, Missouri (the County) is a county of the 3rd class and operates under a three member County Commission.

The accounting methods and procedures adopted by the primary government of Laclede County, Missouri, and the Developmentally Disabled Board conform to the modified cash basis of accounting as applied to governmental entities. The following is a summary of the more significant policies.

Financial Reporting Entity

The financial reporting entity consists of (a) the primary government, (b) organizations for which the primary government is financially accountable, and (c) other organizations for which the primary government is not accountable, but for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete. Component units are legally separate organizations for which the elected officials of the primary government are financially accountable. Financially accountable means the primary government is accountable for the component unit and the primary government is able to impose its will or the component unit may provide financial benefits or impose a burden on the primary government. In addition, component units can be other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete.

The County is a primary government, which is governed by a three member county commission. As required by accounting principles generally accepted in the United States of America, the County has evaluated the above criteria to determine whether any other entity meets the definition of a component unit and must be included in these financial statements. The financial statements of Laclede County Health Center are not included in these financial statements as required by accounting principles generally accepted in the United States of America. The component unit discussed below is included in the County's reporting entity because of the significance of its operational or financial relationship with the County.

Component Unit

Developmentally Disabled Board

The Developmentally Disabled Board, which is governed by a board of directors appointed by the County Commission, provides disability services to the residents of Laclede County. The Developmentally Disabled Board is included in the financial statements of the County as a component unit due to its financial relationship with the County.

NOTE A – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

GOVERNMENT-WIDE FINANCIAL STATEMENTS

The government-wide statements display information about the primary government and its component unit. Interfund activity has been eliminated from these statements to minimize the duplication of internal activities. Governmental activities, which are supported by taxes and intergovernmental receipts, are reported separately from business-type activities, which rely on fees and charges for services for support.

In the government-wide Statement of Net Assets, the governmental activities are consolidated and presented on the modified cash basis of accounting.

The government-wide Statement of Activities presents a comparison between direct disbursements and program receipts for each function of the County's governmental activities. Direct disbursements are those that are specifically associated with a program or a function. Program receipts include charges for goods or services offered by the programs and grants and contributions that are restricted to meet operating and capital disbursements of a particular program. Receipts that are not classified as program receipts, including all taxes, are presented as general receipts.

FUND FINANCIAL STATEMENTS

Separate fund financial statements report information on the County's governmental and proprietary funds. The emphasis of fund financial statements is on major governmental and enterprise funds, each displayed in a separate column. All remaining funds are aggregated and reported as nonmajor funds in their respective categories.

The County reports the following major governmental funds:

General Fund: The General Fund is the general operating fund of the County. It is used to account for all financial resources except those required to be accounted for in another fund.

Road and Bridge Fund: The Road and Bridge Fund of the County is used to account for resources restricted for highway and road disbursements.

Law Enforcement Sales Tax Fund: The Law Enforcement Sales Tax Fund is used to account for sales tax receipts designated for law enforcement disbursements.

Capital Improvement Fund: The Capital Improvement Fund is used to account for the resources designated for capital improvements.

County Development Tax Fund: The County Development Tax Fund is used to account for sales taxes designated for road improvements within the County.

NOTE A – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

The County also reports the following fund types:

The Internal Service Fund accounts for the health insurance benefits of the County on a cost reimbursement basis.

Agency funds account for miscellaneous assets held by the County for other funds, governmental units, and individuals. The agency funds are custodial in nature and do not involve measurement of results of operations.

Basis of Accounting

The government-wide Statement of Net Assets and Statement of Activities and the fund financial statements for the County and the Developmentally Disabled Board, are presented using the modified cash basis of accounting. This basis recognizes assets, net assets/fund equity, receipts, and disbursements when they result from cash transactions. The modification to cash basis relates to the presentation of investments. This basis is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

As a result of the use of the modified cash basis of accounting, certain assets and their related revenues (such as accounts receivable and revenue for billed or provided services not yet collected) and certain liabilities and their related expenses (such as accounts payable and expenses for goods or services received but not yet paid, and accrued expenses and liabilities) *are not recorded* in these financial statements. Also as a result of the modified cash basis, capital assets and long-term debt of the County and Developmentally Disabled Board are not presented in the financial statements.

If the County utilized the basis of accounting recognized as generally accepted, the fund financial statements for the governmental funds would use the modified accrual basis of accounting. All government-wide financial statements and proprietary fund financial statements would be presented on the accrual basis of accounting.

Cash and Investments

The County pools cash and investment resources of various funds in the County Treasurer's office in order to facilitate the management of cash and investments. Cash applicable to a particular fund is readily identifiable. Some County offices also hold cash and investments in their own separate bank accounts as required by state statute. The balance in the pooled cash account is available to meet current operating requirements. Investments of the County are carried at cost, and consist of certificates of deposit.

NOTE A – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Fund Equity

The unreserved and undesignated fund balances for governmental funds represent the amount available for budgeting future operations.

Government-Wide Statements

Equity is classified as net assets and displayed in two components:

a. Restricted net assets – Consists of net assets with constraints placed on the use either by (1) external groups such as creditors, grantors, contributors, or laws and regulations of other governments; or (2) law through constitutional provisions or enabling legislations.

b. Unrestricted net assets – All other net assets that do not meet the definition of "restricted".

It is the County's policy to first use restricted net assets prior to the use of unrestricted net assets when a disbursement is made for purposes for which both restricted and unrestricted net assets are available.

Compensated Absences

The County has a county-wide policy on vacation and sick leave for all employees. Leave is taken at the discretion of each officeholder. The accumulated liability for compensated absences as of December 31, 2010, and 2009 was $14,057 and $12,803 respectively.

NOTE B – CASH AND INVESTMENTS

The County maintains a cash and investment pool that is available for use by all funds. Each fund portion of this pool is displayed as "Cash and investments". In addition, investments are separately held by several of the County's funds. State statutes require that County deposits be fully collateralized in the name of the County. As of December 31, 2010 and 2009, all bank balances on deposit are entirely insured or collateralized with securities.

NOTE B – CASH AND INVESTMENTS (continued)

The County's investments at December 31, 2009, are as follows:

Investment Type	Maturity	Amount
Certificates of Deposit	1/21/2010	$ 2,255,000

Certificates of Deposit

Certificates of deposit are classified as investments but are considered deposits for custodial risk determination. State statutes require that the County's deposits be collateralized in the name of the County by the trust department of a bank that does not hold the collateralized deposits. As of December 31, 2009, all certificates of deposit are entirely insured or collateralized with securities. The County had no certificates of deposit as of December 31, 2010.

The County does not have a policy on interest rate risk.

NOTE C – CLAIMS, JUDGMENTS AND CONTINGENCIES

Federal and State Grants

The County participates in a number of federal and state programs that are fully or partially funded by grants received from other governmental units. Disbursements financed by grants are subject to audit by the appropriate grantor government. If disbursements are disallowed due to noncompliance with grant program regulations, the County may be required to reimburse the grantor government. As of December 31, 2010 and 2009, significant amounts of grant disbursements have not been audited by grantor governments, but the County believes that disallowed disbursements, if any, based on subsequent audits will not have a material effect on any of the individual government funds or the overall financial position of the County.

Legal Matters

There are a number of claims and/or lawsuits to which the County is a party as a result of certain injuries and various other matters and complaints arising in the ordinary course of County activities. The County's management and legal counsel anticipate that the potential claims, if any, against the County resulting from such litigation would not have a material effect on the financial position of the County.

NOTE D – PENSION PLAN – CERF

STATE OF MISSOURI COUNTY EMPLOYEES' RETIREMENT FUND

Plan Description

Laclede County participates in the County Employees' Retirement Fund (CERF), a cost-sharing multiple-employer pension plan. CERF is a defined benefit pension plan which provides retirement and death benefits to plan members and beneficiaries. CERF was created and is governed by state statute, RSMo 50.1000 to 50.1200. As such, it is the system's responsibility to administer the law in accordance with the expressed intent of the General Assembly. The plan is qualified under the Internal Revenue Code Section 401a and it is tax exempt.

The County Employees' Retirement Fund issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to CERF, Boone County National Bank, P.O. Box 577, Columbia, MO 65202 or by calling 1-800-357-8557.

Funding Policy

Laclede County's full-time employees hired before February 25, 2002, are required by state statute to contribute 0% of annual payroll to the pension plan. Laclede County's full-time employees hired after February 25, 2002, are required by state statute to contribute 4% of annual covered payroll to the pension plan. The County is required by state statute to remit the fees collected under RSMo, Sections 52.290, 150.150, 137.280, 137.345 and Chapters 59 and 54, RSMo, plus interest. The required contributions have been made.

NOTE E – ASSESSED VALUATION, TAX LEVY AND LEGAL DEBT MARGIN

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on November 1, and are payable by December 31.

The 2010 and 2009 assessed valuation of the tangible taxable property and the tax levies per $100 assessed valuation of that property were as follows:

ASSESSED VALUATION	2010	2009
Real estate	$ 273,461,890	$ 268,854,560
Personal property	93,233,368	92,359,774
	$ 366,695,258	$ 361,214,334

NOTE E – ASSESSED VALUATION, TAX LEVY AND LEGAL DEBT MARGIN (continued)

	2010	2009
TAX LEVY		
General Fund	$ .1466	$ .1298
Developmentally Disabled Board	.0655	.0663
	$ .2121	$ .1961

The legal debt margin at December 31, 2010 and 2009, is computed as follows:

	2010	2009
Constitutional debt limit	$ 36,669,526	$ 36,121,433
General obligation bonds payable	(39,000)	(43,000)
LEGAL DEBT MARGIN	$ 36,630,526	$ 36,078,433

Under Article VI, Section 26(b) and (c), Missouri Constitution, the County, by a vote of its qualified electors voting therein, may incur an indebtedness for any purpose authorized by law of the County or by any general law of the State of Missouri. The borrowings authorized by this section shall not exceed ten percent of the value of the taxable tangible property in the County.

NOTE F – LONG-TERM DEBT

In 1999, the County issued $78,000 in Limited General Obligation Bonds. The bonds bear interest at 6.5% with principal and interest payments due on March 1 of each year. The annual debt service requirements to amortize the principal of the Limited General Obligation Bonds outstanding at December 31, 2010, are listed in the table below.

Year Ended December 31,	Principal	Interest	Total
2011	$ 5,000	$ 2,535	$ 7,535
2012	5,000	2,210	7,210
2013	5,000	1,885	6,885
2014	5,000	1,560	6,560
2015	6,000	1,235	7,235
2016	6,000	845	6,845
2017	7,000	455	7,455
	$ 39,000	$ 10,725	$ 49,725

NOTE F – LONG-TERM DEBT (continued)

In 2006, the County entered into a cancelable lease purchase agreement to finance the purchase of a tractor at a total cost of $34,537. The agreement requires annual payments of $8,061, which includes interest at 5.25%.

In 2009, the County entered into a cancelable lease purchase agreement to finance the purchase of a grader at a total cost of $202,866. The agreement requires annual payments of $10,113 through 2013 with a balloon payment of $157,833 due in 2014. The payments include interest at 3.15%.

In 2009, the County entered into a cancelable lease purchase agreement to finance the purchase of a grader at a total cost of $202,866. The agreement requires annual payments of $13,859 through 2013 with a balloon payment of $161,579 due in 2014. The payments include interest at 3.15%.

In 2009, the County entered into a cancelable lease purchase agreement to finance the purchase of two backhoes at a total cost of $150,000. The agreement requires annual payments of $23,064 through 2011 with a balloon payment of $92,000 due in 2012. The payments include interest at 3.40%.

In 2010, the County entered into a cancelable lease purchase agreement to finance the purchase of two graders at a total cost of $412,000. The agreement requires annual payments of $29,190 through 2014 with a balloon payment of $318,000 due in 2015. The payments include interest at 3.00%.

Although the agreements provide for cancellation of the leases if the County should fail to appropriate funds at the annual renewal dates, the County does not foresee exercising its options to cancel.

The annual requirements to amortize the principal of the leases are as follows:

Year Ended December 31,	2006 Tractor Lease	2009 Grader Lease	2009 Grader Lease	2009 Backhoe Lease	2010 Graders Lease	Total
2011	$ 8,061	$ 10,113	$ 13,859	$ 23,064	$ 29,190	$ 84,287
2012	-	10,113	13,859	92,000	29,190	145,162
2013	-	10,113	13,859	-	29,190	53,162
2014	-	157,833	161,579	-	29,190	348,602
2015	-	-	-	-	318,000	318,000
TOTAL MINIMUM LEASE PAYMENTS	8,061	188,172	203,156	115,064	434,760	949,213
LESS AMOUNT REPRESENTING INTEREST	(945)	(20,843)	(21,968)	(6,808)	(51,950)	(102,514)
PRINCIPAL BALANCE, DECEMBER 31, 2010	$ 7,116	$ 167,329	$ 181,188	$ 108,256	$ 382,810	$ 846,699

NOTE F – LONG-TERM DEBT (continued)

The following table is the change in long-term debt for the years ended December 31, 2010 and 2009:

	Balance December 31, 2008	Additions	Retirements	Balance December 31, 2009	Additions	Retirements	Balance December 31, 2010
Capital Lease Obligations							
2006 Tractor Lease	$ 21,766	$ -	$ 7,133	$ 14,633	$ -	$ 7,517	$ 7,116
2009 Grader Lease	-	202,866	13,859	189,007	-	21,678	167,329
2009 Grader Lease	-	202,866	13,859	189,007	-	7,819	181,188
2009 Backhoe Lease	-	150,000	23,064	126,936	-	18,680	108,256
2010 Graders Lease	-	-	-	-	412,000	29,190	382,810
1997 Limited General Obligation Bonds	47,000	-	4,000	43,000	-	4,000	39,000
Compensated Absences	13,402	-	599	12,803	1,254	-	14,057
	$ 82,168	$ 555,732	$ 62,514	$ 575,386	$ 413,254	$ 88,884	$ 899,756

NOTE G – RISK MANAGEMENT

The County is exposed to various risks of losses related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The County has transferred its risk by obtaining coverage from commercial insurance companies. In addition, it has effectively managed risk through various employee education and prevention programs. There has been no significant reduction in insurance coverage from the previous year.

NOTE H – INTERFUND TRANSFERS

Interfund transfers for the years ended December 31, 2010 and 2009, consisted of the following:

	Transfers In (Out)	
	2010	2009
General Fund	$ (40,179)	$ (354,561)
Road and Bridge Fund	875,157	1,117,631
E-911 Fund	(40,996)	(43,132)
Capital Improvement Fund	150,000	100,000
County Development Tax Fund	(1,305,000)	(1,205,000)
Assessment Fund	(28,161)	(34,174)
Sheriff Discretionary Fund	(18,745)	(13,232)
Prosecuting Attorney Bad Check Fund	-	(3,896)
Health Insurance Fund	414,124	442,698
Sheriff Revolving Fund	(5,000)	(5,000)
Tax Maintenance Fund	(1,200)	(1,200)
Family Access Fund	-	(134)
	$ -	$ -

Transfers are used to (1) move receipts from the fund that statute or budget requires to collect them to the fund that statue or budget requires to disburse them, and (2) use unrestricted receipts in the General Fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

NOTE I – RESTATEMENT

Fund Balance/Net Assets have been restated as of January 1, 2009, as follows:

Circuit Clerk Time Payment Fund	
Fund Balance, as previously stated, December 31, 2008	$ -
Cash and cash equivalents	9,651
Fund Balance, as restated, January 1, 2009	$ 9,651
Governmental Activities	
Net Assets, as previously stated, December 31, 2008	$ 6,560,841
Cash and cash equivalents	9,651
Net Assets, as restated, January 1, 2009	$ 6,570,492

NOTE J – SUBSEQUENT EVENT

In March 2011, the County approved financing for a new motor grader in the amount of $198,388 with interest at 3.38%.

Budgets and Budgetary Accounting

The County follows these procedures in establishing the budgetary data reflected in the financial statements:

1) In accordance with Chapter 50, RSMo, the County adopts a budget for each fund.

2) Prior to January 15, the County Clerk, who serves as the Budget Officer, submits to the Commission a proposed budget for the fiscal year beginning on January 1. The budget includes estimated receipts and proposed disbursements for all County funds. Budgeted disbursements cannot exceed beginning available monies plus estimated receipts for the year.

3) A public hearing is conducted to obtain taxpayer comments. Prior to its approval by the Commission, the budget document is available for public inspection.

4) Prior to February 1, the budget is legally enacted by a vote of the Commission.

5) Subsequent to its formal approval of the budget, the Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget information included in the financial statements. Budgeted amounts are as originally adopted, or as amended by the Commission. Individual amendments were not material to the original appropriations, which were amended.

6) Budgets for County funds are prepared and adopted on the modified cash basis (budget basis), recognizing receipts when collected and disbursements when paid.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

County Commission
Laclede County
Lebanon, Missouri

We have audited the accompanying financial statements of the governmental activities, each major fund, the discretely presented component unit, and the aggregate remaining fund information of Laclede County, Missouri, as of and for the years ended December 31, 2010 and 2009, which collectively comprise Laclede County, Missouri's basic financial statements and have issued our report thereon dated June 27, 2011. Our report includes an adverse opinion on the aggregate discretely presented component units due to the omission of the Laclede County Health Center. In addition, our opinion was modified because the County prepares its financial statements on the modified cash basis, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered Laclede County, Missouri's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements but not for the purpose of expressing an opinion on the effectiveness of Laclede County, Missouri's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the County's internal control over financial reporting.

Our consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over financial reporting that might be significant deficiencies or material weaknesses and, therefore, there can be no assurance that all deficiencies, significant deficiencies, or material weaknesses have been identified. However, as described in the accompanying schedule of findings and responses, we identified certain deficiencies in internal control over financial reporting that we consider to be material weaknesses.

County Commission
Laclede County
Lebanon, Missouri

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. We consider the deficiencies described in the accompanying schedule of findings and responses to be material weaknesses. They are identified as items 10-1, 10-2 and 10-3.

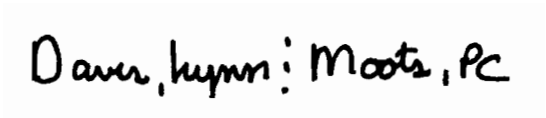
Compliance and Other Matters

As part of obtaining reasonable assurance about whether Laclede County, Missouri's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

We also noted certain other matters that we reported to management of Laclede County, Missouri, in a separate letter dated June 27, 2011.

The County's response to the findings identified in our audit is described in the accompanying schedule of findings and responses. We did not audit the County's response and, accordingly, we express no opinion on it.

This report is intended solely for the information and use of the County Commission and management, and is not intended to be and should not be used by anyone other than these specified parties.



DAVIS, LYNN & MOOTS, P.C.
June 27, 2011

10-1 Segregation of Duties

Condition: Because of a limited number of available personnel, it is not always possible to adequately segregate certain incompatible duties so that no one employee has access to both physical assets and the related accounting records, or to all phases of a transaction.

Criteria: Duties should be segregated so that no one employee has access to both physical assets and the related accounting records, or to all phases of a transaction.

Effect: Risk is present that errors or irregularities in amounts that would be material to the basic financial statements may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions.

Recommendation: We realize that because of limited resources and personnel, management may not be able to achieve a proper segregation of duties; however, our professional standards require that we bring this lack of segregation of duties to your attention in this report.

Response: The limited number of available personnel prohibits segregation of incompatible duties.

10-2 Design of internal control system for preparation of the basic financial statements

Condition: The County has personnel in place to perform all bookkeeping functions necessary to maintain a general ledger and prepare internal use statements for management and the County Commission. However the County does not have the resources to have accounting professionals with the knowledge, experience and training to prepare governmental financial statements in conformity with Governmental Accounting Standards as part of their internal control system.

Criteria: A properly designed system of internal control, which includes preparation of financial statements in conformity with Governmental Accounting Standards, includes having accounting professionals as part of the system to perform that function.

Effect: The County employs the auditors that perform the annual audit of the financial statements to prepare the annual financial statements.

Recommendation: We recognize that the County may not have the resources to have an accounting professional with the knowledge, experience and training to prepare governmental financial statements in conformity with Governmental Accounting Standards. However, we recommend that management continue to increase their knowledge of financial reporting.

Response: The County does not have the resources to hire additional accounting personnel with the knowledge, experience and training solely to prepare governmental financial statements in conformity with Governmental Accounting Standards. The County does have personnel with sufficient knowledge to understand and take responsibility for the basic financial statements.

10-3 Wire Transfers

Condition: The depository agreements with the County banking institutions do not address by whom and to whom a wire transfer may be made. They also do not include special instructions for wire transfers.

Criteria: The County should have written and signed instructions with banking institutions requiring the approval of two authorized individuals before a wire transfer is made and by whom and to whom a wire transfer may be made.

Effect: Risk is present that unauthorized wire transfers may be made.

Recommendation: The County should include in future depository agreements with its banking institutions, who is authorized to make wire transfers for the County, to whom wire transfers are allowed, and require two authorized signatures for approval.

Response: The County will update its depository agreements with its banking institutions to include who is authorized to make wire transfers for the County, to whom wire transfers are allowed, and require two authorized signatures for approval.

Laclede County Commission
Laclede County
Lebanon, Missouri

In planning and performing our audit of the basic financial statements of Laclede County, Missouri, for the years ended December 31, 2010 and 2009, we considered the County's internal control to determine our auditing procedures for the purpose of expressing an opinion on the basic financial statements and not to provide assurance on the internal control. Accordingly, we do not express an opinion on the effectiveness of the County's internal control over financial reporting.

Our consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control over financial reporting that might be significant deficiencies or material weaknesses. However, as discussed in the Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance With *Government Auditing Standards*, we identified deficiencies in internal control over financial reporting that we consider to be material weaknesses.

In addition to the material weaknesses discussed in the Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance With *Government Auditing Standards*, we became aware of additional matters to bring to your attention. The following paragraphs summarize our comments and suggestions regarding these matters.

1. Tax Maintenance Fund, Law Library Fund, Prosecuting Attorney Delinquent Tax Fund, and Prosecuting Attorney Bad Check Fund

   The County currently maintains a Tax Maintenance Fund for the benefit of the Collector's office, a Law Library Fund, Prosecuting Attorney Delinquent Tax Fund, and the Prosecuting Attorney Bad Check Fund. Although the monies are to be used for the benefit of the Collector's office and the Prosecutor's office, these monies represent County funds. Therefore the same policies of the County regarding budgeting, receipts, and disbursements should be followed for these funds as with other funds of the County.

   We Recommend:

   The County require these funds to be deposited with the County Treasurer in the Tax Maintenance Fund, Law Library Fund, Prosecuting Attorney Delinquent Tax Fund, and Prosecuting Attorney Bad Check Fund. Disbursements from these funds should be budgeted and the approval process for disbursements out of these funds should follow the same procedures as with other County disbursements.

2. Receipt Books

Receipt books currently are not controlled at a central location. The County should control receipt books at administration. Receipt books should be logged out to departments. When the departments need a new receipt book, the old receipt book should be turned back into administration for reconciliation. In addition, receipt books used should be official County receipts books in numerical sequence. This is a necessary control procedure to ensure all receipts are properly accounted for.

We Recommend:

The County require all receipt books be controlled at administration and logged out to departments as necessary. The County should also require departments turn in the old receipt book before a new one is issued. In addition, receipt books used should be official County receipts books in numerical sequence.

3. Payroll Processing

The County utilizes direct deposit to employees for all payroll disbursements and the payroll is processed by one person who does the direct deposit without having someone not involved in the process review the direct deposit listing.

We Recommend:

The County assign someone not involved in the payroll process to review the listing for direct deposit payroll and initial the listing prior to the disbursement of funds. The approved listing should be retained to indicate the approval of the disbursement of funds.

4. Payroll Procedures

During our audit, we noted the Prosecuting Attorney's office wrote a check from their special funds account to a County employee for contract labor in the amount of $599. The employee was performing their normal work assignment and should have completed a timesheet and turned it in to the County Clerk's office who prepares all County payroll. The employee is a retired employee who is receiving CERF benefits and has limitations on the number of hours permitted to work each year. The employee did not receive a Form 1099 since the check was below the required $600 threshold required by the IRS.

We Recommend:

The County process all employee wages through the County Clerk's office who performs this function. The County Clerk's office ensures that proper taxes are withheld as well as monitors the number of hours retired employees receiving CERF benefits are working in order to comply with state and federal laws. We further recommend the County provide a training session for all Officeholders to ensure that each office is aware of state and federal laws regarding payroll procedures and understands the implications of not following these laws.

5. File Retention

During our audit, we noted the Sheriff's Department shredded all bank statements pertaining to the December 31, 2009, fiscal year. The County had a state compliance audit during 2010, therefore, the Sheriff's Department thought it was appropriate to dispose of the bank statements, according to the Secretary of State's retention guidelines. The Secretary of State guidelines state that banking records can be destroyed after completion of the audit plus one year. The County's audit report from the state was issued in December 2010, therefore, the Sheriff's Department should have retained the bank statements until at least December 2011. The Sheriff's Department was able to obtain copies from the bank during the course of the audit.

We Recommend:

All County offices become familiar with the Secretary of State's retention guidelines as well as federal retention requirements to ensure the County is retaining the appropriate documents the appropriate length of time.

6. GASB Statement Number 54 Implementation

In February 2009, the Governmental Accounting Standards Board issued *Statement of Governmental Accounting Standards No. 54 – Fund Balance Reporting and Governmental Fund Type Definitions*. This statement establishes new fund balance classifications and the standards for classifications and note disclosures. The effective date is for periods beginning after June 15, 2010.

We Recommend:

The County's management become familiar with the requirements of GASB Statement No. 54 in order to assess the steps necessary to ensure successful implementation of this statement on the effective date.

7. New Bank Accounts

In our prior audit we noted the County did not have a policy in place outlining the procedures required for opening new bank accounts. This policy should address what must be contained in the depository agreement regarding new bank accounts. The policy should also address the procedures necessary for County officials to perform when opening new bank accounts. This is a necessary internal control procedure to ensure all accounts are properly accounted for by the County Clerk's office. This would also help prevent unauthorized accounts from being opened under the County's identification.

We Commend:

The County for adopting policies addressing the procedures necessary for opening new bank accounts and modifying the depository agreement as necessary with its banking institutions.

We will review the status of these comments during our next audit engagement. We will be pleased to discuss them in further detail at your convenience, to perform any additional study of these matters or to assist you in implementing the recommendations.

We appreciate this opportunity to serve as Laclede County's independent auditor and the courtesies and assistance extended to us by the County's employees.

County Commission
Laclede County
Lebanon, Missouri

We have audited the basic financial statements of Laclede County, Missouri, for the years ended December 31, 2010 and 2009, and have issued our report thereon dated June 27, 2011. Professional standards require that we provide you with the following information related to our audit.

Our Responsibility under U.S. Generally Accepted Auditing Standards

As stated in our engagement letter dated February 24, 2011, our responsibility, as described by professional standards, is to express opinions about whether the financial statements prepared by management with your oversight are fairly presented, in all material respects, in conformity with U.S. generally accepted accounting principles. Our audit of the financial statements does not relieve you or management of your responsibilities.

Planned Scope and Timing of the Audit

We performed the audit according to the planned scope and timing previously communicated to you in our engagement letter dated February 24, 2011.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. In accordance with the terms of our engagement letter, we will advise management about the appropriateness of accounting policies and their application. The significant accounting policies used by Laclede County, Missouri, are described in Note A to the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during 2010 and 2009.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events.

The disclosures in the financial statements are neutral, consistent, and clear.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. Material misstatements detected as a result of audit procedures were corrected by management for the following:

- Unrecorded Cash Activity

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated June 27, 2011.

Management Consultations with Other Independent Accountants

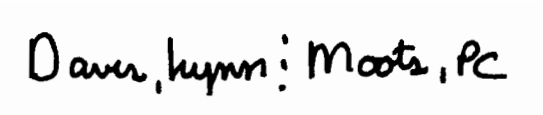
In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the County's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the County's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

This report is intended solely for the use of the County Commission and management of Laclede County, Missouri, and is not intended to be and should not be used by anyone other than these specified parties.

Sincerely,



DAVIS, LYNN & MOOTS, P.C.

CITIZENS SUMMARY

Findings in the audit of Ray County

Public Administrator	The Public Administrator's office has significant control deficiencies, including a lack of oversight and inadequate supporting documentation. As a result, the Deputy Public Administrator and a home care worker have been charged with theft and forgery in connection with over $26,000 disbursed from a ward's account without adequate documentation. The Public Administrator did not review the annual settlements of the two wards with the most assets and signed blank checks in advance when he was planning to be out of the office for an extended period of time, which increased the risk funds would be misused.
Sheriff	It appears the Sheriff was living, and storing personal items, in the Sheriff's annex at taxpayer's expense, and the county paid more than $1,800 over 2 years for premium programming satellite television to the annex. The Sheriff also lacks adequate controls and procedures to ensure inmate monies are accounted for properly and does not reconcile a monthly list of liabilities to cash balances.
Financial Condition and Budgets	The General Revenue Fund is in poor financial condition. The county should reduce spending, evaluate controls and practices, maximize revenues, and monitor the budget closely. The county does not approve budgets in a timely manner and expends funds without an approved budget, in violation of state law.
Election Funds	The former County Clerk failed to properly bill amounts owed to the election account and made unallowable transfers and disbursements. He used $16,006 from a school scholarship trust fund to cover election account shortages and failed to transfer all of the monies owed to the Election Five Percent Fund. In addition, the former County Clerk used $1,000 of Election Five Percent Fund monies to host a party for family and election workers on his next to last day in office and used $750 for training expenses unrelated to elections, including $420 for lodging in Kansas City after being told lodging was not necessary because of the proximity of the meeting location to Ray County.
Payroll Procedures	Although our prior audit recommended centralizing compensatory time records, no corrective action was taken and the United States Department of Labor, Wage and Hour Division, ordered the county to pay almost $10,000 in back wages to 31 Sheriff's office employees. The county still does not maintain centralized compensatory time records, so it cannot ensure compensatory time use and balances are accurate. Also, not all timesheets list hours worked each day, so the county cannot demonstrate compliance with Fair Labor Standards Act requirements.
Notices, Meetings, and Minutes	The county did not always comply with the Sunshine Law. The county did not post notifications or agendas, open meeting minutes did not always document the reasons for closing the meeting and the vote to do so, and closed meeting minutes were not sufficient to show the issues discussed in closed session were allowable.

Fuel and Vehicle Use	As noted in our prior audit, the road and bridge department does not adequately monitor fuel and vehicle use. The road and bridge department spent approximately $157,000 on fuel during the 2 years ended December 31, 2010, but because the county does not maintain mileage and fuel use logs or fuel inventory records, the county cannot be sure the fuel it purchases or the vehicles it owns are used only for county purposes. The county also does not report the value of personal and commuting mileage to the IRS, as required by law.
Recorder of Deeds	As noted in our prior audit, the Recorder does not timely deposit monies received, thereby increasing the risk of loss, theft or misuse of funds. The Recorder also approved two disbursements related to a time clock at the jail because the county was short of money, but state law only allows Recorder Fee Fund monies to be spent on record storage, microfilming, and preservation.
Property Records and Procedures	As noted in our prior audit, the county is not complying with state law with respect to the management of county property. Departments do not perform periodic inspections of property, submit required inventory reports, or track capital asset purchases and dispositions. Only the County Collector had completed a current inventory report.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Poor.***

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	Ray County did not receive any federal stimulus monies during the audited time period.

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Ray County

We have audited certain operations of Ray County in fulfillment of our duties under Section 29.230, RSMo. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2010. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Ray County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Robert Showers, CPA
In-Charge Auditor:	Rex Murdock, M.S.Acct.
Audit Staff:	Nathaniel Fast, M.Acct., CPA

1. Public Administrator

Significant control deficiencies were identified, including a lack of supporting documentation for disbursements, inadequate oversight of disbursements, and signing checks in advance.

1.1 Oversight

The Public Administrator does not adequately review all supporting documentation for disbursements and annual settlements. As a result, $26,561 was disbursed from a ward's account without adequate documentation. The Public Administrator established a petty cash fund for miscellaneous disbursements on behalf of the ward. An external company provides in home care for the ward, and an employee of the company managed the disbursements of the petty cash fund. The Public Administrator disbursed $27,530 during the 3 years ended December 31, 2010, in checks made payable to the employee of the contracted company for the stated purpose of replenishing the petty cash fund and for other miscellaneous expenses such as groceries and travel expenses. Checks for disbursements for this ward were prepared by the Deputy Public Administrator. Based on our review, only $969 in expenses were supported by receipts. According to the Public Administrator, the contract employee to whom payments were made was terminated by the home care company in November 2010. The Deputy Public Administrator was terminated on June 13, 2011, when criminal charges for theft and forgery were filed against her and the contract employee.

The Public Administrator indicated he thought the company was obtaining receipts for the disbursements and the company thought he was obtaining receipts. The Public Administrator also said it was his deputy's responsibility to obtain and review supporting documentation for disbursements, and he did not have sufficient time to review supporting documentation for disbursements while signing checks. In addition, while the Public Administrator stated he reviews approximately 95 percent of the annual settlements, he did not review the annual settlements of the two wards with the most assets, which includes the ward discussed above.

The Public Administrator's function is to serve in a fiduciary role for individuals that cannot provide adequate oversight of their own finances. Without adequate oversight, the Public Administrator cannot fulfill this role and cannot ensure the reasonableness and propriety of disbursements. By ensuring all disbursements are supported by adequate documentation, and reviewing all annual settlements and canceled checks, the Public Administrator can help to safeguard against possible loss or misuse of funds. The Public Administrator's approval of disbursements should be documented on the invoice or supporting documentation.

The Documentation of Unsupported Public Administrator Payments section at the end of this report provides details regarding checks issued to the home care company employee without supporting documentation.

1.2 Blank checks

The Public Administrator indicated there are occasions when blank checks are signed in advance. For example, checks are signed in advance when the Public Administrator knows he will be out of the office for an extended period of time for training or personal leave. If a blank check was signed in advance, the Deputy Public Administrator was trusted to complete the check.

Signing checks in advance is a significant control weakness and increases the risk of misuse of monies.

Recommendations

The Public Administrator:

1.1 Review and approve all disbursements and ensure they are supported by adequate documentation to verify the authenticity and necessity of disbursements. In addition, the Public Administrator should review all annual settlements and document all reviews.

1.2 Discontinue the practice of signing checks in advance.

Auditee's Response

The Public Administrator provided the following written responses:

1.1 First of all I want to state that I am the Ray County Public Administrator and as an official of the Ray County government, I am vested with the trust of the public and I accept ultimate responsibility for any problems as a result of the work performed by my staff for the benefit of the clients we serve. During my years in office I have been through several audits, some of which resulted in welcomed recommendations for improved operation of the office and all recommendations were implemented. Prior to the recent events however there has never been a significant issue or concern with the performance of my office.

As far as oversight of this office, I feel that I do a very good job and always have. I feel that I am personally familiar with each and every client's needs and concerns and try to provide the best care for each of them.

The employee in question had been employed by my office for approximately seven and one-half years, and was in charge of the bookkeeping and other clerical duties of the office. Approximately four years ago, I requested that she be promoted to Deputy Public Administrator. Upon approval of such request by the County Commission, she was sworn in by the Ray County Probate Court Judge as Deputy Public Administrator.

With such promotion the Deputy Public Administrator swore to accountability for a high ethical standard and to perform additional responsibilities as assigned to her. As her performance had been exemplary in the years prior to the appointment as Deputy Public Administrator, I had complete trust and confidence in her and had not been given any reason to doubt that trust.

I have always felt very confident and secure from any problem such as the present issue. The Public Administrator is given the option of preparing the annual settlement in the office or hiring outside counsel for the preparation of settlements for each estate. I have elected to hire counsel to prepare the settlements as a precautionary system of checks and balances for the benefit of both myself and the protectees. The attorneys preparing the annual settlements have praised our work due to the meticulous record keeping of the ledgers, accurate reconciliations of the accounts, our organization and completeness of the file for each client, including: necessary bank statements, cancelled checks, and receipts for each account, as well as the ability to promptly answer any question that may have in review of the information.

In the case discussed by the Missouri State Auditor, the petty cash fund is a daily operating account of cash maintained in the home of the protectee for the caregivers to use for day to day purchases for the operation of the household of the ward. The system failed with respect to this issue, and I acknowledge in hindsight the necessity of a system to account for the petty cash fund, however as previously stated I have never had to deal with allegations of impropriety by a member of my staff. This is something that caught all of us by surprise, but we have implemented change by accounting for and internally auditing the petty cash fund prior to each subsequent disbursement to insure that this situation will never happen again.

As far as receipts, it is the practice of this office to require a receipt, statement or bill for every expenditure. Also, for any amount in excess of $500.00, as a prudent practice rather than a requirement, I generally petition the court for permission to pay the expense. The request is then reviewed and approved if the Probate Judge feels the expenditure is reasonable.

1.2 I understand that pre-signing checks is not generally a good practice, however again they were left with a sworn county official, not merely office staff. I was trying to take the best action for care of the client, which is and always has been my first priority. I have discontinued signing checks in advance for any reason and therefore have complied with the Auditor's recommendation.

2. Sheriff

The Sheriff appears to have improperly utilized public property and resources for personal purposes. In addition, receipting and depositing procedures are inadequate, a comparison of liabilities to cash balances is not performed, and inappropriate disbursements were made from restricted funds.

2.1 Annex

The Sheriff's annex and public resources appear to have been utilized for personal purposes. Based on anonymous tips stating the Sheriff had been living in the annex, auditors requested to see the inside of the facility. After being initially denied, auditors were allowed access to the facility where they observed a significant number of personal items, including a bed, clothes neatly hung up, cooking items, several couches, televisions, tables, and chairs, which gave the appearance of someone residing in the annex. In addition, auditors verified the annex received satellite television service, including premium programming. The Sheriff denied living in the annex and said he was only storing personal items to be given away and used the annex as a place to sleep during inclement weather. The Sheriff also stated the satellite television service was to receive news and weather. Auditors observed some Sheriff's records and a limited amount of evidence being stored in the annex. The Sheriff also said he uses the annex to conduct training and meetings, as a backup 911 dispatch center, and a place where deputies can eat lunch. During the 2 years ended December 31, 2010, a total of $8,520 was paid from the Sheriff Civil Fund and the Sheriff Revolving Fund for rent on the annex, and $1,829 was paid from the Sheriff Civil Fund to provide satellite television for the annex. The County Commissioners indicated they were unaware of whether the Sheriff was living in the annex or not.

The public has placed a fiduciary trust in the Sheriff to expend public funds in a necessary and prudent manner. Living in, or storing a significant amount of personal items, in the annex, and receiving premium satellite packages does not appear to be a necessary or prudent use of county resources.

2.2 Receipts and deposits

The Sheriff has not developed adequate controls and procedures to ensure the accuracy of deposits and accounting records. Our review identified the following concerns regarding the Sheriff's accounting controls:

- The Sheriff does not issue receipt slips for most inmate monies. As a result, a reconciliation of the composition of receipts to deposits cannot be performed.

- Inmate money is recorded on an inmate log and an inmate account record. If an inmate is released from jail prior to their monies being deposited, the Sheriff does not document the return of these monies.

Therefore, during our review of cash on hand, the Sheriff could not demonstrate the amount that should have been on hand.

- Deposits of inmate monies are not always made intact. A February 17, 2011, cash count identified $813 on hand that should have been deposited with the previous deposit. The Sheriff's office only deposited checks, not cash, in the previous deposit.

- Change funds are not maintained at an established level.

Failure to implement adequate receipting and depositing procedures increases the risk that loss or misuse of monies could occur and go undetected. Issuing pre-numbered receipt slips for all monies received, reconciling the composition of receipt slips to deposits, depositing all monies received intact, and maintaining change funds at an established level would help ensure all monies received are accounted for and deposited properly. In addition, noting refunds of undeposited inmate monies on the inmate log will help ensure all monies can be accounted for properly.

2.3 Liabilities

A list of liabilities is not prepared for inmate accounts, and consequently, liabilities are not reconciled with cash balances. Monthly the Sheriff reconciles the bank statement to the check register, but does not reconcile the balance to liabilities. At our request the Sheriff prepared a list of liabilities as of June 15, 2011, and the reconciled account balance was $3,201, while the liability list totaled $3,170.

A monthly list of liabilities reconciled to cash balances helps ensure records are in balance, errors are detected and corrected on a timely basis, and sufficient cash is available for the payment of all liabilities.

Recommendations

The Sheriff:

2.1 Use the annex and other county resources for official county business only.

2.2 Issue pre-numbered receipt slips for all inmate monies received, reconcile the composition of receipts to deposits, deposit all monies intact, and document all monies returned to inmates. The Sheriff should also maintain change funds at an established level.

2.3 Prepare a monthly list of inmate account liabilities, and reconcile it to the book balance.

Auditee's Response

The Sheriff provided the following written responses:

2.1 We intend to continue use of the Annex for official county business only.

2.2 &2.3 This has been implemented.

3. Financial Condition and Budgets

The General Revenue Fund is in poor financial condition. Also, budgets are not approved timely and expenses were incurred prior to a final approved budget.

3.1 Financial condition

The General Revenue Fund is in poor financial condition. The following table reflects actual receipts, disbursements, and ending cash balance of the General Revenue Fund over the last 3 years and anticipated for 2011, as reported in the county budget documents:

	Year Ended December 31,			
	2011 (Budgeted)	2010 (Actual)	2009 (Actual)	2008 (Actual)
Beginning balance $	29,305	191,878	17,358	257,954
Receipts	3,976,338	3,934,150	3,860,735	3,523,660
Disbursements	3,963,658	4,096,723	3,686,215	3,764,256
Ending balance $	41,985	29,305	191,878	17,358

While General Revenue Fund receipts have increased annually from 2008 to 2010, and are anticipated to increase in 2011, disbursements exceeded revenues by $228,649 from 2008 to 2010, resulting in a decline in the General Revenue Fund balance. In addition, at December 31, 2010, $37,651 is due from the General Revenue Fund to the Election Fund (see MAR finding number 4).

It is essential the County Commission address the county's financial condition both in the immediate and long-term future. Reducing spending where possible, evaluating controls and management practices to ensure efficient use of county resources, maximizing all sources of revenue, and closely monitoring the county's budgets will help the County Commission improve the county's financial condition.

3.2 Budgets

County budgets are not approved in a timely manner and expenses are incurred without an approved budget in place. The 2011, 2010, and 2009 budgets were approved in March 2011, April 2010, and July 2009, respectively. In all 3 years, the county expended county funds, including significant non-payroll expenses, without a final approved budget.

Section 50.540, RSMo, requires the County Clerk to submit the budget to the County Commission by February 1. Section 50.740, RSMo, states the County shall not pay any expenses, other than payroll, until the finalized county budget is filed with the State Auditor's office. Approving the county budget as close to the beginning of the fiscal year as possible allows the commission and office holders to more effectively monitor county finances.

Recommendations

The County Commission:

3.1 The County Commission closely monitor the county's financial condition and take the necessary steps to improve the financial condition of the General Revenue Fund. The County Commission should perform long-term planning and ensure receipts are maximized and disbursements are closely monitored.

3.2 Approve budgets prior to approving expenditures other than payroll.

Auditee's Response

The County Commission provided the following written responses:

3.1 We are in agreement to do our best to improve our financial condition.

3.2 Our budget will be prepared as close as possible to the statutory requirements.

4. Election Funds

Procedures for billing election costs are inadequate, resulting in the former County Clerk improperly transferring monies from a trust fund to cover election costs; expenditures from the Election Five Percent Fund were not in accordance with state law; and the County Clerk's commissions were not always transferred to the Election Five Percent Fund.

4.1 Billings

The former County Clerk did not ensure amounts owed to the election account were properly billed. For the August and November 2010 elections, the former County Clerk failed to bill the county for $50,951 in election costs. The County Commission transferred a total of $13,300 to the Election Fund during 2010, therefore, $37,651 is due from the county to the Election Fund.

Per Section 115.077, RSMo, the County Clerk is responsible for the conduct of elections, including preparing billings of estimates of election expenses, and billing political subdivisions for the estimated expenses.

4.2 Trust fund transfer

Due to inadequate billing procedures (see section 4.1), the election account did not contain sufficient funds to pay its liabilities. As a result, in September 2010, the former County Clerk transferred $16,006 from a school scholarship trust fund to the election account. As a result of the

transfer, the scholarship funds are not available for their intended purpose. The former County Clerk intended to pay the school trust fund an interest rate of 5 percent per year. However, there is no written loan agreement to document how and when the repayment of the principal and interest to the trust fund is to occur. The County Clerk has a fiduciary responsibility to utilize trust funds for the purposes stated in the trust agreement.

4.3 Disbursement from restricted funds

The former County Clerk made disbursements from the Election Five Percent Fund which were not in accordance with the statutory purpose of the fund. As allowed by Section 115.065, RSMo, the County Clerk charges an additional 5 percent of total election costs to each political subdivision and maintains these monies in the Election Five Percent Fund. Disbursements from this fund are restricted to election training, election supplies, and equipment to improve the conduct of elections. Total disbursements from the Election Five Percent Fund were $4,300 and $3,450 during the years ended December 31, 2010 and 2009, respectively. Examples of inappropriate disbursements are as follows:

- Approximately $1,000 was disbursed to purchase meats and beverages for a party for the former County Clerk's family and election workers. The party was held on December 30, 2010, the day before the former County Clerk's last day in office.

- During 2009, approximately $750 was disbursed for training expenses unrelated to elections. One disbursement was for approximately $420 for three nights lodging in Kansas City for county clerk training. The County Commission said the former County Clerk requested to pay for lodging from the General Revenue Fund but was denied because the expense for lodging was not necessary because of the proximity of the meeting location to Ray County.

These disbursements do not appear to be necessary costs of training or purchase of supplies or equipment necessary to improve the conduct of elections as required by state law.

4.4 Election account transfers

The former County Clerk did not ensure all monies were properly transferred to the Election Five Percent Fund. Amounts collected for the additional 5 percent monies (see section 4.3) are initially deposited into the election account and then transferred to the Election Five Percent Fund. However, 2010 records indicate the former County Clerk transferred only $2,883 of the total $3,669 collected, and as a result, $786 is due from the election account to the Election Five Percent Fund.

The County Clerk should regularly review the amounts owed to the Election Five Percent Fund and take appropriate steps to ensure amounts owed are property collected and transferred.

Recommendations

The County Clerk:

4.1 Establish procedures to ensure election costs are adequately billed and collected.

4.2 Reimburse the school scholarship trust fund, with interest.

4.3 Ensure all disbursements from the Election Five Percent Fund are in accordance with state law.

4.4 Ensure all amounts due from the election account are transferred to the Election Five Percent Fund.

Auditee's Response

The County Clerk provided the following written responses:

4.1 The recommendation has been implemented. Procedures are now in place to pre-bill all elections.

4.2 The Clerk is working with the commission to get this repaid as soon as possible.

4.3 The recommendation has been implemented. Purchases will be for election equipment or new employee training only.

4.4 The County Clerk has reviewed the amounts due the Five Percent Fund and taken the steps necessary to correct, and will continue to do so.

5. Payroll Procedures

County payroll procedures could be improved. Current procedures do not provide sufficient controls and oversight over compensatory time, and timesheets used by courthouse staff do not adequately demonstrate compliance with the Fair Labor Standards Act of 1938 (FLSA).

5.1 Compensatory time

The County Clerk's office does not maintain centralized compensatory time records. Currently, each department maintains its own records of compensatory time earned and used. This condition was reported in our prior report; however, no corrective action was taken. As a result of a complaint from a former law enforcement employee, the United States Department of Labor, Wage and Hour Division, conducted an investigation in April 2011 of payroll procedures for law enforcement employees and found the Sheriff's office did not have sufficient compensatory time records. The Wage and Hour Division ordered the county to pay $9,905 in back

wages to 31 Sheriff's office employees who were employed from January 1, 2009 through March 31, 2011.

Without centralized records, the County Commission cannot ensure employees' compensatory time usage and balances are accurate Also, centralized records aid in ensuring adherence to county policy regarding compensatory time, equitable treatment of employees, and compliance with federal regulations.

5.2 Timesheets

Time records for hours worked by county personnel are not adequate to demonstrate compliance with the FLSA. In March 2010, the County Commission implemented a timesheet which listed only the total hours worked each month, and not hours worked each day. The former timesheet listed the hours worked each day. Without hours listed each day, the County Commission cannot demonstrate compliance with its overtime policy or FLSA laws.

Time records are necessary to document hours worked, substantiate payroll disbursements, and provide the county with a method to monitor hours worked each day and leave taken, and are beneficial in demonstrating compliance with FLSA requirements.

Recommendations

The County Commission:

5.1 And the County Clerk maintain centralized compensatory time records for all employees.

5.2 Ensure timesheets document the actual hours employees work each day.

Auditee's Response

The County Commission provided the following responses:

5.1 All departments have been advised to comply.

5.2 The County Clerk has implemented new timesheets for correct documentation.

6. Notices, Meetings, and Minutes

Procedures over public meetings, agendas, and minutes could be improved. Various requirements in Chapter 610 (the Sunshine Law) regarding open and closed meetings were not always followed.

6.1 Agendas

The County Commission did not post notification or agendas for meetings. Section 610.020, RSMo, requires the county to give notice at least 24 hours in advance of the time, date, and place of each meeting, and its tentative agenda, in a manner reasonably calculated to advise the public of the matters to be considered.

6.2 Minutes

As noted in our prior report, open meeting minutes did not always document specific reasons for closing the meeting, and the vote to close meetings was not documented in the open minutes. Section 610.022, RSMo, requires that before any meeting may be closed the question of holding the closed meeting and the reason for the closed meeting shall be voted on at an open session.

6.3 Closed meetings

Closed meeting minutes were not sufficient to demonstrate the issues discussed in closed meetings were allowable under the Sunshine Law. The Commission went into closed session meetings five times during 2010 and 2009. Closed session minutes only included a very brief description of the topics discussed.

Section 610.021, RSMo, allows matters to be discussed in closed meetings only if they relate to certain specific subjects. The County needs to ensure only matters specifically authorized by state law are discussed in closed meetings. This law also provides that public governmental bodies shall not discuss other business during the closed meeting that differs from the specific reasons used to justify such meeting, record, or vote.

Recommendations

The County Commission:

6.1 Provide proper notice of meetings and ensure appropriate agendas are posted and retained.

6.2 Ensure the reason for closing meetings and the vote are documented in the open session minutes.

6.3 Ensure closed session minutes are adequately detailed to document the matters discussed and ensure only allowable topics are discussed in closed meetings.

Auditee's Response

The County Commission provided the following written response:

These recommendations have been implemented.

7. Fuel and Vehicle Use

The county does not have adequate procedures in place for monitoring fuel use of the road and bridge department and has not reported the personal use of county vehicles to the Internal Revenue Service (IRS).

7.1 Fuel use

The road and bridge department has not established effective monitoring procedures regarding fuel use. Mileage and fuel use logs are not maintained for department vehicles and equipment, and fuel use is not reconciled to fuel purchases. The road and bridge department incurred fuel costs of approximately $157,000 during the 2 years ended December 31, 2010.

The road and bridge department uses two bulk fuel tanks for vehicles and equipment, and procedures to evaluate the reasonableness of fuel disbursements are not adequate. An inventory of bulk fuel showing purchases, usage, and fuel on hand is not maintained and no procedure is performed to periodically test the amount of fuel on hand. Information on road and bridge vehicle use, such as odometer readings, destination, purpose, or other maintenance information, is not recorded.

Maintenance and review of vehicle and equipment mileage and fuel use logs and bulk fuel inventory records, and comparison of log information and inventory records to fuel purchases, are necessary to ensure vehicles and equipment are properly utilized, to prevent paying vendors for improper billing amounts, and to decrease the risk of theft or misuse of fuel occurring without detection. Logs should provide sufficient details so the county can effectively monitor vehicle and equipment use and fuel costs.

7.2 Commuting mileage

The personal commuting use of county vehicles by some county employees is not reported to the IRS. The road and bridge department owns 13 vehicles. The three road and bridge supervisors are allowed to use county vehicles to commute to and from home daily, and do not complete vehicle logs. Without complete vehicle logs, the county cannot distinguish between official and personal use, and therefore, is unable to properly report personal use.

The IRS reporting guidelines indicate personal and commuting mileage are reportable fringe benefit and require the full value of the provided vehicle to be reported if the employer does not require the submission of detailed logs that document business and personal use. Because procedures have not been established to ensure IRS regulations are followed, the county may be subject to penalties and/or fines for failure to report all taxable benefits.

Similar conditions previously reported

Similar conditions to sections 7.1 and 7.2 were noted in our prior audit report.

Recommendations

The County Commission:

7.1 Require mileage and fuel use logs for all vehicles and equipment and review the logs for reasonableness. In addition, bulk fuel inventory records should be maintained, fuel use should be reconciled to fuel purchases, and any significant discrepancies should be investigated.

7.2 Comply with IRS guidelines for reporting fringe benefits related to commuting miles and require mileage logs which distinguish between business and commuting use.

Auditee's Response

The County Commission provided the following written responses:

7.1 The County Commission will implement logs after we meet with road and bridge supervisors.

7.2 IRS Guidelines will be researched and implemented accordingly.

8. Recorder of Deeds

Receipts are not deposited on a timely basis, and some disbursements from the Recorder Fee Fund are not in compliance with state law.

8.1 Timely deposits

As noted in our prior audit report, the Recorder prepares daily deposit slips for the prior day's receipts; however, deposits are not generally taken to the bank each day. During our review on January 26, 2011, we observed $5,363 of undeposited cash and checks on hand, which represented receipts from 11 business days. A review of the December 2010 bank statement showed only three deposits were made during the month, with each deposit containing approximately $5,100 on average.

Timely deposits help to adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds.

8.2 Recorder Fee Fund

Disbursements from the Recorder Fee Fund were not in compliance with state law. Two disbursements, totaling $1,586, were for service agreements and software support for a time clock at the jail. The Recorder said she approved the disbursements from the Recorder Fee Fund because the jail needed the time clock, and the county was short of money.

Section 59.319, RSMo, restricts the use of Recorder Fee Fund monies to disbursements for record storage, microfilming, and preservation.

Recommendations

The Recorder of Deeds:

8.1 Deposit receipts timely.

8.2 And the County Commission ensure the Recorder Fee Fund is reimbursed for the monies used for the time clock, and ensure future disbursements from this fund are spent in accordance with state law.

Auditee's Response

The Recorder of Deeds provided the following responses:

8.1 The recommendation has been implemented. Deposits are now made daily.

8.2 Expenditures from the Recorder Fee Fund will be made in accordance with state statute in the future.

9. Property Records and Procedures

As noted in our prior audit report, procedures and records to account for county property are not adequate. Most departments have not performed periodic inspections of county owned property or submitted required inventory reports and no procedures exist to track capital asset purchases and dispositions. A review of county inventory files showed that only the County Collector had completed a current inventory report. Inventory lists for some offices dated as far back as 2000. In addition, records lack necessary information such as purchase date, acquisition cost, serial number, and disposal information.

Section 49.093, RSMo, states each county department is responsible for performing annual inspections and inventories of county property used by their department, and for submitting an inventory report to the County Clerk. Adequate capital asset records and procedures are necessary to ensure effective internal controls, meet statutory requirements, and provide a basis for determining proper insurance coverage. Procedures to track capital assets purchases and dispositions throughout the year and compare to physical inventory results would enhance the county's ability to account for capital assets and potentially identify unrecorded additions and dispositions, identify obsolete assets, and deter and detect theft of assets.

Recommendation

The County Commission and the County Clerk work with other county officials to ensure complete and accurate inventory records are maintained and annual physical inventories are conducted.

Auditee's Response

The County Commission provided the following written response:

We have already started implementing this. As of now, 7 departments have updated their inventory report and the others are working on it.

Ray County
Organization and Statistical Information

Ray County is a county-organized, third-class county. The county seat is Richmond.

Ray County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 100 full-time employees and 24 part-time employees on December 31, 2010.

In addition, county operations include the Senate Bill 40 Board, 911 Board, Senior Citizens' Services Board, and a Noxious Weed Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2011	2010
Rodger Fitzwater, Presiding Commissioner	$	30,381
Allen Dale, Associate Commissioner		27,390
Mike Twyman, Associate Commissioner		28,388
Shirley O'Dell, Recorder of Deeds		43,000
Lynn Rogers, County Clerk (1)		47,897
Bryan McMahon, Prosecuting Attorney		109,366
Samuel Clemens, Sheriff		50,000
Joanne Burnine, County Treasurer		43,000
James Garrison, County Coroner		15,000
Kenneth Nolker, Public Administrator		43,000
Margie Bowman, County Collector (2), year ended February 28,	72,892	
Kent Wollard, County Assessor , year ended August 31,		43,000

(1) Includes $4,897 of commission earned for collecting city property taxes.

(2) Includes $25,484 of commissions earned for collecting city property taxes.

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

Ray County did not receive any federal stimulus monies during the 2 years ended December 31, 2010.

Ray County
Documentation of Unsupported Public Administrator Payments

The following table documents all payments by the Public Administrator made payable to the employee of the contracted company as discussed in MAR finding number 1. Our review determined the Public Administrator had obtained documentation to support $969 of the payments listed below.

Thomas A. Schweich
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The following benchmark report is the result of research conducted by the University of Missouri, Harry S Truman School of Public Affairs that has been presented to, and reviewed by the Missouri State Auditor's office.

The objective of this report was to present compiled comparative data on a vast array of policy issue areas to:

1. Provide comparative information to Missouri legislators, other elected officials, and citizens.

2. Without comment, or drawing conclusions, allow the comparative data and rankings to stand alone as indicators.

3. Publish the report in a technical format that provides information, and trends when classifiable, without presumptions or findings.

Many policy makers have found that monitoring performance indicators can provide valuable information when it comes to policy development, as well as government action. Similar reports conducted elsewhere have been helpful in providing a snap shot as to where states are positioned in relation to each other in critical areas dealing with the economy, healthcare, crime, education, transportation, and civic involvement. Comparative analysis can serve to help measure progress made in relation to others and is becoming increasingly more important for generally establishing the direction states are headed in a variety of policy areas. Also, because statistical information is constantly evolving, updated information can almost always be found from sources drawn upon in this report, as well as from other qualified monitoring sources.

This report was completed in coordination with the University of Missouri - Columbia, Harry S Truman School of Public Affairs, and prepared under the direction of Matt Beckmann, MBA, JD, of the State Auditor's office (SAO). Key contributors to this report included SAO staff Robert Showers, CPA; and of the Harry S Truman School of Public Affairs, David Valentine, PhD.

Thomas A. Schweich
State Auditor

Economy

Household Median Income - The median household income is the amount which divides households into two equal groups, one having incomes above that amount and the other having incomes below that amount. The data was provided by the Census Bureau. In 2009, Missouri ranked 27th.

Job Growth and Unemployment Rate, US and Missouri - Job growth statistics represent the growth in the number of jobs in the state. Job growth data shown is relative to a year 2000 baseline. Unemployment rate data from the Bureau of Labor Statistics is obtained by conducting a monthly sample survey called the Current Population Survey (CPS) to measure the extent of unemployment in the country. There are approximately 110,000 individuals included in the survey. The CPS sample is selected so as to be representative of the entire population of the United States. The survey is designed so that each person age 16 and over who is neither in an institution (for example, correctional facilities and residential nursing and mental health care facilities) nor on active duty in the Armed Forces is counted and classified in only one group. The sum of the employed and the unemployed constitutes the civilian labor force. The chart includes job growth and the unemployment rate for Missouri and the United States from 2000 to 2010. The data was provided by the Bureau of Labor Statistics.

State Tax Burden as a Percentage of Personal Income - The amount of state taxes collected, divided by personal income. The data was provided by the Federation of Tax Administrators. In 2010, Missouri ranked 44th.

State Cigarette Tax - The amount of tax levied, in dollars, by a state on the sale of a pack of cigarettes. The data was provided by the National Conference of State Legislatures. In 2010, Missouri ranked 51st.

Percent of Population in Poverty - The percent of the population that has a yearly income below the federal poverty level. The data was provided by the Census Bureau. In 2009, Missouri ranked 20th.

Percent of Children in Poverty - The percent of children under age 18 that live in a household whose yearly income is below the federal poverty level. The data was provided by the Census Bureau. In 2009, Missouri ranked 20th.

Education

NAEP Scores - The National Assessment of Educational Progress (NAEP) is the only nationally representative and continuing assessment of what American students know in various subject areas. NAEP assessments are administered uniformly using the same sets of test booklets across the nation. The test serves as a common metric for all states and selected urban districts. The assessment stays mostly the same from year to year, with only carefully documented changes. The data was provided by the National Center for Education Statistics. In 2009, Missouri ranked 17th in 4th grade reading, and 17th in 8th grade reading. In 2009, Missouri ranked 25th in 4th grade math, and 22nd in 8th grade math.

ACT Scores - The ACT is a national college admissions examination that consists of subject area tests in: English, Mathematics, Reading, and Science plus a writing test. ACT results are accepted by all 4-year colleges and universities in the U.S. The ACT includes 215 multiple-choice questions and takes approximately 3 hours and 30 minutes to complete. The data was provided ACT, Inc. In 2009, Missouri ranked 27th.

Percent of Population Age 25 and Older - High School Graduate or Higher - Estimates the percent of the total population that is at least 25 years old with a high school diploma or equivalent. The data was provided by the Census Bureau. In 2009, Missouri ranked 31st.

Percent of Population Age 25 and Older - Bachelor's Degree or Higher - Estimates the percent of the total population that is at least 25 years old with a bachelor's degree or equivalent. The data was provided by the Census Bureau. In 2009, Missouri ranked 34th.

Health

Percent of Population that are Adult Smokers - The percentage of adults age 18 and older who report themselves to be smokers. This data was provided by the Centers for Disease Control. In 2010, Missouri ranked 11th.

Percent of the Population that is Obese - The percent of the population who have a body mass index (BMI) of 30 or greater. The data was provided by the Centers for Disease Control. In 2009, Missouri ranked 9th. Previous data combined statistics for the percentage of the population that was overweight (BMI between 25 and 30) and obese (BMI over 30). Data depicted in the current report represents only the percentage of the population that is obese.

Live Births to Women Aged 15 to 19 per 1,000 Women - The number of births to teenage women, age 15 to 19, per 1,000 women in the state. The data was provided by the Centers for Disease Control. In 2008, Missouri ranked 20th.

Percent of Population without Health Insurance - The percent of the population that does not have any form of health insurance. The data was provided by the Census Bureau. In 2009, Missouri ranked 28th.

Crime

Violent Crime Rate - The violent crime rate is composed of four offenses: murder and non-negligent manslaughter, forcible rape, robbery, and aggravated assault. Violent crimes are defined as those offenses which involve force or threat of force. The rate is computed as the number of these violent crimes per 100,000 inhabitants. The data was provided by the Federal Bureau of Investigation. In 2009, Missouri ranked 15th.

Property Crime Rate - The property crime rate is composed of offenses such as burglary, larceny-theft, motor vehicle theft, and arson. There is no force or threat of force against the victims. The rate is computed as the number of these property crimes per 100,000 inhabitants. The data was provided by the Federal Bureau of Investigation. In 2009, Missouri ranked 16th.

Northwest Missouri State University

September 2011

Report No. 2011-47

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Northwest Missouri State University (NWMSU)

Auxiliary Services Contracts	NWMSU has not solicited competitive bids or proposals for auxiliary services for years, which is required by state law. Instead, NWMSU extended and amended its food services, facilities management, vending and bookstore contracts in exchange for approximately $1.5 million in donations or other payments to fund a stadium renovation. These amendments effectively guaranteed the continued renewal of the contracts, because NWMSU would otherwise be required to repay prorated portions of the payments. NWMSU also is not properly monitoring its food services and facilities management contracts. It does not check the accuracy of weekly sales reports or the calculation of commissions remitted, the facilities management joint review committee has not met since July 2008, and the facilities management services contractor has not submitted an annual report since fiscal year 2006.
Former President's Employment Contract	The former President's employment contract included payments which may have been in violation of the Missouri Constitution. Former President Dr. Hubbard was paid $224,762 for the year after he stepped down as President, he and his spouse received health and accident insurance for 2 years after his resignation as President, and NWMSU paid $8,930 to move his personal property and furnishings to his new residence in Kansas City. Dr. Hubbard also received $30,000 from the Northwest Foundation in March 2009 in recognition of his 25 years of service to NWMSU and to compensate him because he had not been provided a vehicle for 6 years, even though he had received $1,800 a month for a vehicle allowance. Dr. Hubbard's 2004 employment agreement also entitled him to an annual miscellaneous personal expense allowance of $12,500, and yet, in a 2 year period, Dr. Hubbard used his purchasing card to charge nearly $3,000 for meal expenses instead of paying for them from this personal expense allowance. It appears Dr. Hubbard performed some services for NWMSU during the year after he resigned as President. It is not clear whether such services justified the salary and benefits provided. Moreover, the Missouri Constitution forbids payments to public officials in recognition of past services.
Northwest Foundation	In a 3 year period, NWMSU subsidized over $3.3 million of the operating costs of the Northwest Foundation, a not-for-profit corporation, in apparent violation of the Missouri Constitution. Moreover, NWMSU and the Northwest Foundation have not entered into a written agreement defining the objectives of any collaboration and the parties' respective obligations.
Contract Controls and Procedures	NWMSU needs to improve its controls and procedures for managing contracted services to avoid overpaying for services and to ensure services provided are in accordance with contract terms.
Room and Board Charges	NWMSU raised room and board rates in each of the last 4 years but does not maintain documentation of the annual reviews to show how rates are determined.

Program Operating Results and Related Subsidies	NWMSU incurs significant operating losses operating 3 programs for preschool to high school children. The NWMSU accounting system is not capable of separately reporting operating results for various programs and operating segments.
Real Estate Acquisitions	At the request of NWMSU officials, the Northwest Foundation purchased a parcel of property in 2004 for $475,000 and one in 2007 for $501,060, but there are no specific plans for their use, and no appraisals were conducted before the purchases to determine the fair market value of the parcels.
University-Owned Airplane	NWMSU should perform a cost-benefit analysis to determine whether the continued ownership of its airplane is justified, and NWMSU policy should require that the cost of alternative travel methods be considered prior to authorization of a flight on the university-owned airplane.
Cash Receipts	Internal controls over cash receipts need improvement. The Bursar's office does not record and restrictively endorse checks immediately upon receipt, receipts slips are not always given, and monies collected are not always deposited intact. Monies collected for football camps and student meal cards are not reconciled to amounts remitted to the Bursar's office, and tickets for performing arts and athletic events are not accounted for properly.
Capital Assets	Capital asset records are not accurate and contain assets that are likely no longer owned by NWMSU. A complete physical inventory of capital assets has not been conducted for at least 15 years, and no formal policy exists requiring notification when capital assets are disposed of or relocated.
Computer Security	NWMSU lacks an adequate disaster recovery plan, and supervisors do not periodically review user accounts to prevent unauthorized computer access.

In the areas audited, the overall performance of this entity was **Fair**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	NWMSU was awarded $4,049,576 from Federal Budget Stabilization - Education Funds, which it received and spent in the year ended June 30, 2010, to retain 76 current employees and create 8 new positions. NWMSU also received a $55,979 Recovery Act: Federal Work-Study Grant, which it received and spent in the year ended June 30, 2010, to create 6 new work-study positions.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Board of Regents
and
Dr. John Jasinski, President
Northwest Missouri State University
Maryville, Missouri

We have audited certain operations of Northwest Missouri State University in fulfillment of our duties under Chapter 29, RSMo. The university engaged BKD, LLP, Certified Public Accountants (CPAs), to audit the university's financial statements for the years ended June 30, 2010, 2009 and 2008. We reviewed the reports and substantiating working papers of the CPA firm for the years ended June 30, 2009 and 2008, since the year ended June 30, 2010, audit had not been completed, and performed other procedures that we considered necessary in the circumstances. The scope of our audit included, but was not necessarily limited to, the years ended June 30, 2010, 2009, and 2008. The objectives of our audit were to:

1. Evaluate the university's internal controls over significant management and financial functions.

2. Evaluate the university's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

4. Evaluate selected records and activities of the Northwest Foundation.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the university, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the university's management and was not subjected to the procedures applied in our audit of the university.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, (3) the need for improvement in management practices and procedures, and (4) weaknesses with select records and procedures of the university's foundation. The accompanying Management Advisory Report presents our findings arising from our audit of Northwest Missouri State University.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Gregory A. Slinkard, CPA, CIA
In-Charge Auditor:	Gayle A. Garrison
Audit Staff:	Deborah Whitis, MBA, CPA, CIA
	Kenneth Erfurth

1. Auxiliary Services Contracts

The university has historically contracted with outside vendors for various auxiliary services, including facilities management, food services, vending, and operation of a campus book store. However, the university did not obtain competitive bids, as required by state law in procuring these services. Instead the related contracts were extended in consideration for significant donations made by the vendors. The university obtained a $2 million loan from one contractor without evidence the loan agreement was approved by the Board of Regents or reviewed by legal counsel. In addition, contract revenues and some contract provisions were not properly monitored.

1.1 Contract procurement and vendor donations

The university has not solicited competitive bids or proposals related to various contracts for a number of years and is not in compliance with state purchasing law or the delegated purchasing authority granted it by the Office of Administration, Division of Purchasing and Materials Management, pursuant to Section 34.100, RSMo. Instead, the university extended the related contracts through 2017, at least in part, because of approximately $1.5 million in donations or other payments the vendors made to the university's foundation to help fund a stadium renovation.

- The facilities management services contract relates to custodial, maintenance, and grounds support services provided by a contractor throughout the university's campus and grounds. The university expended over $3.9 million during the 3 years ended June 30, 2010, pursuant to this contract. The contract for these services allows for annual price increases not to exceed 3 percent. Also, contract amendments have allowed for price increases due to increases in the minimum wage and increases in square footage assigned to the contractor.

  At the time of our review, the university had not competitively bid this contract since 1997. In that year, the university entered into a facilities management services contract after a competitive bidding process. The contract was for 1 year with nine additional 1-year renewal options. In November 2001, another company (Company A) acquired the contractor and assumed responsibility for this contract.

  In March 2002, the university amended the contract to require the contractor to lease a football stadium suite for $10,000 per year (the standard lease amount for suites) for 12 years (well after all renewal options of the original contract expired). The amendment states the lease payments are contingent upon the continuation of the facility management services contract.

  In January 2003, the university again amended the contract to require the contractor to contribute $500,000 in June 2007 (the month the 1997 contract was set to expire) to the Northwest Foundation Stadium

Campaign Fund. This contract amendment requires the university to repay a prorated portion of the donation to the contractor if the contract is not renewed during the period from July 2007 through June 2017 (well after all renewal options of the original contract expired).

In 2007, after exercising the nine annual renewal options related to the 1997 contract, the university decided to extend the contract without soliciting competitive bids. The contract was extended for 1 year with nine annual renewal options. If the university chooses not to exercise the annual renewal options, a prorated portion of the $500,000 donation will have be to repaid to the contractor. This decision effectively extended this contract through 2017 (subject to annual renewal).

- The food services contract relates to all food operations provided to students, faculty and employees, and other individuals on campus. The university expended over $24.7 million (net of commission revenues) during the 3 years ended June 30, 2010, pursuant to this contract. These expenditures were substantially offset by revenues related to student meal plans and other food service revenues. Most dining services are purchased as prepaid meal plans by students. The university and the contractor negotiate meal prices (including several semester based meal plans) and other contract services each year taking into consideration the consumer price index for food, changes in the employee pay plan, and increases in operating costs. The vendor accounts for sales and bills the university for all sales less a commission retained by the university. Commission percentages have been approximately 8 percent since 2007.

  Similar to the facilities management contract, the university has not competitively bid this contract since 1997. In that year, the university entered into a food services contract (with Company A) after a competitive bidding process. The contract was for 1 year with nine additional 1-year renewal options.

  In November 2001, the university amended the contract to require the contractor to contribute $500,000 in two installments (in May 2002 and May 2003) to the Northwest Foundation Stadium Campaign Fund. This contract amendment requires the university to repay a prorated portion of the donation if the contract is not renewed during the period June 2002 through May 2017 (well after all renewal options of the original contract expired).

  In 2007, after exercising the nine annual renewal options related to the 1997 contract, the university decided to extend the contract without soliciting competitive bids. The contract extension was for 1 year with nine annual renewal options. If the university chooses not to exercise

the annual renewal options, a prorated portion of the $500,000 donation will have be to repaid to the contractor. This decision effectively extended this contract through 2017 (subject to annual renewal).

- In September 2001, the university amended a multi-year contract for beverage vending services. Pursuant to the contract amendment, the vending contractor was required to contribute $50,000 per year to the Northwest Foundation Stadium Campaign Fund for 6 years beginning in June 2002. This contract required the university to repay a prorated portion of the donation to the contractor if contract was not renewed during a 10-year period through May 2012.

  The university canceled this vending contract effective May 2008. Instead of soliciting competitive bids for these vending services, the university added these services to the contract of the food services contractor (Company A). The cancellation of the contract obligated the university to repay $120,000 to the vending contractor; however, that contractor forgave the entire amount owed, at least in part because it received a significant market share (70 percent) of the beverages sold on campus through May 2012.

- Since 1985 the university has contracted with a company to operate the campus book store for the sale of merchandise and textbooks not handled by the university's textbook rental service. The contract limits profit margins on textbooks and allows the vendor to set prices on other stock items. The contractor retains all sales revenue but is required to pay sales commissions to the university. The university received over $214,000 in sales commission revenues during the 3 years ended June 30, 2010, from the book store contractor.

  The university has not competitively bid this contract since 1978. According to contract information, the contractor agreed to contribute $15,000 a year (totaling $75,000) to the Northwest Foundation Stadium Campaign Fund for 5 years beginning in October 2001. This donation was contingent upon contract renewal through July 2009.

  In 2007, the university extended the contract without soliciting competitive bids. The new contract was for 1 year with nine additional 1-year renewal options. Besides a financial commitment to renovate and equip the bookstore, the contractor agreed to make a $50,000 unrestricted donation contingent upon contract renewals during the 10-year period.

The table below presents the donation/payment schedules included in the various contracts (including football suite lease payments) from fiscal year 2002 through 2010:

Fiscal Year Ended	Facilities Management	Food	Vending	Bookstore
June 30, 2002	$	250,000	50,000	15,000
June 30, 2003		250,000	50,000	15,000
June 30, 2004	10,000		50,000	15,000
June 30, 2005	10,000		50,000	15,000
June 30, 2006	10,000		50,000	15,000
June 30, 2007	510,000		50,000	
June 30, 2008	10,000			50,000
June 30, 2009	10,000			
June 30, 2010	10,000			
Total	$ 570,000	500,000	300,000	125,000

Significant legal concerns were noted regarding the university's handling of these contracts. Under a delegation of authority granted by the Missouri Office of Administration, Division of Purchasing and Materials Management, the university is subject to state purchasing requirements outlined in Chapter 34, RSMo, which require competitive bids be solicited for purchases of $3,000 or more and advertising for bids for purchases of $25,000 or more. The university provided documentation indicating it recognized the facility management services and food services contracts were due to be re-bid in 2007; however, university officials believed they were justified in extending those contracts because of a good performance history of the contractors and the high cost to potential bidders in developing a proposal. According to the documentation provided, the university officials believed other vendors would not submit a bid if a high level of satisfaction already existed with the current service provider. Neither of these alleged reasons justifies not bidding these services as required by statute.

Chapter 34, RSMo, and the delegation of authority allow for the competitive bidding requirements to be waived for certain specified reasons, including single feasible source procurements as outlined in Section 34.044, RSMo; however, university officials indicated they did not consider these contracts to be single feasible source procurements or any of the other specific bidding exceptions allowed by law.

In addition, 1 CSR 40-1.050(8) allows contracts to be amended if they do not significantly alter the original intent and scope of the contract. However, the university's contract amendments requiring donations from the service providers while at the same time binding itself to the renewal options (by having to repay a portion of the donation if it did not exercise the annual renewal options) appears to have significantly altered the intent and scope of the original contracts. As a result, the university was not justified in exercising the annual renewal options related to the original contracts.

The university's handling of these contracts created a disincentive to re-bid the contracts and award them to another vendor due to the payback requirements set forth in the related contract amendments.

1.2 Loan

The university obtained a $2 million loan from Company A in May 2007 in conjunction with a contract amendment. The contract amendment specified the loan was for capital improvements to dining services equipment and venues in campus dining. There was no documentation or other evidence to indicate the loan agreement was reviewed by legal counsel or approved by the Board of Regents.

The interest-free loan repayment schedule called for five annual payments of $400,000, beginning on September 15, 2007. Similar to the contract provisions related to the donations, the terms of the loan also require the university to repay the remaining balance of the loan immediately if the university cancels the contract with the vendor.

To ensure the propriety of any debt obligations entered into, loans should be reviewed by legal counsel and properly approved by the Board of Regents.

1.3 Contract compliance

Contract revenues and services are not properly monitored. The university does not have established procedures to verify the accuracy of reported food services sales which are the basis of commissions paid to the university. In addition, some requirements of the facilities management contract have not been fulfilled.

- The university receives sales commissions from the contractor's food services and vending sales. Although the university receives weekly sales reports from the contractor and verifies the computed commissions, it appears these reports are summary spreadsheets prepared by the contractor. University personnel indicated they do not periodically compare these reports to original sales documentation to verify that sales reported to the university are accurate.

- The facilities management joint review committee has not met since July 2008. The contract established a joint review committee for the purpose of holding regular monthly consultations on the performance of services being provided.

- The facilities management services contractor has not provided annual reports summarizing the activity of the environmental services department since fiscal year 2006. The contract requires the vendor to submit an annual report to the university.

To ensure contracted services are adequately performed and commissions are correctly calculated, the university should improve its oversight and

control over the food services and facilities management contracts. This would include periodic verification of reported sales to original sales documentation. In addition, the university should ensure regular meetings of the joint review committee are held and annual reports of the environmental services department are submitted as required.

Recommendations

The Board of Regents:

1.1 Solicit competitive bids or proposals for the auxiliary services contracts in accordance with state law and the delegation of authority granted by the Missouri Office of Administration, Division of Purchasing and Materials Management. The university should also reevaluate the practice of entering into long-term contracts and discontinue the practice of accepting vendor donations which are contingent upon contract renewals.

1.2 Ensure any loans obtained by the university are properly reviewed by legal counsel and approved by the Board of Regents.

1.3 Ensure university officials exercise proper oversight and control over the auxiliary service contracts. The university should periodically verify reported sales to the vendor's original sales documentation and ensure compliance with the oversight provisions of the auxiliary service contracts.

Auditee's Response

1.1 The Board of Regents agrees that the University should be open and transparent in all purchasing transactions. The Board believes in competitive bids/proposals which will lower the cost of books, food and housing and thus save the students money and keep college affordable.

The University is currently reviewing these auxiliary services contracts and proposals for these services will be issued and contracts awarded as soon as possible but not later than the next 24 to 36 months in accordance with state law.

1.2 The University agrees in the future to not accept loans and/or donations from vendors for leases, or lease extensions. The University agrees that any future loans will be reviewed by legal counsel and approved by the Board of Regents.

1.3 The University agrees that contract oversight is important, and is in the process of re-establishing and revising the criteria and review process. In addition, the Finance Department of the University currently reviews vendor summary sales reports and will implement

periodic verifications of these summary reports to the original sales documentation.

2. Former President's Employment Contract

The Board of Regents' decision to include a transition year in the former President's 0employment contract and pay him substantial compensation and benefits have violated the Missouri Constitution which prohibits the payment of compensation for services previously rendered and/or may not have been in the best interest of the university. In addition, some payments made to this individual while he was still University President did not require him to account for costs incurred and/or have been excessive.

In 2004, the Northwest Missouri State University (NWMSU) Board of Regents and former President Hubbard executed an employment contract which covered a 6 year period ended June 30, 2010. The contract indicated that Dr. Hubbard intended to retire as the university's President after June 30, 2009, and it provided that if the Board was successful in finding a suitable replacement by that date, the former President would be employed by the university to serve in a transition role during the year ended June 30, 2010. The former President stepped down as University President effective July 1, 2009, after serving in that position for 25 years. The former President then subsequently served in a transition role for a year as provided by the contract.

2.1 Transition year compensation

The compensation and benefits provided to the former President after he retired were substantial and perhaps disproportionate to the services he provided to the university during this time period and may have been provided primarily in appreciation for past service and not in the best interest of the university. Article III, Section 39, Missouri Constitution, prohibits the granting of additional compensation to public officials for past service.

The employment contract approved by the Board of Regents in 2004 provided the former President's salary during the transition year was to be no less than the salary paid him during the last year he served as President of the university. As a result, the former President received a salary of $224,762 during the transition year (an amount equal to the base salary of his last year as University President). The 2004 employment contract did not specify duties to be provided by the former President during the transition year, but provided he would perform such duties as outlined by the new President and approved by the Board of Regents.

The Board of Regents hired a new President who assumed the duties of that position effective July 1, 2009. During the transition year the former President submitted monthly activity reports to the new University President which summarized activities he was involved in on behalf of the university.

While some of the activities appeared to benefit the university directly, others did not. Some of the activities reported included:

- Teaching at least two classes, one class for NWMSU and a graduate-level class for an out-of-state university
- Performing statistical and financial analysis for the university
- Seeking additional grants and external funding
- Writing an education-related blog and/or articles for the Kansas City Star
- Serving on a higher education-related foundation board
- Speaking at various engagements

The new President indicated a primary benefit of the former President's services/activities during the transition year was to help maintain and/or build current and future relationships between outside parties (particularly donors) and the university's new leadership.

Other benefits

In addition to the salary paid during the transition year, the 2004 employment contract provided the former President would receive hospitalization, major medical, travel risk, and long-term disability insurance during the transition year and for a year following the transition year. In addition, the contract provided the university would provide health and accident insurance for the former President's dependents (his wife) during this 2 year period. The insurance and other benefits cost the university $30,140.

The 2004 employment contract also provided the university would 1) pay for suitable housing for the former President during the transition year if the former President lived in Maryville, and 2) pay all necessary moving and relocation expenses in vacating the university-provided home. When the former University President retired in July 2009, he was not required to live in Maryville. As a result, the university incurred costs of $8,930 to move the personal property and furnishings of the former President to his new place of residence in Kansas City.

While it is apparent the former President provided some services to the university during the transition year of his contract, it is not clear to what extent those services benefited or assisted the university's new leadership or whether the services justified the substantial salary and benefits provided. In addition, it appears the inclusion of the transition year and related compensation and benefits included in the former President's contract may have been provided primarily in appreciation for past service. While it is understandable the Board of Regents would appreciate and might want to recognize the contributions of the former President in a monetary way, it is not legal to do so.

It should also be noted in March 2009 the Northwest Foundation paid the former President $30,000 pursuant to a formal agreement entered into the previous month between the foundation and the former President. That agreement indicated this payment was in partial consideration of the former President's 25 years of distinguished service to the university and to compensate for the fact he had not had a motor vehicle furnished to him since 2003. This payment was made even though the former President had been paid a monthly vehicle allowance by the university, as reported below.

2.2 Other payments

Some employment-related allowances paid to the former President during his employment did not require him to account for actual costs incurred and/or appeared excessive.

Expense allowance

The former President's 2004 employment contract provided for an annual $12,500 miscellaneous personal expense allowance that was paid in equal monthly installments. However, the former President was not required to account for the use of the allowance. The allowance was intended to cover the cost of meals and miscellaneous travel and entertainment expenses. While he was still President, we noted meal purchases totaling $2,975 during the 2 years ended June 30, 2009, which were made using the President's purchasing card. It was not clear whether these expenses should have been paid by the former President using his expense allowance funds.

In contrast, the contract of the current President does not provide for a personal expense allowance. Instead a budgeted expense reimbursement account of up to $12,500 has been provided. The current President is only paid for actual expenses incurred, supported by documentation and submitted for reimbursement in accordance with the university expense reimbursement policy.

Vehicle allowance

The university did not perform and document a cost analysis to support a vehicle allowance paid to its President. The university amended the former President's 2004 employment contract in May 2007 to provide for an annual $21,600 vehicle expense allowance, which was paid to the former President in equal monthly installments of $1,800. In contrast, the contract of the current President provides for an annual $10,800 vehicle expense allowance, payable in equal monthly installments of $900.

The practice of providing personal and vehicle expense allowances without requiring an accounting of actual costs incurred or periodically reviewing the reasonableness of amounts paid, does not ensure university funds are used in a reasonable and necessary manner.

Recommendations

The Board of Regents:

2.1 Ensure future employment contracts with the University President comply with state law and properly safeguard university interests.

2.2 Require the University President to account for actual expenses incurred, or periodically review the reasonableness of any allowances provided.

Auditee's Response

2.1 The Board of Regents agrees that the 2004 President's contract may have violated the spirit of the Missouri Constitution. The Board of Regents in 2009 corrected many items and now requires documentation for actual expenses incurred and now provides a more realistic market based car expense allowance, approximately half of the 2004 allowance.

We recommend that the Board Secretary provide all new and future Board of Regents a copy of this audit report.

We also encourage future Board of Regents to obtain a written legal opinion on future Presidents' contracts and amendments.

The Board of Regents met July 30, 2009, and took timely and appropriate action, by directing the President to develop a work plan for the former President for the remaining 11 months of the contract. The President and Board developed a six point work plan that held the former President accountable and met the needs of the University.

The Board of Regents will continue to have its legal counsel advising it with regard to future employment contracts for the University President. The contract with the prior President was reviewed and addressed. The current President's contract meets with all of the requirements of Missouri law and addresses the issues identified.

2.2 The Board of Regents will review the reasonableness of any allowances provided with each contract renewal cycle and generally on an annual basis.

3. Northwest Foundation

The university subsidizes a significant amount of operating expenses of its foundation. Subsidies totaled over $3.3 million during the 3 years ended June 30, 2010. This practice does not appear to be appropriate and may violate provisions of the Missouri Constitution. In addition, the university has no formal contract or agreement with the foundation to document the duties and responsibilities of both parties.

The Northwest Foundation (the foundation) was established in 1971 as a 501(c)(3) not-for-profit corporation. The purpose of the foundation is to obtain financial donations to be used for the promotion of the welfare, goals, and programs of the university and to enhance the educational offerings and facilities of NWMSU. A Board of Directors manages the business and affairs of the foundation, and the university's Vice President of University Advancement serves as its Executive Director.

During the 3 years ended June 30, 2010, the foundation expended almost $9 million for scholarships and other university programs and operations. The foundation has also incurred debt on behalf of the university since 2003 to finance renovations, construction, and real estate acquisitions totaling over $13 million. The related assets are, or will ultimately become, property owned by the university through lease-purchase payments. Debt service payments are funded through revenues generated by the projects, university funds, and foundation investment income.

3.1 University subsidies

The university subsidizes a substantial portion of the operating costs of the foundation, financing over $3.3 million of foundation-related expenses during the 3 years ended June 30, 2010, which may violate the Missouri Constitution. Over $2.5 million of this amount represents salary and benefit costs of university-paid employees who perform duties for the foundation.

The Executive Director of the foundation indicated 13 non-student employees in the foundation's Advancement, Alumni Relations, and Development Office perform work for both the university and the foundation. However, the records of time worked do not indicate whether the work was related to foundation or university matters. Although salaries for these employees are paid entirely from university funds, the foundation only reimburses the university for salaries of the foundation finance officer, a percentage of the salary of a development officer, and in some years the salary of a student employee. These salary reimbursements totaled approximately $406,000 during the 3 years ended June 30, 2010.

Foundation and university officials indicated the foundation is able to finance the costs of some of its functions but is not currently able to be financially independent of the university.

The practice of subsidizing the foundation with university funds appears to constitute the granting or lending of public funds to a private entity, which is prohibited by Article III, Section 38(a) and Article III, Section 39(1), Missouri Constitution.

3.2 No formal agreement between university and foundation

A formal agreement between the university and foundation has not been established although there is much activity and collaboration between the university and foundation.

A formal agreement is necessary to ensure the university and foundation are aware of their duties and responsibilities and to provide protection to both parties. Such an agreement might include, but not necessarily be limited to, the overall goals and objectives of the partnership between the entities; anticipated activities, such as scholarship and other direct support provided to the university by the foundation; direct support, accounting system services, and equipment management services provided to the foundation by the university; and guidelines for collaborative efforts on property development, real estate acquisitions, and financing obtained for the university.

An internal audit of the foundation also recommended the foundation document its relationship with the university in a written agreement.

Recommendations

The Board of Regents:

3.1 Discontinue the practice of subsidizing the operations and activities of the foundation. If this cannot be done in the short term, efforts should be made to reduce university subsidies, with the eventual goal that the foundation be financially independent of the university.

3.2 Enter into a written agreement with the foundation that documents the duties and responsibilities of both parties.

Auditee's Response

3.1 The sole purpose of the Foundation is to support the mission of the University. Any University assets used by the Foundation's operations are, in turn, used to generate external funds for the operation of the University. Functions of University Advancement staff would be necessary whether there was a separate 501(c) (3) organization or not. All activities of the development and alumni staff benefit the University. The benefits to the University far outweigh the use by the Foundation of University assets. Future operations of the University will benefit from planned gifts and from endowed gifts to the University that were solicited by development personnel. Investment in fundraising activities is a prudent investment and would be emphasized by the University even in the absence of a separate foundation. The University's facilities have also benefitted from the Foundation incurring significant debt to finance the $4.4 million renovation to the football stadium and $7.675 million for other University buildings.

As the Northwest Foundation matures, the University and the Foundation will work together to carefully monitor the mutual relationship.

3.2 The Northwest Foundation Board of Directors and the Northwest Board of Regents are working to adopt a formal memorandum of understanding that details the relationship between the University and the Foundation and are working toward a goal of completing said agreement within the next 90 days.

4. Contract Controls and Procedures

Controls and procedures for the management of contracted services need to be improved. University personnel do not adequately agree invoices for contracted services to the terms of the contracts.

- In three instances, the university processed and paid billings for auditing services which included balances carried forward from the previous billing statement. However, the university had previously paid these amounts resulting in overpayments totaling $23,507. The independent auditing firm which provided the services detected the overpayments and notified the university to make corrections in subsequent payments.

- The university paid for additional accounting and auditing-related services totaling $3,930, even though the contractor billing invoices did not provide adequate details regarding the hours billed or whether the hourly rate charged for these services was in accordance with the terms of the contract.

- University personnel indicated contracted billing rates or other contract terms are not usually verified with invoices received from the collection agency service vendors. The responsible personnel indicated only the first few invoices of a contract period are verified with the contract terms.

The university should establish adequate procedures for the review and payment of contracted service billings. Without such procedures there is less assurance the payments are proper and in compliance with the contract provisions.

Recommendation

The Board of Regents establish adequate procedures for the review and payment of contracted service billings to ensure payments related to such services are proper and in accordance with the terms of the contracts.

Auditee's Response

The Vice President of Finance is evaluating procedures related to review and payment of contracted services to ensure payment in accordance with the terms of the contracts. An overview of the procedures will be communicated to the campus community within the next 12 months.

5. Room and Board Charges

The university does not adequately document the annual reviews of its room and board rates.

The university increased room and board rates in each of the last 4 years; however, the university's documentation of the annual reviews of its rates, including how any related increases are calculated or determined, is not adequate. The following table presents room and board fees for typical full-time students.

Academic Year		Amount
2010-2011	$	7,250
2009-2010		6,790
2008-2009		6,590
2007-2008		6,276

Although the university indicated room and board planned expenditures are reviewed when determining the room and board increases, there was no documentation maintained to support how the university calculated the approved rates. Without adequate documentation supporting how room and board rates are determined, there is less assurance all related expenses are considered and rates have been set appropriately.

Recommendation

The Board of Regents ensure university officials document and maintain justification for room and board rates charged to students.

Auditee's Response

The University Administration uses a systematic process for setting room and board rates including an annual review of associated costs and comparative benchmarks to determine competitive rates. The University has formally documented the process and will ensure appropriate documentation is maintained and the process followed for subsequent reviews.

6. Program Operating Results and Related Subsidies

The university operates three education programs on campus for preschool through high school age children which incur substantial operating losses. In addition, the accounting system is not capable of reporting operating results of the various programs and individual operating segments of the university.

6.1 Children's education programs

The university operates three on-campus educational programs for children which appear to be operating at significant losses and are subsidized by other university funds. In addition, the university has not performed cost-benefit analyses of these programs.

- The Early Childhood Center is a state-licensed preschool facility that provides child care and educational services for preschool-aged children in the Maryville area. During the 2009-2010 school year, the preschool served a total of 43 children.

As of June 2010, the preschool program employed two full-time and two part-time employees. Besides providing child care/preschool services, this program provides various training and classroom opportunities for several degree programs in the Family and Consumer Sciences Department.

During the 2009-2010 school year, the preschool charged fees between $63 and $348 per child per month, depending on the number of days the child attended the preschool each week and whether the child was there all day or a partial day. University employees and students do not receive a discount for using this service.

The table below presents the operating results (based on the financial information available) of the preschool during the three most recently completed school years. The revenues presented represent the fees charged for the preschool services. The expenditures were funded from the preschool revenues collected and general operating revenues of the university.

Early Childhood Center - Operating Results

		School Year		
		2009-2010	2008-2009	2007-2008
Revenues	$	106,904	109,619	107,134
Expenditures		(208,398)	(218,501)	(267,758)
Operating Losses	$	(101,494)	(108,882)	(106,624)

Amounts in the table do not consider various overhead costs (including utilities, maintenance, custodial, and insurance costs) or tuition revenues from related degree programs.

- The Horace Mann Laboratory School is a kindergarten through 6th grade (K-6) elementary school that has provided educational services for elementary school-aged children in the Maryville area since the early 1900s. During the 2009-2010 school year, the K-6 school served 114 students.

  As of June 2010, the K-6 school employed eight full-time and eight part-time employees. Similar to the preschool, the K-6 school provides training and classroom opportunities for university students in the College of Education and the Department of Family and Consumer Sciences.

  During the 2009-2010 school year, the K-6 school program charged tuition of $700 annually per student but provided discounts ranging from 18 percent to 48 percent if multiple children in the same family were enrolled.

The table below presents the operating results (based on the financial information available) of the K-6 school during the three most recently completed school years. The revenues presented represent the tuition charged for the K-6 school services. The expenditures were funded from the K-6 school revenues collected and general operating revenues of the university.

Horace Mann (K-6) Laboratory School - Operating Results				
		School Year		
		2009-2010	2008-2009	2007-2008
Revenues	$	74,146	62,676	47,356
Expenditures		(746,703)	(726,466)	(725,458)
Operating Losses	$	(672,557)	(663,790)	(678,102)

Similar to the preschool, amounts in the table do not consider various overhead costs or tuition revenues from related degree programs.

- The Missouri Academy (the academy) is a 2 year dual-enrollment high school/associate degree program established in August 2000 that provides educational services to high school-aged students. Academy students live on campus and attend university classes. The academy program provides residential and educational services to students in 11th and 12th grades and is available to students of any state and to international students. During the 2009-2010 school year, the academy served 200 high school-aged children.

  As of June 2010, the academy program employed 15 full-time staff, 3 graduate assistants, and 1 part-time staff in administrative and live-in residential life counselor positions. Students in the academy program earn both a high school diploma and an associate of science degree. The mission of the program includes preparing academy graduates to succeed in science, mathematics, and technology programs in higher education institutions. The academy was established with the support of the Missouri General Assembly and during the early years of the program the university received an additional appropriation from the state to help fund its operations.

  Academy tuition and fees per credit hour and room and board rates are comparable to amounts charged to students in undergraduate programs; however, significant discounts are offered to academy students. The discounts allow academy students to participate in the program for free or at a greatly reduced cost. Information provided by academy officials indicated revenues chargeable to academy students totaled as much as $2.8 million annually; however, these revenues were reduced by discounts to students of 100 percent, 80 percent, and 66 percent during the years ended June 30, 2008, 2009, and 2010, respectively.

University financial records indicated approximately $3 million was expended annually during the 3 years ended June 30, 2010, for direct costs related to the academy, including administrative and residential counselor staff salaries and other direct expenses. However, these expenditures do not include the salary costs of instructors since the students are integrated in classrooms with regular university students.

University financial records did not separately identify the revenues and expenditures of the academy to allow us to present the operating results of the program; however, it is apparent the academy's operations are heavily subsidized with general operating funds of the university.

These programs and other areas of the university that operate at a loss should be carefully analyzed for ways to make them more cost effective and ensure resources used for educational purposes are maximized. While it may be necessary or desirable to fund or subsidize certain programs and operations, funding and subsidies should be reviewed periodically to ensure activities are operated efficiently and continue to be in the best interest of the university.

6.2 Determination of operating results

The university upgraded its financial accounting software in January 2009; however, the accounting system is not capable of reporting operating results of the university's various programs and individual operating segments. As a result, such information is not available to assist university management in making informed decisions.

During our review of the children's education programs discussed above, we noted the university's accounting system does not adequately account for all revenues and expenditures of an individual program or segment of the university and does not generate sufficient information to determine if a program/segment is producing sufficient revenue to meet the related expenditures. We also noted this situation during our review of the university's extended campuses and certain auxiliary operations.

The university needs to consider how it might enhance its current accounting system to allow its management to better evaluate operating results of the various programs and operating segments of the university.

Recommendations

The Board of Regents:

6.1 Ensure university officials analyze the Early Childhood Center, Horace Mann Laboratory School, and Missouri Academy programs to determine whether to continue to operate these programs and/or how they might be operated at a level which is more self-sustaining.

6.2 Ensure university officials consider how to enhance the accounting system to allow management to better evaluate operating results of its various programs and operating segments.

Auditee's Response

6.1 The University routinely evaluates the financial feasibility of each of its academic programs to ensure that education provided by that program is as cost effective as possible. The Horace Mann Laboratory School and the Early Childhood Education and Care Laboratory are laboratories which exist because of academic programs to which they are linked, and therefore those laboratories are considered in the overall cost benefit analysis that is consistently reviewed for each such program. The University does not break down a particular aspect of a program, such as a laboratory, to evaluate whether it is self-sustaining but rather reviews the program as a whole, taking into account, among other things, the tuition and fees generated by students who are enrolled in that program. Northwest, established in 1905 as a Normal School, has a long tradition for preparing teachers, and these initiatives are consistent with that mission and inextricably linked to our academic programs. These laboratories do not exist primarily for the pre-K through grade 6 students, but, rather, are one aspect of the program for University students majoring in teacher education. The University will continue to monitor operations on a regular basis.

6.2 As stated above, the University systematically evaluates each education program to determine, among other things, the cost-benefit analysis of each such program. The University will continue to review the evaluation process, including the accounting aspects of such programs, to improve the ultimate analysis of each program.

7. Real Estate Acquisitions

The university does not currently have specific plans for use of two properties acquired by the university's foundation. In addition, neither the foundation nor the university obtained appraisals to determine the fair value of the properties before acquiring the properties.

The foundation purchased two properties at a cost totaling over $976,000. These adjoining properties include a total of 66 acres and are located adjacent to the campus boundaries. One property was acquired in 2004 at a cost of $475,000 and consisted of a home and 30 acres that were previously used as a farm. The other property was acquired in 2007 at a cost of $501,060 and consisted of 36 acres of unimproved land.

It appears these properties were acquired at the request of university officials; however, they were purchased by the foundation on behalf of the

university because of the foundation's ability to obtain appropriate financing. Shortly after the properties were purchased, the university entered into lease purchase agreements with the foundation for each property. The lease agreements require the university to make annual or monthly lease payments to the foundation and maintain the properties. The university may use the property for any lawful purpose up to and including construction of buildings or support facilities on the properties. Optional purchase prices may be paid by the university through the year 2026 to acquire title to the properties. The actual ownership of the properties will ultimately transfer from the foundation to the university after all lease payments have been made or when the university elects to make optional purchase payments.

7.1 Intended property use

The university has not developed or used these properties since acquisition and does not currently have specific plans regarding future use. Based on discussions with current and former university officials, it appears the university tentatively planned to construct new baseball and softball fields on these properties; however, these projects were not started, at least in part, due to economic and budgetary concerns.

The university's current administration is not committed to the projects previously planned, and the current President indicated the university's leadership team has begun the process of developing a long term strategic plan which will include consideration of the best use of existing properties.

To ensure the best and appropriate use of these properties, university officials should include the use of these properties in the long term strategic plan, taking into consideration the university's long term goals and whether there is a continued need for the properties.

7.2 Property appraisals

Neither the university nor the foundation obtained independent appraisals or performed other procedures to determine the fair value for either of the properties purchased. University officials indicated these purchases were negotiated with the respective sellers and bought at a sales price of $15,833 per acre for the farm and $13,918 per acre for the unimproved land.

Without an independent appraisal of properties purchased, the university has less assurance the price paid was reasonable and represents the fair value of the property acquired.

Recommendations

The Board of Regents:

7.1 Ensure university officials develop a plan for the undeveloped properties which is in concert with future university and regional needs.

7.2 Ensure university officials obtain independent appraisals prior to the purchase of real estate to ensure fair value is paid for any property acquired.

Auditee's Response

7.1 The University appreciates the audit team's findings and understands the broad intent, but believes this area of inquiry applies to University planning and future operations. Nonetheless, the action of development of a plan for said underdeveloped property has already been placed within the University's strategic planning process.

7.2 The University will put a process in place regarding obtaining appraisals prior to June 1, 2012.

8. University-Owned Airplane

The continued ownership of the university's airplane may not be justified. In addition, the cost of alternative travel methods is not considered prior to authorization of flights in the airplane.

The university owns and maintains an airplane to fly board members to board meetings and university officials and employees to education-related meetings, legislative hearings, and other functions. The airplane is a 1978 model six-passenger aircraft purchased in 1995 at a cost of $188,000. During the 3 years ended June 30, 2010, the airplane made 130 flights involving over 300 flight hours and carrying over 240 passengers. While the airplane was primarily used for in-state flights, it was also used for several interstate flights each year.

8.1 Cost-benefit analysis

The university has not performed a cost-benefit analysis to determine if it is beneficial for the university to continue ownership and operation of the airplane. Due to concerns the airplane was not being used effectively, university administration grounded the airplane in April 2010 and it has not been used since that time. The cost of operating the airplane ranged from $350 to $400 per hour and costs to operate the aircraft exceeded the costs of using alternative travel methods by over $20,000 during the 3 years ended June 30, 2010, according to university records. In addition, the university's cost analysis did not consider the maintenance, insurance, and overhead costs related to the airplane.

To ensure the efficient and effective use of university resources, the university should perform a cost-benefit analysis of the airplane to determine if continued ownership of this aircraft is justified.

8.2 Travel method decisions

University policies do not require consideration of the cost of alternative travel methods prior to the authorization of flights. Approval for use of the airplane is determined at the departmental level and can be approved if monies are available in the budget. The university fleet services staff analyze flight costs after flights are conducted. That analysis indicated the

airplane was frequently used when a more cost-effective manner of travel was available. The analysis identified 13 of 130 flights during the audit period when the cost of using the airplane exceeded an alternative travel method by at least $1,000.

Reviewing and approving travel requests, especially involving the university airplane, is necessary to ensure the travel methods selected result in the best value to the university. If the university performs a cost benefit analysis and determines it is beneficial to continue to own the airplane, university management should properly review and approve the use of the airplane. The review should consider the cost of alternative travel methods and other factors affecting the travel decision.

Recommendations

The Board of Regents ensure university officials:

8.1 Perform a cost-benefit analysis of the airplane to determine if continued ownership of this aircraft is justified.

8.2 Compare the cost of alternative travel methods and authorize flights of the university's airplane.

Auditee's Response

8.1 The University will finalize the cost-benefit analysis for the airplane and make an appropriate decision on ownership within the next 24 months.

8.2 The University airplane has been grounded since April 2010. The University will continue to evaluate the efficient use of the airplane in comparison to alternative methods.

9. Cash Receipts

Internal controls over cash receipts should be improved. Control weaknesses exist related to the recording and handling of monies received in the Bursar's office, the handling of monies initially collected by various other departments, and the handling of event tickets.

9.1 Bursar's office collections

The university Bursar's office is the main collection point for receipts on campus. Our review of controls in that office disclosed the following concerns:

- Checks received in the mail by the Bursar's office are not recorded on a mail log or restrictively endorsed immediately upon receipt. An employee in that office initially opens the mail and places any checks received in batches; however, that individual does not record the payments or restrictively endorse the checks. Instead, the various cashiers in that office retrieve the batches and record and process the monies received for any accounts that have a balance due. Any checks received on accounts with a zero balance are held for approximately a

week. If after that time, the account balance is still zero and the check cannot be applied, it is recorded on a Log of Returned Checks and the check is returned to the payor.

To improve controls over checks received in the mail, an initial record or mail log should be maintained for all such checks received through the mail and the checks should be restrictively endorsed immediately upon receipt. The monies should be deposited on a timely basis and any refunds necessary should be made by check.

- Receipt slips are not generated for some monies received in the Bursar's office. In some instances, cashiers have discretion in deciding whether to generate an accounting system receipt slip when recording monies received. Further, when transactions are recorded without issuing a receipt slip, a system-generated receipt number or other transaction number is not assigned by the accounting system. As a result, some receipt transactions are not assigned a sequential number and the numerical sequence of receipt transactions cannot be accounted for properly.

  To improve controls in the Bursar's office, receipt slips should be issued or a receipt number assigned to all monies received to improve accountability over monies received in that office.

- Monies received by cashiers are not always deposited intact. The Bursar's office cashes personal checks and university payroll checks for students and employees from daily cash receipts. A record of these transactions is not created in the accounting system. As a result, the composition of monies received cannot be reconciled to the composition of amounts recorded on the cashier's drawer close out reports or to monies deposited.

  To improve controls over monies received in the Bursar's office, receipts should be deposited intact and the composition of monies received should be reconciled to the composition of monies deposited.

9.2 Other department collections

Procedures are not adequate for monies initially collected outside the Bursar's office. Other departments do not always reconcile documentation to monies collected and turned over to the Bursar's office for deposit.

- During the audit period, the athletic department collected over $296,000 for football camps. Documentation of monies collected by the athletic department at these camps is not reconciled to monies remitted to the Bursar's office for deposit.

- During the audit period, the Horace Mann school collected over $82,000 for student meal cards. Deposit listings prepared by the Horace Mann Laboratory School for meal cards are not reconciled to monies remitted to the Bursar's Office for deposit.

To adequately safeguard receipts and reduce the risk of loss or misuse of funds, the university should require departments transmitting monies to the Bursar's office to reconcile the supporting documentation to the monies transmitted both in total and in composition.

9.3 Event tickets

Event tickets are not adequately controlled and accounted for properly. Tickets for performing arts and athletic events are sold at the performing arts center, the student services center, or the event gate. We noted the following concerns regarding ticket stock controls:

- Tickets for events are printed on blank ticket stock that has a sequential number on the back of each ticket; however, there are no inventory count procedures for the blank stock or comparison of stock usage to sales records.

- Tickets for events are pre-printed in batches and distributed to organizations to be sold. Proceeds from the sales are later collected from the organization along with the unsold ticket stock which is subsequently voided. Voided tickets are canceled in the system and shredded; however, only one employee is present during the verification and destruction of the tickets.

- All event ticket cashiers have the ability to override the established ticket price and issue free tickets.

To ensure all ticket sales are accounted for properly, the university should account for the number of tickets sold, monies collected, and inventory of ticket stock. In addition, an independent review should be performed of all free tickets issued and voided tickets should be verified and destroyed in the presence of two employees.

Recommendations

The Board of Regents:

9.1 Ensure university officials improve controls over monies received by the Bursar's office. In addition, the Bursar's office should discontinue the practice of cashing personal or payroll checks from daily receipts.

9.2 Ensure university officials improve controls over monies collected by other departments.

9.3 Ensure university officials establish procedures to account for the number of event tickets sold, monies collected, and inventory of ticket stock. In addition, voided tickets should be verified and destroyed in the presence of two employees.

Auditee's Response

9.1 The University has changed its cash receipt process to include the following procedures: immediate recording and date-stamp for each receipt compared to daily batching of receipts, receipt numbers issued for all monies received, and zero balance checks returned daily upon receipt. With regard to cashing personal and payroll checks, the University has adequate controls in place to ensure deposits are balanced and reconciled for all transactions regardless of composition.

9.2 The University will work with other departments that collect monies to enhance current processes. These practices will be implemented within the next 12 months.

9.3 The University will implement processes to document ticket stock, sales and monies collected and complete an inventory of the stock. In addition, the University will implement a process to document voided tickets and have two people present when destroying these tickets.

10. Capital Assets

University capital asset records are not accurate and include computer equipment items which have likely become obsolete, been disposed of, and are no longer owed by the university. In addition, periodic physical inventories of assets are not performed and departments are not always notifying the accounting department when capital asset items are disposed of or moved to a different location.

The Controller's office maintains detailed capital asset records to account for university property and equipment items. The current threshold for capitalizing capital assets is $1,000.

10.1 Accuracy of records

Capital asset records are not accurate and include computer equipment items which have likely been disposed of and are no longer owned by the university. The capital asset records include almost 1600 property items coded as computer or data processing equipment that were purchased prior to January 1, 2000. According to university personnel, considering the age of these property items, it is likely most, if not all, of these assets had become obsolete and were disposed of but were not deleted from the capital asset records.

It appears this situation is the result of poor controls and procedures related to the verification of capital assets and the recording of property

dispositions, as discussed below. A thorough review should be performed to ensure the capital asset records are accurate and only include those property items the university currently owns.

10.2 Physical inventory procedures

The university has not conducted a complete physical inventory of its capital assets for at least 15 years. According to university personnel, computer equipment is inventoried in areas when service calls are made by the information systems staff; however, there is no documentation of these procedures. According to university officials, annual physical inventories of capital asset items have not been performed because they do not believe it would be cost-effective to do so.

Annual physical inventories are necessary to ensure the accuracy of capital asset records and to detect the loss, theft, or misuse of assets. The university should conduct annual physical inventories and reconcile the results of the inventories to the detailed capital asset records.

10.3 Disposition or movement of assets

The university does not have a policy requiring departments to notify the accounting department when capital asset items are disposed of or moved to a different location. As a result, the accounting department has not always been notified of asset dispositions or the movement of property items. For example, in July 2010, we noted the accounting department had not been advised of the property items sold during a surplus property auction that took place in January 2010. As a result, 36 property items sold during that auction were not properly deleted from the capital asset records in a timely manner.

The university should establish a formal policy which requires the accounting department to be notified when capital asset items are disposed of or moved to a different location.

Recommendations

The Board of Regents:

10.1 Ensure university officials maintain accurate capital asset records. A review of the capital asset records should be performed to ensure those records only include property items currently owned by the university.

10.2 Ensure university officials conduct periodic physical inventories of university property and equipment items and reconcile the inventory results to the detailed capital asset records.

10.3 Establish a policy or procedure which requires the accounting department be notified when capital asset items are disposed of or moved to a different location.

Auditee's Response

10.1 The University has begun the process of reviewing the capital asset records in an effort to align the database records with assets on hand. The University will continue this process until all assets are reviewed over the next 3-4 years.

10.2 The University will implement periodic physical inventories of its capital assets within the next 4-5 years and reconcile the inventory results to the detailed capital asset record.

10.3 The University President will recommend and the Board of Regents will adopt a policy regarding updating the disposal or relocation of assets and communicate that policy to campus departments within the next 2-3 years.

11. Computer Security

The university does not have an adequate formal disaster recovery plan for its computer system/data and procedures are not sufficient for reviewing employee access to the computer system.

11.1 Disaster recovery plan

An adequate disaster recovery plan has not been developed to help ensure the university can promptly restore computer operations in the event of a natural disaster. The university's current contingency plan relies exclusively on primary and alternate operating sites; however, these sites are both located on campus within approximately 1,500 feet of each other. The university does not have any established plans or agreements which would allow the computer system to be established off campus in the event of a disaster. Because of the university's degree of reliance on the computer system, the need for adequate contingency planning is evident.

An adequate disaster recovery plan should specify recovery actions required to reestablish critical computer operations and include plans for a variety of situations, including a natural disaster. If such an event were to occur, a disaster plan can reduce confusion and provide a framework for the uninterrupted continuance of operations. Once a disaster recovery plan has been updated and approved, it should be periodically tested and reviewed.

11.2 User access rights

Supervisors are responsible for assigning system access rights to employees and for notifying the information technology (IT) system administrator of additions to or changes in user rights. However, university policies do not require the supervisors to perform periodic reviews of system access rights to ensure the access rights of individual employees remain consistent with their job responsibilities. In addition, the IT system administrator does not receive independent information from the Human Resources office when employees are hired, transferred, promoted, or terminated. As a result, the IT system administrator has less assurance that notifications are received for all relevant employment actions.

A periodic supervisory review of all user accounts should be required to help ensure the appropriate type and level of access are assigned to current employees. In addition, information regarding employment actions should be provided by the Human Resources office to the IT section to ensure access rights are appropriately assigned or terminated for employees, as necessary.

Recommendations

The Board of Regents:

11.1 Ensure university officials review and update the current disaster recovery plan to provide assurance that operations can be resumed at an off campus location, if necessary. The updated plan should be periodically tested and evaluated.

11.2 Ensure supervisors periodically review IT system user accounts to ensure access rights of employees remain appropriate. In addition, reports of employment actions should be obtained by the IT section from the Human Resources office and used to verify that notifications have been received for all relevant employment actions.

Auditee's Response

11.1 The University appreciates the audit team's opinions and the Director of Information Technology (IT) will test and evaluate the procedures and facilities it has in place for disaster recovery of computer systems/data to determine what if any changes might need to be made.

11.2 The University agrees with the recommendation and the Director of Information Technology ("IT") will implement a process to ensure supervisors review employee access to data systems. In addition, current safeguards, including triggered email notices related to Human Resources actions concerning employee status changes, will be continued.

Northwest Missouri State University
Organization and Statistical Information

Northwest Missouri State University (NWMSU), located in Maryville, Missouri, was founded in 1905 as the Northwest Normal School. The institution's name has changed several times over the years, to Northwest Missouri State Teachers College in 1919 and to Northwest Missouri State College in 1949, to reflect the offering of degree programs other than teaching. NWMSU received its current designation in 1972 to reflect the offering of graduate level programs.

NWMSU currently operates extended campuses at six locations in addition to the main campus located in Maryville. These extended campus locations include: a partnership campus with North Central Missouri Community College in Trenton, and extended campuses at Kirksville, Joplin, St. Joseph, Chillicothe, and Kansas City. In the fall of 2010, 2009, and 2008, the university's student enrollment, including graduate students, totaled 7,076, 6,903, and 6,613, respectively.

The university employed 954 full-time, part-time and student employees, including 223 professional staff, 248 support staff, 252 faculty and 231 student employees as of June 30, 2010.

The university is governed by a nine-member Board of Regents, appointed by the Governor of Missouri and confirmed by the Senate. The board consists of eight voting members. Six of the regents must reside within the university's statutory service region. The statutory service region includes 14 counties in northwestern Missouri, not including 5 counties around the city of St. Joseph. One of the six regents must live within Nodaway County and two of the regents must reside outside the region and be from different congressional districts. A student representative, with non-voting privileges, also serves on the board. The regents serve 6-year terms and the student representative serves a 2-year term. These individuals serve without compensation; however, they receive reimbursement for any expenses incurred in performing their duties.

The Board of Regents, as of June 30, 2010, consisted of the following members:

Name	Position	Term Ends
Lydia Hurst	President	January 2013
Douglas Wyckoff	Vice President	January 2013
Joseph B. Bosse	Regent	January 2016
Rachelle Brown (1)	Regent	January 2011
Dr. Mark H. Hargens	Regent	January 2015
Gary Panethiere (2)	Regent	January 2011
Doug Sutton	Regent	January 2013
James W. (Bill) Loch	Regent	January 2012
Vacant (3)	Student Regent	

(1) Francis (Gene) Dorrel was appointed in June 2011 for a term ending in January 2017 to replace Rachelle Brown. Rachelle Brown continued to serve on the Board of Regents until her replacement was appointed.

(2) Although Gary Panethiere's term ended in January 2011, he continues to serve on the Board of Regents. A replacement has been nominated by the Governor but has not been confirmed as of July 2011.

(3) Joseph Barbosa was appointed as the Student Regent and was confirmed by the Missouri Senate in December 2010. His term expires December 31, 2011.

The Board of Regents appoints a President to serve as the university's Chief Executive Officer. During the audit period, Dr. Dean Hubbard served as President until July 1, 2009, when he stepped down into a transition role. Effective that date, Dr. John Jasinski was appointed to be the university's new President. In July 2009, the new President formed the Northwest Leadership Team (NLT) to provide oversight and leadership at NWMSU. The individuals who served in these top administrative positions and their compensation for the year ended June 30, 2010, were as follows:

Name	Position	Compensation
Dr. John Jasinski (1)	President	$ 230,000
Dr. Douglas Dunham (2)	Provost	53,166
Stacy Carrick (3)	Vice President of Finance	52,804
Orrie T. Covert (4)	Vice President of University Advancement	126,270
Dr. Jackie R. Elliot (5)	Vice President of Student Affairs	111,180
Dr. Jon Todd Rickman	Vice President of Information Systems	125,402
Mary E. Throener	Vice President of Human Resources and Organizational Effectiveness	92,700
Dr. Robert Boerigter (6)	Director of Athletics	106,080
Dr. Paul McGraw (7)	Director of Environmental Services	n/a

(1) In addition to his base salary of $230,000, Dr. Jasinski's contract provides for monthly payments of $900 for a motor vehicle. In addition to the monetary compensation received, the President is provided with a university-owned residence. Costs of the residence are paid by the university including furnishings, utilities, maintenance, and property insurance. The President is also provided a country club membership paid by the university.

(2) Douglas Dunham was appointed as Provost by the university in March 2010. The annual compensation for the position as stated in the employment contract is $159,500.

(3) Stacy Carrick was appointed as Vice President of Finance by the university in February 2010. The annual compensation for the position as stated in the employment contract is $133,400.

(4) In addition to the base salary of $126,270, Orrie Covert received a stipend of $18,000 for additional duties performed during a search for a new Vice President of Marketing and an annual car allowance of $7,000 provided by the Northwest Foundation. A country club membership is also provided by the foundation. Orrie Covert resigned in June 2011 and a replacement has not been appointed.

(5) Dr. Jackie Elliott resigned from the Vice President of Student Affairs in June 2011 and a replacement has not been appointed.

(6) Dr. Robert Boerigter resigned from the Director of Athletics position in September 2010. Wren Baker was appointed as Director of Athletics in February 2011. The annual compensation for the position as stated in the employment contract is $105,000. Mark Clements, Assistant Director of Athletics - Internal Affairs, served as Interim Athletic Director until February 2011 and received a monthly stipend of $3,300 in addition to his regular salary for performing the interim duties.

(7) Dr. Paul McGraw (an employee of the university's facilities management contractor) served on the NLT until February 2011.

In addition, Nate Blackford was appointed Director of Strategic Research in September 2010 at an annual compensation amount of $94,343. The Director of Strategic Research serves on the NLT.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

According to university personnel, the university was awarded the following American Recovery and Reinvestment Act of 2009 funding:

State of Missouri appropriations totaling $4,049,576 were awarded to the university from Federal Budget Stabilization - Education Funds. The university received and spent the monies during the year ended June 30, 2010, to retain 76 current employees and create 8 new positions.

A $55,979 Recovery Act: Federal Work-Study grant was awarded to the university by the U.S. Department of Education to provide need-based financial aid to students through compensation for hours worked at on-campus or off-campus jobs. The university received and spent the monies during the year ended June 30, 2010, to create 6 new work-study positions.

Financial information and an organization chart follow.

3. Cost Allocations and Administrative Transfers....5
6. Accounting Controls....5
8. Minutes, Meetings, and Public Records....7
10. Emergency Plan....8

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of the City Council
City of University City, Missouri

We have conducted follow-up work pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program on certain audit report findings contained in Report No. 2011-14, *City of University City*, issued in April 2011. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the city about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has begun to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the city, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. We reviewed documents and other evidence indicating the level of implementation for each recommendation reviewed.

As part of the AFTER work conducted, we reviewed a report and supporting documentation provided by city officials concerning their work on each recommendation in the audit report. Documents included copies of the request for proposals for trash services, financial reports concerning overdue balances, updated administrative policies and procedures, accounting and financial records, meeting minutes and notices, and public record request logs.

While this report only includes those findings deemed in need of immediate management attention, the city provided documentation indicating steps had been taken toward implementing all of the recommendations from the audit in which it had stated corrective action would be taken.

This report is a summary of the results of this follow-up work, which was substantially completed during August 2011.

Thomas A. Schweich
State Auditor

City of University City
Follow-Up Report on Prior Audit Findings
Status of Findings

1. Trash Service Billing and Collection

As of June 2010, the city trash collection service had approximately $1.6 million in delinquent citizen accounts. As established by city ordinance, the city had numerous remedial measures available to collect on delinquent trash bills. As of July 2010, the city had utilized several options, including discontinued service, use of payment plans, and audits of accounts with discontinued service. In March 2008, the city also instituted a one-time partial forgiveness program, and in April 2008, began offering a low-income program which waives interest and penalties for those who meet the requirements.

Recommendation

The City Council should continue these efforts to ensure all users are paying for services provided.

Status

In Progress

City officials stated the new financial system provides for more detailed reports to facilitate tracking of past-due accounts and the city has begun to review individual accounts to ensure all financial details are included in the system (such as liens and payment agreements). While the balance of past-due accounts has not changed significantly since our audit report, city officials stated the city has taken steps to encourage timely payment, and created additional options for residents to pay their bills, such as automatic bank drafts. The city is developing an online payment option as well, according to city officials, and continues to offer its low-income program.

Additionally, the city issued a request for proposals (RFP) and will contract with a collection agency to further assist with outstanding accounts. Finally, the city has updated its trash billing statements and delinquency notices to be more informative to residents.

The city has been unable to determine from its previous financial system how much of the $400,000 reduction in delinquent accounts from 2007 to 2010 resulted from collections and how much was written off due to cleaning up the accounts and the various amnesty programs. However, the city was able to provide documentation showing payments on delinquent accounts increased in fiscal years 2008 and 2009, as compared to the prior 2 years, as follows:

	2006	2007	2008	2009
Delinquent Receipts	$ 519,794	427,478	813,586	738,025

In addition, the Finance Director stated she believed the $400,000 reduction was primarily due to collections.

3. Cost Allocations and Administrative Transfers

While some central service department costs (such as accounting, payroll, and the city garage) were allocated to various departments of the city based on full-time equivalent positions or other documented methods, other costs including salaries and benefits were allocated based only on estimates. Allocations without appropriate supporting documentation totaled over $900,000 for the year ended June 30, 2010.

Timesheets did not indicate hours worked by activity for each employee, nor had the city conducted a time study to serve as a basis for allocation of salary and fringe benefits to the appropriate funds. Other expenses were also allocated to functions based on estimates without documentation of how the allocation was determined.

Recommendation

The City Council ensure all expenditures are properly allocated to the various funds and all transfers between funds are adequately documented.

Status

Implemented

The city now has written procedures in place for determining various allocations and has integrated these updated allocations into the fiscal year 2012 budget.

According to city officials, the city is conducting time studies by tracking several months of timesheets to determine the amount of time an employee works in a specific area. At the conclusion of these studies, city officials indicated the fiscal year budget will be adjusted, as needed.

For other programs, the city has developed procedures to determine the amount of monies to be allocated between various funds.

6. Accounting Controls

Concerns were noted with various accounting issues including transmittals, receipt slips, segregation of duties, and bank reconciliations.

6.1 Collector's Office

- Transmittals were dropped off at the Collector's Office by various departments, but were not counted and entered into the accounting system until a later time. Transmittal forms were sent back to the respective department without a receipt slip. Therefore, the departments could not perform a reconcliation between the transmittals submitted to the Collector's Office and the receipt slips generated from the Collector's Office accounting system.

- The Collector's Office did not properly account for the numerical sequence of receipt slips.

6.2 Segregation of Duties

- Cash custody and accounting duties were not adequately segregated in the Community Development Department.

6.3 Numerical Sequence of Receipt Slips

- The Parks, Recreation, and Forestry and the Community Development Departments did not account for the numerical sequence of receipt slips. Personnel indicated all receipt numbers were included in the system-generated daily reports reviewed by management, but our review of the daily reports noted they did not include all transactions. Therefore, reports viewed by management were not always accurate and could not be relied upon to ensure all transactions were reviewed.

6.4 Bank reconciliations

- Bank reconcilaitions were not performed on a timely basis for the General Fund bank account.

Recommendations

The City Council:

6.1 Require the Collector's Office to immediately issue receipt slips for all monies transmitted from other city departments, and ensure these receipt slips are reconciled to amounts transmitted by the city departments. In addition, the City Council should ensure the numerical sequence of receipt numbers are accounted for properly.

6.2 Segregate the accounting duties of the Community Development Department to the extent possible. If proper segregation of duties cannot be achieved, timely supervision or independent review of the work performed and investigation into unusual items and variances are necessary.

6.3 Ensure the numerical sequence of receipt numbers are accounted for properly.

6.4 Ensure bank reconciliations are prepared monthly and retained for all accounts.

Status

6.1 Implemented

The city has created new procedures for the Collector's Office to count transmittals and issue receipt slips to the respective departments immediately. In addition, the city has established procedures to ensure all

receipt numbers are accounted for properly and, according to city officials, the Senior Accountant is reviewing this process for compliance.

6.2 Implemented

New policies and procedures have been created to segregate duties. According to city officials, the Deputy Director reviews and signs off on all transmittals before they are submitted to the Collector's Office to ensure accuracy.

6.3 In Progress

According to city officials, the city has recently changed to a new computer system in the Community Development Department and has established a procedure for reviewing all receipt slips monthly.

City officials stated the city is working with a new software company to develop a system by which it can review individual transaction numbers for the Parks, Recreation, and Forestry Department.

6.4 Implemented

According to city officials, the city has recently hired a Senior Accountant, who has begun monthly reconciliations of bank statements. Additionally, the city Finance Officer reviews the work of the Senior Accountant.

8. Minutes, Meetings, and Public Records

Concerns were noted with procedures regarding closed City Council meetings, the failure to maintain a log of public record requests, and the retention of auxiliary minutes.

8.1 From July 2009 through October 2010, the city did not document the reasons or the votes regarding meeting closure for six closed meetings of the City Council. The Council went directly into closed meetings without first starting in open session and holding a vote to close the meeting, as required by law.

8.2 Although city personnel indicated public requests were handled in a timely manner, the city did not maintain a log of public requests to ensure all requests were handled in compliance with the Sunshine Law.

8.3 The minutes and records of meetings of city affiliated boards, committees, and commissions were not always maintained by the City Clerk, the official custodian of records.

Recommendations

The City Council:

8.1 Ensure votes to close a session are documented in open meeting minutes, along with the reason for the closing of the session.

8.2 Maintain a public request log to help ensure the city is complying with state law.

8.3 Ensure copies of meeting minutes of city affiliated boards, committees, and commissions are maintained by the City Clerk.

Status

8.1 Implemented

According to the city, only one closed session has been held since the audit. The city provided documentation showing the notice was properly posted, and the City Council entered closed session after properly voting to do so. The minutes of the meeting reflect both the votes and the reason for entering closed session.

8.2 Implemented

The City Clerk now maintains a log of public requests.

8.3 Implemented

According to the City Clerk, all minutes of meetings of affiliated boards, committees, and commissions are submitted to her office and copies of the minutes are posted to the city website.

10. Emergency Plan

The city did not have an approved formal emergency contingency plan for its computer systems. The city had been in the process of developing a plan for several years but a plan had not been finalized as of December 2010.

Recommendation

The City Council develop a formal contingency plan for the various computer systems.

Status

In Progress

According to city officials, the city is now contracting with an information technology company to perform periodic back-ups and provide off-site back-up storage.

The city has yet to produce a formal, documented emergency plan, but city officials indicated they plan to do so by the end of 2011.

Thomas A. Schweich

Missouri State Auditor

Douglas County

August 2011

Report No. 2011-45

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Douglas County

Financial Condition	As noted in our prior audit, the financial condition of the General Revenue and Special Road and Bridge Funds has declined, and, although revenues continue to decline, spending is expected to increase. The County Commission needs to reduce spending as much as possible, put controls in place to use county resources efficiently, and maximize revenues.
Real Estate Purchase	The county did not adequately plan the judicial center project. The county agreed to purchase land and buildings for $120,229 before securing a funding source. Both proposed county sales tax ballot measures failed. The county did not require an inspection of the properties for needed repairs or asbestos removal to be performed as part of the real estate contract. Additionally, the county did not estimate the costs to demolish and dispose of two vacant houses still on the property. Moreover, the county did not obtain an appraisal prior to purchasing the property to ensure it was paying a reasonable price.
Disbursements, Vehicle Procedures, and Personnel Policy	The county needs to improve controls and procedures related to bidding, fuel use, vehicle maintenance, and payroll disbursements. The county does not always solicit bids or retain sufficient bid documentation. As noted in our prior audit, fuel use is not reconciled to fuel purchases, and mileage and fuel use logs are not maintained to document the appropriate use of county vehicles and equipment. The Sheriff's office does not maintain maintenance records for its vehicles, and road and bridge employees are compensated for their lunch breaks, but other county employees are not.
Emergency Management	The county needs to improve its controls and procedures over emergency management receipts and disbursements. The county did not have written contracts with the former Emergency Management Director, former Assistant Director, or Emergency Medical Technician Instructor. The former Director and Assistant Director, who are husband and wife, received payments for a number of questionable expenses. The former Director was reimbursed for equipment without adequate supporting documentation, he and the former Assistant Director were reimbursed for mileage at inflated rates, and the former Assistant Director failed to account for all advanced monies, submitted duplicate and altered receipts for meal expense reimbursements, and claimed reimbursement for excessive miles. The EMT class records and receipting procedures are also insufficient.
Meeting Minutes	The County Commission held eight closed session meetings during the audit period but did not document the specific reasons for closing the meetings, as required by the Sunshine Laws.

Sheriff Controls and Procedures	Accounting duties are not adequately segregated, and a documented supervisory review is not conducted. The Sheriff's office does not reconcile the list of liabilities to the cash balances of its two bank accounts, and several errors were not detected. Receipting and depositing procedures need improvement.
Public Administrator Controls and Procedures	The Public Administrator purchases gift cards from ward funds, but the procedures for tracking and documenting such purchases need to be improved. Moreover, it appears she makes such purchases in an attempt to keep wards' cash balances below Medicaid eligibility levels, which is unlawful. The Public Administrator needs to improve her bank reconciliation procedures.
Prosecuting Attorney Controls and Procedures	As noted in our prior audit report, accounting duties are not adequately segregated and no supervisory review is conducted, and receipts are not deposited timely. The Prosecuting Attorney needs to establish adequate procedures for tracking, monitoring, and collecting court ordered restitution. Currently, restitution is manually recorded, and no system has been established to alert the clerk when payments are due or probation is about to end. Defendants are not required to sign restitution payment agreements, and restitution payments are not timely disbursed.
Support the Handicapped Board	The Support the Handicapped Board's contract with the local sheltered workshop does not require the sheltered workshop to obtain bids, and the Board processed some payments to the sheltered workshop without adequate supporting documentation.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Poor**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	Douglas County received a $17,379 Byrne Memorial Justice Assistance Grant during the audit period: $16,079 funded a law enforcement position for 6 months, and $1,300 paid for equipment.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Douglas County

We have audited certain operations of Douglas County in fulfillment of our duties under Section 29.230, RSMo. In addition, Davis, Lynn & Moots, P.C., Certified Public Accountants, was engaged to audit the financial statements of Douglas County for the 2 years ended December 31, 2009. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2010. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Douglas County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Pamela Allison Tillery, CPA
In-Charge Auditor:	Donald Troy Royer
Audit Staff:	Connie James
	Michelle Crawford, M. Acct.

Douglas County
Management Advisory Report
State Auditor's Findings

1. Financial Condition

The financial condition of the General Revenue and Special Road and Bridge Funds has declined as a result of decreasing revenues, increasing costs, and poor planning, and according to the 2011 budget projections, the cash balances of these funds are expected to decrease even more significantly by December 31, 2011. The following table reflects the ending cash balances for the 3 years ended December 31, 2010, as well as the anticipated ending cash balance for the year ended December 31, 2011:

Fund	Projected Ending Cash Balance, December 31, 2011**	Ending Cash Balance, December 31, 2010*	2009*	2008*
General Revenue	$ 8,708	179,507	215,462	244,841
Special Road and Bridge	51,911	177,177	110,302	253,169

* Information was obtained from the county's independent audit report.

** Information was obtained from the county's budget.

Declining receipts of these funds have made it difficult for the county to prepare a balanced budget. In addition, the County Commission has had to transfer approximately $42,000 annually from the General Revenue Fund to support the Assessment Fund. Disbursements are expected to increase during 2011 due to changes in elected official salaries, additional hiring of employees, a projected bridge project, and some equipment purchases. The Prosecuting Attorney's salary is increasing approximately $69,000 per year starting in 2011, as a result of county voters approving a full-time position. Also, based on legal advice, other elected officials' salaries were increased to 100 percent of statutory amounts. In addition, debt and funding issues and future project costs (see MAR finding number 2) have had and will likely continue to have a negative impact on the county's financial condition.

It is essential the County Commission address the county's financial condition both in the immediate- and long-term future. To improve the county's financial condition, the County Commission should reduce spending as much as possible, evaluate controls and management practices to ensure efficient use of county resources, and attempt to maximize all sources of revenue.

A similar condition was noted in our prior audit report.

Recommendation

The County Commission closely monitor the county's financial condition and take the necessary steps to improve the financial condition of the General Revenue and Special Road and Bridge Funds. The County

Commission should perform long-term planning and ensure receipts are maximized and disbursements are closely monitored.

Auditee's Response

The County Commission provided the following written response:

The County Commission is monitoring receipts and disbursements. The County Commission will continue to monitor the county's financial condition.

2. Judicial Center Project

The county entered into debt and disbursed county resources without adequate project planning and without a funding source in place for the possible construction of a judicial center.

In January 2009, the county purchased land and buildings costing $120,229 to use as a site for a future judicial center, and entered into a loan agreement for the purchase. During the 2 years ended December 31, 2010, the county spent an additional $8,650 to repair the roof and install a heating and cooling system in one building located on this property. The county also paid an engineering firm $5,787 for expenses and to prepare plans for a judicial center.

2.1 Planning

The county did not effectively plan this project.

- The county proposed two 1/2 cent sales taxes, a capital improvement sales tax under Section 67.700, RSMo, to be used for loan repayment and construction, and a general sales tax under Section 67.547, RSMo, to be used for operating costs of the judicial center after completion. However, both sales tax issues failed in the November 2010 general election, and the county is currently unable to fund any additional work on the project.

- The county entered into debt without securing a funding source to pay for the purchase of this property. The county made a down payment of $30,056 in January 2009 for the property, and entered into a loan agreement with its depositary bank for the remaining balance of $90,173 due in January 2010. In January 2010, the county made a $30,000 principal payment and entered into another loan agreement for $60,173 due in January 2011. In January 2011, the county made another $30,000 principal payment and entered into another loan agreement for $30,173 due in January 2012. The county plans to pay off this loan in January 2012. The interest rate charged on these loans was approximately 6 percent, and the county will incur interest costs totaling $10,132 related to these loan agreements for this purchase.

- The county did not require an inspection of the properties for needed repairs or asbestos removal to be performed as part of the real estate contract. The county planned to utilize a building located on the

property for an emergency management office; however, the county did not estimate the costs to repair the roof or install a new heating and cooling system prior to the purchase.

- The county planned to demolish two houses located on the property; however, it did not estimate the costs to demolish and dispose of the houses, and the two vacant houses have yet to be demolished.

Had the general sales tax issue referred to above passed, the county would have imposed a levy above the statutory maximum allowed by Section 67.547, RSMo. Attorney General's Opinion No. 61-89 states that a county cannot enact a sales tax that exceeds one half of one percent under Section 67.547, RSMo. When proposing sales tax issues to voters, the county needs to review the various sales taxes being proposed to ensure they are valid and also ensure the purpose as described by the ballot is consistent with the authorizing statute.

Proper long-term planning prior to beginning a project is necessary to ensure the successful completion of the project. A cost analysis of the project considering all costs involved including the purchase of property, construction, and subsequent maintenance and operations is necessary to determine the amount of funding necessary. Ensuring adequate funding will be available for costs related to the project and including subsequent maintenance and operations is necessary to determine whether the project is feasible.

2.2 Independent appraisal

The county did not obtain an appraisal prior to purchasing the property to ensure $120,229 was a reasonable price. While the County Commission believes the amount paid was reasonable, a written appraisal from an independent appraisal company should have been obtained prior to the purchase and used to provide the basis for negotiations.

Recommendations

The County Commission:

2.1 Develop plans for the property purchased and ensure associated costs are considered. In addition, for future proposed sales tax issues, the County Commission should review the overall sales taxes being levied, consult with legal counsel, and ensure they are in accordance with state statutes.

2.2 Ensure independent appraisals are obtained for all future real estate purchases.

Auditee's Response

The County Commission provided the following written responses:

2.1 The county is currently utilizing two buildings on the property for county use. The County Commission will look into utilizing the

property as financing becomes available. In the future, the County Commission will consider all aspects of property purchase before purchasing. The County Commission will consult with legal counsel for any future proposed sales tax issues.

2.2 The County Commission will obtain an independent appraisal for any future real estate purchases.

3. Disbursements, Vehicle Procedures, and Personnel Policy

Controls and procedures over bidding, fuel use, vehicle maintenance, and payroll disbursements need improvement.

3.1 Bidding

The county did not always solicit bids or retain sufficient bid documentation. For example, the county did not solicit bids for road and bridge department equipment repairs totaling $107,859, and drug court tracking services totaling $20,090 during the 2 years ending December 31, 2010.

The county did not retain sufficient bid documentation to show compliance with state law for the purchase of four patrol cars for the Sheriff's office totaling $77,400 and inmate meals totaling $32,649 during the 2 years ending December 31, 2010.

Section 50.660, RSMo, provides guidance on bidding requirements and procedures. Routine use of a competitive procurement process for major purchases ensures the county has made every effort to receive the best and lowest price and all interested parties are given an equal opportunity to participate in county business. Documentation of the various proposals received, and the county's selection process and criteria should be retained to demonstrate compliance with applicable laws or regulations and support decisions made.

3.2 Fuel use

Improvement is needed in the controls and procedures over county fuel. Accounting records indicated fuel purchases totaling approximately $160,000, $44,000, and $2,400 were made by the road and bridge department, Sheriff's office, and Assessor's office, respectively, during the 2 years ended December 31, 2010.

- The county does not have adequate records and monitoring procedures over road and bridge department fuel use. Fuel logs are not maintained for department equipment and vehicles. In addition, bulk fuel records are not maintained by Road District Number 2 to show fuel delivered and dispensed into vehicles and equipment. Of the four bulk fuel tanks

located at road and bridge buildings in Road District Number 2, only two are metered. Also, while bulk fuel records are maintained by Road District Number 1 to show fuel dispensed into vehicles and equipment, these fuel records are not used to reconcile fuel use to fuel purchases.

- While mileage and fuel logs are maintained for Sheriff's office vehicles, the logs are not used to reconcile fuel use to fuel purchases. In addition, the logs are not always accurate and complete, and the amount of fuel purchased was not always recorded on the logs.

- Mileage and fuel logs are not maintained for the Assessor's office vehicle, and as a result, fuel use is not reconciled to fuel purchases.

Procedures for reviewing fuel use and reconciling use to fuel purchased and on hand are necessary to ensure the reasonableness and propriety of fuel use and disbursements. In addition, mileage and fuel use logs are necessary to document the appropriate use of equipment and vehicles and to support fuel charges. Failure to account for fuel purchases could result in loss, theft, and misuse going undetected.

A similar condition was noted in our prior audit report.

3.3 Sheriff's office vehicle maintenance

The Sheriff's office does not maintain maintenance records for its vehicles. Maintenance items, such as oil, filters, antifreeze, etc., are purchased through the county by Sheriff's office employees, and the employees perform the maintenance procedures for their assigned vehicles. The county spent approximately $11,300 for maintenance supplies for the Sheriff's office during the 2 years ended December 31, 2010.

Vehicle maintenance records should be maintained to ensure regularly scheduled preventive maintenance is performed to reduce the cost of repairs. In addition, the maintenance records should be reconciled to maintenance purchases to prevent the loss, theft, or misuse of maintenance supplies.

3.4 Personnel policy

The county personnel policy does not address whether employees are compensated for their lunch break, and as a result, some employees are paid for their lunch break and others are not. Those employees (road and bridge department employees) who are paid for their lunch break are compensated up to an additional 93 hours per year. The county has paid road and bridge department employees for at least 1,700 hours or $17,000 annually for their half hour lunch breaks; thus paying for time not worked, increasing the county's financial burden, and resulting in inconsistency among county employees. Detailed written policies are necessary to provide guidance to county employees, provide a basis for proper compensation, ensure equitable treatment among employees, and avoid misunderstandings.

Recommendations

The County Commission:

3.1 Perform a competitive procurement process for all major purchases and maintain documentation of decisions made.

3.2 And Sheriff and Assessor require fuel use logs be maintained, and these logs be reviewed for accuracy and reconciled to fuel purchases. Any significant discrepancies should be investigated.

3.3 Require maintenance records be maintained, and these records be reconciled to maintenance purchases.

3.4 Review and revise the personnel policy to adequately address lunch breaks, avoid unnecessary costs, and ensure equitable treatment among all county employees.

Auditee's Response

The County Commission provided the following written responses:

3.1 The County Commission will get bids on major purchases and will document the decisions made.

3.2 The County Commission is currently maintaining a fuel log for the road and bridge department. They will reconcile fuel usage to fuel purchased. The County Commission will request that the Sheriff and Assessor maintain accurate logs and reconcile fuel use.

3.3 The County Commission will request that the Sheriff maintain a maintenance log on the vehicles and reconcile to the maintenance purchases.

3.4 The County Commission is looking into updating the personnel policy. Road district number 2 works ten hours each day with a half hour for lunch, and district number 1 has implemented the same work schedule.

The Assessor provided the following written response:

3.2 I have been operating under the same procedures as the previous Assessor. From now on, we will maintain a log to the best of our ability.

The Sheriff provided the following written response:

3.2&3 I currently have a fuel log system in place; however, I am looking into implementing a different vehicle log system to include other maintenance items.

4. Emergency Management

Controls and procedures over emergency management (EM) receipts and disbursements need improvement. The Emergency Management Fund receipts and disbursements totaled approximately $96,000 and $93,000, respectively, during the 2 years ended December 31, 2010.

The county operates an EM program to develop disaster preparedness plans and offer Emergency Medical Technician (EMT) classes to assist individuals in becoming certified EMTs. The former Presiding Commissioner appointed the EM Director and Assistant Director in January 2007, and rescinded those appointments in December 2010. The former EM Director and former Assistant Director are husband and wife. The former EM Director, former Assistant Director, and EMT Instructor were paid $4,174, $13,761, and $3,500, respectively, during the 2 years ended December 31, 2010.

4.1 Contracts and expense reimbursements

As a result of no formal written contracts and a lack of controls and procedures for monitoring the disbursements made by the former EM Director and former EM Assistant Director, multiple questionable disbursements were made. These payments included EMT class services and expense reimbursements including mileage, equipment, supplies, training, lodging, and meals. The County Commission expected the former EM Director and former EM Assistant Director to follow the county's travel and reimbursement policies. The following concerns were noted regarding these payments:

- The county did not enter into formal written contracts with the former EM Director, former EM Assistant Director, and EMT Instructor, who all served as contract workers. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. Written contracts, signed by the parties involved, should specify the services to be rendered, the manner and amount of compensation to be paid, and the documentation required for payments of salary and expenses. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing.

- Billing statements or other records documenting services performed for the EMT classes, or how the amounts paid were determined, were not prepared and submitted to the county by these contract workers. The former EM Director, former EM Assistant Director, and EMT Instructor were paid $2500, $1900, and $3500, respectively, for providing EMT classes. In addition, the county did not issue Internal Revenue Service Forms 1099 to these individuals. Sections 6041 to 6051 of the Internal Revenue Code require non-wage payments of at least $600 in one year to an individual be reported to the federal government on Form 1099.

- Adequate supporting documentation was not obtained or retained for some reimbursement requests. For example, the only documentation provided for four reimbursement requests for equipment totaling $880 were invoices prepared by the former Director from his personal Quicken software, instead of the actual paid receipts or vendor provided invoices. The equipment purchases were for radios, a power supply, and a canopy. All reimbursement requests should be supported by paid receipts or vendor invoices to ensure the obligations were actually incurred and the disbursements represent appropriate uses of public funds.

- The former Assistant Director was advanced $910 in October 2010 for EMT student testing fees from the EM Fund held by the County Treasurer. The former Assistant Director indicated she deposited these testing fees into her personal account and held them until 4 months later when she paid the testing fees in February 2011 (after her appointment as Assistant Director had been rescinded). No documentation was available at the county to support this advance; however, the Assistant Director provided documentation of payment of these testing fees upon our request. This payment should have been disbursed through the county's normal disbursement process and paid directly to the entity by the County Treasurer. In addition, cash advances not supported by documentation could be improper disbursements of public monies; therefore, all cash advances should have documentation to support the nature and reasonableness of the costs.

- The former EM Director and former Assistant Director were reimbursed for mileage; however, the rate paid per mile did not agree with the county mileage rate of 45 cents per mile. The former EM Director and former Assistant Director were reimbursed at 47.5, 50, and 52 cents per mile totaling $6,240 during the 2 years ended December 31, 2010. As a result, the county paid approximately $410 more for mileage reimbursements than provided by county policy.

- The number of miles claimed by the former Assistant Director to various locations was excessive, and as a result, the former Assistant Director was overpaid at least $344. For example, the former Assistant Director claimed reimbursement of 394 miles to travel to Jefferson City for training. Jefferson City is 144 miles away (one way) or 288 miles round trip from Ava. Mileage reimbursement claims should include only those miles actually incurred for county business and as allowed by county policy.

- The mileage reimbursement forms submitted by the former Director and former Assistant Director were also not always complete. The purpose of travel and odometer readings were not always documented. The

county's travel and travel reimbursement policy requires records of mileage driven (by odometer) be submitted. Thorough review procedures are necessary to ensure mileage reimbursements are reasonable and accurate, and represent valid disbursements.

- Duplicate and altered invoices for meal expense reimbursements were paid by the county. The county reimbursed the former Assistant Director for at least eight meals totaling $126 that were supported by duplicate and altered invoices. These invoices were physically altered to delete dates, times of service, and the server. Several other meal invoices totaling $101 were not adequate and appeared to be prepared by the former Assistant Director. In addition, one of the duplicated and altered invoices submitted for reimbursement (noted above) included meals for the former Assistant Director's sister, who had no involvement with the EM program according to the County Clerk.

  The county's meal reimbursement policy requires original receipts or invoices be submitted with reimbursement requests. Allowing altered receipts or invoices to be processed and not questioned indicates weaknesses in the review process and control procedures.

- During the 2 years ended December 31, 2010, the county provided the former Assistant Director 12 cash advances totaling $2,984, not including the $910 advance noted above. The Assistant Director did not always provide documentation to the county of how the full amount of the advance was spent, and she did not return unused advance monies to the county. Requiring documentation to support expenses from advances is necessary to ensure the county pays only reasonable and necessary costs.

4.2 EMT Classes

Improvement is needed over EMT class records and receipting procedures. The EM office held three EMT classes and, according to the County Treasurer's general ledger reports, collected approximately $22,200 for classes during the 2 years ended December 31, 2010. The following concerns were noted related to these classes:

- Accounting records such as receipt slips, attendance reports, grant applications and awards, and invoices were not retained for two of the three EMT classes. Additionally, accounting records were not complete for the third EMT class. As a result, the county has little assurance monies collected and disbursed for the EMT classes were accounted for properly. Accounting records should be retained to ensure the validity of transactions and provide an audit trail to account for all monies received.

- Receipt slips were not always issued for class and testing fees received from students; receipt slips were not always issued in numerical order or accounted for properly; the method of payment was not always recorded on the receipt slips; and the composition of receipts was not reconciled to the composition of transmittals to the County Treasurer. Failure to implement adequate receipting and depositing procedures increases the risk that loss or misuse of monies received will go undetected.

Recommendations

The County Commission:

4.1 Enter into written agreements for EM services, which detail the duties to be performed, compensation to be paid, and the documentation required for payments of services and expenses. The County Commission should ensure non-wage payments are reported on 1099 forms, and amended 1099 forms should be filed for payments made in 2010 and 2009. The County Commission should ensure control procedures are in place to review reimbursement requests for accuracy and detect questionable or altered invoices and discontinue the practice of unsupported cash advances.

4.2 Retain all accounting records, require receipt slips be issued in numerical sequence for all monies received and the numerical sequence of receipt slips be accounted for properly, and reconcile the composition of receipts to amounts transmitted to the County Treasurer.

Auditee's Response

The County Commission provided the following written responses:

4.1 There is now a written agreement that establishes the duties of the EM Director. The agreement is signed by the Presiding Commissioner and the EM Director. The 1099s will be amended for 2009 and 2010. The County Commission has implemented a policy that requires original invoices and receipts before any payment is issued. There will be no cash advances given.

4.2 The County Commission is in the process of forming a contract for the EMT classes. This will require accounting of all the monies collected for the classes and reconciliation of monies collected to what is transmitted to the County Treasurer.

5. Meeting Minutes

Open meeting minutes did not document the specific reasons for closing a meeting. The County Commission held eight closed session meetings during the 2 years ended December 31, 2010. The Sunshine Law, Chapter 610, RSMo, requires public governmental bodies to vote in open session to close a meeting and to announce publicly the reasons for going into closed session.

Recommendation

The County Commission ensure the specific reasons for closing a meeting are documented.

Auditee's Response

The County Commission provided the following written response:

The County Commission will ensure they document the reason for closed meetings.

6. Sheriff Controls and Procedures

Weaknesses exist in accounting controls and procedures in the Sheriff's office. The Sheriff's office collected approximately $145,000 and $483,000 during the years ended December 31, 2010 and 2009, respectively.

6.1 Segregation of duties

The duties of receiving, recording, depositing, and disbursing monies and reconciling the Sheriff's bank accounts are not adequately segregated. A lieutenant performs all of these duties, and a documented supervisory review of the accounting records is not performed.

Proper segregation of duties is necessary to ensure all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, the Sheriff should implement a documented independent or supervisory review to ensure the bank records are in agreement with the accounting records.

6.2 Bank reconciliations and liabilities

Significant weaknesses were identified with the Sheriff's reconciliation procedures. The Sheriff's office maintains two current bank accounts (general and civil fee). The former Sheriff maintained three bank accounts (general, civil fee, and donation). The current Sheriff took office in January 2009. During our review of bank reconciliations and lists of liabilities, we noted the following concerns:

- While bank reconciliations and lists of liabilities are prepared monthly for the Sheriff's two current bank accounts (general and civil fee), liabilities are not reconciled with cash balances. We compared the list of liabilities to cash balances as of December 31, 2010, for the general account, and the list of liabilities totaled $307,728, while the cash balance was only $306,808, resulting in liabilities exceeding the available cash balance by $920. We also compared the list of liabilities to cash balances as of December 31, 2010, for the civil fee account, and the list of liabilities totaled $1,220, while the cash balance was only $724, resulting in liabilities exceeding the available cash balance by $496.

  At our request, the Sheriff investigated these discrepancies and determined he overpaid the County Treasurer $920 in June and July 2010, from his general account. The Sheriff also indicated several accounting errors were made in the handling of his civil fee account

such as paying civil fees totaling $302 from his civil fee account when the civil fees were deposited into the prior Sheriff's civil fee account. The Sheriff has not corrected these errors. Without regular comparison of liabilities to the reconciled cash balance, there is less likelihood errors will be identified and the ability to resolve errors is diminished.

- Due to inadequate monitoring of liabilities and lack of bank reconciliations on three old bank accounts of the former Sheriff, disbursements were incorrectly made from the old and new bank accounts and the errors were not determined in a timely manner. The balance of the former Sheriff's general, civil fee, and donation accounts as of December 31, 2010, were $3, $617, and $61, respectively.

  The Sheriff should continue to attempt to identify the monies held in these accounts and properly dispose of all unidentified monies and close the accounts.

6.3 Receipting and depositing procedures

Receipting and depositing procedures need improvement. During cash counts conducted in January 2011, we noted the following concerns:

- The method of payment is not always recorded on the bond receipt slips, and the composition of receipts is not reconciled to the composition of deposits.

- Receipt slips are not always issued in numerical order or accounted for properly.

- Receipts are not deposited timely and intact. For example, two $30 checks receipted on January 13, 2011, were held and not deposited until January 31, 2011. Other receipts collected on January 13, 2011, were deposited on January 18, 2011. Several other instances were noted where receipts were not deposited intact and timely.

- Checks and money orders are not restrictively endorsed until a deposit is prepared.

Failure to implement adequate receipting and depositing procedures increases the risk that loss or misuse of monies received will go undetected.

A similar condition was noted in our prior audit report.

Recommendations

The Sheriff:

6.1 Adequately segregate accounting duties to the extent possible or ensure supervisory reviews of accounting records are performed and documented.

6.2 Reconcile bank balances to liabilities monthly, ensure any differences between accounting records and reconciliations are investigated and resolved, and close old inactive bank accounts.

6.3 Require the method of payment be recorded on all receipt slips and reconcile the composition of receipts to deposits. Receipt slips should be issued in numerical sequence, and the numerical sequence of receipt slips accounted for properly. The Sheriff should also ensure all monies are deposited intact and in a timely manner, and checks and money orders are restrictively endorsed upon receipt.

Auditee's Response

The Sheriff provided the following written responses:

6.1 These were areas of concern to me when I first took office in 2009 and requested an audit and assistance from your office in January 2009 and was advised to document, document, document, and an audit would be performed in 2011. Once it was explained, regarding segregation of duties and more than one person involved in the accounting process, it made sense. I was attempting to hold one person responsible for the accounting procedures to minimize the opportunity for theft. However, after your process was explained to me, I see a side of the accounting that I was unaware of, and steps have been taken to rectify this.

6.2 Once again, this was an area that I requested assistance and recommendations in when I took office in 2009, and was advised that an audit would be performed in 2011. I had papers and documents that were to be carried over from the previous administration "old" accounts. I inquired to your office about how to deal with these forms and virtually received no assistance. I was told to document, document, document, which is what I did; however, upon your audit we found where refunds had been paid out of the "old" account. Upon inspecting the discrepancies you have noted, I would like to point out that all money is accounted for; however, it was either paid out or paid into the wrong account (within the county funds). Discrepancies in the Sheriff's general account have been rectified. I will continue to identify who the money belongs to in the previous Sheriff's accounts and close the accounts. We are still in the process of identifying who the monies belong to and if this cannot be determined it will be turned over to the County Treasurer as you recommended.

6.3 Once again, I could only follow what was done by the prior bookkeeper, as no assistance or recommendations were provided by your office in 2009. All areas of discrepancies have been corrected. We are still in the process of identifying who the monies belong to

and if this cannot be determined it will be turned over to the County Treasurer as you recommended.

The overall audit was very beneficial and a learning experience for everyone involved. The Sheriff's office is a small office with limited staff. Supervisory staff is required to do many of the accounting procedures as well as taking care of law enforcement situations.

7. Public Administrator Controls and Procedures

Controls and procedures for monitoring receipts and disbursements of wards need improvement. The Public Administrator is the court-appointed personal representative for wards or decedent estates of the Associate Circuit Court, Probate Division, and is responsible for the financial activity of 42 individuals. We reviewed three cases with estate balances totaling approximately $129,800, which represents approximately 47 percent of the total cash balances from all cases at December 31, 2010. We also reviewed one additional case that was closed in 2009.

7.1 Gift cards

Improvement is needed in the Public Administrator's handling of gift cards purchased from ward funds. The Public Administrator indicated some gift cards were purchased to spend down wards' cash balances so assets remained below Medicaid eligibility funds. Intentionally spending down ward assets on unnecessary items to maintain a specific level of Medicaid eligibility is not allowed. At least 23 gift cards totaling $2,625 were purchased from ward funds by the Public Administrator during the 2 years ended December 31, 2010. Of the gift cards purchased, 14 gift cards were not used timely for the ward. For example, three gift cards totaling $350 were purchased in December 2009 and February 2010, and were still on hand in May 2011. We also noted the following concerns:

- The Public Administrator does not adequately or properly account for gift cards purchased. At our request, the Public Administrator provided a list of all gift cards purchased in 2009 and 2010; however, the list was not accurate. The list did not include all gift cards, included gift card purchases that were actually cash disbursements (not gift cards), and some of the dates gift cards were purchased and spent or distributed were incorrect. Additionally, gift cards, which are on hand at the time an annual settlement is filed, are not included on the annual settlements as an asset of the ward.

  The Public Administrator indicated a $200 gift card purchased in December 2009, had been mailed to a nursing facility; however, at our request the Public Administrator contacted the nursing facility and the local vendor where the gift card was purchased in May 2011, and determined the gift card was lost and the balance of the card had been unspent. The local vendor reissued the lost gift card and it is currently held by the Public Administrator.

- A receipt slip was not obtained or retained for 10 of 19 gift cards distributed to wards or to wards' facilities, and as a result, there is no assurance the wards received their gift cards. According to the Public Administrator, it is her policy to have the ward or the ward's facility sign a receipt indicating the gift card was received.

To adequately safeguard gift cards, reduce the risk of loss, theft, or misuse of gift cards, and ensure wards receive gift cards purchased with their funds, records should be established to adequately account for and track gift card purchases, and a receipt indicating the gift card was received should be obtained and retained. Additionally, given that many of the wards did not receive gift cards in a timely manner and some gift cards were lost and not accounted for properly, the Public Administrator should reconsider the necessity of purchasing gift cards for her wards.

Section 208.210.1, RSMo, requires recipients to notify county welfare offices if they possess property which affects their right to receive benefits. Further, Section 208.210.2, RSMo, provides that if it is found that a recipient or spouse possessed income in excess of the amount reported that would affect his right to receive benefits, the amount of benefits may be recovered as a debt due the state.

7.2 Bank reconciliations

The Public Administrator's bank reconciliation procedures need improvement. The Public Administrator maintains bank accounts for most of her wards and maintains a fee account, where fees received from wards are deposited and disbursed to the county. During our review, we noted that an accurate running check register balance of the bank accounts for each estate and the Public Administrator's fee account was not maintained by the Public Administrator. As a result, the Public Administrator does not properly perform reconciliations on the ward's bank accounts or her fee account and bank account records and cash balances are not accurate and in agreement.

Maintaining running book balances in check registers and performing adequate bank reconciliations helps ensure accurate records are kept and there is less likelihood errors will be identified and the ability to both identify and resolve errors is diminished.

Similar conditions previously reported

A condition similar to point 7.2 was noted in our prior audit report.

Recommendations

The Public Administrator:

7.1 Reconsider the necessity of purchasing gift cards for wards. If gift cards are necessary, establish records to properly account for gift

cards, and obtain and retain receipts for distributed gift cards. In addition, the Public Administrator should discontinue the practice of unnecessarily spending down a ward's cash balance so assets remain below Medicaid eligibility funds, and contact the Missouri Department of Social Services, Family Support Division, to determine whether any monies are due to the state.

7.2 Maintain running book balances and reconcile bank balances monthly.

Auditee's Response

The Public Administrator provided the following written responses:

7.1 As Public Administrator, appointed to be guardian-conservator for my wards, I work with Division of Family Services on a daily basis. To meet eligibility for Medicaid they cannot have more than $999. The money they have does not come from said division and must be spent on the ward. The money they have in their personal account is not owed to the state and would not be refunded to the state until they were deceased. For example, if a ward had $1,299 in an account, I would need to purchase clothing, TV, etc. Sometimes they don't need clothing, so I might buy a $200 and a $100 gift card, which cannot be redeemed for cash, but could purchase clothing later or for Christmas as they need it. I believe I accounted for every gift card purchased in 2009-2010. I have a form for the ward or the administrator to sign. In the case of one ward which lives with his mother, she signs. I do have one ward who lives independently that cannot write, so I give him a card for $50. If the auditor would have asked, I would have given them the contact number for any or all wards who received gift cards. When the auditor requested a list of gift cards purchased, I understood that they only wanted 2010. I listed one as a gift card sent to the ward, but when I asked the facility for a receipt they showed it to be cash. I sent the copy of the receipt to the State Auditor's Office. There was a gift card I mailed to a ward at Christmas 2010 which was lost. I don't know if I would have detected the card lost or not but when the ward requested clothing I would have. The card was canceled and a new card was issued. The ward now has the new card. The gift cards are purchased solely for the wards. They love receiving them and doing their own shopping. The gift cards I still had in my office totaling $825 were in their personal check books. I produced every original ticket with the check stapled to it for the auditor. I will follow the recommendation of the auditor and will not purchase any gift cards in future.

7.2 I always balance my ward's check books monthly and do a reconciliation on the back of the statement. As for the running

balance, until I receive the statement from the bank to check all automatic deposits, it would not be accurate. My account for fees paid to the county, are paid at the end of the month. One month out of twenty four I had a small balance. I will follow the auditors recommendations.

8. Prosecuting Attorney Controls and Procedures

Weaknesses exist in accounting controls and procedures in the Prosecuting Attorney's office. The Prosecuting Attorney's office collected approximately $87,000 and $101,000 during the years ended December 31, 2010 and 2009, respectively.

8.1 Segregation of duties

The duties of receiving, recording, depositing, and disbursing monies, and reconciling the Prosecuting Attorney's bank account are not adequately segregated. One clerk performs all of these duties, and a documented supervisory review is not performed.

Proper segregation of duties is necessary to ensure all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, the Prosecuting Attorney should implement a documented independent or supervisory review to ensure the bank records are in agreement with the accounting records.

8.2 Depositing and posting procedures

Receipts are not deposited timely. Deposits are normally made every 2 weeks. In addition, amounts recorded on manual receipt slips are not reconciled to the Prosecuting Attorney's bad check accounting system and deposits. As a result, the Prosecuting Attorney's clerk did not record a receipt, received on January 5, 2011, and deposited on January 14, 2011, into the bad check accounting system until January 26, 2011, after we brought it to her attention. Failure to implement adequate depositing and posting procedures increases the risk that loss or misuse of monies received will go undetected.

8.3 Collection of court ordered restitution

The Prosecuting Attorney has not established adequate procedures to properly track, monitor and collect court ordered restitution due from defendants. Currently, restitution payments are manually recorded on a sheet which is attached to the individual's case file and filed in a cabinet; however, the Prosecuting Attorney does not have any type of system set up to alert office personnel when restitution payments are due or a defendant's probationary period is nearing completion. For example, on May 13, 2010, the court ordered restitution totaling $1,249 be paid by a defendant by March 13, 2011. The Prosecuting Attorney's clerk was not aware that $1,149 of the restitution was still due until we brought it to her attention on March 14, 2011. The Prosecuting Attorney's office subsequently collected the full amount of restitution on May 4, 2011. Adequate procedures for tracking and follow up of delinquent accounts is necessary to facilitate monitoring amounts due, provide information to the judge, and improve

accountability. Failure to implement procedures to adequately track and monitor restitution may result in lost revenue.

8.4 Payment agreements

Defendants are not required to sign a payment agreement for bad check restitution to document the amounts owed and establish a subsequent payment schedule. A payment agreement signed by the defendant could aid in collection of amounts owed.

8.5 Disbursement of restitution

Restitution is not always disbursed to victims in a timely manner. The Prosecuting Attorney's secretary indicated bad check restitution payments are held until the full amount owed is received before disbursing to the victim. She also indicated the Prosecuting Attorney's office holds court ordered restitution payments until a significant amount is received before disbursing to the victim. For example, court-ordered restitution payments received in 2008 and 2009 totaling $80 are still held by the Prosecuting Attorney and have not been disbursed to the victim. In addition, the defendant in this case still owes $220, but was released from probation in May 2009, and the Prosecuting Attorney's secretary indicated she has been unable to locate the defendant to collect additional amounts owed. Several other instances were noted where restitution payments were held for long periods of time before disbursement to the victims. Procedures should be established to ensure restitution is disbursed to the victims in a timely manner.

Similar conditions previously reported

Conditions similar to points 8.1 and 8.2 were noted in our prior audit report.

Recommendations

The Prosecuting Attorney:

8.1 Adequately segregate accounting duties to the extent possible or ensure supervisory reviews of accounting records are performed and documented.

8.2 Deposit receipts on a timely basis and reconcile manual receipt slips to amounts recorded on the bad check accounting system and deposits.

8.3 Develop procedures to adequately track and monitor unpaid restitution and take steps to maximize collections.

8.4 Establish payment plans and require signed agreements for cases with outstanding receivables.

8.5 Disburse restitution to victims in a timely manner.

Auditee's Response

The Prosecuting Attorney provided the following written responses:

8.1 I currently do review the bank statements and checkbook on a regular basis to ensure the propriety and also check amounts against open items. We have one person who does only child support on a grant and one who only does victim advocate grant.

8.2 Deposits are now being made in a timely manner. Receipt numbers are now being added to the deposit slips.

8.3 There is currently a procedure in place to track restitutions. That procedure is Outlook Express-Task Manager, which does set an alert 1-month prior to the probation expiring. In addition, once a year we will have a file review for every "open case" in the office.

8.4 We do not require the defendant to sign payment agreements for bad checks, as we oftentimes receive checks from different merchants on different dates for the same defendant. We can and will develop a restitution-tracking sheet for both the Prosecuting Attorney and defendant to sign.

8.5 We will continue to disburse restitution in a prompt manner. Occasionally, money is held temporarily until 1 victim can be paid or 1 whole check can be paid.

9. Support the Handicapped Board

The Support the Handicapped Board processed some payments to the local sheltered workshop without obtaining adequate supporting documentation as required by the contract. For example, a $6,000 payment made in November 2010, to the sheltered workshop was not supported by invoices as required by the contract. The payment was for a forklift and a loading ramp. Additionally, the contract with the workshop does not require bids be obtained and the sheltered workshop did not obtain bids for ceiling repairs totaling $5,100 disbursed in December 2010.

All disbursements should be supported by paid receipts or vendor invoices to ensure the obligations were actually incurred and the disbursements represent appropriate uses of public funds. To ensure the workshop receives the best and lowest price and all interested parties are given an equal opportunity to participate, the Board should include bid requirements in the contract.

A similar condition was noted in our prior audit report.

Recommendation

The Support the Handicapped Board ensure adequate supporting documentation is obtained and retained for all disbursements as required by the contract. In addition, the Board should revise the contract to require bids

be solicited on large purchases and documentation of bids be submitted when required.

Auditee's Response

The Support the Handicapped Board provided the following written response:

The Support the Handicapped Board agrees that all funds approved by the Board shall be paid only when the request for disbursement is supported by documentation to ensure the sheltered workshop receives the best and lowest price for all large purchases using public funds and that all interested parties are given an equal opportunity to participate, as required by Section 50.660, RSMo.

The Board further agrees to review the 2007 contract between the Board and the sheltered workshop to consider revision to require bids be solicited on large purchases using public funds as required in Section 50.660, RSMo, and documentation of bids be submitted with requests for disbursement.

The Board agrees that all disbursements shall be supported by paid receipts or vendor invoices, and this documentation should be retained as evidence the obligations were actually incurred, and the disbursements represent appropriate use of public funds.

Douglas County
Organization and Statistical Information

Douglas County is a county-organized, third-class county. The county seat is Ava.

Douglas County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 70 full-time employees and 13 part-time employees on December 31, 2010.

In addition, county operations include the Support the Handicapped Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2011	2010
James D. (Butch) Linder, Presiding Commissioner	$	24,572
Richard Mitchell, Associate Commissioner		25,080
Danny Dry, Associate Commissioner		25,080
Tina Boyd, Recorder of Deeds		38,000
Karry Davis, County Clerk		34,200
Christopher D. Wade, Prosecuting Attorney		40,500
Chris Degase, Sheriff		42,000
Kathy Potter, County Treasurer		34,200
Rick Miller, County Coroner (1)		3,667
Mark Pearson, County Coroner (1)		5,500
Linda Coonts, Public Administrator		38,000
Laura Stillings, County Collector year ended February 28 (29),	34,200	
Alicia Miller-Degase, County Assessor , year ended August 31, (2)		10,292
Danny Gray, County Assessor , year ended August 31, (2)		23,750
Ray Riggs, County Surveyor (3)		N/A

(1) Rick Miller was appointed in September 2010, to replace Mark Pearson who resigned in June 2010.

(2) Alicia Miller-Degase was appointed in May 2010, to replace Danny Gray who resigned in April 2010.

(3) Compensation on a fee basis.

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

According to county personnel, the county was awarded the following American Recovery and Reinvestment Act of 2009 funding during the 2 years ended December 31, 2010:

A $17,379 Byrne Memorial Justice Assistance Grant was awarded by the U.S. Department of Justice for payroll costs for a law enforcement position for 6 months and law enforcement and prosecution equipment. During the 2 years ended December 31, 2010, $17,379 was expended and received by the county related to this grant. The county spent $16,079 for payroll and $1,300 for equipment. After grant funds were utilized, the county continued to fund the law enforcement position.

Thomas A. Schweich

Missouri State Auditor

OFFICE OF ADMINISTRATION

Missouri Ethics Commission

August 2011

Report No. 2011-44

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Office of Administration, Missouri Ethics Commission

Access to Investigations, Audits, and Review Files	Because the State Auditor's Office is not authorized to review files of investigations, audits or reviews, we were unable to determine if the Missouri Ethics Commission (MEC) complied with state laws and internal procedures related to complaint investigations. Currently state law does not provide the State Auditor's Office with access to such files. The MEC should work with the General Assembly to provide the State Auditor's Office access to these files.
Compliance Monitoring	MEC has not fully employed its new oversight powers or fulfilled the new responsibilities given to it during the 2010 legislative session. The Executive Director of MEC explained that additional staffing would be required to do so. It should be noted that the Missouri Supreme Court is currently considering the constitutionality of the senate bill which introduced these new powers and responsibilities. The MEC should continue to monitor the legal status of the new statutory requirements and use a risk based approach to be more proactive in its investigative approach and maximize available staffing.
Transparency Improvements	The MEC has made significant improvements to the data available to the public through its website, but additional improvements, such as improving search capabilities or posting a list of late/non-filers, could provide useful information to users, increase accountability and transparency, and possibly deter wrongdoing.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The Office of Administration, Missouri Ethics Commission did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the Missouri Ethics Commission
and
Julie A. Allen, Executive Director
Missouri Ethics Commission
Jefferson City, Missouri

We have audited certain operations of the Office of Administration, Missouri Ethics Commission, in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the years ended June 30, 2010 and 2009. The objectives of our audit were to:

1. Evaluate the commission's internal controls over significant management and financial functions.

2. Evaluate the commission's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the commission, as well as certain external parties; and testing selected transactions. Section 105.955.17, RSMo, prohibits the State Auditor's Office from reviewing any file or document pertaining to any particular investigation, audit, or review by the Missouri Ethics Commission. As a result, we could not audit certain information because of the limitations this statute imposed on the scope of our audit.

We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

Except as discussed in the second paragraph, we conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the commission's management and was not subjected to the procedures applied in our audit of the commission.

For the areas audited, we identified (1) no significant deficiencies in internal controls, (2) no significant noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Office of Administration, Missouri Ethics Commission.

Thomas A. Schweich
State Auditor

Audit Manager:	Robert Showers, CPA
In-Charge Auditor:	Robert L. McArthur II
Audit Staff:	Robert Graham

Office of Administration - Missouri Ethics Commission
Management Advisory Report
State Auditor's Findings

1. Access to Investigations, Audits, and Review Files

State statutes prohibit the State Auditor from reviewing investigation files, audits, or reviews conducted by the Missouri Ethics Commission (MEC). As a result, the State Auditor's office was unable to determine if the MEC fully complied with state laws and internal policies and procedures pertaining to complaint investigations.

The MEC receives complaints regarding violations of state laws related to lobbying, personal financial disclosure, and campaign finance disclosure, as well as violations of code of conduct and instances of conflicts of interest by employees of the State or political subdivisions. State law provides the commission the authority to audit and/or investigate the allegations and determine, by a vote of at least four members of the commission, whether there are reasonable grounds to believe that a violation has occurred. During the 2 years ended June 30, 2010, the MEC received approximately 390 complaints and completed over 280 investigations.

Per Section 105.955.17, RSMo, the State Auditor may audit the MEC and inspect materials relating to its functions to determine whether appropriations were spent within the intent of the General Assembly. However, the audit "shall not extend to review of any file or document pertaining to any particular investigation, audit or review by the commission, an investigator or any staff or person employed by the commission or under the supervision of the commission or an investigator." As a result, our access to these investigations was limited to the final actions taken by the commission; and we could not fully determine if the commission complied with state law regarding the timeliness of pending complaint determinations and could not adequately review the performance of the investigations process.

Based on our review of state laws and regulations of the states surrounding Missouri and inquiries with representatives of other state ethics entities, none of those states have any provisions specifically prohibiting their respective auditor from gaining access to investigation complaints. All eight contiguous states have strict confidentiality requirements related to complaint investigations, and representatives in five of these states indicated their state law and/or constitution, in their opinion, would or could prohibit their respective auditor from looking at investigation files. However, three other states indicated their respective auditor would only temporarily be prohibited, if at all, from looking at ongoing investigation files during the course of an audit.

Limiting the State Auditor's office access to investigation records reduces the level of transparency and accountability of the MEC. Any confidentiality concerns related to the contents of these records would be addressed by Section 29.070, RSMo, which requires examiners appointed by the State Auditor to take an oath of confidentiality.

Recommendation

The MEC work with the General Assembly to provide the State Auditor the necessary access to complaint investigation files to ensure the MEC properly investigates complaints received.

Auditee's Response

The Missouri Ethics Commission provided the following written response:

As noted in this finding, state law establishes confidentiality requirements for the Commission and staff as well as what records the State Auditor may access. During the course of the audit the Commission provided the State Auditor's Office access to the following:

- *Listing of the case numbers; for those cases currently in progress, the case numbers were provided without identifying the individual(s)/entity(s) under investigation;*

For those cases that were requested by the auditor, the auditor received the following:

- *Timing of complaint notifications, established in Section 105.961, RSMo*
- *Timing of investigative notices, established in Section 105.959, RSMo*
- *Timing of Commission decisions, established in Section 105.961, RSMo*
- *The Commission's final decisions and orders*

The only items not accessible to the State Auditor's Office were the actual investigative files, containing investigative reports, documents, and interviews.

The Commission will continue following the confidentiality requirements established in Missouri law.

2. Compliance Monitoring

The passage of additional ethics law requirements in 2010 provided the MEC with additional oversight responsibilities and powers. However, according to MEC officials, the commission's ability to utilize the new oversight powers provided by the legislation is limited due to insufficient staff resources.

New legislation

During the 2010 legislative session Senate Bill (SB) 844 was passed enacting several new ethics law requirements for the MEC to oversee and providing additional oversight powers. New provisions include:

- Allows investigations to be initiated by the MEC, without receipt of a formal complaint, after receiving the approval of all six commissioners.

- Prohibits persons from filing for office until the existing candidate committee or any committee where the person served as a treasurer or deputy treasurer pays all previous fees assessed by the MEC. New

provisions prohibit persons from forming a new committee or serving as deputy treasurer of any committee unless all prior campaign finance disclosure reports from prior elections have been filed and previous fees assessed by the MEC have been paid. In addition, prohibitions were added against candidates who have been previously disqualified as a candidate for office in the 1) primary election from being selected by a party nominating committee for the same office in the same primary election or in the corresponding general election, and 2) general election from being selected by a party nominating committee for the same office in the same general election. Finally, a successful candidate is prohibited from taking office until the existing candidate committee or any committee where the person served as a treasurer or deputy treasurer pays related fees assessed by the MEC. All of these new rules must be monitored for compliance.

- Authorizes the MEC to assess late filing fees for campaign finance disclosure reports, including statements of limited activity. In addition, the MEC is now required to send notice of failure to file or timely file campaign finance reports within 7 business days of the failure to file and to send notice to any candidate and the treasurer of the campaign finance committee.

- Requires certain officials or candidates to report contributions greater than $500 received during regular legislative session within 48 hours, subject to the assessment of late fees.

- Prohibits political action committees, previously referred to as continuing committees, from receiving funds from various sources.

The MEC has adopted procedures to fulfill some of the new responsibilities under SB 844. However, according to MEC officials, limited staff resources have not allowed the MEC to fully implement certain requirements of the new law. Based on discussions with the Executive Director, the ability to initiate investigations would require additional staffing.

The ability to take a risk-based approach in initiating investigations can help identify areas of noncompliance in a timely manner. The early identification of noncompliance can help reduce errors and reduce future noncompliance.

Constitutionality of SB 844

The constitutionality of SB 844 is currently in question. The legislation was deemed unconstitutional by the Cole County Circuit Court. The circuit court's ruling has been appealed to the Missouri Supreme Court. As a result, the circuit court's ruling has been stayed until the Missouri Supreme Court decides on the matter.

Limited resources

MEC officials told us the agency's ability to effectively perform its duties was already limited, even before the passage of SB 844, due to the limited resources available.

MEC reporting specialists are currently assigned to perform all review procedures, in addition to other duties such as handling phone calls. This includes review of approximately 1,100 monthly lobbyist reports, 9,000 annual personal financial disclosure reports, and 18,000 campaign finance disclosure reports in election years (about 8,000 reports are received in other years).

During the 2 years ended June 30, 2010, the MEC performed 313 reviews of campaign finance reports, 52 of which resulted in investigations. Pursuant to Section 105.955.14(4), RSMo, it is the duty and responsibility of the MEC to perform reviews and crosschecks of certain filed reports. If potential problems were identified in the reviews or crosschecks, further review was performed by obtaining supporting documentation such as bank documentation. These reviews and crosschecks may not be completed for 6 to 8 months after an election and mistakes and/or non-compliance may not be caught in a timely manner. Over this timeframe, the same mistakes may occur several times without being identified.

While the agency's fiscal year 2012 budget request included a request for seven additional staff positions, five of which related to the implementation of SB 844, only two additional staff positions were approved. Performing expanded reviews on a larger number of reports in a more timely manner would provide more assurance as to the accuracy and completeness of the reporting process and possibly act as a deterrent and prevent inaccurate or fraudulent reporting.

Lobbyist registration fees

According to the National Conference of State Legislatures, Missouri's current lobbyist registration fee of $10 per year is one of the five lowest registration fees in the nation (of states with lobbyist registration fees). The national average registration fee is approximately $100 per year.

Recommendation

The MEC monitor the legal status of, and ensure compliance with, new statutory requirements and use a risk-based approach in the review and investigation processes in an effort to be more proactive and maximize available staffing.

Auditee's Response

The Missouri Ethics Commission provided the following written response:

The Commission will continue working with the Legislature in obtaining required resources, as noted in this audit finding. The Commission will also continue consistently enforcing the law and effectively using resources, including working to conduct risk-based analysis.

3. Transparency Improvements

While the MEC has made significant improvements in the information available to the public, opportunities exist to make additional information available to the public.

The MEC has recently made improvements to the data available electronically via its website, including:

- Search capabilities to indentify candidates and respective candidate committees for specific elections.
- Committee expenditures by candidate reports that show expenditures in support of or opposition to a specific candidate.
- Reports of contributions over $500 made to a General Assembly member or statewide elected official during the regular legislative session.
- Reports of campaign committees that identify ballot measures supported or opposed for a specific election.
- Reports of campaign finance committee contributions over $5,000.
- Search capabilities for final actions of the commission.

We accessed the websites of surrounding states to determine if those states provided additional useful data and/or database search capabilities to website users. Our efforts disclosed the following examples of information the MEC should consider incorporating in its website:

- The MEC website does not currently provide a list of late/non-filers of various reporting forms. The Kansas website provides links to campaigns and lobbyists that failed to file or filed reports containing errors and/or omissions. The Iowa website provides links to listings of committees, individuals, or organizations that failed to file a required report. In addition, the Oklahoma website provides links to candidate, non-candidate, and state lobbyist reports that were not submitted on time for the previous year.
- Search capabilities on the MEC website do not currently allow the user to search lobbyist expenses paid on behalf of his/her principal. A survey of other state websites found seven of the eight states had lobbyist expenditures by principal available. We identified five contiguous states that had the ability to search expenditures by principal.

Incorporating further improvements into the MEC website would provide additional useful information to users of the site and provide more

accountability and transparency in ethics law reporting. In addition, disclosing lists of late/non-filers may also possibly serve as a deterrent and prevent late and/or non-filing.

Recommendation

The MEC consider implementing further website improvements to provide additional useful data and search capabilities to its users.

Auditee's Response

The Missouri Ethics Commission provided the following written response:

The Commission appreciates the State Auditor's report making note of the significant improvements made in information available to the public and other stakeholders. Shortly after the State Auditor's Office completed field work, the Commission released the search capability allowing the user to search lobbyist expenses paid on behalf of his/her principal. The Commission will continue identifying and providing improvements.

Office of Administration
Missouri Ethics Commission
Organization and Statistical Information

The Missouri Ethics Commission (MEC) was created by the Missouri Ethics Law of 1991 (Section 105.955, RSMo). The MEC is charged with enforcement of conflicts of interest and lobbying laws (Sections 105.450-498, RSMo) and campaign finance disclosure laws (Chapter 130, RSMo). The MEC is assigned to the Office of Administration for budgeting purposes only.

The MEC receives and reviews complaints alleging violations of the conflict of interest and lobbying statutes and the campaign finance disclosure statute. After investigation of these complaints, the MEC either dismisses the case when reasonable grounds are not found that a violation occurred, refers the case to the MEC's general counsel in preparation of a hearing (i.e. when reasonable grounds are found that a violation occurred), or refers the case to a prosecuting attorney for violations of criminal law.

The MEC reviews and investigates reports required by the campaign finance disclosure law, the financial interest disclosure laws, and the lobbying registration and reporting laws. The MEC acts as the public repository for such reports. The MEC provides information and assistance to lobbyists, elected and appointed officials, employees of the state and political subdivisions, and the general public.

The MEC is composed of six members, not more than three of whom may be the same political party. These members must be from different congressional districts, and no more than three can be from an odd- or even-numbered congressional district. The governor appoints the members of the MEC with the advice and consent of the Senate. The commission elects a biennial chair. Members of the Missouri Ethics Commission as of June 30, 2010, were:

Commissioners

Name and Title	Term Expires
Jim Wright, Chair	March 15, 2012
James R. Tweedy, Vice Chair	March 15, 2012
Jeffrey B. Davison	March 15, 2012
Dennis Rose	March 15, 2014
Louis J. Leonatti	March 15, 2014
Vernon Dawdy	March 15, 2014

Julie Allen has served as the Executive Director since being appointed by the commission in October 2008. The MEC employs 20 full-time personnel.

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The MEC did not receive any federal stimulus monies for the 2 years ended June 30, 2010.

THOMAS A. SCHWEICH
Missouri State Auditor

August 19, 2011

Honorable Jeremiah W. (Jay) Nixon
Governor
State Capitol
Jefferson City, Missouri

Dear Governor Nixon:

As you know, the extraordinary events and damage associated with the Joplin tornado, other storms, and the flooding on the both the Missouri and Mississippi rivers have created a significant financial obligation on our state. While I firmly agree with your position that communities and citizens affected by these disasters should receive state and federal assistance needed for a comprehensive and rapid recovery, I also want to ensure necessary resources are provided in a transparent and lawful manner.

This letter, in fulfillment of our duties under Chapter 29, RSMo, communicates the results of our comprehensive review of your actions to withhold state fiscal year (FY) 2012 appropriated expenditures. The objectives of our review were to determine whether:

1. The amount withheld from FY 2012 appropriated expenditures was accurately calculated and adequately supported.

2 The methods used to make the withholdings were in compliance with applicable legal provisions.

3. The budgetary process, as it relates to withholdings, is in need of improvement.

Our review has determined that my office cannot audit the accuracy of amounts withheld because your office prepared no calculation. Additionally, the reason provided for the withholdings does not appear to meet constitutional provisions. We are aware of no constitutional or statutory authority to withhold from appropriated expenditures based on state obligations that were unanticipated at the time the budget was passed by the General Assembly. To the contrary, the relevant constitutional provision allowing withholdings deals only with shortfalls of revenue, not increased costs. In addition, budgetary and related withholding processes need to be re-evaluated and/or state law revised.

Applicable Legal Provisions

Article IV, Section 24, Missouri Constitution, requires the Governor to submit to the General Assembly, within 30 days of it convening, a budget that contains the estimated available revenues and a complete and itemized plan of proposed expenditures of the state, with any recommendations of laws necessary to provide sufficient revenues to meet expenditures.

P.O. Box 869 • Jefferson City, MO 65102 • (573) 751-4213 • FAX (573) 751-7984

Article IV, Section 27, Missouri Constitution, grants the Governor the power to reduce the expenditures below appropriated amounts (withhold) when actual revenues are less than the revenue estimates upon which the appropriations were based. Article IV, Section 27(a), Missouri Constitution, also establishes the Budget Reserve Fund (commonly referred to the Rainy Day Fund). The Governor may request the General Assembly to appropriate emergency funds from this fund with certain restrictions, if there is a budget need due to a disaster. In addition, Article IV, Section 28, and Article III, Section 36, Missouri Constitution, allow monies in the state treasury to be spent only if appropriated.

Recent Disasters

Prior to the beginning of FY 2012, citizens and communities in the state suffered significant disasters. In April and May, flooding occurred in the southeastern section of the state along the Mississippi River, on May 22 a massive tornado destroyed a significant portion of Joplin, and beginning in June flooding occurred in the northwestern section of the state along the Missouri River. On June 10, 2011, you directed the Office of Administration (OA) to withhold over $172 million, approximately $57 million from the state General Fund (to be used for disaster recovery) and $115 million from FY 2012 appropriated expenditures of other funds. On July 1, 2011, based on your instructions, the OA committed an additional $100 million for disaster aid to be paid for with the better-than-expected revenues carried forward from FY 2011. You subsequently ordered the release of over $1.2 million of withholdings.

Withholding Procedures and Methodology

According to the state Budget Director, assumptions/predictions from the following categories are considered when determining withholdings: 1) actual and estimated revenues, 2) state spending obligations, 3) approved legislation which involves revenues/costs not considered in the current budget, and 4) legislation which involves revenues/costs considered in the budget but not approved. Obligations are items, with and without appropriations, which involve the state's share of expenses/costs, and may involve items difficult to estimate/predict such as natural disaster expenditures. Obligation/spending issues may be handled in several ways, including using an estimated (E) appropriation, supplemental budgets, withholdings, or a combination of these items. An example of an item approved by the General Assembly but not considered in FY 2012 appropriations is the legislation which approved the gradual repeal of the franchise tax. An example of an item not approved by the General Assembly, but included in the FY 2012 available revenue amount, is the tax amnesty program estimated to generate approximately $34 million.

According to the Budget Director, the OA does not prepare a formal documented withholding calculation, and does not use a formula to establish withholding amounts. Instead the Governor's office and the Budget Director negotiate withholding amounts and the amount is ultimately based on what the Governor believes is necessary. Each month the OA tracks and evaluates the actual revenues and predictions for future revenues to determine if revenue estimates are on target for the year. The OA also evaluates gaming and lottery revenues monthly because these monies affect the appropriations for education. Withholdings may also be necessary due to the amount of actual expenditures from E appropriations and supplemental budgets, according to the Budget Director. The Governor and General Assembly use E appropriations in the budgetary process. A $1 E appropriation is typically used for expenditures that cannot be readily estimated such as disasters or costs of the National Guard when ordered by the Governor to respond to emergency situations. Disaster recovery costs often are partially funded by federal monies; however, the federal participation rate is often unknown until weeks after the disaster occurred.

Since the early 1990s, the state has used a consensus revenue estimate (CRE) to estimate General Fund revenues. The CRE is an amount agreed upon by the Governor and the General Assembly, based on

recommendations prepared by the state Budget Director and the Directors of the House Appropriations and Senate Appropriations Committee Staff. The CRE comprises a significant portion of the resources available from the General Fund for appropriations by the General Assembly. A meeting is held in December each year to agree upon a CRE for the next fiscal year's budget and to revise the CRE for the current fiscal year.

State Auditor Methodology

The methodology to accomplish our objectives included:

1. Interviewing key personnel from the Governor's office, the OA, House Appropriations, and the Senate (including Appropriations Committee staff) regarding the budgetary and withholding process;

2. Reviewing and evaluating certain applicable legal provisions;

3. Reviewing Governor withholdings and related release of withholdings for FY 2012 and FY 2011; and

4. Reviewing the FY 2012 state budget, including the General Revenue summary of the estimated resources and obligations, and the FY 2011 consolidated revenue report which provides the actual revenues by type for the current and prior fiscal years.

Results and Conclusions

Because the OA did not document a calculation of the necessary withholding amount, it was not possible for us to determine whether the amount withheld from fiscal year 2012 appropriated expenditures was accurately calculated.

The method used to make FY 2012 withholdings does not appear to comply with constitutional provisions. When the Governor ordered the withholdings in June 2012, FY 2012 had not begun, and therefore, actual revenues could not have been lower than anticipated FY 2012 revenues. In addition, there is no provision in the Missouri Constitution, that allows the Governor to withhold amounts from appropriated expenditures based on obligations that were unanticipated at the time the budget was passed by the General Assembly. Your actions are troubling because the legislative branch of government was not provided appropriate checks and balances, and could result in the Governor basically rewriting the budget without recourse by the General Assembly. To address withholding issues and the constitutional separation of powers question, on July 22, 2011, several members of the General Assembly requested a legal opinion from the Office of Attorney General. The Attorney General has not yet issued an opinion related to this request.

One option available under state law would be to use the Rainy Day Fund to fund disaster related costs. This would require you to request an emergency appropriation to be approved by two-thirds of the members of the General Assembly. Utilizing the Rainy Day Fund would require both the Governor and General Assembly to make budgetary decisions and provide greater accountability and transparency for decisions related to funding unanticipated obligations needed for disaster recovery efforts.

State law provides little guidance regarding the proper manner and method to determine withholding amounts, whether withholdings must be released should actual revenues subsequently exceed revenue estimates, or how to determine if actual revenue shortfalls occur. During FY 2011, actual revenues were less than the CRE by about $97 million yet withholdings totaled over $301 million, of

which only $17.5 million were ultimately released. Also, withholdings and subsequent release of withholdings may be based on the revised CRE; however, case law provides that a revenue estimate prepared after passage of the budget has no legal significance. Also, determining when actual revenue shortfalls occur is problematic. While actual revenues for a current year cannot be determined until June 30, the current practice of comparing year-to-date revenues to prior years actual amounts and the CRE appears reasonable.

Several mechanisms currently used in the budgetary process are not authorized by state law. Neither, the CRE nor the E appropriations are authorized by state law. The use of the CRE appears to be a reasonable method to estimate revenues for budget purposes. However, the utilization of E appropriations is subject to misuse as the executive branch has no spending limit as long as cash is available in the State Treasury.

Recommendations

As noted above, my office does not question the need for the swift actions taken by you, as Governor, to address the unprecedented disasters faced by the citizens of the state and the state's responsibility for certain costs. However, the method you used to make FY 2012 withholdings does not appear to comply with constitutional provisions, and amounts withheld were not supported by adequate documentation. In addition, I believe you need to work with the legislature to propose legislation to clarify and/or address the following issues:

1. Whether the Governor can withhold due to spending based on obligations resulting from a disaster or emergency, and were unanticipated at the time the budget was passed by the General Assembly.

2. The establishment of well defined and measurable criteria to determine 1) when to initiate withholdings, 2) required documentation to support withholding amounts, and 3) whether and/or when withholding amounts are to be released.

3. Amending state law to provide for the use of the CRE and E appropriations in the budget process.

4 Consideration of a cap for estimated appropriations.

Sincerely,

Thomas A. Schweich
State Auditor

CC: Members of the General Assembly

Thomas A. Schweich

Missouri State Auditor

Grundy County

August 2011

Report No. 2011-42

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Grundy County

Prosecuting Attorney Procedures	Accounting duties are not adequately segregated. One legal assistant performs all duties of receiving, recording, and transmitting monies for bad checks and another legal assistant performs all duties for restitution without supervisory review. Bad check restitution and fees are not transmitted timely. Many money orders on hand during the February 8, 2011, cash count were not restrictively endorsed or did not indicate a payee. A monthly list of liabilities is not prepared and reconciled to the cash balance for the restitution account, and restitution monies are not distributed timely, which deprives victims of the use of their monies. Our two prior audit reports noted conditions similar to those discussed above. Also, the Prosecuting Attorney's office does not timely reconcile bank accounts or properly document outstanding checks. Write-off adjustments are made without supervisory review and are not adequately tracked and documented.
Sheriff Procedures	Accounting duties are not adequately segregated, and sufficient supervisory reviews are not conducted to safeguard assets. A monthly list of liabilities is not prepared and reconciled to the cash balance for the inmate account. When we asked for a list of liabilities for the inmate account, we discovered the liabilities list was $2,463 less than the inmate account balance as of March 8, 2011. This amount is thought to be profits made from selling telephone cards to the inmates, but a complete and accurate list of liabilities should be maintained, and any telephone card profits should be turned over to the County Treasurer in accordance with state law. The segregation of duties issue and turning over monies to the county treasury were noted in our two prior reports.
Ambulance Procedures	Official pre-numbered receipts slips are not issued for all monies received, monies received are not entered into the accounting system in a timely manner, and receipts are not transmitted to the County Treasurer in a timely manner, increasing the risk of loss, theft or misuse. As noted in our prior audit, no written policies on billing, collection and write-off of accounts receivables exist, and invoices are not prepared in a timely manner. As of December 31, 2010, the Ambulance Fund was owed $371,700, and of this amount $279,100 of which was delinquent by more than 29 days.
Fuel Card Procedures	The County Commission does not require the Ambulance and Sheriff departments to provide supporting receipts before it pays the monthly fuel card statements. The County Commission should require adequate documentation and a thorough review and approval before using public funds to pay the fuel card statements.
Capital Assets	The County needs to improve its county property procedures and records. The County should develop procedures to identify capital asset purchases and dispositions, ensure property records contain all necessary information, and require an annual inventory. Our two prior audits noted a similar condition.
Computer Controls	Unique user identifications are not required to log on to the County Clerk's

office computers, employees share passwords, and passwords do not have to be changed periodically, making unauthorized access and/or changes to the system more likely. Backup data is not kept in a secure off-site location, which impairs the County's ability to recover data in the event of a computer failure.

Additional Comments

Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Senate Bill 40 Board received $21,486 under Title V, Section 5001 of the Recovery Act for Medicaid expenditures reported between October 1, 2008 and December 31, 2010.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 14

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Grundy County

We have audited certain operations of Grundy County in fulfillment of our duties under Section 29.230, RSMo. In addition, Kevin Hudson, Certified Public Accountant, has been engaged to audit the financial statements of Grundy County for the 2 years ended December 31, 2010. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2010. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Grundy County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Randall Gordon, M.Acct., CPA, CGAP
In-Charge Auditor:	Denise Huddleston, MBA
Audit Staff:	Wayne Kauffman, MBA
	Kenneth Erfurth

1. Prosecuting Attorney Procedures

Procedures related to supervisory review, transmittal of bad check restitution and fees, liabilities, bank reconciliations, outstanding checks, and write-off of receivables are in need of improvement. Prosecuting Attorney receipts totaled approximately $124,200 in 2010 and $128,000 in 2009 for court ordered restitution, bad check restitution, and fees.

1.1 Supervisory review

Accounting duties are not adequately segregated. One legal assistant performs all duties of receiving, recording, and transmitting monies for bad check monies and another legal assistant performs all duties for restitution monies. Because the legal assistants are primarily responsible for all accounting functions, routine and thorough supervisory reviews are essential. The Prosecuting Attorney does not review the monthly report of fees turned over to the County Treasurer or the bad check case files. The Prosecuting Attorney also does not perform detailed reviews of other records, such as comparing transmittal amounts to receipt reports generated from the computer system, or reviews of bank reconciliations.

Thorough supervisory reviews help ensure all transactions are accounted for properly and assets are adequately safeguarded. Such reviews would reduce the possibility of errors, loss, or misuse of funds going undetected. Internal controls would be strengthened by the Prosecuting Attorney reviewing the receipting, recording, and disbursing functions. Documentation is necessary to demonstrate performance of the reviews.

1.2 Transmittals

Bad check restitution and fees are not transmitted in a timely manner. Fees are held for periods longer than a month before being transmitted to the Treasurer. In addition, although only money orders are accepted for payments, the money orders are not restrictively endorsed. Also, the payee is not always indicated on the money order. A cash count performed on February 8, 2011, indicated 29 money orders were for county fees and therefore should be restrictively endorsed and 7 money orders did not indicate a payee.

To adequately account for collections and reduce the risk of loss, theft, or misuse of funds, transmittals should be made on a timely basis. In addition, money orders should be restrictively endorsed immediately upon receipt, and the payee should be indicated on all money orders.

1.3 Liabilities

A monthly list of liabilities is not prepared and reconciled to the cash balance for the restitution account, and restitution monies collected are not distributed on a timely basis. As a result, the account has unidentified monies that have not been properly distributed and victims are deprived of the use of their monies. At our request, the Prosecuting Attorney's office prepared a liabilities list and the account had approximately $606 in unidentified funds at February 15, 2011. We also noted approximately $879 in monies included on the list were not in the Prosecuting Attorney's computer system due to a system crash in 2008, and these transactions had

not been re-entered into the system. The Prosecuting Attorney's office does not disburse monies to a victim until there is at least $10 due to the individual and will also wait until there is $5,000 to $10,000 in the restitution account before disbursing monies to victims. This has led to delays of up to 2 months in disbursing monies to victims.

A complete and accurate list of liabilities should be prepared monthly for the restitution account and reconciled to the book balance to ensure records are in balance and sufficient funds are available for payment of all liabilities. Further, the Prosecuting Attorney should attempt to identify the excess in the account. To expedite the distribution of restitution to victims and to reduce the amount of liabilities, the Prosecuting Attorney's office should consider distributing restitution payments to the victims on a monthly basis. If proper disposition of the unidentified monies cannot be determined, these monies should be disposed of in accordance with state law.

1.4 Bank reconciliations and outstanding checks

Bank reconciliations are not performed timely. Reconciliations for the months of July, August, September, and October, 2010, were not performed until November 10, 2010. In addition, a list of outstanding checks is not retained. While the total outstanding check amount is on the bank reconciliation, the total amount is not supported by a detailed list of outstanding checks. Also, five outstanding checks totaling $434 are not included in the computer system due to a system crash. These checks are old outstanding checks which were written between January 5, 2005, and December 16, 2008.

Complete and timely bank reconciliations are necessary to ensure bank activity and accounting records are in agreement, and to detect and correct errors timely. A detailed list of outstanding checks should be documented to support the amount indicated on the bank reconciliation, and to allow for procedures to routinely follow up on outstanding checks to prevent the accumulation of old outstanding checks and ensure monies are appropriately disbursed to the payee or as otherwise provided by state law.

1.5 Uncollectible write-offs

Write-offs of receivables are not verified and approved by a person independent of the postings of such transactions to ensure they are legitimate. Write-offs are adjustments that may be necessary when a person has been released from probation and a court order states the remaining restitution does not have to be paid or when an individual cannot be located to collect payment for a bad check. Currently, the two legal assistants in the Prosecuting Attorney's office can make adjustments without an independent secondary approval or review. In addition, the Prosecuting Attorney's office was unable to provide a report of all adjustments during the audit period.

Proper authorization and adequate documentation, which fully explains the reason for the adjustments to customer accounts, are necessary to ensure

only the proper accounts and amounts are adjusted and to reduce the risk of loss, theft, or misuse of funds.

Similar conditions previously reported

Similar conditions to sections 1.1, 1.2, and 1.3 were noted in our two prior audit reports.

Recommendations

The Prosecuting Attorney:

1.1 Perform and document supervisory reviews of the receipting, recording, and disbursing functions.

1.2 Transmit bad check restitution and fees in a timely manner, restrictively endorse money orders upon receipt, and ensure the payee is indicated on all money orders.

1.3 Require a complete and accurate list of liabilities for the Restitution Account be prepared and reconciled to the book balance monthly, and ensure restitution payments to victims are distributed on a timely basis. In addition, an attempt should be made to investigate unidentified monies, and any monies remaining unidentified should be disbursed in accordance with state law.

1.4 Ensure bank reconciliations are performed timely and include a list of all outstanding checks. In addition, the Prosecuting Attorney should establish routine procedures to investigate outstanding checks.

1.5 Ensure a list of all adjustments is maintained, and an independent review and approval of all adjustments is performed and documented.

Auditee's Response

The Prosecuting Attorney provided the following responses:

1.1 We will start reviewing the bank reconciliations, the checks written, records pertaining to bad checks restitution received that are transmitted to the vendor, and transmittals made to the County Treasurer.

1.2 We will start transmitting bad check fees and bad checks and restitution monies to the vendors at least monthly. We have ordered endorsement stamps to endorse money orders when received. We are asking the remitter to fill in the payee name if not indicated or are filling in the payee name if the money order is received in the mail.

1.3 We agree. We will work on implementing these recommendations.

1.4 We are generating an outstanding checks list monthly and all checks are included. We are working on reviewing old outstanding checks and will handle accordingly.

1.5 We will print out a report for the file indicating why an adjustment is being made and the Prosecuting Attorney will review this report.

2. Sheriff Procedures

Procedures related to supervisory review, liabilities, and telephone profits are in need of improvement. Receipts totaled approximately $104,000 in both 2010 and 2009 for permits, fees, and bonds. Receipts totaled approximately $24,000 in both 2010 and 2009 for commissary items related to the inmate account.

2.1 Supervisory review

Accounting duties are not adequately segregated. One bookkeeper is responsible for receipting, recording, and depositing monies received; preparing and signing checks; and preparing month-end reports and reconciliations for the fee account. The other bookkeeper is responsible for all of these accounting duties for the inmate account. The Sheriff's review of the bank statement is documented by signing his initials on the bank statement. However, his review is limited to the bank statements and does not include other supporting documentation.

Thorough supervisory reviews help ensure all transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be strengthened by the Sheriff expanding his supervisory reviews to include the receipting and recording functions, and improving his review of the disbursement function. Documentation is necessary to demonstrate performance of the reviews.

2.2 Liabilities

A monthly list of liabilities is not prepared and reconciled to the cash balance for the inmate account. The liabilities are the account balances of each inmate and the profits from the sale of telephone cards. At our request, the Sheriff's department prepared a liabilities list. The liabilities list was $2,463 less than the inmate account balance at March 8, 2011. The Sheriff indicated this difference is profits from the sale of telephone cards to the inmates. A complete and accurate list of liabilities should be prepared monthly and reconciled to the book balance to ensure records are in balance and sufficient funds are available for payment of all liabilities.

2.3 Telephone profits

The Sheriff maintains telephone card profits from the inmate account outside the county treasury. Approximately $4,700 in telephone card profits were received from November 2008 through 2010. Profits were initially turned over to the County Treasurer; however, beginning in December 2009 they were kept by the Sheriff in the inmate account. From December 2009

through December 2010, approximately $1,700 in disbursements for items such as coffee pots and television mounts for inmate use were made from telephone card profits without approval of the County Commission.

Maintaining these funds outside the county treasury circumvents the appropriation process and the checks and balances system in place for other county funds. In addition, there is no statutory authority for the Sheriff to maintain such accounts outside the county treasury. Monies collected by the Sheriff's department should be distributed to the appropriate parties monthly and operating disbursements should be authorized by the Sheriff and made through the County Commission's normal disbursement process. Attorney General's Opinion No. 45, 1992 to Henderson, states ". . . sheriffs are not authorized to maintain a bank account for law enforcement purposes separate from the county treasury."

Similar conditions previously reported

Similar conditions to sections 2.1 and 2.3 were noted in our two prior audit reports.

Recommendations

The Sheriff:

2.1 Expand supervisory reviews to include periodic documented reviews of the receipting and recording functions, and improve the review of the disbursement function.

2.2 Require a complete and accurate list of liabilities for the Inmate Account be prepared and reconciled to the book balance monthly.

2.3 Turn over all telephone profits from the commissary to the county treasury.

Auditee's Response

The Sheriff provided the following responses:

2.1 We will attempt to review in more detail by reviewing the receipting and the disbursement records. We will work on determining some ideas to provide some supervision on the records.

2.2 We will start preparing a monthly list of liabilities and reconcile this listing to the book balance monthly.

2.3 We will turn profits over to the county treasury more frequently. However, we do want to keep some monies in the account in order to pay the commissary and the telephone card vendors.

3. Ambulance Procedures

Procedures related to the receipting of monies and billings are in need of improvement. In addition, there is no written policy for the billing, collection, and write-off of accounts receivable. Ambulance Fund receipts totaled approximately $953,000 in 2010, and $947,000 in 2009. Of these receipts, approximately $494,000 was received each year for ambulance services.

3.1 Receipts

Official prenumbered receipt slips are not issued for all monies received. Receipt slips are only issued when cash is received. Also, monies received are not entered into the ambulance accounting system in a timely manner. The Billing Director enters receipts in batches rather than when monies are received. In one instance, we noted receipts entered on December 14, 2010, were for a week of monies received and included 70 receipts. In addition, receipts are not transmitted to the County Treasurer in a timely manner. Transmittals are made to the County Treasurer on a weekly basis unless receipts are more than $5,000.

To adequately account for collections and reduce the risk of loss, theft, or misuse of funds, official prenumbered receipt slips should be issued for all monies immediately upon receipt. In addition, receipts should be entered in the accounting system and transmitted to the County Treasurer in a timely manner.

3.2 Billings/accounts receivables

Billings are not prepared in a timely manner. One accounting clerk prepares the invoices, and invoices are prepared as time allows. We noted two instances where it took more than 35 days to prepare an invoice after the date of the service. In addition, there are no written policies on the billing, collection, and write-off of accounts receivables. As of December 31, 2010, the accounts receivable balance was approximately $371,700, and approximately $279,100 was delinquent by more than 29 days.

Billings should be prepared timely to ensure timely collection of amounts owed. Written policies related to billing, collection, and write-off of accounts receivable are necessary to ensure consistency and to establish adequate internal controls over accounts receivable.

A similar condition was noted in our prior audit report.

Recommendations

The Ambulance Director:

3.1 Require official prenumbered receipt slips be issued for all monies received, enter receipts in the accounting system when received, and transmit receipts to the County Treasurer more timely.

3.2 Ensure patients are billed in a timely manner, and develop written policies for the billing, collection, and write-off of accounts receivable.

Auditee's Response

The Ambulance Director provided the following responses:

3.1 We will write a receipt slip for all monies received, enter receipts more often, and transmit receipts to the County Treasurer more timely. This will depend on how much we have and we will not have as much on hand since Medicare payment procedures have changed. Beginning in 2011, Medicare payments are directly deposited into a bank account so we will not have as much monies on hand as we used to in the past. Medicare is the majority of the payments received. We will review our processes based on this change.

3.2 We will work on entering billings more timely. We are looking at using a billing company to handle Medicaid/Medicare billings and it may also handle the payments. This will also address the write-off issues. If we do not do this, we are looking at making changes to free up some more time for the accounting clerk so that she is not handling as many responsibilities.

4. Fuel Card Procedures

The County Commission pays fuel card statements of the Ambulance and Sheriff departments without supporting documentation for charges and proper review and approval by department heads and county officials. Total payments for these fuel cards were approximately $38,000 in 2010 and $30,700 in 2009. The County Clerk receives monthly fuel card statements from the vendors; however, supporting documentation is not obtained from the Ambulance Department and the Sheriff. A copy of the statement is provided to the Ambulance Department and the Sheriff; however, they do not provide the receipts to support the statement or review and approve the fuel statements.

To ensure the validity and propriety of disbursements and compliance with statutory provisions, adequate supporting documentation should be obtained for each charge and statement reviews should be performed by all county officials who make fuel card purchases.

Recommendation

The County Commission require a thorough review and approval of all fuel card statements prior to approving payment and ensure adequate supporting documentation is maintained.

Auditee's Response

The County Commission provided the following response:

We will request that the Sheriff and the Ambulance Director provide verification of their review of the fuel purchases to ensure that all bills have proper supporting documentation.

5. Capital Assets

Procedures and records to account for county property are not adequate. The county has no procedure in place to identify capital asset purchases and dispositions throughout the year. Records lack some necessary information such as purchase date and acquisition cost. In addition, annual inventories are not performed in all offices. The County Clerk requests that each office submit an inventory list; however, she does not follow up with the offices that do not submit a list. In 2010, the County Collector-Treasurer, Sheriff, Prosecuting Attorney, and Recorder did not submit inventory lists.

Adequate capital asset records and procedures are necessary to ensure effective internal controls, meet statutory requirements, and provide a basis for determining proper insurance coverage. Procedures to track capital asset purchases and dispositions throughout the year and compare to physical inventory results would enhance the county's ability to account for capital assets and potentially identify unrecorded additions and dispositions, identify obsolete assets, and deter and detect theft of assets. Section 49.093, RSMo, provides that the officer or their designee of each county department is responsible for performing annual inspections and inventories of county property used by their department and for submitting an inventory report to the County Clerk.

A similar condition was noted in our two prior audit reports.

Recommendation

The County Commission and the County Clerk work with other county officials to ensure complete and accurate inventory records are maintained and annual physical inventories are conducted, and implement procedures for tracking capital asset purchases and dispositions throughout the year.

Auditee's Response

The County Commission provided the following response:

We will contact the elected officials and department heads and reinforce that they need to submit the capital assets records to the County Clerk to help maintain adequate capital asset records. We will work on improving our records.

6. Computer Controls

Controls over computer systems are not sufficient to prevent unauthorized access or to restore key systems in the event of a disaster or systems failure.

6.1 User IDs and passwords

Unique user identifications are not required to log on to computers in the County Clerk's office and passwords are shared among employees in the

County Clerk's, County Collector's, and Prosecuting Attorney's offices. In addition, passwords are not required to be periodically changed and are not deleted after a computer user's termination.

The lack of an effective system of user identification and passwords may allow unauthorized access and/or changes to the system. To establish individual responsibility, as well as help preserve the integrity of computer programs and data files, access to information should be limited to authorized individuals. To control access, a unique user identification and password should be assigned to each user of a system. These passwords should be kept confidential and changed periodically to help limit unauthorized access to computer files.

6.2 Backup data

Backup data is not stored at a secure off-site location. In addition, backup data is not always tested to help prevent loss of information and ensure all essential county information and computer systems can be recovered following a disaster or computer failure. While backups are automatically prepared nightly in the County Clerk's office, the backups are not tested and the backups are not stored at an off-site location. Although the Prosecuting Attorney's office has already experienced computer failure and was not able to recover data from the accounting software because there was no backup, the Prosecuting Attorney's office still does not prepare backup files on a regular basis.

Failure to store computer backup data at a secure off-site location results in the backup data being susceptible to the same damage as the data on the computer. Preparation of backup data, preferably on a daily or at least weekly basis, periodic testing to ensure it is adequate, and off-site storage would provide increased assurance county data could be recreated if necessary.

Recommendations

The County Commission:

6.1 Work with county officials to require unique user identifications and passwords for all employees. In addition, user identifications and passwords should be deleted after a computer user's termination.

6.2 Work with county officials to ensure backup data is prepared for all county data, stored in a secure off-site location, and tested on a regular, predefined basis.

Auditee's Response

The County Commission provided the following responses:

6.1 We have already implemented this as we have made changes for user identifications and passwords. This process will also help

when a computer user terminates and we will ensure they are removed from access.

6.2 We are working on figuring out how best to do this and we plan on having this done by the end of the year. We will also work with county officials to ensure they are backing up properly.

The Prosecuting Attorney provided the following response:

6.2 We will work on obtaining an affordable backup system.

Grundy County
Organization and Statistical Information

Grundy County is a township-organized, third-class county. The county seat is Trenton.

Grundy County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county bridges, and performing miscellaneous duties not handled by other county officials. The townships maintain county roads. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 42 full-time employees and 21 part-time employees on December 31, 2010.

In addition, county operations include the Ambulance Department, the Senate Bill 40 Board, and the Senior Citizens' Services Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2011	2010
Rick Hull, Presiding Commissioner	$	27,080
Gene Wyant, Associate Commissioner		25,080
Joe Brinser, Associate Commissioner		25,080
Charlene Arnold, Circuit Clerk and Ex Officio Recorder of Deeds (1)		
Kristi Urich, County Clerk		38,000
Jason Spillman, Prosecuting Attorney		45,000
Rodney Herring, Sheriff		42,000
Tom Eads, County Coroner		11,000
Joyce Tuttle, Public Administrator		38,000
Colleen Williams, County Collector-Treasurer year ended February 28,	38,000	
Don Stotts, County Assessor, year ended August 31,		38,000

(1) Compensation is paid by the state.

Financing Arrangements

In December 2006, Certificates of Participation (COPS) totaling $4,995,000 were issued by First Bank of Missouri on behalf of the county and the proceeds of those certificates were used to construct a new Law Enforcement Center. The COPS are scheduled to be paid off in 2030. The remaining principal and interest due at December 31, 2010, was $4,600,000 and $2,594,822, respectively. A one-half cent capital improvement sales tax

was approved by the voters to provide funding for these obligations, and this sales tax expires in 2030.

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

For the years ended December 31, 2010 and 2009, the Senate Bill 40 Board received $21,486 under Title V, Section 5001 of the Recovery Act which provided additional federal funding through the Medicaid Federal Medical Assistance Percentage grant. The grant was awarded by the Missouri Department of Mental Health. The payments were made for Medicaid expenditures reported between October 1, 2008, and December 31, 2010.

Missouri State Auditor

Marion County

August 2011

Report No. 2011-41

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Marion County

Financial Condition	The General Revenue Fund and the Special Road and Bridge Fund are in weak financial condition and not expected to improve during calendar year 2011. Disbursements have generally exceeded receipts for several years. In addition, due to errors in sales tax reduction calculations and voluntary property tax reductions taken, the county is limited in its ability to levy a general property levy. The County Commission needs to address the situation to avoid the reduction or loss of some county services.
Budgetary Practices	County budgets are not adequately monitored. Although quarterly reports comparing actual to budgeted receipts and disbursements are reviewed, actual disbursements exceeded budgeted disbursements for several funds.
County Sales Tax	The county did not reduce property taxes enough to meet the required 50 percent rollback. Marion County enacted a one-half cent sales tax with a provision to reduce property taxes by 50 percent of the sales tax collected, but the former County Clerk did not properly ensure the rollback was sufficient. We noted a similar condition in our prior audit report.
Sheriff Controls and Procedures	The Sheriff department's petty cash fund is not maintained at a constant amount, leaving it susceptible to misuse. In addition, the petty cash fund is used to reimburse employees for travel meals, but the amounts are not reported on form W-2 as required by the IRS. Procedures for approving and monitoring disbursements of the Law Enforcement Restitution Fund (LERF) need to be improved and may not be in compliance with state law. The LERF Board approves its budget but does not review and approve specific disbursements, and actual disbursements have consistently exceeded amounts budgeted.
Commissary Controls and Procedures	The Sheriff department needs to improve its reconciliation procedures for the Commissary Account to reduce the risk of errors and misuse. The Sheriff needs to determine the amount of profit, if any, in the account and turn it over to the County Treasurer as required by state law. The Sheriff department does not deposit some receipts, and commissary receipt slips are used for other types of receipts not deposited into the Commissary Account.
Payroll Procedures	Salaried county employees do not prepare and submit timecards, and leave is not granted in accordance with county policy. A similar condition was noted in our prior audit. The Marion County Board of Services for the Developmentally Disabled/Senate Bill 40 Board awarded its Executive Director a one-time bonus of $2,500, in violation of the Missouri Constitution.
County Property	The county is not maintaining up-to-date property records or conducting physical inventories, as also noted in our prior audit report. State law requires counties to account for personal property costing $1,000 or more.

Prosecuting Attorney Controls and Procedures	As noted in our two prior audit reports, the Prosecuting Attorney's office does not adequately account for the receipt and disposition of bad checks, which increases the risk of loss or misuse. The Prosecuting Attorney's office should assign a sequential number to each bad check complaint received that can be used to track the outcome of each matter.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	Marion County did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 17

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Marion County

We have audited certain operations of Marion County in fulfillment of our duties under Section 29.230, RSMo. In addition, Nichols, Stopp & VanHoy, Certified Public Accountants, has been engaged to audit the financial statements of Marion County for the 2 years ended December 31, 2010. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2010. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices. The accompanying Management Advisory Report presents our findings arising from our audit of Marion County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Debra S. Lewis, CPA
In-Charge Auditor:	Matthew Schulenberg, CFE
Audit Staff:	Jay Dowell, MBA
	Ashley Lee, MBA

1. Financial Condition

The financial condition of the General Revenue Fund and the Special Road and Bridge Fund is weak and not expected to improve during the year ended December 31, 2011, which could put citizens at risk of reduction or loss of some county services. The following tables reflect the actual receipts, disbursements, and cash balances of the General Revenue and Special Road and Bridge Funds for the years ended December 31, 2010, 2009, and 2008, along with anticipated amounts for 2011, according to the approved county budgets.

General Revenue Fund		2011 Budgeted	2010 Actual	2009 Actual	2008 Actual
Beginning Balance, January 1	$	80,513	327,780	235,574	635,904
Receipts		4,846,781	4,592,375	4,813,556	4,845,858
Disbursements		4,923,223	4,839,642	4,721,350	5,246,188
Ending Balance, December 31	$	4,071	80,513	327,780	235,574

Special Road and Bridge Fund		2011 Budgeted	2010 Actual	2009 Actual	2008 Actual
Beginning Balance, January 1	$	54,781	68,145	135,341	222,418
Receipts		1,975,235	1,880,559	1,893,688	2,117,026
Disbursements		2,023,904	1,893,923	1,960,884	2,204,103
Ending Balance, December 31	$	6,112	54,781	68,145	135,341

General Revenue Fund and Special Road and Bridge Fund disbursements have generally exceeded receipts and are projected to again exceed receipts during 2011. Additionally, receipts have consistently decreased and are projected to only slightly increase in 2011.

In addition, the county has not sufficiently reduced property taxes by approximately $2.5 million to offset the sales tax rollback requirement (see MAR finding number 3). The county also took a 15 cent voluntary property tax rollback in 2008, which automatically lowered the property tax rate ceiling in 2009. The district again took the voluntary property tax reduction in 2009 and 2010, thereby reducing the tax rate by a total of 30 cents. In addition, by taking the voluntary reduction again in 2010, the property tax rate ceiling is now reduced by a total 30 cents. As a result of these reductions and the various errors, the county might be unable to levy a general tax for 2011, which could significantly affect its financial condition.

It is essential the County Commission address the situation both in the immediate and long-term future. To improve the financial condition of the county, the County Commission should reduce spending as much as possible, evaluate controls and management practices to ensure effective use of county resources, attempt to maximize all sources of revenue, and closely monitor county budgets.

Recommendation

The County Commission closely monitor the county's financial condition and take the necessary steps to improve the financial condition of the General Revenue Fund and the Special Road and Bridge Fund. The County Commission should also perform long-term planning and ensure receipts are maximized and disbursements are closely monitored.

Auditee's Response

The County Commission provided the following response:

A significant portion of this is due to the economic environment. We have and will continue to closely monitor the county's financial condition.

2. Budgetary Practices

County budgets are not adequately monitored. As a result, actual disbursements exceeded amounts budgeted for several county funds under the control of the Sheriff, County Collector, Recorder of Deeds, and Prosecuting Attorney. Although quarterly reports comparing budgeted and actual receipts and disbursements are reviewed by each county official, budgeted disbursements were still exceeded.

Budget documents are an essential tool for the efficient management of county finances. Adequate budget monitoring allows the county to properly react and plan for increased disbursements and deceased revenues.

A similar condition was noted in our prior report.

Recommendation

County officials should adequately monitor budgets to ensure budgeted disbursements are not exceeded.

Auditee's Response

The Sheriff provided the following response:

I agree with this recommendation and will monitor the budgets more closely.

The Collector provided the following response:

I monitor the budget and do everything within my power to ensure the Collector's Tax Maintenance Fund is not overspent. We had equipment failures and had to replace equipment, which I did with funds from the Collector's Tax Maintenance Fund. I had no way of knowing the equipment was going to fail and therefore could not budget for the need of the new equipment. There were funds in the Collector's Tax Maintenance Fund to cover the expenses of the equipment and the purchases did not affect the General Revenue Fund. I will attempt to budget funds for emergency situations in the future and will continue to monitor the budget.

The Recorder provided the following response:

I monitor the budget and do everything within my power to ensure the Recorder's Technology Fund is not overspent. We had computer failures and had to replace these computers, which I did with funds from the Recorder's Technology Fund. I had no way of knowing the equipment was going to fail and therefore could not budget for the need of two new computers. There were funds in the Recorder's Technology Fund to cover the expenses of the two computers and the expenditure did not affect the General Revenue Fund. I will attempt to budget funds for emergency situations and will continue to monitor the budget.

The Prosecuting Attorney provided the following written response:

While some expenditures have exceeded the budgeted amounts, the expenditures were made because the Fund had accumulated more funds than were anticipated. The Fund was never "over-drawn." Every expenditure was made, with the approval of the County Treasurer's Office and the County Commission, pursuant to statue for benefit of the prosecution of crime in Marion County.

3. County Sales Tax

The county has not established procedures to monitor or assess the results of actual property tax reductions for sales tax collections. In addition, errors were made in the sales tax reduction calculation. As a result, property tax reductions were not sufficient to offset sales taxes received by a total of approximately $2.5 million for the years 2003 through 2010.

Section 67.505, RSMo, requires the county to reduce property taxes for a percentage of sales taxes collected. Marion County voters enacted a one-half cent sales tax with a provision to reduce property taxes by 50 percent of sales taxes collected. The county is required to estimate the annual property tax levy to meet a 50 percent reduction requirement, and certify to the State Auditor's office the annual property tax levy including the amount the levy is required to be reduced for sales tax collections, as well as any voluntary reductions. For 2007 through 2010, the county certified the sales tax reduction and voluntary reductions as follows:

	2010	2009	2008	2007
Sales tax reduction $	.0336	.0211	.1798	.2450
Voluntary reduction	.1500	.1500	.1553	.0897
Actual tax levy	.1153	.0950	.0950	.1138

The former County Clerk mistakenly utilized the calculated tax rate as the sales tax reduction in 2010 and 2009. In addition, he did not fully compare the estimated reduction amounts to actual amounts to ensure the sales tax reduction complied with state law. Without this calculation, the county

cannot consider excess property tax collections from prior years when computing the required reduction for the current year.

As noted in our prior report, the former County Clerk believed the voluntary reduction should also be considered in calculating actual excess and would offset any excess; however, these amounts were clearly designated as voluntary reductions, not sales tax reductions. Also as noted in the prior report, the September 2006 commission meeting minutes indicated the county had voluntarily reduced the General Revenue tax levy to offset the 15 cent levy for the Health Department per the "gentlemen's agreement" when voters passed the separate levy for the Health Department. If the county considers the voluntary reduction to be part of the sales tax reduction calculation, it should certify it as sales tax reduction to the State Auditor's office to clearly show compliance with state law.

Also, it is unclear if sales tax monies distributed to the city Tax Increment Financing (TIF) District should have been considered in the calculation, thus it was not included in the sales tax reduction calculation. The county distributed sales taxes of approximately $112,900, $85,600, $82,200, and $88,600 from the General Revenue Fund to the city TIF district during the years ended December 31, 2010, 2009, 2008, and 2007, respectively.

The county should review the classification of past designations of sales tax and voluntary reductions and ensure future property tax certifications properly reflect the purpose of property tax reductions. In addition, the County Clerk should ensure the proper amounts are utilized as the reductions when setting the tax rates for the year.

A similar condition was noted in our prior report.

Recommendation

The County properly distinguish between sales tax and voluntary reductions on certified property tax forms and assess the results of the actual property tax reductions to clearly show compliance with state law. In addition, the county should consult the Prosecuting Attorney to determine the effect of sales tax distributions to TIF districts on the property tax reduction calculations.

Auditee's Response

The County Commission and County Clerk provided the following written response:

The County agrees with the Auditor's finding and will distinguish between sales tax reduction and voluntary reductions on certified tax forms. The County agrees to assess the results of the actual sales tax rollbacks to show compliance on future calculations. The County assumed that since it had received a Certification Letter from the Auditor's Office each year that showed that the County was in compliance with Missouri Law, that the

Auditor's office was recalculating the rate to verify it was correct at that time. The County will consult with the Prosecuting Attorney to determine the effect of sales tax distribution to the Walmart TIF district on the calculations.

Auditor's Comment

The State Auditor's office annually certifies tax rates for compliance with Section 137.073, RSMo, which establishes the tax rate ceiling. This certification does not include a review and certification of compliance with Section 67.505, RSMo, which requires property tax reductions for sales tax receipts.

4. Sheriff Controls and Procedures

Sheriff department procedures related to petty cash are in need of improvement. In addition, approval procedures for disbursements from the Law Enforcement Restitution Fund do not appear to comply with state law.

4.1 Petty cash

The Sheriff's department uses a petty cash fund to pay for miscellaneous services, to pay inmates their monies when they have less than $2 in their commissary account when released from jail, and to reimburse employees for lunch and fuel when required to travel out of their official domicile for training purposes. During our review of the Sheriff's department petty cash fund, we noted:

- The petty cash fund is not maintained at a constant amount or on an imprest basis which leaves the petty cash fund more susceptible to abuse or mishandling. The Sheriff indicated the petty cash fund ranges from $400 to $600 and is replenished by requesting a flat amount from the County Treasurer. During the years ended December 31, 2010 and 2009, the Sheriff's department received approximately $2,500 and $1,800, respectively, in petty cash from the Treasurer.

  To reduce the risk of misuse, the petty cash fund should be maintained on an imprest basis. Also, on a periodic basis, cash on hand should be counted and reconciled to the balance per the petty cash ledger by an independent person to ensure funds are accounted for properly.

- The Sheriff provides employees with cash advances from the petty cash fund for meals when they travel out of their official domicile for official county business and for fuel if employees are required to use their personal vehicle. The Sheriff indicated the employees do not have to be in a 12-hour travel status to be provided cash for meals. The funds provided to employees are not reflected on the employees' form W-2 nor are the employees required to account for the funds. The Sheriff indicated approximately $1,600 annually was paid to employees during the 2 years ended December 31, 2010 and 2009.

According to Internal Revenue Service (IRS) Publication 463, *Travel, Entertainment, Gift, and Car Expenses*, the cost of business meals that does not involve overnight travel or travel long enough for the employees to stop for sleep or rest to properly perform their duties is a personal expense and, therefore, is not deductible as a business expense. Also, if employers reimburse employees for these business meals, federal regulations require employers to report the amount reimbursed as taxable income to the employee. In addition, any funds that are provided to an employee for fuel, which are not an actual expense accrued by the employee, are also not deductible as a business expense.

- The petty cash fund is not reimbursed from the Commissary Account for monies disbursed to inmates upon release. The Sheriff refunds the balance of each inmate's account to inmates upon release. When the inmate's balance is less than $2, the inmate is paid from the petty cash fund instead of issuing a check from the Commissary Account to avoid issuing so many small checks which are often never cashed. To properly account for inmate monies, disbursements to inmates from the petty cash fund should be reimbursed from the Commissary Account.

4.2 Law Enforcement Restitution Fund

Procedures for approving and monitoring disbursements of the Law Enforcement Restitution Fund (LERF) are in need of improvement and do not appear to be in full compliance with state law. As a result, disbursements exceeded the budget by approximately $29,300 in 2010 and $50,600 in 2009. Approximately $79,300 and $100,600 were disbursed from the fund during the years ended December 31, 2010 and 2009, respectively.

The LERF Board approves the fund's budget, which outlines the general disbursements (i.e., matching funds for a state law enforcement grant, continuation of the crime victim advocate, etc.) from the fund, at the beginning of the year; however, the LERF Board does not review and approve each specific disbursement from the fund. In addition, it appears neither the Sheriff nor the Prosecuting Attorney closely monitor the actual disbursements from the fund, resulting in the budget being over expended on a consistent basis (see MAR finding number 2).

Section 50.565.2, RSMo, provides that money from the LERF shall only be expended upon the approval of a majority of the members of the LERF Board of Trustees.

Recommendations

The Sheriff:

4.1 Ensure the petty cash fund is maintained on an imprest basis, discontinue the practice of providing employees cash advances for traveling purposes from the petty cash fund, and ensure the petty

cash fund is reimbursed from the Commissary Account for monies disbursed to inmates. Furthermore, the Sheriff should develop a travel policy that is in compliance with IRS regulations.

4.2 Work with the Prosecuting Attorney and the LERF Board to establish procedures to require the LERF Board to review and approve each disbursement from the fund.

Auditee's Response

The Sheriff provided the following responses:

4.1 I will maintain the petty cash fund on an imprest basis and discontinue the practice of providing petty cash to employees for fuel. I will not discontinue the practice of providing petty cash to employees for meals when they are required to travel away from the county for official business.

4.2 We met with the LERF Board regarding the additional expenditure; however, the approval might have been prior to the year the monies were spent. I will discuss this situation with the Prosecuting Attorney.

The Prosecuting Attorney provided the following written response:

4.2 The Prosecutor agrees to consider the suggestions of the Auditor concerning working with the Sheriff to more closely monitor the timing of expenditures from the Fund. The Marion County Prosecutor does not agree that the Law Enforcement Restitution Board has failed to approve the expenditures of the Fund pursuant to Missouri Statue 50.565.2. An annual budget is approved by the Board, and no expenditures have been made that were not previously approved by the Board. Admittedly, some expenditures, approved by the Board, were not made during the same budget year as when they were approved. Section 50.565.2 does not require that the Board meet to vote on each individual disbursement from the Fund, as the Auditor suggests. While some expenditures have exceeded the budgeted amounts (particularly relating to those for Courthouse Security), the expenditures were made because the Fund had accumulated more funds than were anticipated. The Fund was never "over-drawn."

5. Commissary Controls and Procedures

Sheriff department controls and procedures for the Commissary Account are in need of improvement. During the 2 years ended December 31, 2010, the Sheriff department received approximately $68,000 annually from inmates for commissary operations.

5.1 Liabilities

Reconciliation procedures for the Commissary Account are not adequate, which increases the risk of errors and misuse. The balance of the Commissary Account exceeded the liability list (list of inmate balances and other monies held) by approximately $4,200 on December 31, 2010.

Monthly lists of liabilities are prepared of inmate balances; however, the lists are not reconciled with the account balance. Although ledgers for the checking account transactions and medical fees charged to inmates are maintained, ledgers for commissary profits (see section 5.2 for additional information on commissary profits), interest income, and disbursement of commissary profit are not maintained. As a result, the Sheriff department cannot determine the amount of profit in the account but believes all monies exceeding the liabilities list are profit or fees that can be spent by the department. However, without a ledger of commissary profits, interest income, and purchases, the Sheriff department cannot ensure records are correct, monies have been properly handled, and the balance remaining in the account represents amounts which can be spent by the department.

5.2 Commissary profits

Commissary profits and other fees collected from inmates are not remitted to the county treasury. For example, the county pays for contracted medical services for inmates from the General Revenue Fund. When an inmate receives medical service, the inmate's account is charged a flat fee based on the medical service received (i.e., doctor fee, nurse fee, etc.); however, the amounts deducted for medical services are not remitted to the county treasurer for deposit to the General Revenue Fund, but are retained in the Sheriff's Commissary Account. The Sheriff indicated the commissary profit and fees retained in the Commissary Account are used to purchase additional commissary items and supplies for the jail.

Section 50.360, RSMo, requires every county official who receives any fees or other remuneration for official services to pay such money to the county treasurer.

5.3 Receipt procedures

Some receipts are not deposited, and commissary receipt slips are used for other types of receipts that are deposited into the Sheriff's General Account and not into the Commissary Account. If an inmate is held for only 24 to 48 hours, their monies are returned to them and not deposited. As a result, the Sheriff cannot reconcile the composition of receipts to deposits. In addition, no one accounts for the numerical sequence of receipt slips issued, which increases the risk of loss, theft, or misuse of funds.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, receipts should be deposited intact in a timely manner, the composition of receipts slips issued should be reconciled to the composition of deposits, and the numerical sequence of receipt slips issued should be accounted for properly.

Similar conditions previously reported

Similar conditions to sections 5.1 and 5.2 were noted in our prior audit report.

Recommendations

The Sheriff:

5.1 Ensure the monthly liabilities list is reconciled to accounting records and any differences are investigated and corrected.

5.2 Discontinue the practice of maintaining county fees and commissary profit outside the county treasury. If these monies continue to be maintained in the Sheriff's Commissary Account, a ledger should be maintained detailing the profit and fees received and spent (exclusive of inmate monies).

5.3 Ensure all receipts are deposited intact in a timely manner, reconcile the composition of receipt slips issued to the composition of amounts deposited, and account for the numerical sequence of all receipt slips. In addition, the Sheriff should ensure the appropriate receipt slips are used for each type of receipt received.

Auditee's Response

The Sheriff provided the following responses:

5.1 I agree with this recommendation and will attempt to keep track of the commissary profits.

5.2 I have an understanding with the County Commission that this money is to be used for the inmates and jail. I do not plan to implement this recommendation.

5.3 This recommendation will be implemented.

6. Payroll Procedures

Records and procedures regarding timecards are in need of improvement. In addition, procedures for salaried employees are not in compliance with county policy, and a bonus was paid by the Senate Bill 40 Board. During the years ended December 31, 2010 and 2009, the county disbursed approximately $3.3 million annually for payroll costs.

6.1 Timecards

Timecards are not prepared and submitted to the County Clerk's office and leave is not granted for salaried employees in compliance with county policy.

The county pays 23 employees, excluding elected officials, on a salary basis. Salaried employees do not prepare timecards or submit timesheets; therefore, their immediate supervisor cannot verify the actual time worked during the pay period nor is the County Clerk's office notified of actual time

worked for these individuals. In addition, county personnel indicated elected officials or the actual salaried employee, depending on whether an elected official is present in the department, take it upon themselves to grant or not grant leave to salaried employees. The leave unofficially granted to salaried employees is not tracked by the County Clerk's office nor are accumulated leave balances paid to employees upon termination.

The county personnel manual requires every employee complete, on a daily basis, official Marion County timecards distributed by the County Clerk's office and all information on the timecard be verified by the elected official of each office prior to submission to the County Clerk's office. In addition, the personnel manual indicates regular full-time employees of the County, who have completed their introductory period, earn vacation time in conjunction with their years of service and 12 days of sick leave each year, and are paid for unused vacation time upon leaving employment. The manual defines an "employee" as those full or part-time employees of the county who work on a salaried or an hourly basis and who are not elected by the electorate of the county; and defines a "regular employee" as an employee who has been designated to a full-time and regular position in the service of the county.

In addition to complying with county policy, adequate documentation of time worked and leave taken is needed to adequately document the legitimacy of payroll amounts and leave balances. Submission of detailed time records to the County Clerk's office, reviewed and approved by supervisors, would provide support for payroll processed by the county.

A similar condition was noted in our prior audit report.

6.2 Bonuses

The Marion County Board of Services for the Developmentally Disabled/Senate Bill 40 Board (MCBSDD) awarded the Executive Director of the MCBSDD a one-time salary bonus of $2,500 in December 2010. This one-time salary bonus was specifically for services previously rendered and, as such, is in violation of Article III, Section 39 of the Missouri Constitution and contrary to Attorney General's Opinion No. 72, 1955 to Pray, which states, "…a government agency deriving its power and authority from the Constitution and laws of the state would be prohibited from granting extra compensation in the form of bonuses to public officers after the service has been rendered."

Recommendations

6.1 The County Commission require all county employees comply with the documented personnel policies or update county policies.

6.2 The MCBSDD discontinue the practice of granting employees bonuses.

Auditee's Response

The County Commission provided the following response:

6.1 We will review this situation and determine the best method to implement the recommendation.

The Marion County Board of Services for the Developmentally Disabled and the Executive Director provided the following written response:

6.2 During the May 2011, board meeting the members discussed the concerns of Senate Bill 40 Board awarding employee bonuses and were in consensus that this would no longer be a practice of Marion County Services for the Developmentally Disabled. This is normally not a procedure that has been followed but due to the circumstances of the delayed evaluation for the Executive Director had been approved.

7. County Property

Property records are not up-to-date and various officials are not complying with statutory provisions related to accounting for county property, which increases the risk of loss, theft, of misuse of property. As of December 31, 2010, county property, including building and vehicles, was valued at approximately $16.7 million on the county's insurance policy.

The County Clerk does not have adequate procedures in place to identify property purchases and dispositions throughout the year, and county property records have not been thoroughly updated for several years. In addition, physical inventories of county property are not performed by county officials, updated county property lists are not turned over to the County Clerk, and written authorization is not obtained from the County Commission for the disposition of county property.

Section 49.093, RSMo, requires counties to account for personal property costing $1,000 or more, assigns responsibilities to each county department officer, and describes details to be provided in inventory records. Adequate county property records and procedures are necessary to ensure effective internal controls, meet statutory requirements, and provide a basis for determining proper insurance coverage. These records should be updated for any property additions and approved dispositions as they occur. Physical inventories, proper tagging of county property items, and periodic comparisons of inventories to overall county property records are necessary to evaluate the accuracy of records, and deter and detect theft.

A similar condition was noted in our prior report.

Recommendation

The County Commission and County Clerk implement procedures for tracking and tagging capital asset purchases throughout the year and work with other county officials to ensure complete and accurate inventory

records are maintained and annual physical inventories are conducted. In addition, the County Commission should establish procedures for approving all county property dispositions.

Auditee's Response

The County Commission and the County Clerk provided the following response:

We agree with this recommendation and plan to implement the recommendation within the next few months.

8. Prosecuting Attorney Controls and Procedures

The Prosecuting Attorney's office does not have an adequate system to account for the receipt and eventual disposition of bad checks, which increases the risk of loss or theft of funds. Currently, Marion County merchants complete a complaint form at the time the bad check is turned over to the Prosecuting Attorney for collection. If payment is collected by the 10 day deadline, the complaint form and information regarding the handling of the case is not recorded on the case log, thus only complaints not paid within the deadline are recorded on the case log and assigned a sequential number. No identifying or tracking numbers are assigned to the paid complaints in a manner that allows all bad checks complaints to be accounted for properly.

To ensure all bad checks turned over to the Prosecuting Attorney are handled and accounted for properly, a sequential number should be assigned to each bad check complaint received and this number should be used to track the status and dispositions of the corresponding bad check. Information in the records should include the complaint number, the merchant name, the issuer of the bad check, and the disposition of the bad check including the date restitution was received and disbursed to the merchant, and the date the criminal case was filed or other disposition.

A similar condition was noted in our two prior audit reports.

Recommendation

The Prosecuting Attorney develop procedures and records that provide sufficient information to better track the disposition of all bad check complaints, including those not prosecuted.

Auditee's Response

The Prosecuting Attorney provided the following written response:

The Marion County Prosecutor does not agree that a "sequential number system" should be implemented as part of the office's bad check system.

All of the information recommended by the Auditor's Office in its "Finding", is already maintained by the Prosecutor's Office. The Prosecutor's Office maintains the system by organizing it based upon the name of the defendant (like it does for all criminal cases), and does not organize it based on a

"sequential number system" as recommended by the Auditor. The complaint by the Auditor is a complaint concerning form and not substance.

Each bad check presented to the office is accompanied by an informational form completed by the victim. For each defendant, the office staff creates a file (using the defendant name), fills out an "index card" listing each bad check received, the amount of the bad check, the merchant's name, and the date that check was received by the Prosecutor's Office.

The Prosecutor's Office then immediately sends a letter to the defendant demanding payment. Those letters are reviewed by and signed by the Prosecuting Attorney. A copy of the letter is retained in the defendant's file.

Any payment made by the defendant is forwarded to the victim, that day, and a copy of the payment is retained in the Prosecutor's file. The payment is sent with a letter reviewed by, and signed by, the Prosecutor. A copy of that letter is also retained in the Prosecutor's file. The payments are also recorded on a computerized spreadsheet (Excel) which is retained on the office computer, and printed out and placed in the defendant's file.

Any extension for payment by the defendant is confirmed in writing by a letter which is reviewed by and signed by the Prosecuting Attorney. A copy of this letter is also retained in the Prosecutor's files.

The Prosecuting Attorney, and his staff, review all bad checks referred for prosecution on a monthly basis. The timely review of these bad checks is monitored by a separate employee in the Prosecutor's Office through the use of the office-wide tickle-card system.

If no payment is received, a criminal complaint is filed with the Associate Court. That complaint is reviewed by and signed by the victim. That complaint is also reviewed by and signed by the Prosecuting Attorney. The Prosecutor's Office then follows it's normal procedure in prosecuting the criminal case. A copy of every document related to the case is kept in the Prosecutor files.

Once the case has reached a disposition, the results are recorded on an index card, which is kept in alphabetical order (by defendant's name) in the Prosecutor's system. The results are also recorded in the defendant's file.

Marion County
Organization and Statistical Information

Marion County is a county-organized, third-class county. The county seat is Palmyra. The county also has a courthouse in Hannibal that serves as the basis of operations for several county elected officials.

Marion County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 99 full-time employees and 3 part-time employees on December 31, 2010.

In addition, county operations include the Senate Bill 40 Board and drainage districts established by the County Commission.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2011	2010
Lyndon Bode, Presiding Commissioner	$	43,510
Robert Heiser, Jr., Associate Commissioner		41,150
Randy Spratt, Associate Commissioner		41,150
Janet Dearing, Recorder of Deeds		62,894
Robert J. Ravenscraft, County Clerk		62,894
Thomas P. Redington, Prosecuting Attorney		109,366
Jimmy Shinn, Sheriff		66,387
F. Jean Buckman, County Treasurer		62,894
Peggy Porter, County Coroner		21,154
Mary Ann Viorel, County Collector, year ended February 28,	26,609	
Lee Viorel, County Collector, year ended February 28,	32,656	
Mark Novak, County Assessor , year ended August 31,		58,629

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

Marion County did not receive any federal stimulus monies during the 2 years ended December 31, 2010.

Missouri State Auditor

Howard County

August 2011

Report No. 2011-40

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Howard County

Financial Condition	Some county funds are in poor financial condition. For several years, disbursements exceeded receipts, and the rental income from the Keller Building does not cover the costs of needed maintenance and repairs.
Property Tax System Controls and Procedures	The County Collector does not complete and timely file accurate annual settlements. The annual settlement for the year ended February 28, 2010, was not filed until February 2011, and contained several errors and omissions. Such mistakes can go undetected because, as noted in our last four audit reports, neither the County Clerk nor the County Commission adequately reviews the County Collector's property tax collection activities. In addition, the County Clerk does not prepare or verify the accuracy of the current and delinquent tax books and also does not prepare aggregate abstract reports as required by state law.
Sheriff Controls and Procedures	We have repeatedly identified weaknesses in the Sheriff's controls and procedures, but improvements still have not been made. Accounting duties are not adequately segregated, and bank reconciliations have not been performed for 5 years. Receipts are recorded on multiple receipt records which are not reconciled, the composition of receipts is not reconciled to deposits, deposits are not made timely, and monies are not kept in a secure location. The Sheriff purchases telephone cards to sell to inmates, but no records of purchases or sales are maintained. In addition, the Sheriff does not transmit fees to the County Treasurer monthly, as required by state law.
Capital Improvement Sales Taxes	The road and bridge capital improvement sales tax ballot language may not be consistent with state law since it does not specifically identify a capital improvement purpose. In addition, the county deposits road and bridge sales tax receipts into the Special Road and Bridge Fund and does not separately account for disbursements made from the sales tax receipts, and has not identified capital improvement projects funded with these monies. The county imposed capital improvement sales taxes in excess of that allowed by state statute; but, when the jail capital improvement sales tax expires on December 31, 2011, the remaining road and bridge capital improvement sales tax will not exceed the statutory maximum.
County Disbursements	Disbursements from some restricted funds were not in compliance with state law. The county does not have a written agreement with the Prosecuting Attorney. To avoid using county resources to subsidize the Prosecuting Attorney's private practice, this agreement should outline which expenses will be provided by the county and which will be provided by her private practice.
Rock and Pipe Sales	The county needs to improve its controls over rock and pipe sales by preparing an invoice for each sale, issuing a receipt slip for each payment, and charging a price sufficient to cover its costs.

Public Administrator Controls and Procedures	The Associate Circuit Court does not review annual status reports for accuracy. The Public Administrator does not always timely deposit checks received on behalf of wards, which increases the risk of loss or misuse and, if done to remain below the Medicaid eligibility threshold, may violate state law. In addition, the Public Administrator does not review bank reconciliations or maintain adequate bank reconciliation documentation.
Capital Assets	As noted in our prior audit, the county needs to improve its property procedures and records. The county should develop procedures to identify property purchases and dispositions, ensure property records contain all necessary information, affix asset tags, and require an annual inventory.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Poor**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	During the audit period, the county was awarded the following ARRA funds: ARRA - Energy Efficiency and Conservation Block Grant: $91,031 to replace the Keller Building heating and cooling systems. These funds had not been received or spent by the end of the audit period. Homelessness Prevention and Rapid Re-housing Program Grant: Howard County received and spent $28,446 to provide homelessness prevention assistance and rapid re-housing assistance during the audit period. Recovery Act - Assistance to Rural Law Enforcement to Combat Crime and Drugs Competitive Grant: During the year ended December 31, 2010, Howard County received $391 and expended $4,039 toward overtime costs for Howard County Sheriff deputies working on criminal cases. Recovery Act: Edward Byrne Memorial Justice Assistance Grant: During the year ended December 31, 2009, Howard County received and spent $9,226 to replace lightbars on Sheriff's department vehicles. ARRA - Immunization Grant: During the year ended December 31, 2010, the Howard County Health Department received vaccines and $1,425 to administer the vaccines to school children.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 21

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Howard County

We have audited certain operations of Howard County in fulfillment of our duties under Section 29.230, RSMo. In addition, Casey-Beard-Boehmer PC, Certified Public Accountants, has been engaged to audit the financial statements of Howard County for the 2 years ended December 31, 2010. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2010. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Howard County.

Thomas A. Schweich

Howard County
Management Advisory Report
State Auditor's Findings

1. Financial Condition

Various county funds are in poor financial condition. The following table reflects the ending cash balances of various county funds for the last 4 years and the projected ending balances for 2011:

	Ending Cash Balance, Year Ended December 31,*				
	2011 Budgeted	2010 Actual	2009 Actual	2008 Actual	2007 Actual
General Revenue (GR) Fund	$ 436	82	25,533	3,777	53,472
Special Road and Bridge (SRB) Fund	0	178,829	233,071	208,044	473,029
Keller Building Fund	7,376	9,472	4	1	1,606

* Amounts were obtained from the county's budget documents.

Budgeted and actual disbursements have exceeded budgeted and actual receipts in the GR Fund in 4 of the last 5 years and the SRB Fund in 3 of the last 5 years. The county monitors budget to actual information and has reduced some county disbursements; however, these reductions have not been sufficient to offset declining receipts. Sales tax receipts, a significant funding source of both funds, declined during each of the years 2007 through 2009 and slightly increased in 2010.

The GR Fund cash balance has also declined due to increasing transfers to other county funds to offset expenses in those funds. During the 2 years ended December 31, 2010, transfers totaled approximately $18,300 and $137,900 from the GR Fund to the Civil Defense Fund and Law Enforcement (LE) Fund, respectively. In addition, the 2011 GR Fund budget includes a $100,000 transfer from the Economic Development Fund as a temporary loan to be paid back with 2011 property tax collections. Also, due to the lack of available funds, the county paid certain expenses from restricted funds; however, some of these disbursements were not in accordance with state law (see MAR finding number 5).

The SRB Fund includes road and bridge capital improvement sales tax receipts which total over $200,000 per year; however, it is unclear whether the county has complied with the state law authorizing the sales tax (see MAR finding number 4).

The Keller Building Fund is in poor financial condition because receipts have not been sufficient to cover building expenses. In addition, the county has been unable to accumulate sufficient monies in this fund to cover major repairs needed. The county has rented space in the Keller Building to various public and private tenants since the Keller Memorial Hospital closed in 1997. The County Commission made an unsuccessful attempt to sell the building in 2002.

The County Commission has increased Keller Building rental rates, including a 10 percent increase in 2010; however, these increases have not been sufficient to offset building maintenance and repair needs. Prior to 2010, the county transferred monies from the GR Fund to the Keller Building Fund to help cover building expenses. Transfers ranged from approximately $1,300 to $25,000 per year from 2006 to 2009. However, in recent years, because the GR Fund balance has declined and major repairs have been needed, the county had to obtain loans and grants to pay for repair and replacement of the heating and cooling systems. In March 2010, the county was awarded a $91,309 Missouri Department of Natural Resources (DNR) grant which requires the county to provide $59,928 in matching funds for the project. Because the county lacks these matching funds, in August 2010, the county was authorized a 6 1/2-year DNR loan of up to $60,000. As of June 2011, the county had borrowed $49,809. County officials indicated they are currently evaluating ways to reduce project costs, which would require lower grant and matching amounts. County officials also indicated any additional needed matching funds would be obtained through additional borrowing from the DNR loan and/or county-provided labor, equipment, and/or materials for the project. In addition, annual loan payments of approximately $3,000 and $1,900 are made from the GR and Keller Building Funds, respectively, for a 2008 16-year DNR loan for repairs to both the courthouse and the Keller Building.

The County Commission and County Clerk indicated they are aware of the concern and are monitoring the county's financial condition through monthly and quarterly budget reports and evaluating ways to reduce disbursements. In August 2010, Howard County voters authorized a 1/2-cent general sales tax levy to be collected beginning in January 2012. The county plans to deposit these collections, which the County Clerk estimates to be $275,000 annually, in the GR Fund.

To improve the financial condition of the county, the County Commission should review disbursements and reduce discretionary spending as much as possible, evaluate controls and management practices to ensure efficient use of county resources, and attempt to maximize all sources of revenue. In addition, the County Commission should continue to review and set Keller Building rental rates at a level sufficient to cover operating costs and establish an adequate cash reserve.

Recommendation

The County Commission continue to closely monitor and take necessary steps to improve the county's financial condition.

Auditee's Response

The County Commission provided the following written response:

1. *Revenue - Sales tax down and expenses increased. Monitor spending.*

2. *Budgets in all departments have all been kept the same for the last 4 years. Economic Development includes $100,000 transaction not used in the audit period.*
3. *State cuts in Health Department, Law Enforcement, and Assessment.*
4. *Road and Bridge Department, due to 3 years of heavy rain and snow, has created a substantial increase in fuel and rock.*
5. *Keller Building utility increases in 2007 has created an increased financial problem. Have replaced the cooling tower and boiler replacement is in the works which will be more efficient.*
6. *Law Enforcement, Road and Bridge, and Health Department - when employees leave they have not been replaced. We have taken steps and done our best to monitor spending.*

2. Property Tax System Controls and Procedures

The County Collector does not complete and file accurate annual settlements in a timely manner, the County Commission and the County Clerk do not adequately review property tax collection activities, and the County Clerk does not prepare and file aggregate abstracts. Property taxes and other monies totaling approximately $6.9 million and $6.7 million were collected and distributed by the County Collector during the years ended February 28, 2011 and 2010, respectively.

2.1 Annual settlements

As of January 2011, the County Collector had drafted, but not finalized, the annual settlement for the year ended February 28, 2010. The County Collector indicated the settlement was not finalized and filed because of tax book differences, and she had attempted but was unable to resolve these differences. Upon our request, the County Collector finalized and filed the settlement in February 2011; however, the settlement contained several errors and omissions. Protested real estate taxes totaling approximately $14,500 were double counted in delinquent and protested amounts. In addition, outlawed personal property taxes were reported as delinquent taxes; and as a result, delinquent tax charges reported on the settlement were approximately $39,300 less than delinquent tax credits reflected on the prior year settlement. Also, the settlement did not include several miscellaneous taxes and fees, including merchant license, vehicle, and late assessment fees totaling approximately $4,200. Other errors were also noted on the annual settlement. Additionally, total charges exceeded total credits by $5,471.

After we brought the above errors to her attention, the County Collector corrected these matters and filed an amended settlement in April 2011. Our review of the annual settlement for the year ended February 28, 2011, which was also filed in April 2011, noted no significant errors, omissions, or differences.

Untimely, incomplete, and/or inaccurate annual settlement information reduces the effectiveness of the settlement as a mechanism for accounting for all monies the County Collector is charged with collecting. To ensure the

validity of the tax book charges, collections, and credits, and for the County Clerk and the County Commission to properly verify these amounts, it is imperative the County Collector file accurate annual settlements on a timely basis. Section 139.160, RSMo, requires the County Collector to settle accounts with the County Commission by the first Monday in March.

2.2 Review of property taxes

As similarly noted in our prior four audit reports, neither the County Commission nor the County Clerk adequately reviews the property tax collection activities of the County Collector.

The County Clerk does not maintain an account book or other records summarizing property tax transactions and changes. In addition, the County Clerk and the County Commission do not perform procedures to verify the accuracy of the County Collector's monthly or annual settlements. As a result, neither the County Clerk nor the County Commission detected the errors in the County Collector's annual settlement noted above. The County Clerk indicated her review is limited to reviewing the County Collector's annual settlements for mathematical accuracy.

Section 51.150.1(2), RSMo, requires the County Clerk to maintain accounts with all persons chargeable with monies payable to the county treasury. An account book or other records which summarize all taxes charged to the County Collector, monthly collections, delinquent credits, abatements and additions, and protested amounts should be maintained by the County Clerk. Such records would help the County Clerk ensure the amount of taxes charged and credited to the County Collector each year is complete and accurate and could also be used by the County Clerk and County Commission to verify the County Collector's monthly and annual settlements. Such procedures are intended to establish checks and balances related to the collection of property taxes.

2.3 Tax books

As similarly noted in our prior four audit reports, the County Clerk does not prepare or verify the accuracy of the current or delinquent tax books. The County Collector prepares the tax books from the computer system and there is no independent review performed by the County Clerk. Because the County Collector is responsible for collecting property tax monies, good internal controls require someone independent of that process be responsible for generating and testing the accuracy of the property tax books. A review of the tax books should include verification of individual entries in the tax books and recalculating total tax book charges.

Sections 137.290 and 140.050, RSMo, require the County Clerk to extend the current and delinquent tax books and charge the County Collector with the amount of the taxes to be collected. If it is not feasible for the County Clerk to prepare the tax books, at a minimum, the accuracy of the tax books should be verified and approval of the tax book amounts to be charged to the County Collector should be documented.

2.4 Aggregate abstracts

The County Clerk does not prepare aggregate abstract reports as required. Section 137.295, RSMo, provides for the County Clerk to prepare and file these reports with the Missouri Department of Revenue and the State Tax Commission.

Recommendations

2.1 The County Collector file complete and accurate annual settlements in a timely manner. The County Collector should continue to investigate the differences reported on the annual settlements.

2.2 The County Clerk maintain an account book with the County Collector. The County Clerk and the County Commission should use the account book to review the accuracy and completeness of the County Collector's monthly and annual settlements.

2.3 The County Clerk prepare the current and delinquent tax books or, at a minimum, verify the accuracy of the tax books prior to charging the County Collector with the property tax amounts.

2.4 The County Clerk prepare and file aggregate abstracts.

Auditee's Response

The County Collector provided the following response:

2.1 I will continue to implement this recommendation.

The County Clerk provided the following written responses:

2.2 The County Clerk agrees with this recommendation. Beginning in 2011, the County Clerk is maintaining an account book with the County Collector. The County Clerk is reviewing the accuracy and completeness of the County Collector's monthly and annual settlements beginning in 2011.

2.3 The County Clerk agrees with this recommendation. Beginning in 2011, the County Clerk is verifying the accuracy of current and delinquent tax books.

2.4 The County Clerk agrees with this recommendation. Beginning in 2011, the County Clerk is preparing and filing aggregate abstracts.

The County Commission provided the following written response:

2.2 County Clerk stated that she has started an account book and adequate review of County Collector tax transactions. The Commission is reviewing monthly and annual settlements from both the Collector and Clerk.

3. Sheriff Controls and Procedures

The Sheriff's accounting procedures do not provide assurance that monies collected are accounted for properly. Prior audit reports have addressed the inadequacy of the Sheriff's controls and procedures. Improvements have not been made and significant weaknesses still exist.

The Sheriff's department received monies totaling approximately $105,000 and $115,000 for the years ended December 31, 2010 and 2009, respectively.

3.1 Segregation of duties

As noted in prior audits, accounting duties are not adequately segregated and adequate supervisory review of the accounting records is not performed. The Sheriff's bookkeeper is primarily responsible for receiving, recording, depositing, and disbursing monies, and reconciling bank accounts. The Sheriff indicated he reviews certain documentation supporting monthly fee transmittals to the County Treasurer; however, he does not document his review.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are safeguarded. Internal controls would be improved by segregating accounting duties among available employees or by implementing a documented independent or supervisory review of records by another employee or the Sheriff.

3.2 Bank reconciliations

As noted in prior audits, bank reconciliations have not been performed for any of the Sheriff's four bank accounts since July 2006. At our request, a bank reconciliation was prepared for the Sheriff's fee account as of February 28, 2011, and noted an unidentified balance of $1,278. As of January 31, 2011, the Sheriff's revolving fund, bond, and old garnishment accounts had bank balances of $888, $9, and $19, respectively. In addition, running book balances are not maintained for any of these accounts.

The Sheriff's bookkeeper indicated she has been too busy to perform bank reconciliations because she is required to perform other department duties including jailer, prisoner transport guard, dispatcher, and various office duties. In 2009, an intern working in the Sheriff's department attempted to reconcile the bank accounts; however, these reconciliations were not useful because they contained errors and were not reviewed for accuracy.

Monthly bank reconciliations and running book balances are necessary to ensure bank activity and accounting records are in agreement, reconciling items are properly monitored, and any errors or discrepancies are corrected on a timely basis.

3.3 Receipts and deposits

As similarly noted in our four prior audits, receipting and depositing procedures continue to need improvement.

- Receipts are recorded on multiple receipt records and the Sheriff's department does not reconcile the various receipt records or reconcile the receipt records to deposits. Cash bonds and inmate board bills are received and receipted by jailers and transmitted to the bookkeeper. The bookkeeper records these and other fee receipts in two manual one-write ledgers and also posts the fee receipts to an electronic ledger which is submitted to the County Treasurer with the monthly fee transmittal. A separate receipt book is used for carry and conceal weapon permits. The lack of reconciliations between the various records makes it difficult to ensure all monies are recorded and deposited.

- The method of payment (cash, check, or money order) is not consistently or accurately indicated on receipt slips, and the composition of deposits is not indicated on deposit slips. As a result, the composition of receipt slips cannot be compared to the composition of deposits.

- Fee receipts are not deposited intact or in a timely manner. Monies are normally collected each business day, but deposits are only made approximately five times each month. Some receipts are turned over to the court rather than deposited; however, a record of receipt from the court is not maintained.

- Generic prenumbered receipt slips are issued for monies received at the jail, and the receipt books are not purchased or issued in numerical order. In addition, our review of jail receipts noted some receipt slips were skipped or missing and not noted as voided.

- Monies received are not kept in a secure location until deposited. Fee receipts are held in an unlocked desk drawer prior to deposit. In addition, seized cash is not stored in a secure location. On March 31, 2011, we identified seized cash totaling $3,500 held for one case in an envelope on a shelf in the unsecured evidence room. Sheriff's records indicate this cash was seized in August 2010. Sheriff's department records also showed seized cash totaling over $5,000 was held in the evidence room from October 2008 to April 2009.

To safeguard receipts and reduce the risk of loss, theft, or misuse of funds, receipts should be adequately recorded, secured, and deposited; and receipt records should be reconciled to deposits. In addition, all seized cash should be deposited or stored in a secure location such as a vault or safe.

3.4 Telephone cards

Records are not maintained of prepaid telephone cards purchased and sold to inmates, and telephone cards and related receipts are maintained in an unsecure location. Batches of 50 telephone cards are periodically purchased from a telephone card vendor for $6.50 per card and held by the Sheriff until sold to inmates for $10 per card. The telephone cards and related cash

receipts are maintained in the Sheriff's desk, and no records of telephone card inventories or sales are maintained. Cash receipts are used to purchase additional telephone cards, and profits are periodically transmitted to the County Treasurer. A cash count performed on February 22, 2011, identified $595 in telephone card receipts maintained in the Sheriff's desk. Based on information obtained from the telephone card vendor, the Sheriff's department purchased telephone cards valued at $4,500 (with a profit value of $1,575) during the 2 years ended December 31, 2010. The Sheriff made two transmittals of profits totaling $1,625 to the County Treasurer during this time period.

Detailed records are necessary to adequately account for telephone cards. Loss, misuse, or theft of the telephone cards and receipts may go undetected without adequate telephone card records and procedures.

3.5 Monthly transmittals

The Sheriff does not always transmit fees to the County Treasurer on a monthly basis as required by state law. For example, fees for December 2009, totaling $2,459, were not disbursed to the County Treasurer until February 10, 2010. Section 50.370, RSMo, requires every county official who receives fees for official services to pay such monies monthly to the County Treasurer.

Recommendations

The Sheriff:

3.1. Segregate accounting and bookkeeping duties to the extent possible or, at a minimum, perform and document periodic reviews of the work performed.

3.2. Maintain running book balances, perform monthly bank reconciliations, and investigate and resolve any differences.

3.3. Ensure official prenumbered receipt slips are issued for all receipts; receipts are maintained in a secure location and deposited intact and in a timely manner; the method of payment is accurately indicated on all receipt slips; voided receipt slips are properly voided and retained; and receipt records, including the composition of receipt slips issued, are reconciled to the composition of deposits. In addition, the Sheriff should ensure seized cash is deposited or stored in a secure location.

3.4. Maintain records of telephone card sales and inventories. Such records should document the beginning number of telephone cards, cards purchased, cards sold, and the ending balance of cards. Periodic physical inventory counts should be performed and reconciled to telephone card records. Any discrepancies should be investigated in a timely manner. In addition, telephone cards and receipts should be maintained in a secure location, receipts should

be deposited, and telephone cards should be purchased through the county disbursement process.

3.5. Transmit fees monthly to the County Treasurer.

Auditee's Response

The Sheriff provided the following responses:

3.1 We are doing the best job we can in reviewing and documenting the review of records given the amount of manpower available to review the records.

3.2 We will contact the State Treasurer regarding how to dispose of the unidentified balances. We will work to implement monthly bank reconciliations starting in the month of June 2011.

3.3. Effective immediately, we plan to do a more accurate job of keeping track of any monies received in the jail, reconciling jail receipt records to our ledger in order to track to each individual, making sure each item is receipted, and making deposits more timely. In addition, any seized cash will be kept in a safety deposit box at the bank.

3.4. During the next couple of months, I will try to begin keeping a ledger of phone cards and statements and maintain the monies that come in for payment of the phone cards in a more secure location.

3.5. Beginning in June 2011, we will do monthly transfers no later than the 20th of each month.

4. Capital Improvement Sales Taxes

Various concerns related to the capital improvement sales taxes were identified. County voters approved two capital improvement sales taxes under Section 67.700, RSMo. In April 1992, the county passed a 1/2-cent road and bridge capital improvement sales tax. The ballot stated the sales tax would be used for "the general operating expense incurred by the Road and Bridge Fund, including but not limited to the following: road rock, salaries, fuel expense, equipment purchases, and bridges and culverts, etc." This sales tax has no expiration date. In November 2002, the county passed a 1/2-cent jail capital improvement sales tax for the purpose of constructing, furnishing, and equipping a Sheriff's office and jail. This sales tax expires December 31, 2011. For each of these sales taxes, the county collected approximately $453,000 during the 2 years ended December 31, 2010.

4.1 Road and bridge sales tax

Although it appears the county spends road and bridge capital improvement sales tax monies in accordance with ballot language, such language may not be consistent with the intent of the authorizing state law.

Section 67.700, RSMo, allows counties to impose a sales tax for any capital improvement purpose designated by the county in its ballot submitted to its voters, and requires the monies received from the sales tax be deposited in a separate fund and used solely for the designated capital improvement purpose. However, as noted above, the ballot did not specifically identify a capital improvement purpose. In addition, the county deposits road and bridge sales tax receipts into the SRB Fund and does not separately account for disbursements made from the sales tax receipts, and has not identified capital improvement projects funded with these monies. Further, the county distributes approximately 20 percent of these receipts to two special road districts; however, the county has not entered into written agreements with the districts or established a system of monitoring the districts' use of these and other monies received from the county.

The County Commission should consult with legal counsel regarding the ballot language and the county's procedures related to the road and bridge sales tax and, if necessary, implement procedures to ensure compliance with state law. In addition, written agreements, along with monitoring procedures, would help ensure monies distributed to special road districts are expended in compliance with state law and as intended by the County Commission.

4.2 Excessive capital improvement sales taxes

The county appears to have exceeded the statutory maximum for capital improvement sales taxes allowed by Section 67.700, RSMo, by 1/2 of 1 percent. In addition, Attorney General's Opinion No. 97-99, to Neel states total capital improvement sales tax rates cannot exceed 1/2 of 1 percent. The jail capital improvement sales tax will expire on December 31, 2011. At that time, the remaining road and bridge capital improvement sales tax will not exceed the statutory maximum.

County officials were unaware the county had imposed capital improvement sales taxes in excess of the maximum rate allowed by state law. This was due in part because the county does not maintain a record of the county's various sales taxes (five sales taxes were in effect at December 31, 2010). Such a record, which would assist officials in monitoring sales taxes for compliance with state law, should include the description, rate, statutory authority, effective date, and expiration date for each county sales tax. Prior to submitting any future sales taxes to voters for approval, the county should review a record of current sales taxes imposed, research the statutory requirements for current and proposed sales taxes, and ensure the sales taxes do not exceed statutory limits.

Recommendations

The County Commission:

4.1 The County Commission should consult with legal counsel regarding the ballot language and procedures related to the road and

bridge capital improvement sales tax and, if necessary, implement procedures to ensure compliance with state law. In addition, the County Commission should enter into written agreements and establish procedures to monitor the special road districts' expenditure of county monies.

4.2 Maintain and periodically review a record of all county sales taxes. In addition, prior to submitting any future sales taxes to voters for approval, the county should review the record of current sales taxes imposed, research the statutory requirements for current and proposed sales taxes, and ensure the sales taxes do not exceed statutory limits.

Auditee's Response

The County Commission provided the following written responses:

The Commission has reviewed the 2002 and 2006 audit recommendations and have not found any problems until this year's audit with capital improvement tax.

4.1 We contacted the Board of Special Road Districts. We have asked for year beginning budget and financial report. At end of year, we have requested an ending balance sheet of expenses. At beginning of each budget year, we will be revisiting the percent of reimbursement for sales tax and CART funds for the Special Road Districts.

We have spoken to the County Attorney for legal advice regarding language and procedures concerning ballot for Road and Bridge sales tax.

4.2 Due to the Jail Sales Tax expiring December 31, 2011, this shouldn't be a concern in the future.

5. County Disbursements

Concerns related to disbursements were identified.

5.1 Restricted funds

Disbursements from some restricted funds were not in compliance with state law.

- During the 2 years ended December 31, 2010, the county spent a total of $6,740 from the Election Services Fund on financial accounting software for the County Clerk's office. The County Clerk indicated this software is not used for election purposes; however, Section 115.065, RSMo, restricts the use of Election Services Fund monies to these

purposes. She also indicated the expenditure was inadvertently charged to the wrong fund.

- In 2010, the county transferred $8,400 from the Sheriff's Revolving Fund to the LE Fund to cover Sheriff's department expenses such as salaries, overtime, and equipment purchases. The 2011 county budget provides for a similar transfer of $3,100. Section 50.535, RSMo, provides Sheriff's Revolving Fund monies are to be used to process applications for concealed carry endorsements or renewals. The Sheriff indicated monies were spent from this restricted fund because the LE Fund lacked sufficient monies to cover the expenses.

5.2 Prosecuting Attorney's office expenses

The county does not have a written agreement with the Prosecuting Attorney outlining the portion of his/her expenses to be paid by the county.

The Prosecuting Attorney operates the county Prosecuting Attorney's office from his/her private law office. From 1999 to 2010, the county paid the former Prosecuting Attorney $3,600 and $2,400 per year for office and equipment rent, respectively. Beginning in 2011, the current Prosecuting Attorney pays the county $100 per month for her office located in the county-owned Keller building. The County Commission determined this rental rate based on the percentage of time she spends on her private practice. In addition, the county pays her $1,500 per year for office equipment rent, and leases a copy machine for her office. The County Commission indicated the current Prosecuting Attorney's rental rate will be reviewed as her private practice changes. In addition, the county pays the salaries of the Prosecuting Attorney's two secretaries. The former Prosecuting Attorney indicated one of his secretaries performed some private practice work, which he estimated was less than 5 percent of her time. The current Prosecuting Attorney indicated one secretary works very little for her private practice, as her private practice has not been fully developed.

The agreed-upon payments are requested and approved through the county's annual budget process. However, there is no written agreement with the Prosecuting Attorney outlining how the rent amounts and/or expenses to be paid by the county were determined. In addition, timesheets prepared by the secretaries do not document time spent on county business and private practice.

To ensure county resources are used only for county business, the county should enter into a written agreement with the Prosecuting Attorney outlining what expenses will be provided by the county and what expenses will be provided by the private practice. Section 432.070, RSMo, requires contracts of political subdivisions be in writing. In addition, the basis for the arrangements should be adequately documented and timesheets supporting time worked by Prosecuting Attorney secretaries on county business and/or

private practice should be prepared. The agreement should be updated when the arrangements and/or county/private practice caseloads change.

Recommendations

5.1 The County Commission, County Clerk, and the Sheriff ensure monies in restricted funds are spent in accordance with state law.

5.2 The County Commission enter into and periodically update written agreements with the Prosecuting Attorney, document the basis for the arrangements, and require timesheets when appropriate.

Auditee's Response

The County Commission provided the following written responses:

5.1 The Commission, Sheriff, and Clerk visited and will take under advisement and ensure monies and restricted funds will be spent according to MO Statutes.

5.2 Prosecutor will have written agreement about the outlining expenses to be paid by the county completed by July 22, 2011 and signed.

The County Clerk provided the following written response:

5.1 The County Clerk agrees with this recommendation and will ensure monies in restricted funds are spent in accordance with state statutes.

The Sheriff provided the following response:

5.1 This transfer was needed to cover Sheriff department expenses; future expenses will be covered from other sources, if available, as provided by state statute.

The Prosecuting Attorney provided the following written response:

5.2 I will work with the County Commission to develop a written agreement outlining the arrangements for payments and/or reimbursements for office expenses. My secretaries will document the time that they spend on my private practice and the time that is spent on county business. The supporting documentation will be available to the Commission when appropriate.

6. Rock and Pipe Sales

The county does not maintain complete and accurate records of all sales of rock and pipe to the public and other governmental entities and related payments. In addition, the county does not fully recover the costs associated with these materials. The county received approximately $71,500 from these sales during the 2 years ended December 31, 2010.

Although the county improved controls over rock and pipe sales in 2009, these controls continue to need improvement. In 2009, the Road and Bridge department administrative assistant began preparing invoices for these sales and receipting responsibilities were transferred from the County Clerk's office to the administrative assistant. However, the administrative assistant does not always prepare an invoice for each sale; and although she began issuing receipt slips in October 2010, she does not issue a receipt slip for each payment. In addition, pipe is sold at 2009 rates rather than the rates the county paid/would pay for the pipe when needed.

To ensure all rock and pipe sales and monies received are accounted for properly, invoices should be prepared for all sales and prenumbered receipt slips should be issued for all monies received. In addition, the County Commission should ensure charges are sufficient to ensure recovery of costs associated with the items sold.

Recommendation

The County Commission ensure invoices are prepared for all sales of rock and pipe, receipt slips are issued for all monies received, and charges are sufficient to ensure recovery of costs.

Auditee's Response

The County Commission provided the following written response:

The Commission have discussed with the Road and Bridge Supervisor and Administrative Assistant to keep inventory and invoice records on pipe and rock. Update billing and receipts will be provided to purchaser and Clerk.

7. Public Administrator Controls and Procedures

Weaknesses involving preparing and reviewing annual settlements and status reports, depositing monies, and reconciling bank accounts were identified. The Public Administrator is the court-appointed personal representative for wards or decedent estates of the Associate Circuit Court-Probate Division, and is responsible for the financial activity of approximately 65 individuals.

7.1 Annual settlements and status reports

The Associate Circuit Court has not established procedures to adequately monitor the activity of cases assigned to the Public Administrator. The Associate Circuit Court requires the Public Administrator to annually report financial activity for each case on either an annual settlement or status report, as determined by the Associate Circuit Judge. The Associate Circuit Judge reviews and approves annual settlements and status reports; however, the court does not verify the accuracy of the information contained in status reports. While the Probate Clerk reviews each annual settlement by verifying its accuracy and reviewing supporting documentation, her review of the annual status reports is limited to a review for reasonableness. Because an annual status report, rather than an annual settlement report, is required for most cases, the court has no assurance all financial activity of each ward is appropriately reported to the court for review.

Failure to adequately review and monitor the activity of cases assigned to the Public Administrator by the Associate Circuit Court increases the risk that errors or misuse of funds could go undetected.

7.2 Undeposited checks

Some checks received by the Public Administrator on behalf of wards are held for extended periods of time before deposited. Three death benefit checks totaling $17,945 received on behalf of a ward during 2010 were held for 3 weeks, 1 month, and 9 months, respectively, before deposit. Two of these checks were not reported as income/assets on the ward's annual settlement filed in March 2011. According to the Public Administrator, these types of checks are often held for future expenses so a ward's assets remain below Medicaid eligibility funds.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, receipts should be deposited timely and appropriately reported on annual settlements. In addition, Section 208.210.1, RSMo, requires recipients to notify county welfare offices if they possess property which affects their right to receive benefits. Further, Section 208.210.2, RSMo, provides that if it is found that a recipient or spouse possessed income in excess of the amount reported that would affect his right to receive benefits, the amount of benefits may be recovered as a debt due the state.

7.3 Bank reconciliations

Adequate bank reconciliation documentation is not maintained, and the Public Administrator does not review the bank reconciliations performed by her deputy. The Public Administrator indicated bank reconciliations are performed on the computer system and are not saved, and previous reconciliations are not available from the system.

To ensure bank statements are properly reconciled to accounting records, documentation should be maintained of the reconciliations performed by the deputy and reviewed by the Public Administrator.

Recommendations

7.1 The Associate Circuit Judge establish procedures to adequately monitor the activity of all cases assigned to the Public Administrator.

7.2 The Public Administrator discontinue the practice of holding checks and contact the Missouri Department of Social Services, Family Support Division, to determine whether any monies are due to the state. In addition, all monies should be deposited timely and appropriately reported on annual settlements.

7.3 The Public Administrator maintain documentation of bank reconciliations and ensure periodic reviews of bank reconciliations are performed and documented.

Auditee's Response

The Associate Circuit Judge provided the following written response:

7.1 Please be advised that the audit covers the period prior to my being sworn in to the position of Associate Judge, and that the prior Probate Clerk left her position along with my predecessor, so I cannot speak to their standards and practices.

With regard to the concern listed in the audit stating that additional financial scrutiny of annual status reports are needed, our response is as follows:

The Judge has met with the Public Administrator regarding this matter. The Public Administrator has agreed to submit the most recent bank statement as an attachment with the annual status report so the Court can verify the financial status of each ward.

It is my understanding that the Auditor's office feels that this will give an adequate safeguard against any error or misuse of funds.

The Public Administrator provided the following written responses:

7.2 This was one case I held checks to establish a trust. Although I was late reporting it to the court, I did do a settlement and got court approval. It is not my regular practice to hold checks.

7.3 My deputy is now giving me a monthly bank statement with a copy of the reconciliation attached, which I review and initial.

8. Capital Assets

As noted in the prior audit report, procedures and records to account for county property are not adequate. The County Clerk has no procedures to identify and track property purchases and dispositions throughout the year. In January 2011, the County Clerk requested and received inventory reports from all county officials and department heads. Inventory reports had not been received for several years, except for the road and bridge department which submits the reports annually. The inventory reports lacked some necessary information such as purchase dates, acquisition costs, serial numbers, and disposal information. In addition, most property was not tagged as county property until the January 2011 inventory process.

Adequate capital asset records and procedures are necessary to ensure effective internal controls, meet statutory requirements, and provide a basis for determining proper insurance coverage. Section 49.093, RSMo, provides the officer or their designee of each county department is responsible for performing annual inspections and inventories of county property used by their department and for submitting an inventory report to the County Clerk.

Recommendation

The County Commission and the County Clerk work with other county officials to ensure complete and accurate inventory records are maintained, annual physical inventories are conducted, and procedures are implemented for tracking capital asset purchases and dispositions throughout the year. In addition, all capital assets should be adequately tagged and identified as county property.

Auditee's Response

The County Commission provided the following written response:

All departments have, as of this year, started inventory. All capital assets will be tagged and identified as county property.

The County Clerk provided the following written response:

The County Commission and County Clerk agree with this recommendation. We have begun to ensure complete and accurate inventory records are maintained, annual physical inventories are conducted, and procedures have been implemented for tracking capital asset purchases and dispositions throughout the year. All capital assets are currently tagged and identified as county property.

Howard County
Organization and Statistical Information

Howard County is a county-organized, third-class county. The county seat is Fayette.

Howard County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 48 full-time employees and 23 part-time employees on December 31, 2010.

In addition, county operations include the Health Department, the Senate Bill 40 Board, and four levee districts.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2011	2010
William Lowell Eaton, Presiding Commissioner	$	25,760
Richard Conrow, Associate Commissioner		25,080
Howard McMillian, Associate Commissioner		25,080
Charles J. Flaspohler, Circuit Clerk and Ex Officio Recorder of Deeds (1)		
Kathyrne Harper, County Clerk		36,000
Mason R. Gebhardt, Prosecuting Attorney		43,000
Charlie Polson, Sheriff		42,000
Susan Keyton, County Treasurer		36,000
Frank Flaspohler, County Coroner		11,000
Marsha Davis, Public Administrator		38,000
Sharon Himmelberg, County Collector (2), year ended February 28,	42,052	
John (Woody) McCutcheon, County Assessor, year ended August 31,		38,000
Gene Bowen, County Surveyor (3)		

(1) Compensation is paid by the state.

(2) Includes $6,052 of commissions earned for collecting city property taxes.

(3) Compensation on a fee basis.

Financing Arrangements

The county entered into a lease purchase agreement with United Missouri Bank on March 28, 2003. The terms of the agreement called for the county to lease the Howard County Law Enforcement Center to United Missouri Bank, then the bank leases the law enforcement center back to the county with lease payments equal to the amount due to retire the indebtedness. Certificates of Participation totaling $1,725,000 were issued by United Missouri Bank on behalf of the county and the proceeds of those certificates were used to construct the law enforcement center. The lease is scheduled to be paid off in January 2012. The remaining principal and interest due on the lease at December 31, 2010, totaled $430,000. Funding for these obligations is provided by a 1/2-cent capital improvement sales tax which expires December 31, 2011.

The county entered into two energy efficiency loan agreements with the Missouri Department of Natural Resources (DNR) to finance major repairs at the courthouse and the Keller Building. In July 2008, the DNR issued a 16-year loan, in the amount of $49,336 with a 4.1 percent interest rate, for courthouse and Keller Building repairs. The remaining principal due on the loan at December 31, 2010, was $42,210. In August 2010, the DNR authorized a 6 1/2-year loan up to $60,000, with a 0 percent interest rate, for Keller Building repairs. As of June 2011, the county had borrowed $49,809 and made no principal payments on the second loan.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

According to county personnel, the county was awarded the following American Recovery and Reinvestment Act of 2009 (ARRA) funding during the 2 years ended December 31, 2010:

An ARRA - Energy Efficiency and Conservation Block Grant was awarded by the U.S. Department of Energy to the DNR. Through this grant, the DNR awarded a grant in the amount of $91,031 to Howard County in March 2010 to replace the Keller Building heating and cooling systems. As of December 31, 2010, the county had not received or spent any of these grant funds.

A Homelessness Prevention and Rapid Re-housing Program grant was awarded by the U.S. Department of Housing and Urban Development to the Missouri Department of Social Services and $28,446 was passed through to Howard County and spent during the year ended December 31, 2010. This program provides homelessness prevention assistance to households that would otherwise become homeless and rapid re-housing assistance to persons who are homeless.

A Recovery Act - Assistance to Rural Law Enforcement to Combat Crime and Drugs Competitive Grant was awarded by the U.S. Department of Justice to the Missouri Department of Public Safety (DPS). Through this grant, the DPS reimbursed Howard County for overtime payments to law enforcement officers working criminal cases. During the year ended

December 31, 2010, $4,039 was expended toward the overtime costs for Howard County Sheriff deputies and $391 was received by the county related to this grant.

A Recovery Act: Edward Byrne Memorial Justice Assistance Grant was awarded by the U.S. Department of Justice to the DPS and $9,226 was passed through to Howard County and spent during the year ended December 31, 2009, to replace lightbars on Sheriff's department vehicles.

An ARRA - Immunization grant was awarded by the U.S. Department of Health and Human Services to the Missouri Department of Health and Senior Services (DHSS). Through this grant, during the year ended December 31, 2010, the DHSS provided the Howard County Health Department DTaP vaccines and $1,425 for administration of the vaccines to school children.

Thirty-Fourth Judicial Circuit

City of Howardville Municipal Division

August 2011

Report No. 2011-39

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Thirty-Fourth Judicial Circuit, City of Howardville Municipal Division

Accounting Controls and Procedures

The audit identified significant weaknesses with the municipal division's accounting controls and procedures, making it difficult to ensure that all receipts are deposited and accounted for properly. Accounting duties are not segregated. The Court Clerk performs all accounting duties without adequate supervision or review, and accountability over receipts is inadequate.

Receipts are not recorded on a cash control ledger, receipt slips are not always issued in numerical order, method of payment is not always noted, and procedures for voiding receipt slips need improvement. The municipal division's practices do not meet the requirements of the Missouri Municipal Clerk Manual, and there is no assurance all monies received are properly deposited.

Receipts are not deposited timely and intact, and checks and money orders are not restrictively endorsed until the deposit is prepared. The municipal division collected $267.50 that does not appear to have been deposited.

For 68 percent (44 out of 65) of the violations we reviewed, fines and court costs collected did not agree with the amounts authorized by the violations bureau schedule, mainly because no court costs were collected in the majority of these cases. The final disposition of some cases was not documented on the dockets as required by state law, and the Municipal Judge does not always sign the court dockets after case dispositions are recorded.

Partial payments received and balances due are not accounted for or followed-up on properly. The municipal division is collecting a Law Enforcement Training fee; however, the city has not passed an ordinance authorizing this fee. Fines and court costs are not disbursed to the city at least monthly, as required by state law. As of February 28, 2011, the municipal division bank account contained $18,700, most of which should be disbursed to the city.

The municipal division does not perform monthly bank account reconciliations and does not identify or reconcile month-end liabilities. The bank signature card for the municipal division bank account only listed the former City Clerk who resigned in 2010. Bank signature cards need to be updated in a timely manner.

Records and Reports	Some municipal division records for periods prior to October 2009, could not be located, including case files, dockets, and most financial records. Moreover, 45 percent (17 out of 38) of the traffic tickets dated after October 2009 selected for review could not be located. The lack of records makes it impossible to confirm whether traffic tickets and court cases were processed and accounted for properly. Missouri Supreme Court Operating Rule 8.04.6 requires municipal divisions to retain all case file records, which is essential for establishing accountability and demonstrating compliance with state law. The municipal division has not always filed accurate and timely monthly summary reports of cases heard in court, including fines and court costs collected, as required by state law.
Ticket Accountability	Neither the police department nor the municipal division adequately accounts for the numerical sequence of traffic tickets issued. Our review of the 200 tickets assigned to the police department during the audit period revealed 42 could not be located. Because tickets are not adequately tracked by number and ultimate disposition, the municipal division cannot be sure all tickets assigned and issued are properly submitted or voided.
Court Clerk Trainer	The Board of Aldermen authorized an individual to help train a temporary court clerk and perform certain duties, such as preparing deposit slips and requesting the city disburse Law Enforcement Training fees to the state. This individual was allowed access to municipal division assets and court records without the knowledge and authority of the Municipal Judge and without being bonded. To reduce the risk of loss or misuse of funds, all persons with access to court assets should be bonded, and to protect confidential court records, individuals should not be given access to court records without authorization from the Municipal Judge.

In the areas audited, the overall performance of this entity was **Poor**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The Thirty-Fourth Judicial Circuit, City of Howardville Municipal Division, did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 12

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Thirty-Fourth Judicial Circuit
and
Municipal Judge
Howardville, Missouri

We have audited certain operations of the City of Howardville Municipal Division of the Thirty-Fourth Judicial Circuit in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2010. The objectives of our audit were to:

1. Evaluate the municipal division's internal controls over significant financial functions.

2. Evaluate the municipal division's compliance with certain legal provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the municipal division, as well as certain external parties; and testing selected transactions. The municipal division could not locate or provide us any financial or other records related to transactions conducted prior to October 2009. In addition, some court cases filed and citations issued by the City of Howardville Police Department subsequent to October 2009 could not be located by the municipal division. Because of this limitation on the scope of our audit, we could not audit those transactions or information related to the transactions.

We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

Except as discussed in the second paragraph, we conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) deficiencies in internal controls and (2) noncompliance with legal provisions. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Howardville Municipal Division of the Thirty-Fourth Judicial Circuit.

A petition audit of the City of Howardville, fulfilling our obligations under Section 29.230, RSMo, is still in process, and any additional findings and recommendations will be included in the subsequent report.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Mark Ruether, CPA
In-Charge Auditor:	Heather R. Stiles, MBA, CPA

1. Accounting Controls and Procedures

Significant weaknesses were identified with accounting controls and procedures of the municipal division. As a result, there is little assurance all municipal division receipts were deposited and accounted for properly.

1.1 Segregation of duties

Accounting duties are not segregated. The Court Clerk performs all accounting duties, including receiving, recording, depositing, disbursing, and reconciling court receipts. Neither the Municipal Judge nor other city personnel provide adequate supervision or review of the work performed by the Court Clerk.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls could be improved by segregating duties to the extent possible. If proper segregation of duties is not possible, there should be documented independent reviews of the municipal division records.

1.2 Receipt procedures

Accountability over municipal division receipts is inadequate.

- Receipts are not recorded on a cash control ledger, and receipt slips were not always issued in numerical sequence. As a result, the municipal division does not account for the numerical sequence of receipt slips.

- The method of payment (i.e., cash, check, or money order) and case number or ticket number were not always recorded on the receipt slips issued.

- Procedures to void receipt slips need improvement. In one instance, four receipt slips were issued to the same defendant within 3 days for the same amount for the same court case. While the defendant confirmed to us that he only paid the court once, only two of the receipt slips were physically voided. Additionally, the original copies of some voided receipt slips were not retained.

Without proper receipt procedures, there is little assurance all receipts are accounted for properly and deposited intact. The Missouri Municipal Clerk Manual, Chapter Four - Financial Procedures, requires pre-numbered receipt slips for all payments received which include the date, case number, name of person making the payment, amount received, type of payment, and initials of the person receiving the payment. The manual also requires the receipt information including the receipt slip number be recorded on a cash control ledger and the individual case file to provide adequate supporting documentation and a proper audit trail. Proper accounting for the numerical

sequence of receipt slips and retaining original copies of voided receipt slips provides better controls over receipts.

1.3 Deposit procedures

Receipts totaling $267.50 could not be traced to deposits. In addition, receipts are not deposited timely or intact, the composition of receipts is not reconciled to the composition of bank deposits, and checks and money orders are not restrictively endorsed until the deposit is prepared.

During October 2009, $170 of cash received could not be traced to specific deposits. These cash receipts were recorded on October 5 ($70) and October 13 ($100) and court personnel could not explain why these receipts could not be traced to deposits. Additionally, on March 2, 2010, a court receipt slip was issued for a money order for $97.50; however, the deposit of this money order could not be traced into the court's bank account.

Deposits are generally made one to three times per month while receipts are generally received throughout the month. Also, in December 2010, following the resignation of the Court Clerk on December 6, 2010, no additional court receipts were deposited until a deposit was made on January 4, 2011. This deposit was for $4,098 which included court monies received in the month of December 2010.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, all monies should be deposited intact, on a timely basis, and checks and money orders should be restrictively endorsed immediately upon receipt. Additionally, to ensure all receipts are properly recorded and deposited intact, receipt slips included in each deposit should be documented and the composition of receipt slips issued should be reconciled to the deposit. The municipal division should investigate the monies which could not be traced to deposits and take appropriate action.

1.4 Case disposition

Fines and court costs collected did not agree with the amounts authorized by the violations bureau (VB) schedule for 44 of 65 violations reviewed. For 31 of these 44 violations, only the fine amount and no court costs were collected. In addition, it is municipal division procedure to document the final disposition of all cases on the court dockets, including cases handled through the VB; however, the final disposition of some cases was not documented on the dockets, and the Municipal Judge does not always sign the court dockets after case dispositions are recorded. As a result, there is less assurance fines and court costs are properly handled and deposited.

Section 479.070, RSMo, requires the proceeding for every case commenced before the municipal division to be entered on the docket. Accurate recording of the case disposition is necessary to ensure all fines and court costs have been properly collected and deposited. In addition, procedures to ensure amounts collected through the VB agree to the schedule approved by

the Municipal Judge are necessary to ensure the proper amount of fines and court costs are collected.

1.5 Accounts receivable

Procedures to properly account for partial payments received and balances due need improvement. Monthly court dockets did not always contain a list of cases with amounts owed to the municipal division as required by court policy. Defendants are allowed to pay fines and court costs over time after signing a payment agreement form, and the Court Clerk keeps track of these payments on the cover of each case file.

To ensure proper follow up on amounts due to the court, all cases with amounts due should be included on the monthly court dockets.

1.6 Law enforcement training fees

The city has not established an ordinance authorizing the collection of the Law Enforcement Training (LET) surcharge. The municipal division assesses and collects a $2 surcharge for LET for each municipal ordinance violation to pay for training of law enforcement personnel employed or appointed by the city.

Section 488.5336.1, RSMo, provides that municipal divisions may collect the LET surcharge if authorized by the city government. To ensure compliance with state law, applicable court fees should be established by city ordinance.

1.7 Fines and court costs

The municipal division does not regularly disburse fines and court costs deposited in the court bank account. As of February 28, 2011, approximately $18,700 remained in the court bank account, the majority of which represents fines and court costs not remitted to the city. Since the current municipal division bank account was opened in October 2009, only two disbursements to the city totaling $11,022 have been made.

The lack of monthly disbursements of fines and court costs deprives the city of the use of these funds. Section 479.080, RSMo, requires the municipal division disburse fines and court costs to the city at least monthly.

1.8 Bank reconciliations

The municipal division does not prepare bank reconciliations for the division bank account or maintain a balance in the check register. In addition, month-end liabilities are not identified or reconciled to the division bank account balance.

Monthly bank reconciliations are necessary to ensure bank activity and accounting records are in agreement and to detect and correct errors in a timely manner. An accurate check register balance is necessary to facilitate reconciliation with bank account balances. In addition, liabilities should be identified at each month-end and reconciled to the bank account balance to ensure accounting records are in balance and monies held in trust are

sufficient to meet the payment of all liabilities. Such reconciliations would allow for prompt detection of errors.

1.9 Bank signature card

The municipal division has not adequately updated the bank signature card. The signature card as of March 16, 2011, only lists the former Court Clerk who resigned in December 2010. Failure to remove a prior employee's name from bank records in a timely manner could increase the possibility of misuse of funds. To protect court assets, the signature card should be updated to include only those individuals authorized to conduct municipal division business.

Recommendations

The City of Howardville Municipal Division:

1.1 Ensure there are documented periodic reviews of municipal division records by the Municipal Judge or city personnel independent of the accounting functions.

1.2 Issue official pre-numbered receipt slips for all monies received in numerical sequence, and ensure the method of payment is accurately recorded on each receipt slip. The municipal division should maintain a cash control ledger and periodically account for the numerical sequence of receipt slips issued. Also, the original copies of voided receipts should be properly defaced and retained.

1.3 Deposit all monies received intact in a timely manner and ensure all checks and money orders are restrictively endorsed immediately upon receipt. The composition of receipt slips should be reconciled to the composition of deposits. In addition, the municipal division should investigate the receipts not deposited in October 2009 and March 2010 and take appropriate action.

1.4 Collect the proper amount of fines and court costs in accordance with the VB schedule. Additionally, the court dockets should include the proper disposition of all cases and be signed by the Municipal Judge.

1.5 Ensure all cases with amounts due are included on monthly court dockets.

1.6 Request the city Board of Aldermen establish an ordinance authorizing the collection of the Law Enforcement Training surcharge.

1.7 Disburse all fines and court costs due to the city monthly in accordance with state law.

1.8 Maintain a current balance in the check register and prepare monthly bank reconciliations. In addition, month-end liabilities should be identified and reconciled to the bank account balance. Any differences should be investigated.

1.9 Update the bank signature card on a timely basis to include only those individuals currently authorized to sign checks.

Auditee's Response

The Municipal Judge provided the following written response:

A new Court Clerk has been hired and the State Auditor's recommendations have been implemented or will be implemented.

1.1 The City Clerk is now performing an independent review and signing applicable court accounting records.

1.2 This has already been implemented.

1.3 Deposits are now made intact daily or when at least $100 is received, and checks and money orders are restrictively endorsed immediately. Due to the significant turnover in court clerks, it may not be feasible to determine the cause of the discrepancies noted in October 2009 and March 2010.

1.4 This has been corrected.

1.5 A show cause docket is now prepared for each court date which lists all defendants who owe money to the court.

1.6 The Mayor has indicated the city recently passed an ordinance authorizing the collection of the LET fee.

1.7 We have recently distributed the balance of fines and court costs to the city and will make monthly disbursements to the city.

1.8 This will be implemented.

1.9 The Judge and the Mayor will be the only two individuals on the bank signature card.

2. Records and Reports

Records prior to October 2009 have not been maintained by the municipal division, and some court case files subsequent to that time could not be located. As a result, we could not audit some municipal division transactions. In addition, monthly reports of court activity were not accurate and were not filed with the city as required by state law.

2.1 Missing records

Some records related to municipal division activities pertaining to periods prior to October 2009, could not be located, including case files, dockets, and most financial records. The municipal division was shut down in 2003 and reestablished in August 2008. City personnel indicated from August 2008 to October 2009, fines and court costs received were recorded on city receipt slips and deposited into a city bank account. While city receipt slips and deposit records prior to October 2009 were retained, the municipal division could not locate court records, such as court dockets, traffic tickets issued, and court case files, to support these amounts deposited. Additionally, there are no records of any amounts being disbursed to the state for court fees collected for Crime Victims Compensation (CVC) and Peace Officer Standards Training (POST) prior to October 2009.

In addition, case files could not be located for some traffic tickets issued subsequent to October 2009. The municipal division could not locate copies of traffic tickets or related case files for 17 of 38 (45 percent) traffic tickets selected for review. As a result, the ultimate disposition of each ticket cannot be adequately tracked nor can tickets be accounted for properly.

Because these records could not be located, neither the municipal division nor the city has reasonable assurance that all traffic tickets and other court cases were processed by the division and accounted for properly. There is also no assurance that all fines and court costs received by the city or court were recorded and accounted for properly.

Missouri Supreme Court Operating Rule 8.04.6 requires municipal divisions to retain all case file records. Retention of municipal records is essential to establish accountability of division activity and in demonstrating compliance with state law.

2.2 Monthly reports

Municipal division summary reports were not always prepared timely, were not always accurate, and were not filed with the city. Reports are required to be prepared monthly and include caseload information, warrant information, and amount collected for each type of fine or court cost. Collection amounts on these reports did not always agree to court receipt slips and deposits, and some reports were prepared and filed with the Office of State Courts Administrator (OSCA) more than 30 days after the end of the reporting period.

Section 479.080, RSMo, requires the court to prepare and file with the city a monthly list of all cases heard in court, including fines and court costs collected. Missouri Supreme Court Operating Rule 4.29 allows the municipal division to submit the monthly summary report to the city to fulfill this requirement. Accurate reports are necessary to ensure the proper amount of fines and court costs are reported to OSCA and to the city.

Recommendations

The City of Howardville Municipal Division:

2.1 Maintain all court records, including case files for each traffic ticket filed, in accordance with court operating rules.

2.2 Ensure accurate municipal division summary reports are completed and filed with the city and OSCA as required by state law and court rule.

Auditee's Response

The Municipal Judge provided the following written response:

2.1 All court case files and traffic tickets are now being retained.

2.2 This has been implemented.

3. Ticket Accountability

The police department and municipal division do not adequately account for the numerical sequence of traffic tickets issued. The municipal division maintains a log of traffic ticket books assigned to officers; however, a log or list of all tickets issued or voided by the police department is not maintained. City records indicate a total of 200 tickets were assigned to the police department during the year ended June 30, 2010, and our review noted 42 of these 200 tickets could not be located by the municipal division or the Howardville Police Department.

Without properly accounting for the numerical sequence and ultimate disposition of tickets issued, the police department and the municipal division cannot be assured all tickets issued were properly submitted for processing. A record should be maintained accounting for the ultimate disposition of each ticket assigned to police officers to ensure all tickets have been accounted for properly and to decrease the risk of loss, misuse, or theft of funds.

Recommendation

The City of Howardville Municipal Division work with the police department to ensure the numerical sequence and ultimate disposition of all tickets issued are accounted for properly.

Auditee's Response

The Municipal Judge provided the following written response:

The city's new Police Chief is now retaining copies of all traffic tickets and submitting them to the court.

4. Court Clerk Trainer

An individual was allowed access to municipal division assets and court records without the knowledge and authority of the Municipal Judge, and without being properly bonded.

In October 2009, the Board of Aldermen authorized this individual to help train a temporary court clerk and this arrangement continued into December 2009 when another new court clerk was hired. There was no compensation involved with this arrangement.

Since October 2009, this individual has periodically performed duties such as issuing receipt slips, preparing deposit slips, preparing and submitting monthly summary reports to OSCA, and requesting the city disburse LET and CVC fees to the state. Some of these duties continued to be performed after June 2010 despite a city board decision to terminate the arrangement at that time. The Municipal Judge indicated he was never contacted by city officials regarding the training arrangement and was not aware this individual was allowed to handle court monies or access court records. Additionally, this individual was not bonded.

Failure to bond all persons with access to court assets increases the risk of loss or misuse of funds. In addition, allowing an individual access to court records without approval of the Municipal Judge could result in unauthorized access to confidential court records.

Recommendation

The Municipal Division work with the Board of Aldermen to ensure all individuals with access to court assets and records are bonded and authorized by the Municipal Judge.

Auditee's Response

The Municipal Judge provided the following written response:

I did not authorize this individual to access court assets or records. The current Court Clerk is the only person (besides myself) authorized to handle court assets and records.

Thirty-Fourth Judicial Circuit
City of Howardville Municipal Division
Organization and Statistical Information

The City of Howardville Municipal Division is in the Thirty-Fourth Judicial Circuit, which consists of New Madrid and Pemiscot Counties. The Honorable Fred Copeland serves as Presiding Judge.

The municipal division is governed by Chapter 479, RSMo, and by Supreme Court Rule No. 37. Supreme Court Rule No. 37.49 provides that each municipal division may establish a violation bureau in which fines and costs are collected at times other than during court and transmitted to the city treasury.

Personnel

At June 30, 2010, the municipal division employees were as follows:

Title	Name
Municipal Judge	Phillip Santie
Court Clerk (1)	Vacant

(1) Latosha Maxwell resigned as Court Clerk in June 2010. Valleria Austin started as Court Clerk in August 2010. She resigned in December 2010. As of March 2011, the court clerk position remains vacant.

Financial and Caseload Information

	Year Ended June 30, 2010
Receipts	$14,373
Number of cases filed	167

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The Thirty-Fourth Judicial Circuit, City of Howardville Municipal Division, did not receive any federal stimulus monies during the year ended June 30, 2010.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Mental Health Commission
and
Keith Schaefer, Ed.D., Director
Department of Mental Health
Jefferson City, Missouri

We have conducted follow-up work pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program on certain audit report findings contained in Report No. 2010-167, *Department of Mental Health, Office of Director,* issued in December 2010. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the department about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has begun to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the department, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. We reviewed documents and other evidence indicating the level of implementation for each recommendation reviewed.

As part of the AFTER work conducted, we obtained a cost analysis prepared by the department related to the use of overtime, interviewed Department of Mental Health (DMH) officials concerning changes in overtime and compensatory time policies, received data related to complaint investigations and preliminary reports, and discussed with DMH officials monitoring of a service contract. This report is a summary of the results of this follow-up work, which was substantially completed during April 2011.

Thomas A. Schweich
State Auditor

2.1 Overtime

Neither the Department of Mental Health (DMH) nor its operating facilities had established policies to limit the amount of overtime an employee is allowed to work. As a result, some DMH facility employees worked excessive amounts of overtime.

For the 3 years ended June 30, 2010, the DMH paid employees approximately $47.8 million in overtime department-wide. During calendar year 2009, we noted over 40 habilitation center employees that received overtime in excess of, and in addition to, their regular pay. From January 1, 2008, to June 30, 2010, the DMH paid approximately $10.2 million in overtime to 527 employees whose paid overtime was 50 percent or more of their regular salary.

Neither the DMH central office nor its facilities had performed cost analyses or studies to determine whether hiring additional employees would be more cost effective than paying significant amounts of overtime to existing staff.

Recommendation

The DMH establish a policy to limit the amount of overtime an employee is allowed to work. In addition, a cost analysis should be performed to determine whether hiring additional employees would be more cost effective than paying significant amounts of overtime to existing staff.

Status

In Progress

The DMH, Division of Developmental Disabilities (DD) established a policy in December 2010 to limit the amount of overtime per employee to 24 hours per pay period unless approved by a superintendent or his/her designee. Additionally, DD established a real-time tracking system to document the amount of overtime hours each employee worked each pay period in order to assist in employee scheduling. The new policy requires facility human resources officials to review the number of overtime hours worked each pay period to ensure the 24-hour requirement is met.

DD has not fully implemented this new policy, and further efforts are needed to ensure all facilities are in compliance with the policy. However, records indicated at least one facility had made significant improvements in staff overtime.

The DMH, Division of Comprehensive Psychiatric Services (CPS) implemented an overtime policy in April 2011 that limits the amount of overtime an employee can work to (1) no more than 16 hours in a rolling 24-hour period; (2) no more than 32 hours overtime in any 7 consecutive day period; (3) no more than 40 hours overtime in any given pay period; (4) no more than 40 hours of either regular or overtime work across 3 consecutive days. DMH officials said CPS is working with information technology staff to modify the division's time and attendance system so that

the overtime hours worked could be used with the division's scheduling system to improve monitoring of employee overtime.

Department officials performed a cost analysis of overtime payments and concluded that cost effective use of overtime saves the department more than $2 million annually versus hiring additional employees.

2.2 Compensatory time balances

Section 105.935, RSMo, provides that at the beginning of each calendar year nonexempt direct care state employees are to be paid for any overtime hours earned and accrued under the Fair Labor Standards Act from the previous calendar year, though employees have the option of retaining up to 80 hours of compensatory time at year end.

In January 2010, we identified 153 nonexempt direct care employees in excess of the 80-hour limit.

Recommendation

The DMH ensure that overtime payment and accrued compensatory balance policies are in compliance with state law.

Status

Implemented

DMH officials indicated the department policy has been revised to align with Section 105.935, RSMo. Employees may now only retain up to 80 hours of overtime. Officials will work to ensure that employees whose compensatory time balances are currently above the 80 hour limit are reduced by June 30, 2011.

3.1 Complaint investigations - initial inquiry

Initial complaint investigation inquiries were not always completed timely by the Investigations Unit.

A review of 25 randomly selected investigations disclosed the initial inquiry into 4 (16 percent) of these complaints had not met the DMH 10 work-day criteria for timeliness. Regional offices provided good cause for only two of the exceptions.

Recommendation

The DMH ensure that initial complaint inquiries are completed within timeframes established by DMH regulations. If additional time is needed to complete the inquiry, any extension should be approved and adequately documented.

Status

Implemented

Both the CPS and DD divisions at the central office have reemphasized to regional office staff the DMH policy requirements concerning initial inquiries into investigations. The DD division has begun monitoring regional office compliance with the timeliness of initial inquiries. In

addition, DMH officials said an authorization field has been added to the investigation tracking system to document approval of justifiable reasons for extended time to complete the initial inquiry.

3.2 Initiation of investigations

While significant improvements have been noted, the Investigations Unit did not always start investigations in a timely manner as defined by criteria established by that unit.

Delayed investigations may make it more difficult to determine whether an incident or violation actually occurred.

Recommendation

The investigations unit continue recent improvements in starting complaint investigations in a timely manner.

Status

Implemented

DMH officials indicated a continued emphasis on the timeliness of the initiation of an investigation. Additionally, "dash board" notifications have been added to the DMH monitoring system identifying late investigations. As a result, the fiscal year 2011 compliance rate increased to 99.8 percent.

3.3 Preliminary reports

Generally, investigations are expected to be completed within 30 working days after the investigation is initiated. Investigators may be granted additional time to complete the investigations. Our review of 25 investigations noted 2 instances where a preliminary report was issued and additional time was granted for the completion of a final report. However, in both of these instances, the investigations were not completed within the time of the extension granted.

Department Operating Regulation 2.205 allows the assigned investigator 30 working days to complete an investigative report. If the report cannot be completed within this period of time, a preliminary report may be completed along with a notice of additional time needed to complete the report. The preliminary report shall include a statement of findings acquired during the period of the preliminary investigation, the reason for the need of additional time and the proposed completion date.

Recommendation

The DMH ensure, for investigations with preliminary investigation reports, the Investigation Unit require investigators to meet revised completions dates or request an additional extension.

Status

Implemented

The Investigations Unit has established a new policy requiring more documentation concerning preliminary reports and now requires a new

proposed completion date be established when the initial proposed completion date is not met.

4. Monitoring of BRIDGES program contract

The department did not adequately monitor a service contract involving expenditures in excess of $320,000 during the 3 years ended June 30, 2010.

CPS did not properly monitor this contract to ensure contract requirements were met or applicable services were actually provided.

Recommendation

The DMH properly monitor service contracts to ensure the documentation required by contract provisions is submitted and reviewed, and the applicable services have been properly provided to consumers. The DMH should also determine whether benefits obtained continue to justify the related expenditures of service contracts.

Status

Implemented

DMH officials indicated a CPS employee has been assigned to specifically monitor all expense and equipment contracts for compliance. In addition, DMH officials indicated CPS staff reviewed the contract for compliance with key provisions and, as a result of this review, division officials are considering contract modifications.

Thomas A. Schweich

Missouri State Auditor

OFFICE OF ATTORNEY GENERAL

Medicaid Fraud Control Unit

July 2011

Report No. 2011-37

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Office of Attorney General, Medicaid Fraud Control Unit

Background

The Medicaid Fraud Control Unit was created in 1994. It investigates and prosecutes Medicaid fraud by health care providers and reviews complaints of abuse or neglect of nursing home residents. Section 191.909.1, RSMo, requires the Attorney General's office to annually report certain activities related to the Medicaid Fraud Control Unit.

Audit Findings

The state auditor is required to conduct an audit to determine the amount of money invested in the unit and the amount of money actually received by the unit. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2010. The Medicaid Fraud Control Unit collected almost $39 million and $80 million in 2010 and 2009, respectively. No findings resulted from our audit.

In the areas audited, the overall performance of this entity was **Excellent**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Medicaid Fraud Control Unit did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

State Auditor's Report 2

Introduction
Background 4
Scope and Methodology 4

Organization and Statistical Information 6

Appendixes

A Recoveries - 2 Years Ended December 31, 2010 8
B Operating Costs - 2 Years Ended December 31, 2010 9

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly
and
Honorable Chris Koster, Attorney General
Jefferson City, Missouri

We have audited certain operations of the Office of Attorney General, Medicaid Fraud Control Unit, as required by Section 191.909.1, RSMo. The objectives of our audit were to:

1. Determine the amount of money recovered by the unit.

2. Determine the amount of money invested in the unit.

3. Evaluate the unit's compliance with certain legal provisions.

Our audit determined the amount of money recovered by and invested in the unit, and reported those amounts in Appendixes A and B. In addition, for the areas audited, we identified no significant noncompliance with legal provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the office's management and, other than Appendixes A and B, was not subject to the procedures applied in our audit of the Medicaid Fraud Control Unit.

No findings resulted from our audit of the Office of Attorney General, Medicaid Fraud Control Unit.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Douglas Porting, CPA, CFE
Audit Manager:	Toni Crabtree, CPA
In-Charge Auditor:	Terri Erwin, MBA, CGAP
Audit Staff:	Gina Henley

Office of Attorney General
Medicaid Fraud Control Unit
Introduction

Background

Starting in 2008, pursuant to Section 191.909.1, RSMo, the Attorney General's office is to report annually, by January 1 of each year, the following activities related to the Medicaid Fraud Control Unit (MFCU):

"(1) The number of provider investigations due to allegations of violations under sections 191.900 to 191.910 conducted by the attorney general's office and completed within the reporting year, including the age and type of cases;

(2) The number of referrals due to allegations of violations under sections 191.900 to 191.910 received by the attorney general's office;

(3) The total amount of overpayments identified as the result of completed investigations;

(4) The amount of fines and restitutions ordered to be reimbursed, with a delineation between amounts the provider has been ordered to repay, including whether or not such repayment will be completed in a lump sum payment or installment payments, and any adjustments or deductions ordered to future provider payments;

(5) The total amount of monetary recovery as the result of completed investigations;

(6) The total number of arrests, indictments, and convictions as the result of completed investigations."

Additionally, the state auditor is required to conduct an audit of the MFCU ". . . to quantitatively determine the amount of money invested in the unit and the amount of money actually recovered by such office."

Scope and Methodology

The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2010.

Our methodology included conducting interviews with appropriate MFCU and Department of Social Services (DSS) personnel; reviewing written policies and procedures; obtaining and reviewing the MFCU annual report for the years ended December 31, 2010 and 2009; reviewing applicable state law and MFCU records; and testing of certain transactions.

We obtained an understanding of internal controls that were significant within the context of the audit objectives and assessed whether such controls had been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that

were significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

To determine the amount of monies recovered by and invested in the unit, we compared the annual report information to the revenues and expenditures recorded in the state accounting system (SAM II), and to supporting documentation. We ensured the annual report included all amounts and information required by Section 191.909.1, RSMo, and compared the amounts and information to supporting documentation to ensure the report was complete and accurate. We also tested the amounts and information in the case files to ensure MFCU supporting documentation was complete and accurate.

Office of Attorney General
Medicaid Fraud Control Unit
Organization and Statistical Information

The Attorney General's office is located in Jefferson City. There are branch offices in Kansas City, St. Louis, Springfield, and Cape Girardeau. The office is organized into nine divisions: Agriculture and Environment; Consumer Protection; Civil, Disability and Workers' Rights; Criminal; Financial Services; Governmental Affairs; Labor; Litigation; and Public Safety. Each division is headed by a chief counsel who is responsible for the operations of the division.

The Medicaid Fraud Control Unit (MFCU) is organizationally located within the Public Safety Division, and was created in 1994.

The MFCU conducts a statewide program for the investigation and prosecution of health care providers that defraud the Medicaid program. Additionally, the MFCU reviews complaints of abuse or neglect of nursing home residents and may review complaints of the misappropriation of patients' private funds in these facilities. The MFCU is also charged with investigating fraud in the administration of the Medicaid program and providing for the collection or referral for collection to the state Medicaid agency, the Department of Social Services (DSS). Referrals are received from the DSS Program Integrity Unit and Investigations Unit, other state agencies, and federal agencies. Additionally, the MFCU initiates its own investigations.

The MFCU operates under the administration oversight of the Office of Inspector General (OIG) of the U.S. Department of Health and Human Services (HHS), and must be recertified annually by the OIG. To receive certification, the MFCU must be separate and distinct from the state Medicaid agency (DSS). Federal regulations also prohibit 1) any official from DSS from having authority to review or overrule activities of the MFCU, 2) the MFCU from receiving funds from the DSS, 3) the MFCU from pursuing recipient fraud, unless there is a conspiracy with a provider, and 4) the MFCU from engaging in the routine computer screening activities that are the usual monitoring function of the DSS. In addition, the MFCU is required to enter into a Memorandum of Understanding with the DSS which outlines each agency's responsibilities and duties to each other. An annual federal grant from HHS reimburses 75 percent of MFCU expenses, with the state paying the remaining 25 percent of expenses.

Section 191.905.11, RSMo, provides restitution monies recovered by the MFCU be deposited to the MO HealthNet Fraud Reimbursement Fund and appropriated to the federal government and affected state agency(s) to refund monies falsely obtained from the federal government and state agency(s). For federal fiscal years 2009 and 2010, monies collected were distributed between the federal government and state agency at a rate of 63.19 percent and 36.81 percent, and 64.51 percent and 35.49 percent, respectively. These rates changed in federal fiscal year 2011 to 63.29

percent and 36.71 percent, respectively. Any monies remaining in this fund after appropriation to the federal government and state agency(s) are to be used to increase the MO HealthNet provider reimbursement until it is at least 100 percent of the Medicare provider reimbursement rate for comparable services. Any cost reimbursements for the investigation and/or prosecution of the Medicaid fraud are to be deposited to the MO HealthNet Fraud Prosecution Revolving Fund. These monies may be appropriated to the Attorney General, or to any prosecuting or circuit attorney who has successfully prosecuted and been awarded such costs of prosecution.

Restitution and investigation/prosecution costs recovered by the MFCU are transmitted to the DSS, Division of Finance and Administrative Services for depositing and recording in SAM II.

At December 31, 2010, the Office of Attorney General, MFCU employed 20 full-time employees, including a director, attorneys, investigators, auditors, a programmer analyst, and secretaries.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Office of Attorney General, MFCU did not receive any federal stimulus monies during the 2 years ended December 31, 2010.

Appendix A
Recoveries - 2 Years Ended December 31, 2010

For the 2 years ended December 31, 2010, the MFCU recovered the following funds:

	Year Ended December 31,		
	2010	2009	
Federal	$ 3,061,644	62,161	(1)
State	14,397,677	50,226,979	(2)
Federal direct	21,372,374	29,586,133	(3)
Total	$ 38,831,695	79,875,273	

(1) Federal government's share of the funds recovered by the unit.

(2) State's share of the funds recovered by the unit and from multi-state cases. In 2009, the unit received a settlement in the amount of $31 million which is being held pending litigation. A portion will be subject to the federal split when resolved.

(3) This amount includes the federal government's share of multi-state settlements, which is remitted directly to the federal government by the multi-state trustee.

Appendix B
Operating Costs - 2 Years Ended December 31, 2010

For the 2 years ended December 31, 2010, the costs incurred to operate the MFCU were:

	Year Ended December 31,		
	2010	2009	
Salaries and wages	$ 801,804	875,305	
Fringe benefits	343,920	387,068	
Travel, in-state	3,718	4,783	
Travel, out-of-state	2,336	4,736	
Supplies	23,020	26,446	
Professional development	19,715	10,275	
Communication services and supplies	14,365	13,851	
Professional services	14,734	156,984	
Maintenance and repair services	15,331	15,794	
Computer equipment	108,816	9,355	
Office equipment	40,055	1,173	
Debt service	3,704	1,858	
Miscellaneous expenses	1,477	6,475	
Court costs	1,060	60,063	
Building lease payments	69,683	65,484	
Total	$ 1,463,738	1,639,650	(1)

(1) For 2010 and 2009, funding of these costs included both state monies and a federal reimbursement. The federal reimbursement for 2010 was $1,097,803, with $120,236 being indirect costs. The federal reimbursement for 2009 was $1,229,738, with $133,922 being indirect costs. The state funding for 2010 and 2009 was $365,935 and $409,912, respectively.

Thomas A. Schweich

Missouri State Auditor

City of Neosho

July 2011

Report No. 2011-36

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the City of Neosho

Financial Condition	The city's financial condition has worsened due to decreased revenues, cost overruns, real estate purchases, golf course subsidization, and a failure to adequately monitor the city's budget and cash balances. At September 30, 2009, the General Fund balance was more than $1 million negative.
Accounting Records and Budgets	The city does not maintain accurate and complete accounting records and budgets, is not performing timely bank reconciliations, and is not comparing actual receipts and expenses to budgets. The city did not always submit annual financial reports to the State Auditor's office as required by law.
Real Estate Transactions	The city sold property to the Neosho R-V School District for almost $200,000 less than its appraised value without soliciting any other bids. The city also agreed to exchange services for land without appraising the land or calculating the costs of the services to be provided. The city spent nearly $400,000 to purchase properties for additional parking, but, because it did not plan for development costs, the properties remain unused.
Civic Center	The city spent $600,000 more than planned on the renovation of the civic center and did not effectively plan how the financing would be paid. The renovation project included 47 change orders, none of which were separately bid. The city paid an individual $12,690 to promote events at the civic center without soliciting bids or ensuring contract requirements were met.
Senior Center	Because the city failed to obtain a performance bond on the senior center renovation, it spent $135,313 to compensate subcontractors when the general contractor defaulted. The city also did not have a written agreement with a general contractor as required by state law.
Procurement Procedures	The city failed to abide by its own procurement policy by not soliciting bids for several purchases. The city also did not periodically solicit proposals for services, such as golf course management and banking. Also, the city may have saved interest costs if it had used a competitive sale rather than a negotiated sale when selling certificates of participation in March 2010.
Disbursements	The city does not reconcile fuel used to fuel purchased or require mileage and fuel use logs, and records show a total fuel shortage of 1,375 gallons over a 3 month period. The Interim City Manager is allowed to use a city vehicle, but the value of commuting miles is not properly reported as compensation. The city did not always enter into written contracts and did not monitor contract compliance, so it overpaid a consultant $7,500 and did not properly bill the Neosho school district for its resource officer. Also, some contract terms were not adequate to ensure the city's needs would be met. The city spent nearly $11,000, to purchase items from a local business owned by the spouse of former Councilman/Mayor Werneke without seeking bids.

Payroll Controls and Procedures	Timesheets are not always signed and retained, and some employees are not properly compensated for overtime. The city is not properly and consistently managing the tuition reimbursement program and is not reporting reimbursements as taxable wages. Three retired employees retained city health insurance at the subsidized rate for several years after retiring.
Accounting Controls and Procedures	Accounting duties are not adequately segregated and there is no documented review of the Accounting Manager's duties or the Finance Director's wire transfer duties. Receipts are not always issued, the numerical sequence of receipts and batch numbers are not accounted for properly, and monies received are not deposited timely and intact. Business licenses are not pre-numbered and license and permit fees are not reconciled.
Utility System Controls and Procedures	Utlility revenues are used to subsidize General Fund operations, and the city increased utility rates without performing a cost analysis or rate review. The city does not reconcile gallons of water billed to gallons of water pumped, so unauthorized use or leaks could go undetected. The city also does not compare amounts billed for utilities to amounts paid and does not properly handle delinquent accounts. An independent review of any adjustments made to utility accounts is not conducted. Customer utility deposits are not reconciled to the deposit payable balance.
Meeting Minutes	Closed meeting topics were not limited to those specifically identified in the open meeting minutes and allowable under the Sunshine Law.
Capital Asset and Insurance Procedures	The city is not properly managing its capital assets and unnecessarily carried insurance on vehicles it no longer owned.

In the areas audited, the overall performance of this entity was **Poor**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The city was awarded a $7,758,719 Clean Water State Revolving Fund Grant for sewer system and wastewater treatment facility improvements, of which $4,348,772 was received and $4,789,246 was expended in fiscal year 2010. The city was also awarded a $58,640 Energy Efficiency and Conservation Block Grant for upgrades of the city wastewater treatment plant, but funds related to this grant were not received or expended in fiscal year 2010.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of City Council
City of Neosho, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the City of Neosho. We have audited certain operations of the city in fulfillment of our duties. The city engaged Davis, Lynn, and Moots, P.C., Certified Public Accountants (CPAs), to audit the city's financial statements for the year ended September 30, 2010. To minimize duplication of effort, we reviewed the report and substantiating working papers of the CPA firm for the year ended September 30, 2009, since the year ended September 30, 2010, audit had not been completed. The scope of our audit included, but was not necessarily limited to, the year ended September 30, 2010. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions.

2. Evaluate the city's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Neosho.

An additional report, 2010-102, *Fortieth Judicial Circuit, City of Neosho Municipal Division,* was issued in August 2010.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Pamela Allison Tillery, CPA
In-Charge Auditor:	Donald Troy Royer
Audit Staff:	Michelle Crawford, M. Acct.

1. Financial Condition

The General Fund is in poor financial condition because of a prolonged decline in sales tax revenues; low cash reserves resulting from real estate purchases (see MAR finding number 3); cost overruns on renovation projects (see MAR finding numbers 4 and 5); and subsidization of the golf course for several years. The city failed to monitor its budget and cash balances, and as a result, it was not aware of the severity of its financial condition. In addition, the city's financial obligations have risen significantly over the last several years. The city failed to plan how it was going to make principal and interest payments on financing obtained for renovation projects and incurred additional costs due to poor project planning and management (see MAR finding number 4 and 5); and improperly borrowed monies from restricted funds, including using water and sewer monies to finance general operations.

The General Fund balance significantly deteriorated from 2007 to 2009. General Fund revenues, expenditures, and fund balances for those years are noted below:

	Year ended September 30,		
	2009	2008	2007
Beginning fund balance	$ 776,755	1,188,181	1,508,363
Revenues	9,138,245	9,525,160	6,048,122
Expenditures	(12,001,042)	(15,710,367)	(6,956,495)
Other financing sources	1,043,386	5,773,781	588,191
Ending fund balance	$ (1,042,656)	776,755	1,188,181

Information was obtained from independent audit reports.

In addition, city records indicate the General Fund balance was ($3,412,239) as of September 30, 2010. This balance is likely inaccurate because the beginning fund balance per city records as of October 1, 2009, was $192,098 less than the audited fund balance. The city has yet to receive its independent audit report for fiscal year 2010. However, the city clearly has a very serious financial condition concern.

Financial information

The City Council does not receive and review accurate financial information which would assist in effectively monitoring cash balances and the financial condition of city funds. Accounting records and annual budgets are not accurate (see MAR finding number 2). Revenues and expenditures of the General Fund appear to have increased significantly in fiscal year 2008; however, this is misleading because the city consolidated several restricted funds into the General Fund.

Golf course subsidization

The city has historically operated its golf course at a loss, and the Golf Fund had a deficit fund balance at the end of the city's last two audited fiscal years. As a result, the General Fund is required to subsidize its operations and activities. The Golf Fund revenues, expenditures, and operating loss for the last 4 years are noted in the table below:

	2010*	2009**	2008**	2007**
Revenues	$ 509,815	502,277	481,455	481,212
Expenditures	(579,979)	(584,210)	(641,768)	(638,224)
Operating Loss	$ (70,164)	(81,933)	(160,313)	(157,012)

* Information was obtained from city records.

** Information was obtained from independent audit reports.

According to the independent audit report, the Golf Fund had a deficit fund balance of ($62,711) as of September 30, 2009. While city records indicate the Golf Fund had a fund balance of $881,812 at September 30, 2010, this fund balance is likely not accurate because the beginning fund balance per city records as of October 1, 2009, was $878,220 more than the audited fund balance at that same date. Additionally, city records indicated approximately $3.5 million of the city's debt balance is for golf course improvements and equipment. Further, the city contracts with an individual to manage the golf course (see MAR finding number 6), and has not evaluated whether these services could be provided by city employees at a lower cost to the city.

Obligations

The city's independent audit report for the year ended September 30, 2009, indicated the city inappropriately borrowed restricted monies to subsidize the General Fund as noted below, and accurate information is not available for the year ended September 30, 2010:

Fund	Amount
STAR Loan	$ 739,200
Street	451,976
Hotel/Motel Sales Tax	204,367
Economic Development Sales Tax	157,044
Tax Increment Financing (TIF)	139,027
Senior Center Sales Tax	13,652
Water and Sewer	397,473
Total	$ 2,102,739

In addition, the General Fund has significant financial obligations related to long-term debt. Financial obligations have risen significantly over the last several years. Independent audit reports show that from fiscal year 2006 to fiscal year 2009, the financial liability of the General Fund has increased approximately 229 percent from $4.8 million to $15.8 million. Most of this

increase was incurred to refinance past debt and finance renovations of the civic center and senior center through the use of Certificates of Participation (COPs). Further, the city issued additional COPs totaling $1.3 million in March 2010 (See MAR finding number 4).

Actions taken

At the recommendation of its independent auditor, the city developed a financial plan in July 2010, to address current and future cash flow issues to assist in meeting financial obligations and the repayment of restricted funds. The city also eliminated 36 jobs during the year ended September 30, 2010.

The financial plan includes approving a property tax levy rate increase from $0 to $0.4225 on real property which is expected to generate property tax receipts of approximately $401,000 in fiscal year 2011. The financial plan also includes provisions for repayment of the above restricted monies (excluding the STAR Loan Fund) over the next 5 years. In addition, the Missouri Department of Transportation has required the city to commit to the completion of airport capital projects originally funded by the STAR loan. These projects are now required to be funded by the General Fund and the General Fund is required to repay the STAR loan which was inappropriately used for general city purposes.

The city contracted with an accounting firm in April 2010 to perform General Fund cash flow projections for the next 6 years. The cash flow projections did not include the estimated property tax receipts because the levy was approved after the completion of the projections and did not include the repayment of some restricted monies noted above as these were unknown at the time. We adjusted the cash flow projections for these differences in the table below:

	Year ended September 30,					
	2010	2011	2012	2013	2014	2015
Actual/projected beginning cash balance	$ 1,892	1,052,140	125,653	(132,222)	(492,288)	(979,954)
Projected receipts	7,761,689	7,299,471	7,377,188	7,445,953	7,515,406	7,585,553
Projected disbursements	(6,813,640)	(6,069,184)	(6,227,222)	(6,414,038)	(6,606,460)	(6,804,653)
Projected COP Proceeds	1,324,285	50,000	0	0	0	0
Projected debt payments and repayment of restricted monies	(1,222,086)	(2,206,774)	(1,407,841)	(1,391,981)	(1,396,612)	(1,400,972)
Projected ending cash balance	$ 1,052,140	125,653	(132,222)	(492,288)	(979,954)	(1,600,026)

It is essential the City Council continue to address the General Fund financial condition both in the immediate- and long-term future. To improve the financial condition, the Council should review disbursements and reduce spending as much as possible, evaluate controls and management practices to ensure efficient use of city resources, and attempt to maximize all sources

of revenue. Additionally, the city should perform a cost-benefit analysis to determine whether the continued operation of the golf course is beneficial and cost-effective. Although short-term interfund transfers are sometimes necessary to overcome temporary cash flow problems, interfund transfers are not appropriate as a long-term funding mechanism. Further, to effectively monitor the available cash and financial condition, the city needs complete and accurate financial reports.

Recommendation

The Neosho City Council require accurate and timely financial reports be prepared, closely monitor the city's financial condition, and take the necessary steps to improve the financial condition of the General Fund and Golf Fund. The Council should also develop a debt policy and monitor the overall financial obligations of the city.

Auditee's Response

The Neosho City Council provided the following written response:

The City Council agrees with the recommendation of monitoring the city's financial condition and has taken steps necessary to improve the accuracy in financial reporting used for decision making by the City Council. The City Council's long-term plan is to build a 90-day reserve in the General Fund. The City Council is now requiring cash-flow projections as part of our decision making process.

The City Council concurs with the recommendation that the golf course needs to be self-supporting. While the city recognizes the importance of making the golf course self-supporting, high debt loads from past renovations/expansions and current economic conditions continue to create challenges in the short-run.

The City Council agrees with the recommendation to develop a debt policy and will take steps necessary to do so. Such a policy should work to establish specific debt limits based on the city's projected future cash flows. It should also provide criteria to determine the overall affordability of any new debt before such debt is incurred.

Starting in January 2011, the City Council began receiving the requested financial reports. The City Council will continue to monitor the delivery of timely and accurate financial information and will take all steps necessary to ensure it continues.

2. Accounting Records and Budgets

Improvement is needed in the preparation of accounting records and budgets, and with financial reporting. Accounting records are not accurate, and the City Council cannot adequately monitor the financial condition and cash balances of the city.

2.1 Accounting records

Accounting records are not maintained in a manner to allow the city to properly track and record the financial activity of restricted monies, and as a result, the accounting records maintained by the city are not accurate. State motor vehicle-related receipts; auditorium, economic development, senior center, street, street and bridge, fire, park, and drainage sales taxes; and Police Officer Standards Training (POST) and Law Enforcement Training (LET) fees are not accounted for properly. The city consolidated several of these restricted funds into the General Fund in fiscal year 2008. Until October 2010, these monies were deposited into the General Fund, and while receipts and disbursements were tracked, the balances of the restricted monies were not. Thus, while the city has taken steps to deposit current restricted receipts into separate funds, the balances of restricted funds as of September 30, 2010, have not been determined and transferred to these new restricted funds.

To be of maximum assistance to the Council and to adequately inform the public, the accounting records of the city should accurately report financial activity and account balances. Additionally, Article IV, Section 30, Missouri Constitution, requires motor vehicle-related receipts apportioned by the state of Missouri be disbursed for street related purposes only. Sections 94.577, 94.705, 321.242, and 644.032, RSMo, specify how sales tax monies are to be used and indicate these monies should be deposited into separate funds. Section 488.5336.2, RSMo, requires POST and LET fees be used only for the training of law enforcement officers.

2.2 Bank reconciliations

As of February 2011, bank reconciliations had not been performed for the master fund bank account since September 2009, and our review of the last bank reconciliation performed of the city's investment bank account for August 31, 2010, noted a difference of $121,500 between the reconciled bank balance and the general ledger balance.

Monthly bank reconciliations are necessary to ensure all accounting records balance, transactions have been properly recorded, and errors or discrepancies are detected and corrected on a timely basis. Complete documentation of the reconciliations should be maintained to support conclusions and corrections, and to facilitate independent reviews.

2.3 Budgets

The 2011 and 2010 fiscal year budgets were not accurate and complete. The budgets did not include the beginning and estimated ending cash balances, and actual receipts and disbursements for the preceding year. Because the city did not include beginning and estimated ending cash balances on the

budget, the city cannot determine whether it is budgeting a deficit balance. The Council indicated various information was not included in the budgets because it was not accurate.

A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific financial expectations for each area of city operations and provides a means to effectively monitor actual costs and receipts. Sections 67.010 to 67.040, RSMo, establish specific guidelines as to the format and approval of the annual operating budget. Further, Section 67.010, RSMo, prohibits municipalities from budgeting a deficit balance.

2.4 Monitoring of budgets

The Council has not developed a process to monitor budget to actual receipts and disbursements. A report of budgeted and year-to-date actual receipts and disbursements is not prepared and reviewed by the Council. To help ensure the budget and financial condition are adequately monitored, detailed budget to actual reports should be prepared and reviewed by the Council.

2.5 Financial reporting

The city did not submit an annual financial report to the State Auditor's office for the years ended September 30, 2010 and 2009. In addition, the city did not submit an annual financial report for the year ended September 30, 2008, until October 2009. Section 105.145, RSMo, requires each political subdivision to file an annual report of its financial transactions. In addition, 15 CSR 40-3.030 requires the annual financial report be filed within 4 months after the end of the political subdivision's fiscal year if an unaudited financial report is filed and within 6 months after the end of the political subdivision's fiscal year if an audit report prepared by a certified public accountant is filed.

Recommendations

The Neosho City Council:

2.1 Ensure accounting records accurately reflect the financial activity of the city. The Council should also determine the amount of restricted monies in the General Fund, make appropriate transfers, and continue to track restricted monies as required by state law.

2.2 Ensure bank reconciliations are performed each month, the reconciled bank balance is compared to the general ledger balance, and any differences are investigated.

2.3 Prepare complete and accurate budget documents.

2.4 Periodically compare year-to-date receipts and disbursements with budgeted amounts to monitor city finances.

2.5 Submit an annual financial report to the State Auditor's office as required by state law.

Auditee's Response

The Neosho City Council provided the following written responses:

2.1 The City Council agrees with this recommendation. Separate funds were set-up to reflect the fiscal year 2010-2011 annual budget, implemented October 1, 2010.

2.2 The City Council agrees with the recommendation of bank reconciliations. Currently, the investment account has been reconciled through January 2011 and the master account has been reconciled through September 2010. Going forward, timely reconciliations of all cash accounts will be an expectation of the City Council and policies will be developed to require timely reconciliations.

2.3 The City Council agrees with the recommendations as provided by the State. The 2011-2012 fiscal year budget will be prepared and reviewed for accuracy.

2.4 The City Council concurs with the recommendation and is currently provided monthly financial reports with budget-to-actual comparisons.

2.5 The City Council agrees with the recommendation that the financial report needs to be submitted as required by state law. City staff will be directed to provide the year end 2009 audit. The fiscal year end audit is in progress and will be provided at its completion. The fiscal year end 2011 annual financial report will be provided as required by statute.

3. Real Estate Transactions

The city failed to ensure it received and exchanged reasonable amounts for city properties. In addition, the city did not properly plan financing to develop properties purchased for parking, and as a result, is unable to utilize the properties for the intended purpose.

3.1 Park recreation center

While the city obtained an appraisal for its park recreation center property, the city did not solicit bids for its sale and sold the property at a price significantly less than the appraised value. In October 2010, the recreation center property was appraised at $570,300. In December 2010, the city sold the recreation center property to the Neosho R-V School District for $375,000 ($195,300 less than the appraised value) without soliciting any other bids. The city sold several properties, including the park recreation center, to raise money to help the city's poor financial condition. Good business practices require the sale of real estate be formally publicized and bids solicited to ensure a reasonable price is received.

3.2 Exchange of services for property

The city entered into an oral agreement for the exchange of land from a not-for-profit entity (NFP) for subsequent services, and the value of neither the land nor the services was determined. In September 2009, 11 acres of land were given to the city by an NFP to construct a public works building in exchange for engineering, surveying, and road and sewer infrastructure work needed to prepare the adjoining properties still owned by the NFP for commercial development. There was no appraisal to determine a fair value of the land, and the city did not determine the value of the proposed services prior to the exchange. In November 2010, the city calculated its costs for surveying, engineering, and infrastructure as approximately $84,000. Good business practices require independent appraisals and a determination of the cost of services to be exchanged to ensure a reasonable value received and exchanged. In addition, written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing.

3.3 Downtown parking

The city spent a total of approximately $392,000 in fiscal years 2008 and 2009 to purchase properties for parking (including $290,000 for additional civic center parking), but did not plan financing for the development of the properties, and as a result, the properties remain unused. Given the city's financial condition, it is unclear when the city will be able to demolish the buildings on these properties and complete the parking projects.

Considering the city's financial condition and the large investment of city funds, the City Council should consider and document its plans to pay for the cost of developing these properties. Adequate planning will help ensure the best use of city funds.

Recommendations

The Neosho City Council:

3.1 Ensure future sales of real estate are formally publicized and bids are obtained.

3.2 Obtain appraisals and determine the cost of services to be exchanged to support future real estate transactions, and enter into written agreements.

3.3 Document plans to develop properties purchased.

Auditee's Response

The Neosho City Council provided the following written responses:

3.1 The City Council concurs. Current policy and practices are in line with these recommendations. While the sale of the parks recreation center was below appraisal, it was in accordance with Attorney General Opinion 2001-111. Furthermore, the City Council believes that this sale was the best option given the circumstances of the

city's financial situation, the deteriorating state of the recreation center, and the interest of the citizens.

3.2 The City Council agrees and current practices are in line with recommendations.

3.3 The City Council agrees with the recommendation provided and will strive to handle future endeavors more efficiently. Development plans for many of the properties listed were discussed by the City Council at various times in open session, but minutes of those meetings do not specifically list details of such discussions.

4. Civic Center

The city did not adequately plan how it was going to finance the civic center renovation and did not adequately monitor civic center renovation and operating costs. Significant change orders were approved without additional bidding, and some of the change orders were incurred due to poor planning. The city paid an individual to promote events at the civic center; however, the individual did not fulfill the terms of his contract. In addition, these services were not bid.

4.1 Monitoring and planning

The city did not adequately monitor the operating and renovation costs of the civic center. The city budgeted approximately $3 million to renovate, $200,000 to furnish, and $70,000 to operate the civic center during the year ended September 30, 2008. The renovation project cost approximately $3.4 million, and the city spent an additional $500,000 during fiscal year 2008 for the civic center including property for a parking lot (see MAR finding number 3), paving for an existing parking lot, office furniture, asbestos removal, operating expenses, and other minor capital purchases. As a result, the city spent approximately $600,000 more than it planned.

In addition, the city did not effectively plan how it was going to make principal and interest payments for 20 years on the financing obtained. The city issued $3.6 million in COPs in 2007 of which $3 million was for the civic center renovation project and $600,000 was for the senior center renovation project (see MAR finding number 5); however, the actual costs of the civic center renovation exceeded the COPs proceeds, and monies from the General Fund were used to pay for the remainder of the project costs.

As a result of the overspending, the city issued additional COPs totaling $1.3 million in March 2010, to repay the General Fund for cost overruns on this renovation project and assist in the continued operations of the city for the upcoming year.

Good business practices require adequate planning prior to approving significant capital improvement projects and monitoring of project costs.

Adequate planning for major capital projects is necessary to ensure the projects are financially feasible and supported by the taxpayers, and to help prevent potential problems or misunderstandings during the project.

4.2 Change orders

There were significant change orders to the civic center project, which contributed to project cost overruns. Some of these change orders were incurred due to poor planning. Additionally, the services provided and items purchased through the change orders were not bid. During the civic center renovation, 47 change orders totaling $334,754 were processed representing 12 percent of the original contract amount. Some of the change orders include:

Reason for Change Order	Cost
Theater lights	$ 40,217
Refinish balcony treads and risers	25,513
Window treatments	23,624
Increase in amount budgeted for exterior signage	19,162
Additional light fixtures required by the addition of black ceiling tiles	18,503
Relocate concession stand to an office	15,928
Low voltage aisle lights for balcony seats	14,745
Time extension for contractor to complete added change orders	13,690
Stage curtains	11,688

While change orders often occur on construction contracts, they are normally used to make adjustments for problems that are unknown when construction projects are originally bid. Change orders should be kept to a minimum to ensure the maximum amount of construction costs are subjected to competitive bidding and to reduce the amount of administrative time and effort in processing change orders. If the scope of a project changes substantially, consideration should be given to bidding those parts of the project.

4.3 Civic event promoter

The city paid an individual $12,690 to promote events at the civic center from February 2009 to February 2010; however, the individual did not fulfill the terms of his contract. The contract required the individual to promote one event each quarter, provide the city with a full financial accounting of each event, and establish a budget for each event to be approved by the City Manager.

The individual only promoted two events during the 12 month contract period, did not provide the city with a full financial accounting of the events held, and did not provide the city with a budget for each event. The city paid the individual $1,000 each month for the 12 month contract period and an additional $690 for audio and tear down services. In addition, the city did not bid these services.

The city should monitor contracts to ensure compliance with contract terms. In addition to complying with city ordinances, which require services costing more than $5,000 to be advertised for bids and for bids to be approved by City Council, competitive bidding helps ensure all parties are given an equal opportunity to participate in city business and the city has received the best and lowest price.

Recommendations

The Neosho City Council:

4.1 Ensure adequate planning and monitoring is performed and documented on future projects.

4.2 Ensure adequate planning is performed to reduce the number of change orders, and give consideration to bidding when substantial project changes are needed.

4.3 Ensure compliance with contract requirements. The City Council should also ensure bids are solicited for all applicable purchases and services in accordance with city ordinances and sufficient documentation is maintained.

Auditee's Response

The Neosho City Council provided the following written responses:

4.1 The City Council agrees with the recommendation of monitoring the planning and performance of future projects. Current practices do provide for better monitoring and oversight. Recent projects have received greater scrutiny prior to approval and project costs have been closely monitored.

4.2 The City Council agrees with the recommendation. The City Council is currently being provided detailed information from the directors when a change order is presented. All change orders are reviewed and approved by the City Council. Recent change orders have been limited to unknown or unexpected events. Significant changes to current and future projects will be done by bid, not by change order.

4.3 The City Council agrees with the recommendation and will ensure future bids are solicited in accordance with city ordinances and policy. The city will also work to better monitor compliance of contracts and maintain adequate documentation for any agreed-upon changes that may impact performance.

5. Senior Center

The city failed to require a performance bond on the senior center renovation project, resulting in additional costs to the city. In addition, the city did not enter into a written agreement with a general contractor for the project.

In July 2007, the city entered into a construction contract for the renovation of the senior center. The total cost of the project was estimated to be approximately $518,000. The renovation project was completed in April 2008, at a cost of approximately $634,000.

5.1 Performance bond

The city unnecessarily spent an additional $135,313 because it did not require the general contractor to furnish a performance bond. In February 2008, the city was notified the general contractor had not paid several subcontractors for work performed totaling $141,340, and the city had already paid the general contractor for some of these amounts. The City Attorney negotiated payments to these subcontractors down to $135,313; however, amounts previously paid to the general contractor could not be recovered because there was no performance bond.

Section 107.170, RSMo, requires all public entities to obtain a performance bond for public works contracts with costs estimated to exceed $25,000. Performance bonds provide assurance for proper completion of such projects and may have relieved the city from any potential liability to subcontractors upon default by the contractor.

5.2 Written contract

The city did not enter into a written agreement with the general contractor hired to complete the senior center renovation project, at a cost of $11,000. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing.

Recommendations

The Neosho City Council:

5.1 Ensure performance bonds are obtained on construction projects as required by state law.

5.2 Enter into written agreements when appropriate.

Auditee's Response

The Neosho City Council provided the following written responses:

5.1 The City Council agrees that performance bonds should be obtained for construction projects as required by state law and current city practices require such bonds.

5.2 The City Council agrees that all contracts should be in writing. All current contracts are in writing and are presented to the City Council for approval.

6. Procurement Procedures

6.1 Bidding

Procurement practices need improvement. According to accounting records, disbursements (including payroll) totaled approximately $16.6 million during the year ended September 30, 2010.

Although the city has a procurement policy which requires city officials to solicit bids for items or services costing more than $1,500 and advertise and obtain City Council approval for bids for items or services costing more than $5,000, the city did not solicit bids for numerous purchases made during the year ended September 30, 2010, and through January 2011, including:

Item or Service	Cost
Public works and golf course bulk fuel (two vendors-annual)	$ 125,080
Bulk fuel (aviation-annual)	96,591
Water testing	43,743
Fuel (local gas station-annual)	35,663
Accounting services (two vendors)	15,043
Leak detection services	10,590

In addition, while the city solicited and received six bids for cleaning services in April 2010, for city hall, the senior center, and the Lampo Community Center, the Council did not clearly document its decision and did not ensure compliance with the bid amounts. The city used the lowest bidder; however, the price charged by the low bidder was $421 per month higher than the amount quoted in the bid, and as a result, the city paid amounts in excess of the next lowest bid received. The city paid this contractor approximately $18,400 during the year ended September 30, 2010.

Also, the city has not solicited proposals for golf course management services for several years. The city has contracted with an individual for these services since 2005, and entered into a 3 year contract with him in October 2009. The city paid this individual $211,297 during the year ended September 30, 2010. The city also paid this individual an additional 12.5 percent ($24,090) of all golf cart rental fees during the year ended September 30, 2010. The city owns or leases all golf carts and pays all expenses for maintenance, so it is unclear why this individual is paid a percentage of these fees.

Further, while the City Council had adopted and approved a formal purchasing policy, various versions of the policy, which include conflicting purchasing and bidding requirements, are used by city departments.

In addition to complying with city ordinances, competitive bidding helps ensure all parties are given an equal opportunity to participate in city business. Complete documentation should be maintained of all bids and

proposals received and the reasons why a bid or proposal was selected. Also, one centralized purchasing policy, which clearly defines the levels of purchase authorization or approval requirements for various purchases should be adopted to ensure purchasing procedures are consistent and purchases are properly approved.

6.2 Banking services

The city has not solicited proposals from various banking institutions since 2003 for the deposit of city monies. The Council should solicit formal proposals for its banking services on a periodic basis. Doing so will help ensure the banking services received, as well as the costs of those services, are reasonable and competitive.

6.3 Financing

COPs totaling $1.3 million were sold in March 2010, through a negotiated instead of a competitive sale. In addition, the City Council did not select the COPs underwriter or legal counsel competitively. The Council used an underwriter and legal counsel it was familiar with and relied upon the advice of the underwriter instead of seeking open bids assuring the most competitive rate of return for taxpayers. The COPs were issued to repay the General Fund for cost overruns on renovation projects and to assist in the continued operations of the city for the upcoming year.

COPs are a method of financing a capital project whereby a financial institution sells interests in the capital project, leases the project to a local government, and repays the certificates with the lease payments. After the certificates have been repaid, the local government typically has the option to purchase at a nominal amount the capital project it has been leasing. COPs are not required to be approved by city voters.

While Missouri law does not require competitive sales of these types of financing instruments or competition in selecting underwriters and legal counsel, competitive sales may result in lower interest costs for the city.

Recommendations

The Neosho City Council:

6.1 Ensure bids are solicited for all applicable purchases and services in accordance with city ordinances and sufficient documentation is maintained. The Council should also ensure the adopted and approved purchasing policy is used by all departments.

6.2 Solicit proposals for banking services on a periodic basis.

6.3 Pursue fair and open competition in any future financing option sales.

Auditee's Response

The Neosho City Council provided the following written responses:

6.1 The City Council agrees that bids should be solicited for all applicable services and purchases. City staff is working towards perfecting that process. The City Council also agrees that the only purchasing policy that should be used city wide is what was approved by ordinance. That policy has been redistributed to all departments to ensure compliance.

6.2 The City Council agrees with the recommendation of soliciting proposals for banking services. City staff is working on preparing a request to be solicited by the end of the fiscal year. The City Council will ensure our policy for banking services will require those services be bid on a 3-year schedule (or less) to ensure costs are reasonable and competitive.

6.3 The City Council agrees with the recommendation of pursuing fair and open competition and will ensure compliance in any future financing.

7. Disbursements

Weaknesses were noted in controls and procedures over disbursements.

7.1 Fuel and usage records

Controls and procedures over fuel use and purchases need improvement. The city purchased $110,849, $35,663, $14,231, and $1,172 of fuel for the public works and parks departments, police department, golf course, and airport courtesy car, respectively, during the year ended September 30, 2010.

- Significant differences between fuel use and purchases are not investigated. The city maintains use records for bulk tanks used by the public works department and compares use to fuel purchases. City records reported shortages during June, July, and August 2010, totaling 1,015 gallons of unleaded fuel and 360 gallons of diesel fuel.

- Police department fuel use is not reconciled to fuel purchases. Mileage logs are maintained by the police department and could be used in this reconciliation.

- Mileage or fuel use logs are not maintained for bulk fuel tanks used by the golf course, and as a result, fuel use is not reconciled to fuel purchases.

- A mileage log is not maintained for the courtesy car at the airport, and as a result, fuel use is not reconciled to fuel purchases.

- Mileage logs maintained by the City Manager, Fire Chief, and employees of the police department, park department, and public works department were not always accurate and complete. The purpose of travel was not always documented on mileage logs, and several logs did not include all miles driven. For example, a public works employee log did not include 1,711 miles driven between February 15 and June 1, 2010.

Procedures for reviewing fuel used and reconciling use to fuel purchased and on hand, are necessary to ensure the reasonableness and propriety of fuel use and disbursements. In addition, mileage and fuel use logs are necessary to document the appropriate use of equipment and vehicles and to support fuel charges. Failure to account for fuel purchases could result in theft and misuse of fuel going undetected.

7.2 Interim City Manager commuting mileage

The value of commuting use of the Interim City Manager's city vehicle is not properly reported by the city as compensation. In addition, given the city's poor financial condition and the on-going employment of the Interim City Manager, the city should reconsider providing this benefit.

The original employment contract with the Interim City Manager, approved in April 2010, provided a city owned vehicle for him to take home daily. The Interim City Manager lives in Eucha, Oklahoma (approximately 130 miles round trip from Neosho). After we questioned the Interim City Manager about personal commuting miles, the city entered into a new contract in October 2010, which provided for the Interim City Manager to take a city owned vehicle home daily and personal commuting miles valued at $300 per month to be reported as a taxable fringe benefit.

The Interim City Manager indicated the city valued the commuting miles ($300) using the Internal Revenue Service (IRS) lease value method; however, the city valued the vehicle at $12,000 while the city acquired the vehicle in June 2010 valued at $15,900. As a result, the city under reported the taxable fringe benefit during the year ended December 31, 2010 by $533 or ($63 each month).

In addition, the city charter requires the City Manager to live within the city. Given the city has employed the Interim City Manager since April 2010, and has an employment contract with him which extends to October 2011, the city should re-consider whether this is still an interim position and whether a city vehicle should continue to be provided for personal commuting miles.

Federal regulations require all employers to withhold payroll taxes and include the value of personal automobile (commuting) use in taxable

income. The IRS provides several methods to determine automobile commuting values.

7.3 Written contracts and contract compliance

The city did not always enter into written contracts defining services provided and benefits received and did not monitor contracts for compliance. As a result, a consultant was overpaid and the Neosho R-V School District was not billed in accordance with contract terms. Also, some contract terms were not adequate to ensure the city's needs would be met.

- The city entered into a verbal agreement with an individual for the rental of city property. The city received $6,255 in rental payments during the year ended September 30, 2010.

- The city failed to properly monitor payments to a consultant hired to establish a Transportation Development District (TDD), and as a result, overpaid the consultant by $7,500. The city entered into a written contract with a consultant in December 2007. The contract provided for the city to pay the consultant a total of $17,500 ($10,000 at the signing of the agreement and another $7,500 when the TDD was created). However, the city paid the consultant a total of $25,000 ($10,000 in December 2007, $11,250 in December 2008, and another $3,750 in July 2009). The TDD was not formally established until February 2011.

- The city provides a resource officer to the Neosho R-V School District, but did not bill the district in accordance with the contract for the 2010-2011 school year. The Council entered into a written contract with the school district on August 18, 2009, to provide a resource officer in exchange for the district to pay the city 75 percent of the costs of the officer with payment to be made by November 30 of each school year. The city did not bill the district for the 2010-2011 school year until we brought this to the city's attention in February 2011.

- The city did not ensure bank reconciliations were prepared in accordance with contract requirements. In February 2010, the city was behind in preparing bank reconciliations and hired an accounting firm to prepare the bank reconciliations. The contract required the accounting firm to reconcile city bank accounts for October 2009 through January 2010, at a cost of approximately $10,000. The accounting firm only completed bank reconciliations for the investment bank account and did not prepare bank reconciliations for the master bank account for this time period.

  In addition, some contract requirements were not adequate to ensure the city's needs would be met. In September 2010, the city contracted with an individual to prepare "as many" of the remaining bank reconciliations for the investment and master fund bank accounts as he

could for the year ended September 30, 2010, up to the cost of $5,000. This individual only completed bank reconciliations for the investment bank account through May 2010, and none were completed for the master bank account. This poorly written contract did not provide the city any assurance accounting work would be completed and the city's needs met. Neither of these accounting services were bid (see MAR finding number 6).

Clear and detailed written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing. In addition, the city should monitor contracts to ensure compliance with contract terms, and request reimbursement for any overpayments.

7.4 Potential conflicts of interest

The city purchased items valued at $6,214 from a local business owned by the spouse of former Councilman/Mayor Werneke during the year ended September 30, 2009. The city purchased an additional $1,555 of items from this business during the period October 1, 2009, through April 20, 2010, (the end of the former Mayor's term of office). Some of these transactions exceeded $500, and bids were not solicited by the city for the purchases. In addition, the former Mayor signed 15 checks made payable to his wife's business totaling $3,224 during the period April 2009 to April 2010. These purchases included notepads given away at a senior center booth during a business exposition, plaques, and flower box signs.

Officers of a city serve in a fiduciary capacity. Personal interests in business matters of the city could create the appearance of conflicts of interest. In addition, Section 105.454(3), RSMo, provides no elected official may participate in any matter directly or indirectly in which he or she attempts to influence any decision of the political subdivision when he or she knows the decision could result in the acceptance of a service, sale, rental, or lease for consideration exceeding $500 per transaction or $5,000 annually to his or her spouse unless the transaction(s) is subject to bid and is the lowest bid received.

Recommendations

The Neosho City Council:

7.1 Require fuel use logs be maintained for all city-owned vehicles and equipment, and these logs be reviewed for accuracy and reconciled to fuel purchases. Any significant discrepancies should be investigated.

7.2 Ensure commuting use in city vehicles is properly reported as taxable income, and reconsider offering this benefit to the Interim City Manager.

7.3 Enter into written agreements defining services provided and benefits received, monitor contracts for compliance and request reimbursement for overpayments, and bill the school district in compliance with the contract.

7.4 More closely examine city transactions to identify and avoid apparent and actual conflicts of interest. The Council should ensure strict compliance with the law when conducting city business.

Auditee's Response

The Neosho City Council provided the following written responses:

7.1 The City Council agrees with the recommendation stated. City staff will be directed to implement a more consistent procedure for maintaining, reviewing, and reconciling fuel logs to fuel purchases.

7.2 The City Council agrees and confirms that city staff has reported the taxable benefit as required by law. It is also the City Council's intention to not offer this benefit in the future.

7.3 The City Council agrees with the recommendation and currently requires all contracts be in writing and monitored for compliance of all terms. Past practices by former employees resulted in an accounting work backlog. Current staffing allows for such accounting functions to be performed internally and future use of outside accounting assistance is not anticipated.

7.4 The City Council agrees with the recommendation of closely examining transactions to identify and avoid apparent and actual conflicts of interest. Better controls related to the signing of checks have been put in place to prevent such conflicts from occurring in the future.

8. Payroll Controls and Procedures

Controls and procedures over payroll disbursements need improvement.

8.1 Timesheets

Timesheets were not signed by some employees, and some original timesheets prepared and signed by park department employees were not retained. Original signed timesheets are necessary to document hours worked, substantiate payroll disbursements, and provide the city with a method to monitor hours worked and leave taken, and are beneficial in demonstrating compliance with Fair Labor Standards Act of 1938 (FLSA) requirements. In addition, timesheets should be signed by the employee and the employee's supervisor to indicate their agreement to the actual time reported each month and to ensure the accuracy of time worked and leave taken.

8.2 Personnel policies

The city is not compensating some employees for overtime in compliance with its overtime policy and FLSA requirements.

- Several employees have multiple duties, work over the standard 40 hour work week, and are not paid overtime. For example, during the 2-week pay period ended August 15, 2010, a full time wastewater department employee worked 80 hours and also worked 18 hours for the park department. The employee was not compensated at time and a half for the overtime hours. The city personnel policy and the FLSA require any time worked over 40 hours in a week (for non-emergency personnel) to be paid at time and a half.

- Nonworking time (vacation, sick leave, compensatory time taken, and holidays) is included in total hours worked when determining the amount of overtime earned by employees, which is disallowed by the city personnel policy and not required by the FLSA. The city may be paying more overtime to employees than required as a result of using nonworking time in its calculations of overtime earned.

8.3 Tuition reimbursements

Improvement is needed in the handling of tuition reimbursements. The city personnel policy provides for reimbursement of tuition expenses, and the city reimbursed employees $4,979 and $16,891 during the years ended September 30, 2010 and 2009, respectively.

- The city did not properly report tuition reimbursements to the IRS as taxable income for two employees. IRS Publication 970, requires employers to report tuition reimbursements in excess of $5,250 in a calendar year on the employee's W-2 form as taxable wages.

- Tuition was not consistently reimbursed to employees, and the city did not have documentation to explain the inconsistencies. The city reimbursed two administrative employees for all classes taken to obtain their bachelors of science degrees, but reimbursed two police department employees for only law enforcement classes taken to obtain their bachelors of science degrees.

- In February 2010, an employee was reimbursed $4,979 through the reimbursement program without adequate documentation that program requirements were met. To qualify for reimbursement, an employee is required to file an application for reimbursement 30 days prior to the class starting and obtain supervisory approval. The employee must also provide a report card showing a grade of A or B, and proof of payment. The application for this reimbursement was not signed by the employee or her supervisor (the former City Manager) or submitted 30 days prior to the class starting, a grade was not provided for one of the courses taken, and records provided by the employee appear to indicate the

employee received a refund from the university for one of the classes she was reimbursed for by the city.

To help ensure employees are treated fairly and equitably, the city should ensure all employees are reimbursed consistently and require documentation that program requirements were met.

8.4 Retiree health insurance benefits

Three retired employees were allowed to retain city health insurance at active city employee rates for 3 to 8 years after their respective retirement dates in violation of city policy. The city personnel policy allows for retired employees to continue health insurance coverage at the group Consolidation Omnibus Budget Reconciliation Act (COBRA) rates for up to 18 months after retirement. In addition, any employee who reaches age 65 during the 18 month period will be discontinued from the COBRA coverage due to eligibility for Medicare. To ensure retired employees are treated fairly and equitably, the city should develop procedures to monitor retiree benefits for compliance with its personnel policy.

Recommendations

The Neosho City Council:

8.1 Ensure timesheets are prepared, properly signed and approved, and retained for all employees.

8.2 Ensure compliance with the city overtime policy and the FLSA.

8.3 Report tuition reimbursements as wages in accordance with IRS regulations. The Council should ensure tuition reimbursements are consistent and supported by adequate documentation. The Council should also seek reimbursement for any unsubstantiated amounts.

8.4 Ensure compliance with city policy regarding retiree health insurance benefits.

Auditee's Response

The Neosho City Council provided the following written responses:

8.1 The City Council agrees with the recommendation. City staff are currently providing timesheets signed by the employee and their supervisor and these timesheets will be retained in accordance with the State's records retention policy.

8.2 The City Council agrees it is important to be in compliance with FLSA for overtime. The city will work to be in compliance by correcting known issues regarding overtime compensation.

8.3 The City Council agrees with the recommendation. Currently, the city does not offer tuition reimbursements. A further review will be

made to determine if any reimbursement should be sought for previously paid tuition reimbursements.

8.4 The City Council agrees with the importance of adhering to the current personnel policy and will require strict compliance with city policy and federal law related to COBRA benefits.

9. Accounting Controls and Procedures

Accounting duties are not adequately segregated; procedures for receipting, posting, and depositing monies are not adequate; and improvement is needed in the controls and procedures over business licenses and building permits. As a result of these numerous control weaknesses, there is no assurance all monies are handled and accounted for properly. According to the independent audit report, approximately $14 million in receipts were processed during the year ended September 30, 2009, and according to city records approximately $19 million in receipts were processed during the year ended September 30, 2010.

9.1 Segregation of duties

Accounting duties are not adequately segregated.

- The Accounting Manager prepares deposits, takes deposits to the bank, and reconciles some city bank accounts. In addition, there is no documented supervisory review of the duties performed by the Accounting Manager.

- In June 2010, the Finance Director was given authority by the City Manager to make electronic wire transfers between city bank accounts; however, procedures do not provide for documented supervisory reviews of such wire transfers. The Finance Director prepares some city bank reconciliations. While no wire transfers have been made by the Finance Director, these duties should be segregated or an independent review of wire transfers performed.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties is not possible, a timely supervisory review of the work performed is necessary.

9.2 Receipting, posting, and depositing procedures

Receipting, posting, and depositing procedures need improvement. During cash counts conducted in October 2010, and review of the related deposits, we noted the following:

- Manual receipt slips are not issued for some monies received.

- The numerical sequence of manual receipt slips issued by the receptionist at city hall and employees of the collection department and park department are not accounted for properly.

- Amounts recorded on the manual receipt slips are not reconciled to the city accounting system and deposits. As a result, the city did not detect duplicate receipt slips issued for some monies collected by the park department. A cash count performed on October 5, 2010, in the park department, revealed two receipt slips issued on October 1 and October 4, 2010, for the same monies received.

- Receipt slips are not always issued by the collection department for monies collected at other departments and then transmitted to the collection department.

- The numerical sequence of receipt and batch numbers assigned by the city computerized accounting system are not accounted for properly. Receipt numbers restart with each new batch and multiple batches are used daily. In addition, the computer programmer indicated the accounting system is not capable of tracking voided or deleted receipt numbers.

- City receipts are typically not deposited timely and intact and are not always posted to the computerized accounting system timely. An October 5, 2010, cash count identified monies totaling $39,280 received from October 1 through October 5 which had not been posted to the computerized accounting system. Some of these monies were not posted until as late as October 20, 2010. Also, $18,475 of these monies were held and not deposited for more than 8 days. Numerous other instances were noted where other types of city receipts, such as golf fees, building permits, and park department receipts, were not deposited intact and timely. City officials indicated receipts are recorded and deposited only when time permits.

- Rental deposits for use of the Lampo Community Center are held until refunded, and no documentation is retained to support the refunds.

Failure to implement adequate receipting, posting, and depositing procedures increases the risk that loss or misuse of monies received will go undetected.

9.3 Business licenses and building permits

Business licenses are not prenumbered, and there is no procedure to reconcile business licenses and building permits issued to fees collected and amounts deposited. To ensure fees for all licenses and permits are properly collected, recorded, and deposited, the licenses should be prenumbered and the numerical sequence accounted for properly, and the licenses and permits issued should be periodically compared to fees recorded and deposited.

Recommendations

The Neosho City Council:

9.1 Segregate accounting duties to the extent possible and implement appropriate reviews and monitoring procedures.

9.2 Require receipt slips be issued in numerical sequence for all monies received and the numerical sequence of receipt slips be accounted for properly. The Council should also ensure manual receipt slips are reconciled to amounts recorded on the computerized accounting system and deposits, deposit all monies intact and in a timely manner, and issue all refunds by check. The Council should account for the numerical sequence of computerized receipt and batch numbers and work with the computer programmer to ensure the accounting system tracks voided or deleted receipt numbers.

9.3 Issue prenumbered business licenses and account for the numerical sequence, and reconcile licenses and permits issued to fees recorded and deposited.

Auditee's Response

The Neosho City Council provided the following written responses:

9.1 The City Council agrees that accounting duties need to be segregated and will direct the City Manager to ensure proper procedures are implemented to address the specific concerns listed. As of this date, the Finance Director no longer has the ability to make electronic wire transfers between the city's bank accounts.

9.2 The City Council agrees with the need to improve receipting procedures and will direct the City Manager to develop and present for approval a more controlled and consistent policy regarding receipts, posting, and deposits. Such a policy is essential to ensure public funds are handled properly. City staff currently provides refunds by check and has developed a system of tracking voided/deleted receipt numbers which includes the review of a supervisor.

9.3 The City Council agrees and city staff is currently working on a new procedure of issuing pre-numbered business licenses and building permits so that proper accounting and tracking can be ensured.

10. Utility System Controls and Procedures

Significant weaknesses were indentified in control procedures related to the utility system. As a result of these weaknesses, there is less assurance all utility monies have been accounted for properly and utility charges are set at the appropriate level to cover the cost of providing the related services. Per city accounting records, the utility system operating receipts exceeded $3.9 million for the year ended September 30, 2010.

10.1 Subsidization and utility rates

Utility revenues are used to subsidize General Fund operations, and as a result, city customers may be paying too much for utility services. As of September 30, 2009, $397,473 (see MAR finding number 1) is due to the Water and Sewer Fund from the General Fund, and accurate information is not available for the year ended September 30, 2010.

The city increased water and sewer rates in fiscal years 2008 and 2009, respectively, without performing cost analyses or utility rate reviews. As a result, the city did not determine and cannot demonstrate whether utility rates charged to customers are set at a level consistent with the costs of providing the related services.

Section 67.042, RSMo, provides that fees may be increased if supported by a statement of costs, which shows the increase is necessary to cover costs of providing the service. Utility rates should be set to cover the cost of providing the related services; not at a level which results in excessive fund balances. In addition, utility services should not generate profits to fund (through subsidizations) other services provided by the city. Periodic rate studies are necessary to ensure user charges are set at appropriate levels.

10.2 Water usage

Although the city compares the gallons of water billed to customers to gallons of water pumped each month, significant differences are not investigated. In addition, city water usage is not tracked, and without this information the city cannot properly perform the reconciliation. During the months of January and June 2010, the gallons of water pumped exceeded gallons billed by approximately 54.9 (54 percent) and 44.9 (49 percent) million gallons, respectively. As a result of not investigating these differences, unauthorized use might occur and not be billed and leaks may go undetected.

Tracking city water usage and investigating significant differences between water billed and water pumped is necessary to help detect significant water loss on a timely basis and ensure water usage is properly billed.

10.3 Reconciliations

The city did not perform monthly reconciliations of total amounts billed, payments received, and amounts unpaid for utility services including water, sewer, and trash. Monthly reconciliations are necessary to ensure accounting records balance, transactions are properly recorded, and any errors or discrepancies are detected on a timely basis.

10.4 Delinquent utility reports

While delinquent utility reports are prepared on a monthly basis by the Billing Analyst, the city has not established procedures to monitor or review these delinquent accounts. At March 31, 2011, the city had $147,020 in delinquent utility accounts.

To ensure delinquent accounts are handled properly, the delinquent accounts should be monitored and reviewed by someone independent of the utility department.

10.5 Adjustments

While the Finance Director reviews and approves adjustments to the utility system, which are submitted by the Billing Analyst, a subsequent review of the actual changes made to the utility system is not performed. To ensure all adjustments are valid and accounted for properly, a subsequent review of all changes made to the utility system should be performed and documented.

10.6 Utility deposits

Utility deposits posted to customer accounts in the utility system are not reconciled to the deposit payable balance in the general ledger. New customers are required by ordinance to pay a refundable deposit before receiving utility service. At our request, the Billing Analyst printed a list of deposits posted to customer accounts and the Accounting Manager printed the deposit payable balance in the general ledger as of August 31, 2010. The list of utility deposits from the utility system totaled $51,992 and the deposit payable balance in the city's general ledger totaled $51,467, resulting in a difference of $525.

Monthly reconciliations of the list of deposits to the deposit payable balance are necessary to ensure deposits are properly recorded in both customer accounts and the general ledger. Any discrepancies should be promptly investigated and resolved.

Recommendations

The Neosho City Council:

10.1 Discontinue using utility monies to fund other city operations. In addition, the Council should review utility rates periodically to ensure receipts are sufficient to cover all costs of providing these services, but not set at a level which results in excessive fund balances. Such reviews should be documented.

10.2 Investigate significant differences between gallons of water pumped to gallons billed and track city usage on a monthly basis.

10.3 Ensure monthly reconciliations of amounts billed to amounts collected and delinquent accounts are performed. In addition, the Council should ensure adequate documentation to support reconciliations is retained.

10.4 Ensure someone independent of the utility department monitors and reviews delinquent accounts.

10.5 Ensure approved adjustments are compared to actual changes made to the utility system.

10.6 Ensure a complete list of utility deposits is reconciled monthly to the deposit payable balance in the general ledger. Any discrepancies should be investigated and resolved.

Auditee's Response

The Neosho City Council provided the following written responses:

10.1 The City Council agrees utility monies should not be used to fund other city operations. Those practices are no longer viewed as acceptable and such subsidization is no longer occurring. The City Council concurs that utility rates should be evaluated periodically to ensure there is an accurate and adequate rate structure in place for covering all necessary utility costs. Periodic rate studies will be done as required by law.

10.2 The City Council is aware of ongoing water loss issues. Recently approved water system improvements will help with reducing water loss. Other contingencies will be evaluated and pursued to bring the city's loss ratios in line with acceptable limits.

10.3 The City Council agrees that monthly reconciliations should be performed and reviewed pertaining to utility amounts billed, collected, and delinquent and will endeavor to improve its process. The City Council will direct the City Manager to develop and present for approval a more controlled and consistent policy regarding such reconciliations.

10.4 The City Council agrees that a review of delinquent accounts should be performed independent of the billing department. The City Council will direct the City Manager to develop and present for approval a formal policy to monitor delinquent utility accounts.

10.5 The City Council agrees the need to review adjustments after entry into the utility system and will encourage city staff to review procedures to improve that process.

10.6 The City Council agrees with this recommendation and will work to ensure monthly reconciliation of bank accounts, include the utility deposit account.

11. Meeting Minutes

The city did not ensure compliance with the Sunshine Law for closed session meetings.

- Meeting minutes were not sufficient to demonstrate how some issues discussed in closed meetings were allowable under the Sunshine Law. These issues included discussing the attentiveness of city staff to customers and city residents, the financial operations of the civic center,

the condition of the civic center when shown to potential renters, and a salary increase for the Interim City Manager.

- Open meeting minutes indicated meetings were closed by the City Council for a specific reason; however, closed meeting minutes indicated other topics, that were not specifically identified in the open meeting minutes, were discussed.

To ensure compliance with state law, the City Council should restrict discussion in closed sessions to the specific topics listed in the Sunshine Law, Chapter 610, RSMo; document the specific reasons for going into closed session; and adequately document discussions held in closed meetings.

Recommendation

The Neosho City Council ensure only allowable topics are discussed in closed meetings and specific reasons for closing a meeting are documented. Closed meeting discussions should be limited to the topics announced in open session.

Auditee's Response

The Neosho City Council provided the following written responses:

The City Council agrees with the recommendation. Compliance with the requirements of the Missouri Sunshine Law is a top concern of this City Council, and we strive to limit conversations to the specific reason(s) documented for closing any meeting.

12. Capital Asset and Insurance Procedures

Capital asset records are not complete and have not been updated since 2008. In addition, the city disposed of two vehicles in June 2008, and another vehicle in January 2009; however, these vehicles were still carried on the city insurance policy as of January 14, 2010. Also, property is not tagged for specific identification, and an annual physical inventory is not performed. The audited financial statements for the year ended September 30, 2009, valued city property at approximately $26.4 million.

Adequate capital asset records and procedures are necessary to secure better internal controls and safeguard city assets that are susceptible to loss, theft, or misuse; and to provide a basis for determining proper insurance coverage. In addition, given the city's financial condition, the city should better monitor its insurance coverage to ensure unnecessary costs are not incurred.

Recommendation

The Neosho City Council ensure property records include all pertinent information for each asset such as tag number, description, cost, acquisition date, location, and subsequent disposition, and are compared to the city's insurance coverage. The Council should also properly tag, number, or otherwise identify all applicable city property and conduct an annual inventory.

Auditee's Response

The Neosho City Council provided the following written response:

The City Council agrees with this recommendation and recognizes the value of keeping the capital asset list updated. The City Council will direct the City Manager to review the procedures in place for tracking city assets and ensure all recommendations are addressed.

City of Neosho
Organization and Statistical Information

The City of Neosho is located in Newton County. The city was incorporated in 1878 and is currently a home rule-charter class city. The city employed 106 full-time employees and 30 part-time employees on September 30, 2010.

City operations include fire, law enforcement, utilities (water, sewer, wastewater, and trash), street maintenance, senior center, airport, golf course, and park services.

Mayor and City Council

The city government consists of a five-member council. The members are elected for 3-year terms. The mayor and mayor pro tem are elected by the council for a 1-year term. The mayor presides over the council, and may vote on all matters. The mayor and city council at September 30, 2010, are identified below. The mayor and city council members are paid $10 for each meeting attended with a maximum of $25 per month. The compensation of these officials is established by ordinance.

Richard Davidson, Mayor
Tom Workman, Mayor Pro Tem
Matt Persinger, Councilman
Heather Bowers, Councilwoman
Chris Wright, Councilman

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

According to city personnel, the city was awarded the following American Recovery and Reinvestment Act of 2009 funding during the year ended September 30, 2010.

A $7,758,719 Clean Water State Revolving Fund Grant was awarded by the U.S. Environmental Protection Agency for sewer system and wastewater treatment facility improvements. During the year ended September 30, 2010, $4,789,246 was expended and $4,348,772 was received by the city related to this grant.

A $58,640 Energy Efficiency and Conservation Block Grant was awarded by the U.S. Department of Energy for upgrades of the city wastewater treatment plant. During the year ended September 30, 2010, no funds were expended or received by the city related to this grant.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Daviess County, Missouri

The Office of the State Auditor, in cooperation with Daviess County, has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2010, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Kevin G. Hudson, Certified Public Accountant, is attached.

Independent Auditors' Report

To the County Commission of
Daviess County, Missouri
Gallatin, Missouri

I have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of Daviess County, Missouri, (the County) as of and for the years ended December 31, 2010 and 2009, which collectively comprise the County's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the County's management. My responsibility is to express an opinion on these financial statements based on my audit.

I conducted my audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. I believe that my audit provides a reasonable basis for my opinion.

As discussed more fully in Note 1, the County prepares its financial statements on the cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

In my opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position-cash basis of the governmental activities, each major fund, and the aggregate remaining fund information of the County as of December 31, 2010 and 2009, and the respective changes in financial position-cash basis, thereof for the years then ended in conformity with the basis of accounting described in Note 1.

In accordance with *Government Auditing Standards,* I have also issued my report dated May 24, 2011, on my consideration of the County's internal control over financial reporting and on my tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of my testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with the *Government Auditing Standards* and should be considered in assessing the results of my audit.

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. I have applied certain limited procedures to the required supplementary information, budgetary comparison information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to my inquiries, the basic financial statements, and other knowledge I obtained during my audit of the basic financial statements. I do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

My audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the County's basic financial statements. The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments and Non-Profit Organizations*, and is not a required part of the basic financial statements of Daviess County, Missouri. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The Schedule of Expenditures of Federal Awards has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In my opinion, the information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Kevin G. Hudson, C.P.A.
Trenton, Missouri
May 24, 2011

Daviess County, Missouri
Management's Discussion and Analysis
For the Two Years Ended December 31, 2010

The discussion and analysis of Daviess County's financial performance provides an overall review of the County's financial activities for the years ended December 31, 2010 and 2009. The intent of this discussion and analysis is to look at the County's financial performance as a whole; readers should also review the basic financial statements, including the notes to the financial statements, to enhance their understanding of the County's financial performance.

Financial Highlights

Key financial highlights for 2010 and 2009 are as follows:

- The county's total governmental expenditures exceeded total governmental revenues by $14,285 for the year ended December 31, 2010. The total governmental expenditures exceeded governmental revenues by $347,670 for the year ended December 31, 2009.

- The county's governmental funds ended the year ended December 31, 2010 with a combined cash balance of $2,962,317 and the year ended December 31, 2009 of $2,976,602.

- County revenues for the year ended December 31, 2010 of $3,157,580 decreased by $320,420 over the county revenues for the year ended December 31, 2009 of $3,478,000.

- County expenditures for the year ended December 31, 2010 of $3,192,973 decreased by $532,697 over the county expenditures for the year ended December 31, 2009 of $3,725,670.

Overview of the Financial Statements

The contents of this report comply with the presentation requirements of Statement No.34 of the Governmental Accounting Standards Board, *Basic Financial Statements - and Management's Discussion and Analysis - for State and Local Governments,* as applicable to the cash basis of accounting. The county's basic financial statements consist of government-wide financial statements, fund financial statements, and notes to the financial statements. The notes are an integral part of the government-wide and fund financial statements and provide more detail about the information presented in the statements. This report also contains other financial information in addition to the basic financial statements.

The county has elected to present its financial statements on the cash basis of accounting, a basis of accounting other than accounting principles generally accepted in the United States of America. "Basis of accounting" refers to when financial events are recorded. Under the cash basis of accounting, revenues are recorded when received rather than when earned, and expenditures are recorded when paid rather than when the related liabilities are incurred. Therefore, when reviewing the financial information and discussion in this report, the reader should recall the limitations resulting from use of the cash basis of accounting.

Government-Wide Financial Statements

The Government-Wide Statement of Net Assets and the Government-Wide Statement of Activities report information about the county as a whole. These statements present the county's net assets and show how they have changed. Over time, increases or decreases in the county's net assets are one indicator of whether its financial health or position is improving or deteriorating. However, to assess the county's overall financial health, the reader needs to consider additional nonfinancial factors. The government-wide financial statements report only governmental activities - activities such as general government operations, public safety, and health and welfare that are usually financed through taxes and intergovernmental receipts. The county has no business-like activities-activities financed wholly or partially by fees charged to external parties for goods or services.

Fund Financial Statements

The fund financial statements provide detailed information about the most significant funds - not the county as a whole. Some funds are required to be established by state law or by bond covenants. However, the County Commission establishes other funds to help it control and manage money for particular purposes or to show that it is meeting legal responsibilities for using certain taxes, grants, or other sources of receipts. The fund financial statements include only governmental funds, which focus on the flow of money into and out of those funds and the balances left at year end that are available for spending. The governmental fund statements provide a detailed view of the county's general government operations and the basic services it provides. Governmental fund information helps the reader determine whether more or fewer financial resources can be spent in the near future to finance the county's programs.

Notes to the Financial Statements

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages18-27 of this report.

Other Information

This report also includes as required supplementary information this Management's Discussion and Analysis and the Budgetary Comparison Schedules for all governmental, special revenue funds and capital projects funds - cash basis. Such information is intended to supplement the government-wide financial statements, fund financial statements, and notes to the financial statements but is not a part of those statements.

In addition, the report includes the following components that are not a required part of the financial statements: the Schedule of Expenditures of Federal Awards, required for audits of federal program expenditures conducted in accordance with Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations.*

Government-wide Financial Analysis

Below is a chart showing assets, receipts and disbursements for the years ended December 31, 2010 and 2009.

	Year Ended December 31, 2010	2009
Net Assets	$2,962,317	$ 2,976,602
Program Receipts	1,769,671	1,995,867
General Receipts	1,409,017	1,382,133
Disbursements	3,192,973	3,725,670
Change in Net Assets	(14,285)	(347,670)

For the two years disclosed in the audit, the change in Net Assets is primarily due to the General Fund and Capital Improvements Fund. The General Fund had net assets of $1,749,160 in 2008 as compared to $1,656,670 in 2010. The Capital Improvements Fund had net assets of $264,913 in 2007 as compared to $178,358 in 2010. General receipts did not fluctuate much between 2009 and 2010. Disbursements decreased between 2009 and 2010 due to the county paying out a $500,000 grant to the Daviess County Public Water Supply District No.1 that the county was a subrecipient of.

Financial Analysis of the County's Funds

The focus of the County's governmental funds is to provide information on near-term inflows, outflows and balances of spendable resources. Such information is useful in assessing the County's financing requirements. In particular, unreserved fund balance may serve as a useful measure of a government's net resources available for spending at the end of the year.

As of December 31, 2010, the county's governmental funds reported combined ending fund balances of $2,962,317, a decrease of $14,285 over the prior years fund balance of $2,976,602. The unreserved portion of fund balance was $1,656,670 for 2010 and $1,664,094 for the year ended 2009. The remainder of fund balance is reserved to indicate that it is not available for new spending because it has already been committed.

The General Fund is the chief operating fund of the County. At the end of the fiscal year 2010, unreserved fund balance of the General Fund was $1,656,670 and the unreserved fund balance of the General Fund for fiscal year 2009 was $1,664,094. As a measure of the General Fund's liquidity, it may be useful to compare both unreserved fund balance and total fund balance to total fund expenditures.

The unreserved fund balance of the General Fund decreased by $7,424 for fiscal year 2010 as compared to a decrease of $85,066 for fiscal year 2009.

County Revenue Fund Budgeting Highlights

The County's budget is prepared according to Missouri law and is based on accounting for certain transactions on a basis of cash receipts, disbursements, and encumbrances. The most significant budgeted fund is the county's General Fund.

The original and final budgeted revenues for the general fund were $1,331,595 for 2010 and $1,008,490 for 2009. The original and final budgeted expenditures were $1,157,682 and $1,650,786 for 2010 and $1,080,883 for 2009.

The County did make budget amendments to various funds.

Economic Factors and Next Year's Budgets

The county sales taxes and property taxes have increased slightly in the past two years, which is a positive sign for revenue growth.

The County's General Fund has increased $42,510 over the two year period that was audited. This is encouraging due to the current economic times. The increased costs for fuel, materials, equipment, utilities, and operating expenditures continues to be a source of concern as well as the general state of the economy.

Requests for Information

This financial report is designed to provide our citizens, taxpayers, creditors, and investors with a general overview of the County's finances and to demonstrate the County's accountability for the money it receives. If you have any questions about this report or need additional financial information, contact the County Clerk, 102 N. Main, Gallatin, Missouri 64640, (660) 663-2641.

Note 1: Summary of Significant Accounting Policies

The financial statements of Daviess County, Missouri (the County) have been prepared on the cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America. The Governmental Accounting Standards Board is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The County has adopted the reporting model as required by GASB Statement 34, for the presentation of information in the government-wide financial statements and the major fund statements. The more significant of the County's accounting policies are described below.

A. Reporting Entity

In evaluating the County as a reporting entity, management has addressed all potential component units (traditionally separate reporting entities) for which the County may be financially accountable and, as such, should be included within the County's financial statements. The County (the primary government) is financially accountable if it appoints a voting majority of the organization's government board and (1) it is able to impose its will on the organization or (2) there is a potential for the organization to provide specific financial benefit or to impose specific financial burden on the County. Additionally, the primary government is required to consider other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete.

Based on the application of the above criteria, the county has no component units.

B. Basis of Presentation

Government-wide Statements

The Statement of Net Assets and the Statement of Activities present financial information about the County's governmental activities. These statements include the financial activities of the primary government in its entirety. Eliminations have been made to minimize the double-counting of internal transactions. These statements distinguish between the governmental and business-type activities of the County. Governmental activities generally are financed through taxes, intergovernmental revenues, and other nonexchange transactions. Business-like activities are financed wholly or partially by fees charged to external parties for goods or services. For the years ended December 31, 2010 and 2009, the county had only governmental activities.

Note 1: Summary of Significant Accounting Policies (Continued)

The Government-Wide Statement of Net Assets presents the financial condition of the county's governmental activities at year-end. The Government-Wide Statement of Activities presents a comparison between direct expenses and program revenues for each function of the County's governmental activities. Direct expenses are those that are specifically associated with and are clearly identifiable to a particular function. Program revenues include (a) charges paid by the recipients of goods or services offered by the programs and (b) intergovernmental receipts that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented as general revenue. The comparison of direct disbursements with program receipts identifies the extent to which each governmental function is self-financing or draws from the general receipts of the county.

Fund Financial Statements

A fund is defined as a fiscal and accounting entity with a self-balancing set of accounts. The county uses funds to segregate transactions related to certain functions or activities in order to aid financial management and to demonstrate legal compliance. Fund financial statements are designed to present financial information of the county primary government at this detailed level. The fund financial statements focus on major funds. Each major fund is presented in a separate column, and nonmajor funds are aggregated and presented in a single column. Major funds include (a) the county's primary operating fund, (b) any fund for which total cash, receipts or disbursements of an individual fund are at least 10% of the corresponding element total for all funds of that type, and © any other fund that county officials believe is particularly important to financial statement users.

The accompanying financial statements are structured into one category of funds - governmental. Governmental funds are those through which most governmental functions are typically financed. Reporting for such funds focuses on the sources, uses, and balances of current resources. The county's major governmental funds are as follows:

General Fund - The General Fund is used to account for all revenues and expenditures applicable to the general operations of county government that are not properly accounted for in another fund. All general operating revenues that are not restricted or designated as to their use by outside sources are recorded in the General Fund. Revenues are derived primarily from taxes and intergovernmental revenues.

Special Revenue Funds - The Special Revenue Funds are used to account for the proceeds of specific revenue that are legally restricted to expenditure for specified purposes. The Special Road and Bridge Fund, Law Enforcement Sales Tax Fund, Central Emergency Dispatch Service Fund and Capital Improvements Fund are all considered major Special Revenue Funds.

Capital Projects Fund: The Capital Projects Fund is used to account for resources designated to construct or acquire capital assets and major improvements. Revenues are derived primarily from the issuance of long-term liabilities, intergovernmental revenues, grants and earnings on investments. The Capital Improvements Fund is considered a Capital Project Fund.

The county's nonmajor governmental funds are also special revenue funds.

Note 1: Summary of Significant Accounting Policies (Continued)

Fiduciary funds account for assets held by the county as a trustee or an agent for individuals, private organizations, other governments, or other funds. Fiduciary fund reporting focuses on net assets and changes in net assets; fiduciary assets are reported in a separate Statement of Fiduciary Net Assets because the county cannot use those assets to finance its operations. The county's fiduciary funds consist of agency funds, which report assets held in a purely custodial capacity and do not involve measurement of results of operations.

The agency funds include the County Collector's Fund, School Fines Fund, Bankruptcy Fund, Prosecuting Attorney Forfeiture Fund, Prosecuting Attorney Administrative Fee Fund, Unclaimed Fees Fund, Overplus Fund, Bond Forfeiture Fund, Protested Taxes Account, Treasurer/Ex Officio Fund, Criminal Cost Fund, CDES Fund, CAFO Fund, Deputy Sheriff Salary Fund and County Employees Retirement Fund. These funds are all included in the accompanying Statement of Fiduciary Net Assets.

C. Basis of Accounting

Basis of accounting refers to when transactions are recorded in the financial records and reported in the financial statements. The government-wide and fund financial statements are prepared on the cash basis of accounting; accordingly, amounts are recognized when received or disbursed in cash. Consequently, certain assets and their related revenues (such as accounts receivable and revenues billed but not yet collected for goods and services provided) and certain liabilities and their related expenditures (such as accounts payable and expenditures for goods and services received but not yet paid for) are not recorded in these financial statements. Generally accepted accounting principles for state and local governments require revenues to be recognized when they are earned or when they become available and measurable and expenditures or expenses to be recognized when the related liabilities are incurred.

Equity classifications: On the Government-Wide Statement of Net Assets, equity is classified as net assets and displayed in two components: restricted and unrestricted. Net assets are reported as restricted when limitations are imposed on their use through either the enabling legislation adopted by the County Commission or external restrictions imposed by creditors, grantors, or the laws and regulations of other governments. All other net assets are reported as unrestricted. The county applies restricted resources first when a disbursement is made for which both restricted and unrestricted net assets are available.

In the fund financial statements, equity is classified as fund balance and also may be displayed in two components: reserved and unreserved. Fund balance is reported as reserved to indicate that a portion of the fund balance is not available for appropriation or is legally segregated for a specific future use. When such restrictions do not exist, fund balance is reported as unreserved.

D. Vacation, Personal and Sick Leave

Vacation time, personal time is considered as expenditures in the year paid. Vacation time is given ½ a normal work day a month up to a total of six work days a year and must be used in its entirety prior to the employee's next anniversary date. The county does not have personal days, but comp time can be earned by working overtime.

Note 1: Summary of Significant Accounting Policies (Continued)

E. Budgets and Budgetary Accounting

The County follows the following procedures in establishing the budgetary data reflected in the financial statements:

1) In accordance with Chapter 50, (Sections 50.525 through 50.745, RSMo 2000), the County adopts a budget for various County funds.

2) Prior to January 15, each department, office, institution, commission, or court of the County submits two budgets to the budget officer showing its requirements for expenditures and its estimated revenues for the next budget year. These figures are presented with corresponding figures for the last completed year and an estimate of the current year.

3) The budget officer holds public hearings prior to presentation of the budget document to the County Commission no later than January 15th of each year.

4) A public hearing is held not earlier than 10 days after the budget document is made available to the public and with at least 5 days notice of the hearing.

5) Amendments to the budget are made by the County Commission as required to allow for appropriation of increased revenues and adjustments between line items within the budget. Budget amendments were made for 2010 and 2009. Please see budgetary comparison schedules in required supplementary information for further details.

The County's policy is to prepare the annual operating budget on a cash basis.

F. Inventories and Capital Assets

Inventories include office equipment, road and vehicle maintenance supplies, and fuel. Capital assets consist of land, buildings, furniture, equipment, vehicles, and infrastructure such as roads and bridges. Both inventories and capital assets are recorded as disbursements when they are purchased or constructed.

G. Prior Period Adjustments

In the prior year, the County was required to include the Circuit Clerk Interest Fund, the Law Library Fund and the Associate Division Interest Fund in the County's financial statements. For the two years ended December 31, 2010, the County was no longer required to include these funds in the financial statements. The omission of these funds caused the beginning fund balance to be adjusted by $9,113.

Note 1: Summary of Significant Accounting Policies (Continued)

H. Long-Term Debt

Consistent with the cash basis of accounting, long-term debt is not reported in the government-wide or fund financial statements. Proceeds from debt issuances are reported when received, and payments of principle and interest are reported when disbursements are made.

I. Estimates

The preparation of financial statements in conformity with generally accepted accounting principles required management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

J. Reserved Fund Balance

Reserved fund balance represents the portion of fund balance that is not available for appropriation or is legally restricted for a specific purpose.

K. Risk of Loss

The County protects itself from risk of loss by purchasing commercial insurance for property damage and liability risks. The County does not self insure its risks.

Note 2: Stewardship, Compliance and Accountability

Compliance with Finance Related Legal and Contractual Provisions

The County incurred no material violations of finance related legal and contractual provisions.

Excess of Expenditures Over Appropriations in Individual Funds

For the year ended December 31, 2009, the County had an excess of expenditures over appropriations in the Domestic Violence Fund, the Law Enforcement Block Grant Fund and the Sheriff Revolving Fund, For the year ended December 31, 2010, the County had an excess of expenditures over appropriations in the Sheriff's Civil Fee Fund, Sheriff Forfeitures Fund, Law Enforcement Block Grant Fund, the Recorder Tech Fund, the Recorder User Fees Fund, the Sheriff Revolving Fund, the Senate Bill 40 Fund and the Central Dispatch Emergency Services Fund.

Net Assets/Fund Balance Deficit

For the two years ended December 31, 2010, the County's Sheriff's Civil Fee Fund had a deficit fund balance of $61.

Note 3: Cash and Investments

Deposits - At December 31, 2010 and 2009, the carrying amount of the County's deposits was $2,436,435 and $2,381,787 respectively. The bank balance for the year ended December 31, 2010 and 2009 was $2,517,041 and $2,480,921 respectively. Custodial credit risk is the risk that in the event of a bank failure, a government's deposits may not be returned to it. The County's deposit policy for custodial credit risk requires compliance with the provisions of state law. County policy further requires that all securities that serve as collateral against the deposits of a depository institution must be held in safekeeping at a non-affiliated custodial facility. Of the bank balance, $250,000 was covered by federal depository insurance and $2,267,041 was covered by collateral held by the County's safekeeping agent in the County's name at December 31, 2010 and $2,230,921 for the year ended December 31, 2009.

The Senate Bill 40 and the Central Emergency Dispatch Services Fund deposits at December 31, 2010 and 2009, and the County's Collector's deposits at December 31, 2010 and 2009, were not exposed to custodial credit risk because they were entirely covered by federal depositary insurance, by collateral securities held by the county's or board's custodial bank in the county's or board's name.

State law requires collateralization of all deposits with federal depository insurance; bonds and other obligations of the U.S. Treasury, U.S. agencies or instrumentalities of the State of Missouri; bonds of any city having a population of not less than two thousand, county, school district, or special road district of the State of Missouri; bonds of any state, tax anticipation notes issued by any first class county, or a surety bond having an aggregate value at least equal to the amount of the deposits

Investments - The county may purchase any investments allowed by the State Treasurer. These include (1) obligations of the United States government or any agency or instrumentality thereof maturing and becoming payable not more than three years from the date of purchase, or (2) repurchase agreements maturing and becoming payable within ninety days secured by U.S. Treasury obligations of U.S. government agencies or instrumentalities of any maturity, as provided by law.

Interest Rate Risk - Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. The County has no formal investment policy regarding interest rate risk.

Investment Credit Risk - The County has no investment policy that limits its investment choices other than the limitation of state law as follows:

a. Direct obligations of the U.S. Government, its agencies and instrumentalities to which the full faith and credit of the U.S. Government is pledged, or obligations to the payment of which the full faith and credit of the State is pledged.

Note 3: Cash and Investments (Concluded)

b. Certificates of deposit or savings accounts that are either insured or secured with acceptable collateral with in state financial institutions, and fully insured certificates of deposit or savings accounts in out-of-state financial institutions.

Concentration of Credit Risk - The County places no limit on the amount it may invest in any one issuer. For the two years ended December 31, 2010, the County had no concentration of credit risk.

The carrying values of deposits and investments shown above are included in the financial statements at December 31, 2009, as follows:

Deposits	$ 694,562
Investments	1,687,225
Total Deposits and Investments	$ 2,381,787

As of December 31, 2009, the County's investments were as follows:

Fund	Type	Maturities	Amount
Multiple Fund	Certificate of Deposit	1/23/2010	$ 251,185
Multiple Fund	Certificate of Deposit	1/24/2010	509,344
Multiple Fund	Certificate of Deposit	7/27/2010	373,566
Multiple Fund	Certificate of Deposit	8/13/2010	553,130
	Total Investments		$ 1,687,225

The carrying values of deposits and investments shown above are included in the financial statements at December 31, 2010, as follows:

Deposits	$ 725,656
Investments	1,710,779
Total Deposits and Investments	$ 2,436,435

As of December 31, 2010, the County's investments were as follows:

Fund	Type	Maturities	Amount
Multiple Fund	Certificate of Deposit	1/23/2011	$ 253,614
Multiple Fund	Certificate of Deposit	1/23/2011	514,269
Multiple Fund	Certificate of Deposit	1/23/2011	384,418
Multiple Fund	Certificate of Deposit	2/13/2011	558,478
	Total Investments		$ 1,710,779

Note 4: Taxes

Property taxes attach as an enforceable lien on property as of January 1 each year. Taxes are levied on November 1st and payable by December 31st of each year. Taxes paid after December 31 are subject to penalties. The county bills and collects its own property taxes and also taxes for most other local governments (except some cities). The assessed valuation of the tangible taxable property for the calendar years 2010 and 2009 for purposes of County taxation was as follows:

	2010	2009
Real Estate	$ 75,609,650	$ 73,600,883
Personal Property	23,337,842	24,537,174
Railroad and Utilities	6,186,349	6,022,491
Total	$105,133,841	104,160,548

The County also receives sales tax collected by the State and remitted based on the County's sales tax rate to the total sales tax collected in the County.

The tax levy per $100 of the assessed valuation of tangible taxable property for the calendar years 2010 and 2009 for purposes of County taxation was:

	2010	2009
General Revenue Fund	$ .1200	$ .1200
Senior Citizens Services	.0500	$ .0500
Senate Bill 40	$ .0800	$ .0800
Total	$ .2500	$ .2500

Note 5: County Employees' Retirement Fund (CERF)

The County Employees' Retirement Fund was established by the State of Missouri to provide pension benefits for County officials and employees.

A. Plan Description

The Retirement Fund is a cost-sharing multiple employer defined benefit pension plan covering any county elective or appointed officer or employee whose performance requires the actual performance of duties during not less than (1,000) one thousand hours per calendar year in each county of the state, except for any city not within a county and any county of the first classification having a charter form of government. It does not include county prosecuting attorneys covered under the Missouri State Retirement System, county sheriffs covered under Sections 57.949 to 57.997, RSMo and certain personnel not defined as an employee per Section 50.1000(8), RSMo. The Fund was created by an act of the legislature and was effective August 28, 1994. The general administration and the responsibility for the proper operation of the fund and the investment of the fund are vested in a board of directors of nine persons.

B. Pension Benefits

Beginning January 1, 1997, employees attaining the age of sixty-two years may retire with full benefits with eight or more years of creditable service. The monthly benefit for County Employees is determined by selecting the highest benefit by calculating using three different prescribed formulas (flat-dollar formula, targeted replacement ratio formula, and prior plan's formula). A death benefit of $10,000 will be paid to the designated beneficiary of every active member upon his or her death.

Upon termination of employment, any member who is vested is entitled to a deferred annuity, payable at age sixty-two. Early retirement at age fifty-five with reduced benefit is allowed for vested employees.

Any member with less than eight years of creditable service forfeits all rights in the fund but will be paid his or her accumulated contributions.

The County Employees' Retirement Fund issues audited financial statements. Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, P.O. Box 2271, Jefferson City, Missouri 65102-2271, or by calling 1-573-632-9203.

C. Funding Policy

In accordance with State Statutes, the Plan is funded through various fees collected by counties and remitted to the CERF. Eligible employees hired before February 2002 have an option to contribute 2% of their annual salary, while employees hired after February 2002 are required to contribute 6% of their annual salary in order to participate in the CERF. During 2010 and 2009, the County collected and remitted to CERF, employee contributions of approximately $79,836 and $78,918 respectively, for the years then ended.

Note 6: Commitments and Contingencies

The county is a party to various legal proceedings. At the date of these financial statements, the County cannot estimate its liability, if any, from losses that may result from certain proceedings. In the opinion of management and the County attorneys, the potential adverse impact of these proceedings would not be material to the combined financial statements of the County.

The County has several federal and state grants for specific purposes that are subject to review and audit by grantor agencies. Such audits could result in reimbursements to the grantor agency for expenditures disallowed under the terms of the grant. County management is not aware of any potential losses from such disallowance and believes that reimbursements, if any, would not be material.

Note 7: Central Dispatch Emergency Services Fund

Due to a statutory change effective August 28, 2010, the County's Central Dispatch Emergency Services Fund is considered a legally separate political subdivision. Even though the fund is now considered a legally separate entity, the fund was audited for the two years ending December 31, 2010 and will be included in the financial statements of this audit.

Note 8: Risk Management

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is a member participant in a public entity risk pool which is a corporate and political body created pursuant to state statute (Chapter 537.70 RSMo. 1986). The purpose of the risk pool is to provide liability protection to participating public entities, their officials, and employees. Annual contributions are collected based on actuarial projections to produce sufficient funds to pay losses and expenses. Should contributions not produce sufficient funds to meet its obligations, the risk pool is empowered with the ability to make special assessments. Members are jointly and severally liable for all claims against the risk pool.

The County is also a member of the Missouri Association of Counties Self-Insured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this Fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The Fund is self insured up to $2,000,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

Daviess County, Missouri
Notes to the Required Supplementary Information
For the Two Years Ended December 31, 2010

Note 1: Budgeting and Budgetary Practices

The County Commissioners and other applicable boards are responsible for the preparation and approval of budgets for various county funds in accordance with Sections 50.525 through 50.745, RSMo, the county budget law.

Note 2: Budgetary Basis of Accounting

The County budget is adopted on the cash basis of accounting.

Note 3: Expenditures in Excess of Appropriations

For the two years ended December 31, 2010, expenditures exceeded final budget amounts as follows:

	Amount Over Budget	
	2010	2009
Sheriff Civil Fee Fund	$ 831	$ -
Domestic Violence Fund	$ -	$ 91
Sheriff's Forfeitures Fund	$ 29	$ -
Law Enforcement Block Grant Fund	$ 11,753	$ 325
Recorder Tech Fund	$ 380	$ -
Recorder User Fees Fund	$ 2,999	$ -
Sheriff Revolving Fund	$ 922	$ 795
Senate Bill 40 Fund	$ 1,527	$ -
Central Dispatch Emergency Services	$ 32,229	$ -

FEDERAL COMPLIANCE SECTION

Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

To the County Commission of
Daviess County, Missouri
Gallatin, Missouri

I have audited the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Daviess County, Missouri as of and for the two years ended December 31, 2010, which collectively comprise of the County's basic financial statements and have issued my report thereon dated May 24, 2011. In my report, the county prepares its financial statements on a prescribed basis of accounting that demonstrates compliance with the cash basis and budget laws of the State of Missouri, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America. I conducted my audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing my audit, I considered the County's internal control over financial reporting as a basis for designing my auditing procedures for the purpose of expressing an opinion on the financial statements but not for the purpose of expressing an opinion on the effectiveness of the County's internal control over financial reporting. Accordingly, I do not express an opinion on the effectiveness of the County's internal control over financial reporting.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the County's financial statements will not be prevented, or detected and corrected on a timely basis.

Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Basic Financial Statements Performed in Accordance with Government Auditing Standards (Concluded)

My consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be deficiencies, significant deficiencies or material weaknesses. I did not identify any deficiencies in internal control over financial reporting that I consider to be material weaknesses, as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the County's financial statements are free of material misstatement, I performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of my audit, and, accordingly, I do not express such an opinion. The results of my tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

This report is intended solely for the information of the Board of Commissioners, management, others within the entity, federal awarding agencies, and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

Kevin G. Hudson, C.P.A.
Certified Public Accountant
May 24, 2011

Independent Auditors' Report on Compliance with Requirements Applicable to Each Major Program and on Internal Control over Compliance in Accordance with OMB Circular A-133

To the County Commissioners
Daviess County, Missouri
Gallatin, Missouri

Compliance

I have audited the compliance of the Daviess County, Missouri with the types of compliance requirements described in the OMB Circular A-133 *Compliance Supplement* that could have a direct and material effect on each of the County's major federal programs for the two years ended December 31, 2010. The County's major federal programs are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts and grants applicable to each of its major federal programs is the responsibility of the County's management. My responsibility is to express an opinion on the County's compliance based on my audit.

I conducted my audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133. *Those standards and OMB* Circular A-133 require that I plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the County's compliance with those requirements and performing such other procedures as I considered necessary in the circumstances. I believe that my audit provides a reasonable basis for my opinion. My audit does not provide a legal determination on the County's compliance with those requirements.

In my opinion, the County complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the two years ended December 31, 2010.

Independent Auditors' Report on Compliance with Requirements Applicable to Each Major Program and on Internal Control over Compliance in Accordance with OMB Circular A-133 (Continued)

Internal Control Over Compliance

The management of the County is responsible for establishing and maintaining effective internal control over compliance with requirements of laws, regulations, contracts and grants applicable to federal programs. In planning and performing my audit, I considered the County's internal control over compliance with the requirements that could have a direct and material effect on a major federal program in order to determine my auditing procedures for the purpose of expressing my opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, I do not express an opinion on the effectiveness of the County's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance*, is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis.

My consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be deficiencies, significant deficiencies or material weaknesses. I did not identify any deficiencies in internal control over compliance that I consider to be material weaknesses, as defined above.

This report is intended solely for the information and use of the Board of Commissioners, management, others within the entity, federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

The accompanying Notes to the Supplementary Schedule are an integral part of this schedule

Daviess County, Missouri
Notes to the Supplementary Schedule
For the Years Ended December 31, 2010 and 2009

Note 1: Summary of Significant Accounting Policies

A. Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of OMB Circular A-133. This circular requires a schedule that provides total federal awards expended for each federal program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA number is not available.

This schedule includes all federal awards administered by Daviess County, Missouri.

B. Basis of Presentation

OMB Circular A-133 includes these definitions, which govern the contents of the schedule:

Federal financial assistance means assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals.

Federal award means Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from Federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants or contracts, used to buy goods or services from vendors.

Accordingly, the schedule includes expenditures of cash awards.

C. Basis of Accounting

The schedule is presented on the cash basis of accounting, which recognizes amounts only when disbursed in cash.

Note 2: Subrecipients

The county provided federal awards to one subrecipient during the years ended December 31, 2010 and 2009. This was a grant in the amount of $500,000 that was passed through to the Daviess County Public Water Supply District No.1

Daviess County, Missouri
Schedule of Findings and Questioned Costs
Years Ended December 31, 2010 and 2009

Section I - Summary of Auditors' Results

Financial Statements

Type of auditor's report issued	Unqualified
Internal control over financial reporting:	
Material weakness(es) identified	_Yes X No
Significant deficiencies identified not considered to be material weaknesses?	__Yes X None Reported
Noncompliance material to financial statements noted	_Yes X No

Federal Awards

Internal control over major programs:	
Material weakness(es) identified?	_Yes X No
Significant deficiencies identified not considered to be material weaknesses?	_Yes X None Reported
Type of auditor's report issued on compliance for major programs	Unqualified
Any audit findings disclosed that are required to be reported in accordance with Circular A-133, Section .510(a)	_Yes X No

Identification of major programs:

CFDA Number	Name of Federal Program or Cluster
20.205	Highway Planning and Construction
14.228	CDBG Grants/State's Program

Dollar threshold used to distinguish between Type A and Type B programs:	$ 300,000

Daviess County, Missouri
Schedule of Findings and Questioned Costs
Years Ended December 31, 2010 and 2009

Section II - Financial Statement Findings

There were no financial statement findings.

Section III - Federal Award Findings and Questioned Costs

This section contains no audit findings that *OMB Circular A-133* requires to be reported for an audit of financial statements.

Daviess County, Missouri
Follow-Up on Prior Audit Findings for an Audit of Financial
Statements Performed in Accordance with *Government Auditing Standards*

In accordance with *Government Auditing Standards,* this section reports the auditor's follow-up on action taken by Daviess County, Missouri, on the applicable findings in the prior audit report issued for the two years ended December 31, 2008.

07/08-01

Condition: The Developmentally Disabled board does not adequately review and properly approve disbursements made by the treasurer of the board. Monthly financial statements were not prepared for the board to review and monthly bank reconciliations were not prepared by the board treasurer.

Effect: Due to the lack of bank reconciliations and monthly financial statements, the Developmentally Disabled Board did not have proper information in which to make proper financial decisions.

Cause: Since there was inadequate internal controls and no financial reports for the board to review on a monthly basis, the board treasurer made unauthorized disbursements in the amount of $24,700.

Recommendation: The new treasurer should prepare monthly financial reports and bank reconciliations. I also recommend that the board review each individual expenditure and approve them before payment is made.

Status: Implemented

Daviess County, Missouri
Summary Schedule of Prior Audit Findings In Accordance with OMB Circular A-133

Section .315 of OMB Circular A-133 requires the auditee to prepare a Summary Schedule of Prior Audit Findings to report the status of all findings that are relative to federal awards and included in the prior audit report's Schedule of Findings and Questioned Costs. The summary schedule also must include findings reported in the prior audit's Summary Schedule of Prior Audit Findings, except those listed as corrected, no longer valid, or not warranting further action.

Section .500(e) of OMB Circular A-133, requires the auditor to follow up on these prior audit findings; to perform procedures to assess the reasonableness of the Summary Schedule of Prior Audit Findings; and to report, as a current year finding, when the auditor concludes that the schedule materially misrepresents the status of any prior findings.

The prior audit report issued for the two years ended December 31, 2008, included no audit findings that Section .510(a) of OMB Circular A-133 requires to be reported for an audit of federal awards.

NATURAL RESOURCES

Petroleum Storage Tank Insurance Fund Board of Trustees

July 2011

Report No. 2011-34

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Petroleum Storage Tank Insurance Fund Board of Trustees

Background	The Petroleum Storage Tank Insurance Fund (PSTIF) was created by statute to provide insurance to owners and operators of petroleum storage tanks in the event of a leak or spill. The PSTIF is overseen by an 11 member Board of Trustees, which receives assistance from an Advisory Committee. The PSTIF is currently scheduled to expire on December 31, 2020.
Financial Condition	The PSTIF has $27 million more in liabilities than it has in assets, and it appears revenues will not be enough to cover cleanup costs at contaminated sites. Similar conditions were noted in our 2001 audit. The Trustees should consider various options, such as increasing load transport fees and improving timeliness in finalizing claims, formalizing a risk-based approach for cleanups, increasing participation fees or deductible amounts or reducing liability limits, some of which may require legislative action. The Advisory Board has not reported on the private insurance market since 2003, even though it is required by statute to do so every 2 years, and the Trustees need access to this information to make informed decisions.
Administrative Services Contract	The PSTIF pays a company over $3 million each year to perform administrative tasks, such as receiving and processing insurance applications, sending renewal notices, and receiving and processing claims. The company charges $94.35 an hour for claims management services, which seems high compared to salaries and benefits of state employees in similar jobs. The Trustees should document a formal analysis to determine if hiring employees for this work would be a better use of public funds.

In the areas audited, the overall performance of this entity was **Fair**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The Petroleum Storage Tank Insurance Fund Board of Trustees did not receive any federal stimulus monies during the audited time period.

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 11

Appendixes

A Comparative Statement of Net Assets, June 30, 2010 and 2009 13

B Comparative Statement of Revenues, Expenses, and Changes in Net Assets, Years Ended June 30, 2010 and 2009 14

C Comparative Statement of Cash Flows, Years Ended June 30, 2010 and 2009 15

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the Petroleum Storage Tank
Insurance Fund Board of Trustees
and
Carol Eighmey, Executive Director
Jefferson City, Missouri

The State Auditor is required under Chapter 29, RSMo, to audit the Petroleum Storage Tank Insurance Fund Board of Trustees. The board engaged Casey-Beard-Boehmer PC (formerly Casey and Company, LLC), Certified Public Accountants (CPAs), to audit the board's financial statements for the years ended June 30, 2010 and 2009. To satisfy our statutory obligation and minimize duplication of effort, the State Auditor has used the work of the CPA firm. We reviewed the reports and substantiating working papers of the CPA firm to satisfy ourselves as to the appropriateness of using the reports, and we accept them in partial fulfillment of our duties under Chapter 29, RSMo. We have also audited certain operations of the board in fulfillment of our duties. The scope of our audit included, but was not necessarily limited to, the years ended June 30, 2010 and 2009. The additional objectives of our audit were to:

1. Evaluate the board's internal controls over significant management and financial functions.

2. Evaluate the board's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the board, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the board's management and was not subjected to the procedures applied in our audit of the board.

For the areas audited, we identified (1) no significant deficiencies in internal controls, (2) no significant noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Petroleum Storage Tank Insurance Fund Board of Trustees.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Mark Ruether, CPA
In-Charge Auditor:	Joyce Thomson

1. Financial Condition

Total liabilities of the Petroleum Storage Tank Insurance Fund (PSTIF) exceeded total assets by over $27 million as of June 30, 2010. Financial projections indicate revenues will not be sufficient to cover clean up costs at contaminated sites through December 31, 2020, which is the expiration date of the fund.

Although the PSTIF had a cash balance exceeding $78 million at June 30, 2010, the PSTIF also had claim liabilities exceeding $106 million. Claim liabilities include claim reserves which are estimates of costs for the cleanup of known contamination caused by petroleum releases from underground and aboveground storage tanks, as well as estimated future costs for unknown contaminated sites and any future petroleum leaks or spills. PSTIF personnel routinely prepare financial projections to assist the Board of Trustees in monitoring the financial status of the fund. The financial projections indicate cleanup costs will exceed revenues due to known locations currently undergoing cleanup and potential new cleanup sites.

The Board is required by Section 319.129.17, RSMo, to obtain an actuarial study of the PSTIF every 2 years. These actuarial studies provide a 10-year projection of the estimated financial condition of the PSTIF. The most recently completed study in 2009 indicated the PSTIF would have a deficit of $58 million by 2019.

We noted similar financial concerns in our prior audit issued in 2001, which indicated the PSTIF was scheduled to expire on December 31, 2003. Because of the large number of contaminated sites requiring cleanup, the Missouri General Assembly has twice extended the expiration date of the PSTIF since 2001, to its current expiration date of December 31, 2020. While the legislature has a history of extending the life of the PSTIF to ensure adequate funding is available for the cleanup of contaminated sites, the Board should consider the following alternatives:

Transport load fee and claim resolution

Additional revenues could be generated by increasing the transport load fee and finalizing claims in a more timely manner.

The largest source of PSTIF revenues is the transport load fee, which is a fee assessed on each load of petroleum brought into Missouri. Section 319.132, RSMo, authorizes the Board to set the fee at a maximum of $60 per transport load of 8,000 gallons; however, if the balance of the PSTIF exceeds $100 million, collection of the transport load fee would be suspended. Prior to 2008, the fee had been set at $40 per load, but due to increasing cash balances in the PSTIF, the Board reduced the fee to $20 per load in 2008. Current financial projections and actuarial studies, as described above, are based on the $20 fee currently in place. The Board indicated it closely monitors the financial condition of the PSTIF and will increase the transport load fee when necessary.

While the cash balance had been rising prior to 2008, the PSTIF has continued to show an accumulated deficit (liabilities exceeding assets). The amount of claim liabilities remains high in part because a large percentage of claims remain open for many years. Of the 1,100 total open claims in January 2011, 581 (53 percent) claims with total claim reserves of over $32 million have been open for 10 years or more. Board personnel indicated contact is made with each claimant at least annually to help ensure that cleanup activity is ongoing; however, claims cannot be closed and finalized until the cleanup work is approved by the Department of Natural Resources (DNR). In many instances, the DNR requires the landowners to perform soil and groundwater testing for several years before issuing final approval of the cleanup site, even though no cleanup activity has taken place for several years. In addition, litigation related to certain claims does not allow the claim to be closed and finalized. Board personnel indicated they work with the DNR to resolve old claims, but improvement in the timeliness of finalizing claims has been slow. Timely payment and finalization of old claims would help reduce claim reserves and allow the Board to increase the load transport fee to raise additional funding for the payment of current and future claims.

Risk-based approach

Although Missouri has made efforts to consider a risk-based approach for petroleum contamination cleanup, standards have not been formally adopted. Section 319.109[1], RSMo, requires the DNR to adopt a risk-based approach to corrective standards for cleanup of contamination and the Hazardous Waste Management Commission to propose rules to implement these standards by February 13, 2009. In 2001, the DNR formed a group of stakeholders with the help of a national expert to review a risk-based approach for petroleum storage tanks. Proposed standards were prepared in 2004; however, these standards have not been formally incorporated into the Code of State Regulations. Board personnel indicated these standards are normally followed when approving funds for specific projects. With the expectation that cleanup of all contaminated sites is not possible given the limited availability of financial resources, the Board should work with the DNR to ensure a risk-based approach is formally adopted and implemented. This would help ensure cleanup funding is provided to those sites with the greatest environmental impact.

Private insurance

The Board's Advisory Committee does not report biannually to the General Assembly on the private insurance market for tanks as required by state law. Currently, the PSTIF provides insurance coverage for about 85 percent of the state's petroleum storage tanks. When the program ends (currently set by state law to expire on December 31, 2020) tank owners will need to obtain insurance through private insurance carriers. The last report on the private

[1] Section 319.109, RSMo, defines risk-based approach as " . . . corrective standards which take into account the level of risk to public health and the environment associated with site-specific conditions and future land usage."

insurance market was prepared in 2003. Board personnel indicated the preparation of this report is not a priority and neither the Governor nor the General Assembly have requested a report since 2003. Section 319.131.2, RSMo, requires the PSTIF Advisory Committee to report biannually to the general assembly on the availability and affordability of the private insurance market as a viable method of meeting the financial responsibilities required by state and federal law in lieu of the PSTIF.

Participation fees

The Board could generate additional revenues by increasing participation fees. Participants in the insurance program pay an annual insurance participation fee of $100 to $200 per storage tank as established by Board rules; however, Section 319.133, RSMo, allows the Board to charge participation fees of $100 to $500 per tank. The participation fee provides insurance coverage to the participant in the event of a petroleum spill or leak. The average estimated cost of a contamination cleanup is over $75,000. To ensure the participation fees are in line with fair market value, the Board should compare the insurance participation fee to insurance premiums available in the market and consider increasing the participation fee accordingly.

Deductible amount and liability limit

The Board could reduce cleanup costs by seeking legislation to increase the insurance deductible amount and/or decrease the liability limit. In accordance with Section 319.131.4, RSMo, the PSTIF imposes a $10,000 deductible with the PSTIF paying additional eligible costs up to $1,000,000 per incident. Since cleanup improves a site's property value, owners have a significant interest in the amount of cleanup, but limited interest in controlling the costs of the cleanup.

From a national industry survey of 49 states performed in September 2010[2], 5 states create financial incentives for owners to control costs by applying a percentage deductible to the full cost of cleanup and increasing the proportion of costs for which owners are responsible as costs increase. In addition, according to the study, 16 states have deductible amounts higher than $10,000. Changing the deductible from $10,000 to a higher amount or as a percentage of costs with different percentages as costs increase could improve the financial condition of the PSTIF.

In addition, decreasing the liability limit would decrease PSTIF costs. Of the approximately 1,200 claims open as of November 2010, 52 claims exceeded $500,000 which totaled $36.6 million. If the maximum liability limit was $500,000, the 52 claims would have totaled $26 million resulting in a savings to the PSTIF of $10.6 million.

[2] Association of State and Territorial Solid Waste Management Officials, State Funds Task Force, State Funds Survey Results 2010.

Conditions previously reported

Similar conditions were noted in our prior report issued in 2001. While the Board has taken some action to better monitor financial resources and ensure adequate funding is available for the cleanup of contaminated sites, additional measures are needed to improve the financial condition of the PSTIF and to ensure revenues will be sufficient to cover clean up costs at all contaminated sites through December 31, 2020 (the expiration date of the PSTIF).

Recommendation

The PSTIF Board of Trustees consider the alternatives outlined above and continue to monitor the financial condition of the PSTIF to ensure adequate resources are available for petroleum contamination cleanup. The Board should work with the DNR to ensure timely closure and final payment of claims and formalization of risk-based cleanup standards. In addition, the Board should prepare biannual reports on the availability and affordability of the private insurance market, as required by state law

Auditee's Response

The PSTIF Board provided the following written response:

The PSTIF Board of Trustees is committed to assuring that adequate funds are available to fund all claims as they are submitted, while at the same time keeping fees as low as possible and collecting the minimum amount of money necessary to carry out its responsibilities. The Board believes its 13-year history demonstrates it has successfully balanced these competing goals.

Regarding the transport load fee and claim resolution, the Board agrees that if PSTIF-eligible responsible parties would complete their cleanups more quickly, and file reimbursement requests with the PSTIF more quickly, the cash balance in the Trust Fund would decrease more quickly, thereby allowing Trustees to consider increasing the transport load fee to rebuild the reserves that will be necessary for future claims and for paying "runout" after the scheduled 2020 "sunset date" of the program. The Board has a long history of initiating actions and dialogue to try and stimulate quicker cleanups.

However, the Board has no statutory authority to compel anyone to initiate a cleanup or complete cleanup activities on any specific timeframe. State law grants to other agencies and offices of state government the authority to compel actions or set deadlines for action. The PSTIF regularly communicates and collaborates with those other agencies.

Regarding a risk-based approach to cleanups, the Board concurs that the risk-based cleanup approach currently being administered by the DNR via guidance documents should be "codified" in regulations, and continues to provide input and assistance to the DNR on this issue.

Regarding private insurance, the Board acknowledges that its Advisory Committee has not prepared a recent report on private insurance, and has directed its Executive Director to work with the Committee to prepare such a report during 2011. The Board would note that its Advisory Committee is comprised of volunteers and has no staff, making biannual preparation of such a report difficult.

Regarding participation fees, it is doubtful whether the Board could increase participation fees prior to August 28, 2014, given the General Assembly's prohibition in section 1.310, RSMo.

In addition, the Board observes that by authorizing the transport load fee, the General Assembly has intentionally spread the cost of the program over all petroleum distributors, thereby allowing participation fees to remain low for small tank owners/operators, who often have older equipment and thin profit margins. Were the Board to charge actuarially-based participation fees, many small business owners likely could not afford PSTIF coverage.

Regarding the deductible and liability limit, the Board notes that when the General Assembly originally created the PSTIF, the deductible was $25,000; it subsequently reduced the deductible to $10,000.

It is also noted that a higher deductible would undermine the goal of accelerating cleanups, as insured tank owners/operators would likely be slower to undertake the initial phases of cleanups.

While a lower per-occurrence limit would obviously reduce the PSTIF's overall financial liability, it would also mean that the PSTIF would no longer meet federal and state "financial assurance" requirements for tank owners/operators, who would then have to purchase private insurance or letters of credit to supplement their PSTIF coverage. The board sees no reason to impose this additional cost on Missouri businesses and doubts there would be support for such a change in the Missouri General Assembly, especially in the current economic climate.

2. Administrative Services Contract

While the Board solicits proposals for administrative services every 5 to 7 years (through the Office of Administration, Division of Purchasing and Materials Management), the Board has not documented a formal cost/benefit analysis comparing the costs of contracting for administrative services to hiring employees to provide these services. The Board has contracted with a firm for several years to provide the majority of administrative functions related to the operation of the PSTIF, including receiving and processing applications for insurance coverage, sending renewal notices, receiving and processing claims, and other accounting and record keeping services. This firm has been paid over $3 million annually from the PSTIF.

The firm currently bills claims management services at $94.35 per hour, which accounts for the majority of administrative services provided to the Board. For example, in April 2009, the firm billed for 2,036.5 hours of claims management services totaling $192,144, which was 70% of the total amount billed ($274,511) for the month. This hourly rate appears high compared to salaries and benefits paid to comparable state employees. Board personnel indicated the Board has recently discussed the possibility of hiring employees with the Office of Administration, and it was determined that it did not make sense to hire additional state employees at this time due to current state budget problems, declining tank insurance claims, and the pending end of the PSTIF in 2020.

Cost/benefit analyses for major contracting decisions are necessary to ensure funds are spent efficiently and effectively.

Recommendation

The PSTIF Board of Trustees document a cost/benefit analysis to compare the costs of contracting for administrative services to the costs of providing these services in-house.

Auditee's Response

The PSTIF Board provided the following written response:

The Board shares the State Auditor's passion for controlling administrative costs and notes that prior to rebidding the contract in 2010, the Trustees and its Executive Director discussed the option of requesting authorization from the Governor and the General Assembly to hire state employees to perform the tasks currently being done by contract employees. It was concluded that was not a realistic or favorable option because:

i. Neither the Governor nor the General Assembly were likely to support a request to increase the state workforce at a time both were taking steps to shrink the state workforce.

ii. State compensation for the technically-trained personnel required for the PSTIF's work is below market, making it difficult to hire and retain quality personnel.

iii. Costs for state employees of equivalent training, expertise and experience as those provided by the Board's contractor are quite similar to the contractor's hourly rates. For example, a registered geologist employed by the State, when fringe benefits and overhead are included, costs $88-132 per hour, (using salaries of current employees working in the tanks area for the Department of Natural Resources and applying a multiplier of 3.5; see 10 CSR 25-15.010(8)(A)1). Costs for engineers are higher.

iv. The time required to obtain appropriation authority from the Governor and the General Assembly, then hire and train personnel, would be significant and would detract from and delay other activities and responsibilities of the Board, including its efforts to expedite cleanups and claim processing.

v. As noted in the audit report, claims management and processing requirements are diminishing over time, making it difficult to hire and train state employees who would then have to be laid off within a few years.

Finally, as noted in the report, the Board regularly rebids its contract with the assistance and oversight of OA's Division of Purchasing to assure that it is paying competitive rates for the required services.

Auditor's Comment

The PSTIF Board has no basis to conclude the General Assembly and Governor would not seek the most cost effective method to deliver public services. Without a thoroughly prepared and documented analysis, decision makers do not have the information available to make informed decisions. The Board should have had sufficient time to prepare such an analysis since our previous audit raised similar issues over 10 years ago. In addition, the PSTIF was originally set to expire in 1998 and has been extended until 2020. Given the current projected fund deficits, it is likely any additional employees would serve at least 7 or 8 years.

Petroleum Storage Tank Insurance Fund Board of Trustees Organization and Statistical Information

The Petroleum Storage Tank Insurance Fund (PSTIF) was first established by the Missouri General Assembly in 1989, in response to federal legislation requiring owners and operators of underground storage tanks (USTs) to have financial resources available to pay for cleanup of spills and/or leaks from their tanks. Originally called the Underground Storage Tank Insurance Fund, it began insuring owners and operators of such tanks in May 1992. Since then, the PSTIF has insured more than 4,700 UST sites and 13,000 tanks. Coverage is provided for the costs of cleaning up a leak or spill, as well as third-party property damage or bodily injury resulting from spills or leaks. A $10,000 deductible applies to each incident, with a policy limit of $1 million per incident and $2 million annual aggregate.

In 1995, the Missouri Legislature expanded the responsibilities of the PSTIF to include cleanup of sites where USTs had been closed. The same bill authorized the PSTIF to pay ongoing costs of cleanup at insured sites where a spill/leak had occurred before the owner was insured by the PSTIF. In 1996, the program was again expanded to offer insurance coverage to aboveground storage tanks (ASTs) owners/operators and to pay for cleanup of sites where ASTs had previously operated. This same legislative amendment renamed the fund to the PSTIF and established a Board of Trustees to oversee the PSTIF.

The Board of Trustees has eleven members. Eight members are appointed by the Governor with the advice and consent of the Senate. The other three members are designated officials from executive branch agencies. The Board of Trustees works to ensure monies are effectively used to clean up the environment, participants receive timely professional services, and resources are economically used to benefit the maximum number of Missourians.

The Board of Trustees established an Advisory Committee to assist and advise the Board on PSTIF operations. The Advisory Committee includes a variety of professionals from the petroleum industry, insurance industry, environmental consulting and contracting businesses, and environmental attorneys; also included are representatives from the Department of Natural Resources and the Department of Agriculture.

The PSTIF is primarily financed with a fee assessed on each load of petroleum brought into Missouri. Annual fees are also charged for insurance coverage. The PSTIF Board of Trustees currently contracts with a private company to provide administration services. These services include receiving and processing applications for insurance coverage, sending renewal notices, receiving and processing claims, and other accounting and record keeping services.

The PSTIF Board of Trustees may appoint an executive director to perform administrative duties. Carol R. Eighmey was appointed Executive Director on August 15, 1997. One other employee performs various administrative and clerical tasks.

State law currently specifies that the PSTIF will expire on December 31, 2020.

PSTIF Board of Trustees

Members	Term Expires*
Donald McNutt, Chairman	February 2009
James P. Ford, Vice Chairman	February 2008
Thomas Kolb	February 2011
Schuyler J. Mariea	February 2010
Danny Opie	February 2008
Thomas J. Pfeiffer	February 2006
Melvin Schebaum	February 2009
Bruce V. Work	February 2011
John Albert , Department of Agriculture	
Harry Bozoian, Department of Natural Resources	
Renee Slusher, Office of Administration	

* All members continue to serve on the board until replacements are appointed by the Governor.

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The PSTIF did not receive any federal stimulus monies during the years ended June 30, 2010 and 2009.

Seventh Judicial Circuit

City of North Kansas City Municipal Division

July 2011

Report No. 2011-33

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Seventh Judicial Circuit, City of North Kansas City Municipal Division

Comments	We evaluated the municipal division's internal controls over significant financial functions, including receipt and disbursement procedures, and its compliance with certain legal provisions, including rules governing fines, costs, and bonds. For the areas audited, no findings were identified.

In the areas audited, the overall performance of this entity was **Excellent**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The Seventh Judicial Circuit, City of North Kansas City Municipal Division, did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

State Auditor's Report 2

Organization and Statistical Information 4

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Seventh Judicial Circuit
and
Municipal Judge
North Kansas City, Missouri

We have audited certain operations of the City of North Kansas City Municipal Division of the Seventh Judicial Circuit in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended September 30, 2010. The objectives of our audit were to:

1. Evaluate the municipal division's internal controls over significant financial functions.

2. Evaluate the municipal division's compliance with certain legal provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the municipal division, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) no significant deficiencies in internal controls and (2) no significant noncompliance with legal provisions. No findings resulted from our audit of the City of North Kansas City Municipal Division of the Seventh Judicial Circuit.

A petition audit of the City of North Kansas City, fulfilling our obligations under Section 29.230, RSMo, is still in process, and any additional findings and recommendations will be included in the subsequent report.

Thomas A. Schweich
State Auditor

Audit Staff:	Robert Graham

Seventh Judicial Circuit
City of North Kansas City Municipal Division
Organization and Statistical Information

The City of North Kansas City Municipal Division is in the Seventh Judicial Circuit, which consists of Clay County. The Honorable K. Elizabeth Davis serves as Presiding Judge.

The municipal division is governed by Chapter 479, RSMo, and by Supreme Court Rule No. 37. Supreme Court Rule No. 37.49 provides that each municipal division may establish a violation bureau in which fines and costs are collected at times other than during court and transmitted to the city treasury.

Personnel

At September 30, 2010, the municipal division employees were as follows:

Title	Name
Municipal Judge	Steven R. Fuller
Court Clerk	Vicki Russell
Deputy Court Clerk	Amber Diven

Financial and Caseload Information

	Year Ended September 30, 2010
Receipts	$546,318
Number of cases filed	4,386

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Seventh Judicial Circuit, City of North Kansas City Municipal Division did not receive any federal stimulus monies during the year ended September 30, 2010.

Missouri State Auditor

City of Lowry City

July 2011

Report No. 2011-32

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the City of Lowry City

Utility Policies, Procedures, and Records	The city has not reviewed its water and sewer rates for several years and has not prepared a statement of costs to help determine if it is charging appropriate rates. The city is less likely to detect errors, theft, or misuse in the Water and Sewer Fund because the city does not perform monthly reconciliations of the utility amounts billed, collected and unpaid, and the City Treasurer is able to post adjustments without independent approval. The city was not adequately managing delinquent accounts; service was not discontinued upon non-payment, and the monthly delinquent account reports were not provided to the Board of Aldermen or maintained by the City Treasurer. Refundable utility deposits were not properly tracked and reconciled to the appropriate bank account. The City Treasurer calculated the amount of utility deposits paid as of January 6, 2011, to be $18,855, but the city only had $16,300 in bank accounts designated for utility deposits.
Restricted Funds	The city allocated expenses between restricted funds without adequate documentation of the justification. For example, City Treasurer wages were split evenly between the General Fund and the Water and Sewer Fund, but there is no record of how many hours the City Treasurer spent working on each city service or how this allocation was determined. The Police Fund has accumulated an excess balance of Law Enforcement Training fees.
Accounting Controls and Procedures	The city does not always issue prenumbered receipt slips for monies collected, which makes it difficult to ensure all monies are accounted for properly. The city maintains fuel tanks, but fuel use is not reconciled to fuel purchases to ensure fuel costs are reasonable. Some disbursements lacked adequate supporting documentation, including $370 in 2009 and $570 in 2010 paid to the Fire Chief to pay volunteer firemen for attending each monthly meeting and $200 paid to the City Clerk for a copy machine. Neither the Mayor nor the Mayor Pro Tem are bonded even though they can sign checks written on city bank accounts.
Property Tax System Controls and Procedures	The city should improve controls with respect to the property tax process. A detailed annual report of property taxes is not presented to the Board of Aldermen. The City Collector does not maintain an account book and did not prepare a list of delinquent taxes for approval by the Board of Aldermen until November 2010.

Payroll Issues	The city did not properly report wages, withhold employee payroll taxes from, or pay the employer's share of payroll taxes on property tax commissions retained by the City Treasurer/Collector. The Board of Aldermen approved and paid $150 bonuses to each full-time employee in December 2010 and 2009 in violation of the Missouri Constitution's prohibition against the payment of additional compensation to public officers for services previously rendered.
Audits, Budgets, and Financial Reporting	The city has not obtained required annual audits of its water and sewer systems, and budgets are missing required elements.
Minutes and Ordinances	Open meeting minutes did not always document a permissible reason for closing meetings or a roll call vote to go into a closed meeting. City ordinances are not complete, up-to-date, and sufficient, and the city is not complying with some ordinances. The city should adopt ordinances setting employee compensation and the term of office and duties of the City Clerk, property tax rates, penalties for delinquent taxes, and procedures regarding utility collections. Also, the City Collector retains 4 percent of property taxes collected, but the ordinance only authorizes the City Collector to retain 2 percent.

In the areas audited, the overall performance of this entity was **Fair**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The City of Lowry City did not receive any federal stimulus monies during the year ended June 30, 2010.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent:	The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
Good:	The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
Fair:	The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
Poor:	The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 15

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Lowry City, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the City of Lowry City. We have audited certain operations of the city in fulfillment of our duties. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2010. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions.

2. Evaluate the city's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Lowry City.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Donna Christian, CPA, CGFM
In-Charge Auditor:	Lori Bryant
Audit Staff:	Connie James

1. Utility Policies, Procedures, and Records

There are significant weaknesses in city operations related to water and sewer services. As a result, there is less assurance utility rates are set at an appropriate level and utility monies are handled and accounted for properly.

1.1 Water and sewer rates

The city has not performed a review of water and sewer rates for several years. Water and sewer rates have not changed since 2002. The city collected approximately $120,000 in water and sewer fees during the year ended June 30, 2010.

Water and sewer fees are user charges which should cover the cost of providing the related services. The city should perform a detailed review of its water and sewer costs, including depreciation and debt service costs, and set rates to cover the total costs of operation. Preparing a statement of costs would not only allow the city to determine the rates necessary to support current and future operations, but also provide documentation to customers of the rationale behind the rates. Such rate studies should be performed periodically.

1.2 Reconciliations and adjustment approval

Adequate reconciliations of water and sewer customer account activity are not performed, and adjustments made to customer accounts are not properly approved.

Although daily reports of receipts posted to the computerized utility system are generated and compared to individual deposits, the city does not perform monthly reconciliations of total amounts billed, payments received, and amounts unpaid. Additionally, the City Treasurer who is responsible for all utility billing, receipting, and recording functions has the ability to post adjustments to the computer system without obtaining independent approval. Further, adjustment reports are not generated and reviewed by the Board. This lack of reconciliations and oversight increases the risk of theft, loss, or misuse of funds and the possibility such problems might go undetected.

Monthly reconciliations are necessary to ensure all accounting records balance, transactions are properly recorded, and any errors or discrepancies are detected on a timely basis. Further, to ensure only the proper accounts and amounts are adjusted, all adjustments should be reviewed or approved by an independent person and adjustment reports should be generated and reviewed by the Board.

1.3 Shut-off procedures

The City Treasurer does not document actions taken on delinquent accounts, and water service is not always disconnected in accordance with written city guidelines. Additionally, the monthly report documenting past due accounts is not provided to the Board or retained by the City Treasurer.

According to the City Treasurer, utility bills are sent out the last day of each month, and the current practice is to assess a 10 percent late fee if the bill is not paid by the tenth of the following month. If residents do not pay their bill by the twentieth, their services are disconnected. There is a $25 reconnect fee. However, if the customer talks to the City Treasurer about payment arrangements or if the customer normally pays, the City Treasurer will not have their water service disconnected. We noted instances during the year ended June 30, 2010, where various customers had delinquent utility accounts not paid within the required time period; however, service was not disconnected.

Allowing customers to receive utility service without paying timely reduces the incentive to make timely payments and may result in a loss of revenue to the city. To ensure all utility customers are treated equitably and the city guidelines are followed, the City Treasurer should provide the Board of Aldermen with a report of delinquent accounts along with documentation of the action taken to collect unpaid amounts.

1.4 Utility deposits

Refundable utility deposits are not properly tracked and reconciled to restricted bank account balances. Before receiving utility service, new customers are required to pay a $100 refundable deposit. The city does not prepare a list of customer utility deposits monthly and reconcile the list to the amount of deposits held in city accounts. Additionally, while the city has two bank accounts designated for utility deposits, no funds were deposited into these accounts during our audit period. Instead, utility deposits collected were deposited into the Water and Sewer Fund checking account and never transferred to the utility deposit bank accounts. At our request, the City Treasurer prepared a list of utility deposits on hand from customer account information and calculated the amount of utility deposits paid as of January 6, 2011, to be $18,855; however, the city only has a total of $16,300 in bank accounts designated for utility deposits. Inadequate reconciliation procedures increase the possibility of undetected errors.

Utility deposits represent a liability to the city and by not depositing all utility deposits into the bank account established for that purpose, the city is unable to determine if the monies available are sufficient to meet the refundable deposit obligation. Complete and accurate records and reconciliation procedures are necessary to ensure utility deposits are accounted for properly and monies held are sufficient to meet the refundable deposit obligation.

Recommendations

The Board of Aldermen:

1.1 Review water and sewer rates periodically to ensure receipts are sufficient to cover all costs of providing these services.

1.2 Ensure monthly reconciliations of the amounts billed to amounts collected and delinquent accounts are performed, all adjustments to customer accounts are properly authorized, and adjustment reports are generated and reviewed.

1.3 Ensure city utility disconnect procedures are followed, and require the City Treasurer to provide the Board with a report of delinquent accounts along with documentation of the action taken to collect unpaid amounts.

1.4 Prepare a complete list of utility deposits monthly and reconcile to the bank account balances. Any differences should be investigated. Additionally, the Board of Aldermen should determine the amount of deposits held in the Water and Sewer Fund bank account, transfer the monies to the utility deposits bank accounts, and deposit all subsequent utility deposits received into the utility deposit bank account.

Auditee's Response

The Board of Aldermen provided the following responses:

1.1 We agree and will begin reviewing water and sewer rates when we prepare our annual budget.

1.2 We will now begin reviewing adjustment reports monthly and ensure monthly reconciliations are properly performed.

1.3 Documentation of delinquent account follow up procedures is shown on the monthly delinquent listing. This listing was previously thrown away; however, it will now be retained to document collection and shut off procedures.

1.4 We will immediately set up an Excel spreadsheet for customer deposits and reconcile the total to the balance in the bank accounts. Any customer deposits included in the Water and Sewer Fund bank account will be transferred to the utility deposit bank accounts.

2. Restricted Funds

The city has not established adequate procedures to ensure the use of various city funds is properly restricted, and the Law Enforcement Training Fund has accumulated a balance in excess of amounts allowed by state law.

2.1 Disbursement allocation

Disbursements are often allocated to various city funds without adequate documentation of how the allocation was determined. For instance, the City Treasurer's wages are paid 50 percent from the General Fund and 50 percent from the Water and Sewer Fund, with no documentation maintained to indicate the number of hours worked for each city service or how these allocations were determined. The Treasurer was paid a total of $21,266

during the year ended June 30, 2010. Additionally, $5,069 paid for a mower was divided equally between the Water and Sewer, Street, and Cemetery Funds, while the $40 cost of a battery for the mower was split 40 percent to the Street Fund and 60 percent to the Cemetery Fund.

To ensure restricted funds are used for intended purposes, the city should properly allocate disbursements to the various city funds based upon specific criteria, such as the number of hours worked on specific areas or projects. Additionally, documentation should be maintained to support the allocations.

2.2 Law Enforcement Training fees

The Police Fund has accumulated an excess balance of Law Enforcement Training (LET) fees. As of December 31, 2010, the Police Fund balance was approximately $12,000 of which approximately $11,000 was LET fees and the remainder was Police Officer Standards and Training (POST) monies.

Section 488.5336, RSMo, provides that no municipality shall retain more than $1,500 of LET fees per certified law enforcement officer, candidate for certification, or a coroner and the coroner's deputies and requires any excess be transmitted quarterly to the city General Fund. As of June 2010, there were two law enforcement officers in the city.

Recommendations

The Board of Aldermen:

2.1 Ensure disbursements and salaries are properly allocated to the applicable city funds and allocations are supported by adequate documentation.

2.2 Determine the excess balance of LET fees within the Police Fund and transfer any overage to the General Fund.

Auditee's Response

The Board of Aldermen provided the following responses:

2.1 We will perform a monthly time study of the City Treasure's time to determine the proper percentage of salary to allocate to each fund. This time study will be performed before the end of this year and documentation will be maintained to support our allocation. Also, we will immediately begin to retain supporting documentation of how other expense allocations are determined.

2.2 We have already started putting LET fees we now receive into the General Fund. A transfer will be made by next month to move the excess LET balance to the General Fund.

3. Accounting Controls and Procedures

Accounting controls and procedures utilized by the city need improvement.

3.1 Receipt slips

Receipt slips are not always issued for fire dues, rentals, permits, and licenses. Additionally, manual receipt slips issued for water and sewer deposits are not prenumbered.

To ensure all monies received are properly recorded, prenumbered receipt slips should be issued for all monies not recorded on utility billing stubs or property tax statements, and the numerical sequence of receipt slips should be accounted for properly.

3.2 Fuel purchases

Although fuel usage logs are maintained for the fuel tanks, fuel use is not reconciled to fuel purchases. The city maintains diesel and regular gasoline fuel tanks for use by the fire, street, and water/sewer departments. The city spent over $10,500 for fuel during the year ended June 30, 2010. To ensure fuel costs for vehicles and equipment are reasonable, the city should reconcile fuel use to fuel purchases.

3.3 Supporting documentation

Adequate supporting documentation was not obtained for some disbursements. This includes checks issued to the Fire Chief for $370 and $570 in December 2009 and 2010, respectively, to pay volunteer firemen $5 for attending each monthly meeting and a check issued to the City Clerk for $200 for a copy machine.

All disbursements should include proper supporting documentation to ensure the obligation was actually incurred and the disbursement represents an appropriate use of public funds.

3.4 Bonding

The Mayor, the City Treasurer/Collector, and the Mayor Pro Tem can sign checks issued on city bank accounts; however, the Mayor and the Mayor Pro tem are not bonded. Failure to properly bond individuals who have access to funds exposes the city to risk of loss.

Recommendations

The Board of Aldermen:

3.1 Require prenumbered receipt slips be issued for all monies not recorded on a utility stub or property tax statement.

3.2 Reconcile fuel use to fuel purchases and investigate any differences.

3.3 Require adequate, detailed supporting documentation be obtained and retained for all disbursements.

3.4 Maintain bond coverage for all officials with access to city assets.

Auditee's Response

The Board of Aldermen provided the following responses:

3.1 We will immediately implement this recommendation.

3.2 Starting next month we will reconcile fuel used to fuel purchased and investigate any differences.

3.3 Adequate supporting documentation will now be retained for all disbursements. Documentation was maintained to support payment to the firemen for attending meetings; however, this documentation was later destroyed. In the future a copy will be filed with the city.

3.4 This recommendation has been implemented. Bond coverage has been obtained.

4. Property Tax System Controls and Procedures

Several concerns were noted with reporting and monitoring procedures for the property tax system. The City Treasurer has been appointed by the Board of Aldermen as City Collector. During the year ended June 30, 2010, the city received property taxes of approximately $34,000. With the exception of the City Clerk reviewing property tax deposits into the city's bank account, no one is involved in the property tax process other than the City Treasurer/Collector. As a result, there is less assurance that property taxes are handled properly.

4.1 Detailed report of property taxes

A detailed annual report of property taxes is not prepared and presented to the Board of Aldermen.

Section 79.310, RSMo, requires the City Collector to make a detailed report to the Board of Aldermen, stating the monies collected during the year, the amounts uncollected, and the names of the persons from which amounts are uncollected. A detailed annual report, which complies with state law, classified by type of tax would provide greater assurance taxes have been properly collected, written off, or determined to be delinquent. Such reports should summarize all taxes charged to the City Collector, collections, delinquent credits, abatements and additions, and protested amounts. Annual reports, examined by the Board of Aldermen, would help detect any errors or irregularities that might occur.

4.2 Account book

An account book to record property tax charges, collections, and remaining delinquent taxes is not maintained by the City Collector. A properly maintained account book, including (by type) the property taxes charged to the City Collector at the beginning of the year, collections each month, and balances uncollected, can be useful in preparing the annual report required by state law.

4.3 List of delinquent taxes

A list of delinquent taxes is not prepared and approved by the Board of Aldermen. The City Collector did prepare a list of delinquent real estate taxes for the November 2010 board meeting; however, this was the first such report that had been prepared for several years.

Section 94.320, RSMo, provides the Board of Aldermen shall require the City Collector, at the first meeting of the Board in April each year, to prepare lists of delinquent taxes. The Board of Aldermen shall examine and approve the lists and charge the City Collector with the lists to collect the taxes due.

Recommendations

The Board of Aldermen:

4.1 Require the City Collector to prepare detailed annual reports as required by state law.

4.2 Require the City Collector to maintain an account book.

4.3 Require the City Collector to submit an annual list of all taxes remaining due and uncollected to the Board.

Auditee's Response

The Board of Aldermen provided the following responses:

4.1 A report has been prepared and provided to the Board of Aldermen.

4.2 An account book will be prepared beginning with the next tax year.

4.3 A report has been prepared and provided to the Board of Aldermen.

5. Payroll Issues

Some wages were not properly reported and bonuses were paid to employees.

5.1 Reporting wages

The city did not properly report as wages, withhold employee payroll taxes from, or pay the employer share of payroll taxes on property tax commissions retained by the City Treasurer/Collector. Commissions totaled $1,500 in 2010 and $1,214 in 2009. The city did file IRS form 1099s; however, the payments appear to represent compensation subject to Form W-2 reporting and payroll tax withholding.

Section 105.300, RSMo, defines an appointive officer or employee of a political subdivision as an employee for Social Security and Medicare tax purposes. For employees, the IRS requires employers to report compensation on W-2 forms and withhold and remit federal income taxes. Similarly, Chapter 143, RSMo, includes requirements for reporting wages and withholding state income taxes. State and federal laws require

employers to pay the employer's share of Social Security and Medicare on the compensation paid to employees.

5.2 Bonuses

The Board of Aldermen approved and paid Christmas bonuses of $150 to each of the city's full-time employees in December 2010 and 2009 totaling $1,050.

The bonuses appear to represent additional compensation for services previously rendered and, as such, are in violation of Article III, Section 39, Missouri Constitution, and Attorney General's Opinion No. 72, 1955 to Pray, which states, ". . . a government agency deriving its power and authority from the constitution and laws of the state would be prohibited from granting extra compensation in the form of bonuses to public officers after the service has been rendered."

Recommendations

The Board of Aldermen:

5.1 Ensure all compensation paid to employees is subject to payroll taxes and properly reported on W-2 forms.

5.2 Discontinue granting bonuses to employees.

Auditee's Response

The Board of Aldermen provided the following responses:

5.1 If we contract with the County Collector for the collection of city property taxes this will no longer be an issue; however, if we continue to collect city property taxes at city hall, we will look into implementing this recommendation before the next tax year.

5.2 We will stop paying bonuses immediately and consider other methods of compensating our employees.

6. Audits, Budgets, and Financial Reporting

The city did not obtain an annual audit or properly prepare and monitor budgets.

6.1 Audits

The city does not obtain annual audits of its water and sewer systems. Section 250.150, RSMo, requires the city to obtain annual audits of the combined water and sewer system. In addition to being required by state law, annual audits of city funds help ensure monies are properly handled and financial transactions are properly recorded.

6.2 Budgets

City budgets are not complete. The budgets do not include a budget message, beginning and estimated ending resources, a comparison between

budgeted and actual amounts for the 2 preceding years, or amounts related to the debt of the city.

Section 67.010, RSMo, requires the preparation of an annual budget with specific information. A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing financial expectations for each area of city operations. It will also assist in setting utility rates and informing the public about city operations and current finances.

Recommendations

The Board of Aldermen:

6.1 Obtain annual audits as required by state law.

6.2 Prepare annual budgets that contain all information as required by state law.

Auditee's Response

The Board of Aldermen provided the following responses:

6.1 In the past we have had difficulty in finding someone to perform our audit. We have funds included in this year's budget for an audit. We will contract for an audit of the year ending June 30, 2011.

6.2 We are already working on a budget for next year and all the required information will be included.

7. Minutes and Ordinances

The city did not always ensure compliance with the Sunshine Law, and improvement is needed in city ordinances.

7.1 Closed meetings

The minutes of open meetings do not always document reasons for closing meetings or the specific section of law that allows for the closed meeting. In addition, a roll call vote to go into a closed meeting is not always taken and/or recorded in the minutes.

Section 610.022, RSMo, requires that before any meeting may be closed, the question of holding the closed meeting and the reason for the closed meeting, including reference to a specific section of the law, shall be voted on at an open session. Additionally, a record of votes, including roll call votes, is required.

7.2 Ordinances

City ordinances are not complete and up-to-date, and the city does not comply with some ordinance provisions. Additionally, the city has not adopted ordinances required by state law and/or needed to govern the city.

- The city has not established an ordinance for employee compensation or the term of office and duties for the City Clerk. Section 79.270, RSMo, provides that compensation of city officials and employees be set by ordinance, and Section 79.320, RSMo, requires the term of office and duties be established by ordinance for the City Clerk. In addition to meeting statutory requirements, establishing ordinances to set compensation rates, duties, and terms of office documents the approved amounts to be paid and eliminates misunderstandings.

- The city has not adopted ordinances to set property tax rates. Section 94.190.3 RSMo, requires the property tax rate be set annually by ordinance.

- Ordinance number 196 provides for the City Collector to receive 2 percent of the property taxes collected; however, the City Collector retains 4 percent.

- There is no ordinance to establish penalties for delinquent taxes, although such penalties are charged.

- The Board has not adopted an ordinance regarding utility collections, fees, deposit amounts, and delinquent accounts. Although there are some written guidelines, these guidelines are not comprehensive or always followed.

Since the ordinances represent legislation passed by the Board of Aldermen to govern the city and its residents, it is important that city officials comply with city ordinances, adopt city ordinances as required by state law, and maintain ordinances in a complete up-to-date manner. Additionally, to ensure all utility and property tax accounts are handled equitably and in a consistent manner, the Board should establish comprehensive ordinances addressing these areas.

Recommendations

The Board of Aldermen:

7.1 Ensure roll call votes are taken during open meetings to close meetings, and the specific statute and subsection allowing closure is noted in the open meeting minutes.

7.2 Ensure city officials comply with city ordinances, new ordinances are passed where appropriate, and ordinances are maintained in a complete, up-to-date manner.

Auditee's Response

The Board of Aldermen provided the following responses:

7.1 We will ensure compliance with the Sunshine Law in all future meetings.

7.2 Some improvements have already been made on the city's ordinances and we will be working on additional ordinances.

City of Lowry City
Organization and Statistical Information

The City of Lowry City is located in St. Clair County. The city was incorporated in 1897 and is currently a fourth-class city. The city employed four full-time employees and five part-time employees on June 30, 2010.

City operations include law enforcement, fire services, utilities (water and sewer), cemetery, and street maintenance.

Mayor and Board of Aldermen

The city government consists of a mayor and four-member board of aldermen. The members are elected for 2-year terms. The mayor is elected for a 2-year term, presides over the board of aldermen, and votes only in the case of a tie. The mayor and Board of Aldermen, at June 30, 2010, are identified below. The Mayor is paid $90 per meeting plus $10 per special meeting attended and Board of Aldermen members are paid $40 per meeting plus $10 per special meeting attended. The compensation of these officials is established by ordinance.

John Neuenschwander, Mayor
Sean Langston, Alderman
Steve Elsey, Alderman
Charles Cone, Alderman
Mike Floyd, Alderman

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The City of Lowry City did not receive any federal stimulus monies during the year end June 30, 2010.

Financial Activity

A summary of the city's financial activity for the year ended June 30, 2010, follows:

City of Lowry City
Year Ended June 30, 2010

	General Fund	Police Fund	Fire Fund	Water and Sewer Fund	Street Fund	Cemetery Fund	Total

Note: The Police Fund cash balance includes the Law Enforcement Training savings account and certificates of deposits. The Water and Sewer Fund includes utility deposit monies. The Cemetery Fund includes the operating account, the perpetual trust accounts, and land purchase accounts.

THOMAS A. SCHWEICH
Missouri State Auditor

HARRY J. OTTO, CPA
DEPUTY STATE AUDITOR

July 6, 2011

Honorable Peter Kinder
Lieutenant Governor
State Capitol
Jefferson City, Missouri

Dear Lieutenant Governor Kinder:

To avoid a conflict of interest, the State Auditor has recused himself from all reports pertaining to your office and has directed me to oversee procedures performed by the State Auditor's professional audit staff. This report relates to the reimbursement calculated and paid by you for all in-state lodging costs previously paid to you or on your behalf by the State of Missouri from January 2005 through April 2011. Your calculation considered in-state lodging costs and made no determination if the travel was for official or non-official purposes. Our review has determined that the reimbursement amount of $52,320.00 was calculated correctly based on your assumptions and methodology. However you should consider the need to make additional reimbursements due to (1) coding errors that were made by your office within the state accounting system that resulted in you not repaying lodging costs totaling $1,472.53, (2) lodging expenditures totaling $416.10 paid to you by other state agencies, and (3) not considering meal costs when calculating your reimbursement.

The objectives of our review were to determine if:

1. The reimbursement amount was properly calculated (accurate) for in-state lodging paid to you or on your behalf and the amount calculated was fully reimbursed to the state based on your assumptions.

2. The assumptions, records, and supporting documentation for the reimbursement amount are reasonable and adequate.

Lieutenant Governor - Assumptions and Methodology

On April 26, 2011, you submitted a personal check, totaling $52,320.00, to the Office of Administration (OA) as reimbursement for in-state lodging costs. We received a written statement from your office indicating the reimbursement was made voluntarily and was not required by law, and that all travel costs paid to you and on your behalf were appropriate and lawful.

Your staff calculated the reimbursement amount using the state accounting system (SAM II) vendor payment information available on the Internet through the Missouri Accountability Portal (MAP). The calculation included all in-state lodging costs that were paid to you, and all in-state lodging costs direct billed by two hotels in St. Louis (Chase Park Plaza and Four Seasons Hotel) to the Office of Lieutenant Governor on your behalf, from January 2005 through April 2011.

Methodology

The methodology to accomplish our objectives included:

1) recalculating total vendor payments for in-state lodging paid to you or paid to hotels on your behalf as reported by the MAP during the period from January 2005 through April 2011;

2) reviewing all vendor payments made to you, including payments made by the Office of Lieutenant Governor, as well as other state departments, during the period from January 2005 through April 2011;

3) analyzing and reconciling the SAM II detailed expenditure transactions with the MAP vendor payment totals for the period from January 2005 through April 2011;

4) scanning office SAM II detailed in-state travel expenditures for possible misclassifications and coding errors for the period from January 2005 through April 2011;

5) summarizing office in-state travel expenditures for the period from January 2005 through April 2011;

6) obtaining an understanding of the status of the Lieutenant Governor's calendar;

7) reviewing audit documentation related to travel expenditures, including 10 of 127 expense claims, completed during the two previous audits of the *Office of Lieutenant Governor* (Report Numbers 2010-163 and 2007-64); and

8) obtaining deposit documentation from the OA to substantiate the reimbursement amount.

Procedures and Results

Our recalculation of the reimbursement amount, totaling $52,320.00, using your office's assumptions and methodology for in-state lodging costs, is consistent with the rounded amount determined by your staff. Our analysis of the vendor payment information for the applicable time period is as follows:

	In-State Lodging Costs*		
Time Period	Paid to Lieutenant Governor	Direct Billed by Hotels	Total
July 2010 to April 2011	$510.23	$2,307.07	$2,817.30
July 2009 to June 2010	2,110.88	8,826.78	10,937.66
July 2008 to June 2009	6,235.37	5,625.99	11,861.36
July 2007 to June 2008	3,751.50	5,622.28	9,373.78
July 2006 to June 2007	8,925.96	0.00	8,925.96
July 2005 to June 2006	5,954.96	0.00	5,954.96
January 2005 to June 2005	2,447.58	0.00	2,447.58
Total	$29,936.48	$22,382.12	$52,318.60

* As reported on the SAM II/MAP for vendor payments made through the Office of Lieutenant Governor.

We identified five vendor payments made to you by the Department of Economic Development (Office of Director and Division of Tourism) and the OA, during the period January 2005 to April 2011,

which were not taken into consideration by your office when determining the amount of reimbursement. These payments, totaling $976.17, were identified on your expense account as travel costs, including in-state meals, mileage, in-state lodging, and a state plane flight, related to your involvement on various boards, commissions, and taskforces. The in-state lodging portion of these payments totaled $416.10.

While reviewing the office detailed SAM II expenditure transactions and expense claims selected for testing, we also identified misclassifications made by your office due to transactions coded to an incorrect expenditure category. For example, several in-state lodging costs were classified as in-state meal costs, several in-state meal costs were classified as in-state lodging costs, and some in-state lodging costs were classified as out-of-state lodging costs. Overall, in-state lodging costs totaling $1,838.08 were misclassified, and other costs totaling $365.55 were misclassified as in-state lodging. While these expenditure misclassifications are not significant, they resulted in in-state lodging, totaling $1,472.53, not being considered in your reimbursement calculation. We discussed the miscoding of expense accounts with your staff during our previous audits of your office.

For travel expenditures tested in prior audits of your office, with one exception, the room rates charged during in-state lodging stays did not exceed the federal continental United States (CONUS) rates. We did observe that state sales taxes were paid on several hotel stays; however, following discussion with your staff, this appears to have been resolved in the fall 2007 and is no longer an issue. We also noted the Office of Lieutenant Governor never exceeded budget amounts between fiscal years 2005 and 2010.

Meal costs were not considered by your office in the calculation of the reimbursement amount. After corrections were made for the misclassifications noted above, reimbursements made to you for in-state meals totaled $10,893.13 during the period January 2005 to April 2011. According to the state travel policy, when no overnight travel is involved officials and employees must be in continuous travel status for 12 hours or more to be considered eligible for reimbursement of meal expenses. Your staff indicated to us that meal reimbursements and/or meals paid on your behalf were not considered for reimbursement because your lodging reimbursement greatly exceeded any questionable or inappropriate lodging costs.

We previously audited your mileage reimbursements for non-official use of your state-owned vehicle. In August 2007, you discontinued using the state-owned vehicle for official, commuting, or personal travel. Instead, you used your personal vehicle and claimed mileage for travel related to official business. You subsequently ceased claiming mileage reimbursement and no mileage claims have been paid to you since May 2009. Therefore mileage reimbursements were not addressed for the purposes of this review.

Because there was some confusion reported by various media sources about whether the office calendar was lost and/or not accessible for prior periods, we inquired about the status of the office calendar. According to OA, Information Technology Services Division (ITSD) personnel, the calendar was always accessible through the state archiving system. The state uses an email/calendar archiving system, and this system was upgraded in June 2009. As a result, the upgrade changed the way archived calendars are accessed and viewed. Also, calendar events are archived by posting date rather than event date. In April 2011, upon request by your office, the OA, ITSD restored over 18,000 archived calendar views. This resulted in numerous duplicate entries for some events because every action or revision made to the calendar was restored. The OA, ITSD also provided your office copies of the calendar information electronically, and, upon our request, your office provided a copy of the electronic calendar to us. As a result of the numerous duplicate entries for some events, it is cumbersome to review events on the restored calendars. Although the electronic calendar is your master calendar, your office also indicated that you worked from a printed copy of the calendar and made changes to the calendar as needed. These printed versions were not retained and revisions were not always updated on the electronic calendar.

Limitations

The calendars were not maintained for the purpose of providing a means or method to determine official and non-official events. As a result, we could not reach a comprehensive definitive conclusion with respect to making such as a determination. Documentation was not always complete or accurate as to the specifics of your scheduled events, such as the purpose of the event and a determination whether the event was for official state business.

Therefore, we did not attempt to compare in-state lodging costs paid to you with activities or events scheduled in your calendar. We also did not evaluate the purpose of travel related expenses to determine if the amounts paid for meals were appropriate based on the calendar information.

In addition, misclassifications were noted on four of the ten expense claims selected for review. Although we did not believe it to be cost-effective to review additional expense claims, it is likely additional instances of misclassifications exist in other claims submitted.

Conclusions

We have concluded:

1) With the exception of office misclassification coding errors which netted to $1,472.53, you have reimbursed the state for the total amount of in-state lodging costs paid to you or paid on your behalf by the Office of Lieutenant Governor from January 2005 through April 2011.

2) Two other state agencies reimbursed you for lodging expenses totaling $416.10 during the period from January 2005 through April 2011. These reimbursements were not taken into consideration by your office when determining the amount of reimbursement.

3) We cannot conclude with certainty that you have fully reimbursed the state because meal costs were not considered by your office when determining the reimbursement amount. However, you have assumed that any possible reimbursement calculation of potentially questionable meals (meals total $10,893.13) would more than be offset by your excessive reimbursement of in-state lodging. The findings of our report do not dispute this assumption.

Sincerely,

Harry J. Otto, CPA
Deputy State Auditor

Missouri State Auditor

Warren County

June 2011

Report No. 2011-30

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Warren County

Commission Minutes	The County Commission is not always maintaining a record of votes taken during closed meetings, as required by the Sunshine Law.
Fuel Use	The county does not require mileage and fuel use logs for county vehicles and equipment in the road and bridge department, and fuel use is not reviewed and reconciled to fuel purchases. Proper oversight is needed to prevent and detect errors, theft or misuse.
Gift Cards	The Assessor and Sheriff used county funds to purchase gift cards, which they gave to employees at the end of the year as appreciation awards. The Missouri Constitution forbids the payment of additional compensation, such as bonuses, to public employees for services already rendered. Moreover, the gift cards were bought with county monies from the Assessment Fund and Sheriff's Civil Fund, which have restrictions on how those monies can be used.
Computer Passwords	Passwords for county computers are not changed regularly to ensure confidentiality and reduce the risk of unauthorized users.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	During the 2 years ended December 31, 2010, the county was awarded $422,564 in ARRA funds: A $29,305 Recovery Act: Edward Byrne Memorial Justice Assistance Grant Program Local Solicitation grant which was spent by the Sheriff's department to purchase 19 mobile data terminals. A $13,645 Emergency Food and Shelter National Board Program grant, of which $10,111 was expended to provide meals, assist with rent or mortgage and assist with utility bills for needy families and individuals. The remaining $3,534 was reclaimed by the Emergency Food and Shelter National Board. A $37,998 Nonmonetary Immunization grant provided 1,652 vaccines to the county which were administered by the county health department. A $262,106 Homelessness Prevention and Rapid Re-housing Program grant to help families and individuals who are at risk of becoming homeless and those experiencing homelessness who need temporary assistance obtaining and retaining housing, of which $187,509 was received during the year ended December 31, 2010. Boonslick Regional Planning Commission received $3,790 of this for administration of the grant, North East Community Action Corporation received $95,554 and Saints Joachim & Ann Care Service received $88,165.

The Warren County Developmental Disabilities Board received $79,510 through the Medicaid Federal Medical Assistance Percentage grant, of which $35,500 was disbursed to two entities which used it to renovate a playground for children with developmental disabilities and repair and renovate a building used by developmentally disabled adults.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Warren County

We have audited certain operations of Warren County in fulfillment of our duties under Section 29.230, RSMo. In addition, McBride, Lock & Associates, Certified Public Accountants, has been engaged to audit the financial statements of Warren County for the 2 years ended December 31, 2010. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2010. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Warren County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice Fast, CPA, CGFM, CIA
Audit Manager:	Jeannette Eaves, CPA
In-Charge Auditor:	Tina Disney, M. Acct
Audit Staff:	Emily Bias
	Monique Williams

1. Commission Minutes

Records of votes taken in several closed sessions were not maintained. Section 610.020, RSMo, requires a record of votes taken in closed session be retained.

Recommendation

The County Commission ensure votes taken in closed sessions are retained as required by the Sunshine Law.

Auditee's Response

The County Commission provided the following response:

We do not always take votes when we decide to hire someone upon a department head's recommendation. We talk about it and usually have a consensus, but do not take votes. We will try to document votes in the future.

2. Fuel Use

The county has not established effective monitoring procedures regarding fuel use for the road and bridge department. Mileage and fuel use logs are not maintained for county vehicles and equipment, and fuel use is not reviewed or reconciled to fuel purchases. As a result, theft and misuse of fuel could go undetected. During the 2 years ended December 31, 2010, the county incurred fuel costs of approximately $198,000 for the road and bridge department.

Maintenance and review of vehicle and equipment mileage and fuel use logs and comparison of log information and inventory records to fuel purchases, are necessary to ensure vehicles and equipment are properly utilized, to prevent paying vendors for improper billing amounts, and to decrease the risk of theft or misuse of fuel occurring without detection. Logs should provide sufficient details so the county can effectively monitor vehicle and equipment use and fuel costs.

Recommendation

The County Commission require mileage and fuel use logs for all vehicles and equipment and review the logs for reasonableness. In addition, fuel use should be reconciled to fuel purchases, and any significant discrepancies should be investigated.

Auditee's Response

The County Commission provided the following response:

We are obtaining a computer system that monitors fuel pumped for clear and red diesel. We expect to have this system up and running by the first of October. Once the system is up and running, we will perform these reconciliations.

3. Gift Cards

During the 2 years ended December 31, 2010, the Assessor and Sheriff purchased gift cards to give to their employees at the end of each year as appreciation awards. The Sheriff purchased $7,750 of cards using the Sheriff's Civil Fund and the Assessor purchased $450 of cards using the Assessment Fund.

These gift cards may represent additional compensation in the form of bonuses for services previously rendered, in violation of Article III, Section 39 of the Missouri Constitution.

In addition, the purchase of gift cards does not appear to be an allowable use of these county funds. Section 57.280, RSMo, allows Sheriff's Civil Fund monies to be used only for the procurement of services and equipment to support the operation of the Sheriff's Office, and Section 137.725, RSMo, allows Assessment Fund monies to be used only for the salary and expenses of the Assessor's office.

Recommendation

The County Commission, along with the Sheriff and Assessor, ensure all disbursements are necessary and beneficial to county residents.

Auditee's Response

The County Commission provided the following response:

We had reservations about these purchases and questioned the officials. This audit reaffirms our opinion and we will not approve these requests in the future.

The Sheriff provided the following written response:

At the Warren County Sheriff's Department Employee Award and Recognition Banquet held in December of both 2009 and 2010 I presented each of my employees with a fifty-dollar ($50) Wal-Mart gift card. The cards presented for both years was $7,750 in total.

The purpose of the banquet and the cards was to recognize each of the employees and the contributions they have made to the organization. As a result of such awards and recognition in front of their peers we have significantly impacted the motivation of the department, we have brought the employees of the various divisions closer on a personal level, we have become familiar with each other's families, we have reduced turnover, we have minimized rumors and gossip, we have fostered a sense of belonging and ownership, and have become more effective and efficient in serving the citizens of Warren County.

As the elected Sheriff of Warren County I am both a manager and a leader. I am responsible for managing the financial budget and physical equipment of the overall agency, and I am the leader of the Sheriff's Department

employees. While I strive to be fiscally responsible for every penny I spend I am also constantly aware of the physical and emotional wellbeing of my employees. At any moment in time my personnel are directly responsible for not only their own safety and security, but that of the thirty-thousand residents of Warren County. To this end I utilize any method, resource, or tool at my disposal to motivate, lead, and manage. Napoleon once said that a soldier will fight long and hard for a bit of colored ribbon. I simply expanded upon that philosophy by not only presenting cloth service awards, but also paper certificates, public praise, and the Wal-Mart gift cards. My actions were based upon my interpretation of Missouri Statue 57.280 which states the Sheriff's Civil Fee funds may be expended at the discretion of the Sheriff for the furtherance of the Sheriff's set duties.

As a result of the recent opinion and advice of the Missouri State Auditor's Office I will discontinue the practice of awarding the gift cards.

The Assessor provided the following written response:

I, Wendy Nordwald the Warren County Assessor held a 2010 Recognition and Appreciation Night for staff with the purpose of improving moral, productivity, employee longevity, motivation and efficiency within the Assessors' Office. Each employee was recognized for their contributions and skills that enhance the office productivity and service to the taxpayers in which we serve throughout the year.

In 2008 and 2009, 2 (two) job positions within the Assessors' Office were lost and to date have not been replaced. The entire Assessment staff had stepped up for the challenge and successfully handled the increased workload, increased responsibilities and without any increased compensation, therefore $450 was spent on monetary money cards, to maintain as well as improve employee motivation, productivity, moral, longevity and efficiency.

Staff was recognized for their individual contributions and accomplishments in 2010 with a Personalized Certificate of Excellence and Individual Awards, along with monetary money card for wage compensation. As I interpret case law, Kuyper vs. Stone County Commission, 838 S.W.2d (Mo. Banc 1992), the Missouri Supreme Court held that the Assessor within the general amount budgeted, decides how much to pay employees of the office. The 2010 Recognition and Appreciation Night resulted in a lasting, positive and highly motivating effect on each and every staff member, and likewise beneficial to each taxpayer and/or resident to which we serve.

As a result of the discussion with the audit team and opinions of this report in the future to completely avoid these circumstances, I will either

discontinue this practice completely or compensate my employees out of my own personal funds.

4. Computer Passwords

Passwords for county computers are not changed on a periodic basis to ensure confidentiality. Without procedures to periodically change passwords, there is less assurance passwords effectively limit access to the data files and programs to only those individuals who need access for completion of job responsibilities, and to reduce the possibility of unauthorized users.

Recommendation

The County Commission ensure passwords are periodically changed.

Auditee's Response

The County Commission provided the following response:

We will talk to our IT person next week about setting up a schedule for changing passwords.

Warren County
Organization and Statistical Information

Warren County is a county-organized, third-class county. The county seat is Warrenton.

Warren County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 113 full-time employees and 13 part-time employees on December 31, 2010.

In addition, county operations include the Warren County Developmental Disabilities Board and the county health department.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2011	2010
Arden Engelage, Presiding Commissioner	$	34,670
Daniel Hampson, Associate Commissioner		32,670
Hubert Kluesner, Associate Commissioner		32,670
Jerri Jordan, Circuit Clerk and Ex Officio Recorder of Deeds (1)		
Barbara Daly, County Clerk		49,500
Michael Wright, Prosecuting Attorney		109,366
Kevin Harrison, Sheriff		57,200
Gene Cornell, County Treasurer		36,630
Roger Mauzy, Sr., County Coroner		17,600
Jeffrey Hoelscher, Public Administrator		20,000
Linda Stude, County Collector, year ended February 28,	49,500	
Wendy Nordwald, County Assessor, year ended August 31,		49,500

(1)Compensation is paid by the state.

New County Facility

In November 1994, the county passed a 1/2-cent sales tax for 15 years for the purpose of capital improvements for the county. In February 2008, the county renewed the 1/2-cent sales tax indefinitely. The county is in the process of building a new administration building with these sales tax monies. The building is scheduled to be completed in early 2012 with an estimated cost of $6,531,255.

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

According to county personnel, the county was awarded the following American Recovery and Reinvestment Act of 2009 funding during the 2 years ended December 31, 2010:

A $29,305 Recovery Act: Edward Byrne Memorial Justice Assistance Grant Program Local Solicitation grant was awarded by the U.S. Department of Justice for the improvement of information system and technology. During the year ended December 31, 2009, $29,305 was received and expended by the Sheriff's Department to purchase mobile data terminals for 19 patrol vehicles.

A $13,645 Emergency Food and Shelter National Board Program grant was awarded by the U.S. Department of Homeland Security to supplement and expand ongoing efforts to provide shelter, food, and supportive services for needy families and individuals. Warren County provided 2,644 meals to individuals in the county, assisted in paying rent or mortgage for 26 households, and assisted in paying utility bills for 15 households. During the year ended December 31, 2009, $13,645 was received by Warren County and $10,111 was expended. The remaining $3,534 has been reclaimed by the Emergency Food and Shelter National Board.

A $37,998 Nonmonetary Immunization grant was awarded by the Centers for Disease Control and Prevention and passed through by the Missouri Department of Health and Senior Services to provide 1,652 vaccines to the county. During the year ended December 31, 2010, vaccines with a cost of $37,998 were received and administered by the County Health Department.

A $262,106 Homelessness Prevention and Rapid Re-housing Program grant was awarded by the U.S. Department of Housing and Urban Development and passed through the Missouri Department of Social Services to provide help for individuals and families who are currently in housing but are at risk of becoming homeless, and individuals and families who are experiencing homelessness and need temporary assistance in order to obtain and retain housing. During the year ended December 31, 2010, $187,509 was received and expended by Warren County related to this program. Warren County paid $3,790 to Boonslick Regional Planning Commission for administration of the grant and $95,554 and $88,165 to subgrantees North East Community Action Corporation and Saints Joachim & Ann Care Service, respectively.

The Warren County Developmental Disabilities Board received $79,510 under Title V, Section 5001 of the Recovery Act which provided additional federal funding through the Medicaid Federal Medical Assistance Percentage grant. The grant was awarded by the Missouri Department of Mental Health. The payments were made for Medicaid expenditures reported between October 1, 2008, and December 31, 2010. For the years ended December 31, 2010 and 2009, $79,510 was received by the board and $35,500 was disbursed to two entities, leaving a balance of $44,010 at December 31, 2010. Expenditures were for a flashing caution light system, boiler repair, and building renovation for an entity that serves adults with developmental disabilities and to renovate a playground for Warren County school children with disabilities.

Thomas A. Schweich

Missouri State Auditor

City of Pine Lawn

June 2011

Report No. 2011-29

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the City of Pine Lawn

Background

The Missouri State Auditor's Office has been petitioned by the citizens of Pine Lawn to audit the city four times in the last 17 years. Of the 29 recommendations reported in 2006 (Report no. 2006-082) for the city, only 13 were fully implemented. Multiple recommendations in this report are repeated from previous audit reports issued by our office.

Financial Condition

The General Fund and Trash Fund are in poor financial condition, and citizens could suffer the loss or reduction of some services. The city regularly transfers money from the General Fund to cover Trash Fund shortages, and the General Fund is still repaying a loan from the Capital Improvement Fund. The city is often late paying its trash vendor and paid $6,700 in late fees from January 1, 2009, to March 1, 2011. In February 2011, the city had a past due balance with its trash vendor of $87,225. A similar condition was noted in the 2006 audit.

Trash Services

The city does not charge enough for trash services to cover operating costs and is not adequately pursuing delinquent customer accounts. At the current user rate, the city pays $181,200 a year more for trash service than it would receive if all citizens paid their bills on time. Adding to the problem, as of January 4, 2011, the city is owed $1.4 million by 799 delinquent trash customers (63% of all trash accounts). The city's failure to adequately pursue delinquent trash accounts has been noted in audit reports at least as far back as 1994. The city must increase trash rates and/or decrease the cost of providing trash service and diligently pursue delinquent customer accounts or this situation will continue to worsen.

Budget Procedures

The city needs to improve its budgeting procedures. For fiscal year 2010, the city overspent its General Fund budget by $309,768, the majority of which was due to the police department overspending its budget by $255,855. If the Board of Aldermen regularly reviewed budget to actual statements, it could better control such overspending.

Instead of preparing a new budget for fiscal year 2010, the Board just used the fiscal year 2009 budget, which was not approved until 5 months after the fiscal year began. Moreover, no budget was prepared for any city funds other than the General Fund. The budget did not include many of the elements required by state law, such as beginning and ending cash balances and actual receipts and disbursements for the 2 preceding years. The 2000 and 2006 audits noted similar deficiencies.

Closed Meetings

The city often fails to document compliance with the Sunshine Law. Open meeting minutes do not always reflect a roll call vote to go into closed session and/or the specific reasons for closing the meeting. Similar concerns were noted in the 2000 and 2006 audits.

City Procedures

The city needs to improve it procedures and records for city property. Some departments do not maintain a list of assets, while others have incomplete or outdated lists, many assets are not tagged, and documented annual physical inventories are not performed, leaving city assets susceptible to theft or misuse. Although state law requires city contracts to be in writing, the city does not have written contracts with some of its service providers, such as attorneys, payroll services, and collectors of electronic fines and court costs. The city also did not maintain adequate documentation to show that bids were obtained for over $160,000 in purchases.

The city should consider obtaining regular audits to help with monitoring the city's financial condition and ensuring the propriety and accuracy of financial transactions. The city should adopt a written travel policy which explains acceptable travel expenses and the documentation required for reimbursement. The city should also maintain fuel and usage logs for equipment and vehicles. For fiscal year 2010, the city purchased $71,000 of fuel, but there is insufficient documentation to determine whether the miles driven were reasonable, all the fuel was used for city purposes, or the city received all the fuel for which it was charged.

Payroll and Fringe Benefits

The city paid salary advances to employees and aldermen in violation of the Missouri Constitution. The city should ensure ordinances exist setting the compensation of city officials and employees. The city also needs to improve its procedures related to the Mayor's use of a city vehicle. The city should require the Mayor to maintain a detailed mileage log indicating business and personal use of the vehicle, and the city should report the amount of personal mileage, including commuting, on the Mayor's W-2 form. If no mileage log is maintained, the IRS requires the full value of the vehicle be reported on the W-2 form. If neither of these approaches is followed, the IRS could impose penalties and/or fines on the city for failing to report all taxable benefits.

In the areas audited, the overall performance of this entity was **Poor**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The City of Pine Lawn did not receive any federal stimulus monies during the year ended June 30, 2010.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Pine Lawn, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the City of Pine Lawn. We have audited certain operations of the city in fulfillment of our duties. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2010. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions.

2. Evaluate the city's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Pine Lawn.

An additional report, 2011-023, *Twenty-First Judicial Circuit, City of Pine Lawn Municipal Division*, was issued in May 2011.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

	Chris Vetter, CPA

City of Pine Lawn
Management Advisory Report
State Auditor's Findings

1. Financial Condition

The General Fund and Trash Fund are in poor financial condition and are not expected to improve significantly, which could put citizens at risk of reduction or loss of some services. The following table reflects the ending cash balances of these funds, according to city accounting/budget records, for the 2 years ended June 30, 2010, as well as anticipated balances for the year ended June 30, 2011:

	Ending Cash Balance, Year Ended June 30,		
Fund	2011 (Budgeted)	2010 (Actual)	2009 (Actual)
General	$ 337,895	313,925	452,598
Trash	N/A*	13,208	29,684

*Budgeted ending balance is not available because the city did not prepare a budget for this fund (See MAR finding number 3).

The Trash Fund is in poor financial condition due to several factors. The city does not charge residents a rate sufficient to cover costs. In addition, the city does not actively pursue delinquent trash accounts, which totaled approximately $1.4 million as of January 4, 2011 (see MAR finding number 2). Because of the poor financial condition of the Trash Fund, the city has been unable to pay its trash vendor on time. From January 1, 2009, to March 1, 2011, the city paid approximately $6,700 in late fees to the trash vendor. In February 2011, the city had a past due balance of $87,225 for trash service.

The poor condition of the Trash Fund has also affected the financial condition of the General Fund. During the years ended June 30, 2010 and 2009, the city transferred $166,922 and $97,342 respectively, from the General Fund to the Trash Fund to cover shortages. In addition, from August 2006 through June 2008, the city transferred $93,927 from the General Fund to pay for trash service. For the year ended June 30, 2011, the city budgeted a transfer of $100,000 from the General Fund to the Trash Fund; however, $160,738 had been transferred as of April 5, 2011.

The city needed to borrow funds from the Capital Improvement Fund in 2007 and 2006, partially to cover funds transferred to the Trash Fund. The city is making regular payments from the General Fund to the Capital Improvement Fund to repay the amount borrowed plus interest. During the years ended June 30, 2010 and 2009, the city transferred $61,200 and $68,400 respectively, from the General Fund to the Capital Improvement Fund to repay a portion of the loans. As of June 30, 2010, the General Fund still owed $174,134 to the Capital Improvement Fund. The city plans to have the remainder of the loans repaid by June 2013.

The city cannot continue to spend more than it receives in the General Fund and the Trash Fund. The Board of Aldermen has not developed a formal or specific plan to reduce disbursements or increase receipts. In addition, the Board did not adopt a new budget for the year ended June 30, 2010, instead using the previous year's budget, and does not review budget to actual statements on a regular basis (see MAR finding number 3). To improve the financial condition of the city, the Board should develop a long-term plan that will allow the city to reduce disbursements and/or increase receipts to operate within its available resources. The recommendations contained in MAR finding number 2, if implemented, will help the city establish procedures to operate within available resources and help improve the financial condition of both the General Fund and the Trash Fund. In addition, the city should ensure bills are paid timely to avoid paying late fees and other penalties.

A similar condition was noted in the prior audit report No. 2006-82, *City of Pine Lawn, Missouri,* issued in December 2006.

Recommendation

The Board of Aldermen should closely monitor the financial condition of the city and develop a long-term plan to ensure receipts are maximized, disbursements are closely monitored, and bills are paid in a timely manner.

Auditee's Response

The Board of Aldermen, Mayor, and City Administrator provided the following written response:

The Board of Aldermen accepts the recommendation and intends to closely monitor the financial condition of the City and develop a long-term plan to ensure receipts are maximized, disbursements closely monitored, and bills paid in a timely manner.

On the loan from Capital Improvement to the General Fund, the Mayor has directed the City Administrator to provide the Board with a quarterly report to assure payments are being made properly.

2. Trash Services

The city does not charge customers a rate sufficient to cover the costs of providing trash service or actively pursue collection of delinquent trash accounts.

2.1 Trash rate

The trash rate charged to city residents does not cover amounts paid to vendors for trash hauling and payment collection services. As a result, the city is forced to make up the difference using other revenue sources. The city charges each household $12 per month, which is the maximum allowed per the original ballot voted in 1999. The trash vendor, however, charges the city approximately $23 per household per month. In addition, the vendor that bills and collects trash payments from residents retains 8 percent of the monies collected. If all households paid their bills, the city would still be

short approximately $15,100 each month or $181,200 each year. However, the actual difference is much greater since many residents are not paying their bills (see section 2.2). City officials indicated a rate increase has been discussed in the past, but they believed a rate increase would be the equivalent of a tax increase, requiring a vote of the citizens, instead of treating the trash rate as a user fee. Also, the city did not prepare a budget for the Trash Fund to monitor this situation (see MAR finding number 3).

The city should perform and document a detailed review of its trash costs and determine a rate necessary to cover the total costs of operations without generating excessive profits. Preparation of a statement of costs would allow the city to determine the rate necessary to support current and future operations as well as provide documentation to residents of the rationale behind the rates. The city should review alternatives to increase the trash rate to cover all costs of providing the trash service.

2.2 Delinquent accounts

The city does not adequately pursue collection of delinquent trash accounts, which has affected the financial condition of the city. As of January 4, 2011, the delinquent accounts list included 799 of the total 1,266 customers and totaled approximately $1.4 million (including 2 percent penalties on past due amounts), an increase of approximately $900,000 since June 30, 2006. The city passed an ordinance in 2002 to collect delinquent trash fees when housing inspections or business licenses are acquired or renewed. Although this ordinance attempts to collect a portion of the amount owed, the city does not actively pursue collection of past due trash fees when housing inspections or business licenses are not required. Allowing customers to receive service without payment reduces the incentive to make payments and results in loss of city revenue.

A similar condition was noted in our prior audit report.

Recommendations

The Board of Aldermen:

2.1 Evaluate ways to increase fees for trash services to a level sufficient to cover the costs of the service.

2.2 Discuss with legal counsel options available to ensure collection of delinquent trash accounts.

Auditee's Response

The Board of Aldermen, Mayor, and City Administrator provided the following written response:

The Board of Alderman accepts the recommendation. The Mayor and Board of Aldermen have directed the City Administrator and Attorney to investigate collections options, direct billing, and increasing the trash fee. A

report is expected within the next 120 days. After being fully advised, the City intends to take appropriate action.

Also, for clarity, the trash fee/tax was created by a ballot issue. As such, an increase will require a vote of the citizens.

3. Budget Procedures

Budget procedures are in need of improvement. Actual disbursements exceeded budgeted disbursements in the General Fund and the budget is missing many key elements required by state law.

3.1 Budget overspending

Actual disbursements exceeded budgeted disbursements by $309,768 for the General Fund for the year ended June 30, 2010. The Board does not review budget to actual statements on a regular basis to properly monitor city finances. The majority of the overspending was due to the police department overspending its budget by $255,855 and the city transferring $59,055 more than budgeted from the General Fund to various city funds.

Budget documents are an essential tool for the efficient management of city resources. Section 67.040, RSMo, allows for budget increases, but only after the governing body officially adopts a resolution setting forth the facts and reasons. Section 67.080, RSMo, provides that no expenditure of public monies shall be made unless it is authorized in the budget.

3.2 Budget preparation

The city did not prepare a new budget for the year ended June 30, 2010. The budget for the year ended June 30, 2009, was used; however it was not approved until November 30, 2009. In addition, the budget was only for the General Fund and did not include several elements required by state law. No budgets were prepared for the Capital Improvement Fund, the Storm Water and Park Improvement Fund, the Trash Fund, the D.A.R.E. Fund, or the Judicial Training Fund. As a result, the Board cannot effectively monitor actual costs from these funds by periodically comparing budgeted to actual disbursements. The approved budget did not contain a budget message, actual receipts and disbursements for the 2 preceding years, or beginning and ending cash balances. The budget only included budgeted receipts and disbursements for the year.

Sections 67.010 through 67.080, RSMo, include specific guidelines as to the format and approval of the annual operating budget. A complete budget should include separate receipt and disbursement estimations by fund, and include the beginning available resources and a reasonable estimate of the ending available resources.

A similar condition was noted in our prior audit report.

Recommendations

The Board of Aldermen:

3.1 Review budget to actual statements on a monthly basis to improve monitoring of city finances and refrain from approving disbursements in excess of budgeted amounts.

3.2 Develop policies and procedures to ensure budgets are prepared for all funds in a timely manner and contain all information required by state law.

Auditee's Response

The Board of Aldermen, Mayor, and City Administrator provided the following written responses:

3.1 The Board of Aldermen accepts the recommendation. The Mayor and Board have directed the City Administrator to provide, for its review, a monthly budget to actual statement. This will allow the Board to monitor spending and keep it within budget.

3.2 The Board will adopt budget procedures, with deadlines and requirements set by state law. This policy will be adopted within the next 90 days.

4. Closed Meetings

The city frequently fails to document compliance with the Missouri Sunshine Law. The following information was omitted from open meeting minutes:

- A roll call vote to go into a closed meeting is not always taken and/or recorded in the minutes of the open meeting.
- The minutes for open meetings do not always document the specific reasons for closing the meeting. For example, 11 open meeting minutes from October 2009, to October 2010, did not state the reason for the closed meetings.

Chapter 610, RSMo, requires that before any meeting may be closed, the question of holding the closed meeting and the reason for the closed meeting, including reference to a specific section of the law, shall be voted on at an open session. These reasons and the corresponding votes to close the meetings should be documented in the open meeting minutes to demonstrate compliance with statutory provisions.

Similar conditions were noted in our prior audit report.

Recommendation

The Board of Aldermen ensure the vote to close a meeting and reasons for going into closed meetings are documented in open meeting minutes.

Auditee's Response

The Board of Aldermen, Mayor, and City Administrator provided the following written response:

The Board of Aldermen accepts the recommendation. The Board of Aldermen routinely states the reasons for closed meetings, however the City recognizes that the minutes do not reflect the same. The City Clerk has been advised of her recording mistake and going forward will properly cite reasons for going into closed sessions.

5. City Procedures

The city does not properly account for city property. In addition, the city does not have written contracts and bid documentation for some services and has not obtained an annual audit. Also, the city does not have a travel policy.

5.1 Capital assets

Procedures and records to account for city property are not adequate. As a result, assets are more susceptible to theft or misuse. Each department is responsible for tracking its assets instead of city officials maintaining a centralized capital asset list. City administration does not maintain a list; however, upon our request in November 2010, a list was prepared. The list was not complete, did not include the value of the assets, and only contained general terms for items (such as computer and television). In addition, most assets are not tagged for specific identification. Annual physical inventories are not performed, except in the police department, and the police department annual inventory is not documented.

Adequate capital asset records are necessary to secure better internal control over city property and provide a basis for determining proper insurance coverage required on city property. Capital asset records should be maintained on a perpetual basis, accounting for property acquisitions and dispositions as they occur, and include a detailed description of the assets such as descriptions, make and model numbers, and asset identification numbers; the physical location of the assets; and the date and method of disposition of the assets. All capital assets should be identified with a tag or other similar device, and the city should conduct annual physical inventories and compare the results to detailed records.

5.2 Contracts

The city could not provide written contracts for attorney fees ($112,516), payroll services ($3,275), and electronic collection of fines and court costs (vendor is paid through fees collected directly from defendants). The city cannot adequately monitor disbursements or fees without copies of the written contracts. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing.

5.3 Bids

Adequate documentation was not maintained to demonstrate that bids were obtained for some purchases. The city could not provide bid documentation for park renovations ($143,227), renovations and maintenance at the police department ($6,135), a police department vehicle ($4,000), various vehicle repair work ($7,658), and catering for a community event ($1,200). The city bid ordinance states bids shall be obtained for purchases greater than $1,000. City officials indicated bids were solicited for these purchases; however, no documentation of bids could be provided.

To provide evidence of the bid process and compliance with city bid policy, complete documentation should be maintained of all bids received and reasons noted why the bid was selected, or why multiple bids were not obtained.

5.4 Independent audits

The city has not had an audit performed since the previous State Auditor's office audit report was issued in 2006, for the year ended June 30, 2005. The city spent $23,131 during the 2 years ended June 30, 2010, for an audit of the city; however, an audit report was never issued. A representative from the accounting firm indicated the city had not provided the firm with enough information to complete the audit.

An audit of the city is not required by state law; however, considering the financial condition of the city and the findings contained in this audit report, the city should consider obtaining timely audits of city funds to better enable officials to ascertain the financial condition of the city and to ensure the propriety and accuracy of financial transactions.

5.5 Travel policy

The city does not have a travel policy to address meal allowances, mileage reimbursements, advance payments, and the related documentation required to be submitted. For example, the Mayor was paid $3,401 in advance to attend a conference in Las Vegas, Nevada. The Mayor turned in $2,689 in receipts and $426 in cash, leaving $286 unsupported. Also, meal receipts of $45 and $10 were submitted twice, which went unnoticed by city personnel.

A travel policy should be adopted to ensure the city pays only for actual and reasonable travel expenses. The policy should outline items such as daily meal allowances, acceptable hotel rates, and mileage reimbursement rates. In addition, the policy should require documentation be submitted for all expenses.

5.6 Fuel and usage logs

Fuel and usage logs for equipment and vehicles are not maintained. As a result, it is difficult to determine whether the use of equipment and vehicles is reasonable and supports fuel charges. In addition, fuel usage cannot be reconciled to fuel purchased to ensure the proper amounts are paid. The city purchased fuel totaling approximately $71,000 for the two fuel tanks during the year ended June 30, 2010. Fuel and usage logs should include sufficient

documentation to determine reasonableness of miles driven and allow reconciliation of fuel use to fuel purchases.

Similar conditions previously reported

Similar conditions to points 5.1, 5.2, and 5.3 were noted in our prior audit report.

Recommendations

The Board of Aldermen:

5.1 Ensure complete and detailed capital asset records are maintained, assets are properly tagged for identification, and annual physical inventories are performed and compared to detailed records.

5.2 Enter into written contracts defining services provided and benefits received.

5.3 Ensure documentation of bids or quotes received and justification for the bid selected is maintained.

5.4 Consider obtaining timely audits of city funds.

5.5 Adopt formal policies and procedures for travel expenses.

5.6 Require logs of fuel dispensed and vehicle and equipment usage be maintained. In addition, the log of fuel dispensed should be reconciled to fuel purchases and the usage log should be reviewed for reasonableness. Any significant discrepancies should be investigated.

Auditee's Response

The Board of Aldermen, Mayor, and City Administrator provided the following written responses:

5.1 The City has adopted a plan to account for all property. The City will place barcodes on all city owned property. It is anticipated that all property will be logged and accounted for within the next 90 days. The system has the capacity to conduct an audit of the property as frequently as the City desires.

5.2 The City will draft written agreements for its city attorney, payroll service provider, and other vendors. Additionally, the agreements will be presented to the Board for review and approval by ordinance within the next 90 days.

5.3 The City routinely seeks out bids for any project in excess of $1,000. Notwithstanding, the City will reinforce its policy to ensure that all documentation for bids is kept in a centralized location with a back up in a secondary location. Additionally, the City is

adopting a new bid policy which will address in detail how bids are sought and when they are required.

5.4 The City intends to have an audit conducted at the end of this fiscal year and thereafter adopt a policy requiring an annual audit.

5.5 The City has drafted a new travel policy that will address the concerns cited in this finding. For clarity purposes, it is important to note that the money advanced to the Mayor for the Black Mayor's Conference was expended for legitimate city business. The Mayor returned all funds not expended and receipts for all other funds. There was a small amount spent for local transportation and tips, which no receipt was given by a service provider.

5.6 *The City will review means of tracking fuel. The City has not had any issues with misuse of its fuel, but intends to be proactive and review its processes.*

6. Payroll and Fringe Benefits

The city gives salary advances to employees and aldermen and could not provide an ordinance establishing compensation for city officials and employees. In addition, the city does not report the Mayor's commuting miles to the Internal Revenue Service (IRS).

6.1 Salary advances

The city paid $4,212 in payroll advances to various aldermen and employees from June 2009 through November 2010. All advances reviewed were deducted from the employee's next paycheck.

Salary advances represent loans and grants of public funds, and as such, are prohibited by Article VI, Sections 23 and 25, Missouri Constitution. These sections prohibit the loaning or granting of public funds to individuals.

6.2 Compensation ordinances

The city could not provide ordinances establishing the compensation of city officials and employees. Section 79.270, RSMo, requires the Board of Aldermen to fix salaries of all city officials and employees by ordinance.

A similar condition was noted in the prior audit report No. 2006-82, *City of Pine Lawn, Missouri*.

6.3 Commuting miles

The Mayor is allowed to use a city vehicle to commute between home and work; however, the amount of personal (commuting) mileage was not recorded on his W-2 forms as required by IRS guidelines. The Mayor is not required to maintain a mileage log indicating business and personal use. The car used by the mayor was purchased on July 24, 2008, and had been driven 55,361 miles as of April 14, 2011.

IRS reporting guidelines indicate personal commuting mileage is a reportable fringe benefit. Furthermore, IRS guidelines require the full value of the provided vehicle be reported on the employee W-2 forms if the employer does not require submission of detailed logs that distinguish between business and personal use. Additionally, the city may be subject to penalties and/or fines for failure to report all taxable benefits.

Recommendations

6.1 Discontinue allowing payroll advances.

6.2 Establish compensation of all city officials and employees by ordinance.

6.3 Comply with IRS guidelines for reporting fringe benefits related to commuting in city-owned vehicles. In addition, mileage logs should be required when vehicles are used for commuting.

Auditee's Response

The Board of Aldermen, Mayor, and City Administrator provided the following written responses:

6.1 Salary advances were not a routine practice of the City. However, the City will discontinue making any advance payment of salary to an employee and adopt a policy reinforcing the same.

6.2 The City currently has ordinances which set out the compensation of its officials; notwithstanding the City will revisit the issue and draft the necessary ordinances.

6.3 The report alleges that "the Mayor is allowed to use a city vehicle between home and work; however the personal (commuting) mileage was not recorded on his W-2 forms as required by IRS guidelines." The vehicle utilized by the mayor is also used by other officials of the City. The commute between home and work by the Mayor is less than a mile in both directions. IRS Publication 15-B provides for an exclusion from taxable income, De Minimis (minimal) benefits to employees. A De Minimis benefit is any property or service an employer provides to an employee that has so little value (taking into account how frequently the employer provides similar benefits to employees) that accounting for it would be unreasonable or administratively impracticable. Additionally, the Mayor is the Chief Executive Officer of the City and a Police Commissioner, as such he routinely responds to emergencies within the City that may occur at any time, and often times do occur in the middle of the night. Notwithstanding, the City will further research this issue so that it is in compliance with any state or federal law.

Auditor's Comment

6.3. Without a log, we could not determine whether the vehicle was sometimes driven by other employees. In addition, commuting mileage does not appear to meet the IRS requirements for a de minimis benefit since it is not unusual or infrequent.

City of Pine Lawn
Organization and Statistical Information

The City of Pine Lawn is located in St. Louis County. The city was incorporated in 1947 and is currently a fourth-class city. The city employed 39 full-time employees and 26 part-time employees on June 30, 2010.

City operations include law enforcement services, trash collection, and maintenance of city streets.

Mayor and Board of Aldermen

The city government consists of a mayor and eight-member board of aldermen. The members are elected for 2-year terms. The mayor is elected for a 4-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor and Board of Aldermen, at June 30, 2010, are identified below. The Mayor is paid $700 per month and Board of Aldermen members $500 per month.

Sylvester Caldwell, Mayor
Pelton Jackson, Alderman
James C. Brooks, Alderman
Willie E. Beal, Alderman
LaVera Fowler, Alderman
Maggie Bishop, Alderman
Jimmie Moore, Alderman
Nakisha Ford, Alderman
Mary Gray, Alderman

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The City of Pine Lawn did not receive any federal stimulus monies during the year ended June 30, 2010.

Financial Activity

A summary of the city's financial activity for the year ended June 30, 2010, follows:

City of Pine Lawn
Year Ended June 30, 2010

	General Fund	Capital Improvement Fund	Storm Water and Park Improvement Fund	Trash Fund	D.A.R.E. Fund	Judicial Training Fund	Total

Thomas A. Schweich

Missouri State Auditor

Gans Road and U.S. 63 Transportation Development District

June 2011

Report No. 2011-28

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Gans Road and U.S. 63 Transportation Development District

Background	The Gans Road and U.S. 63 Transportation Development District (TDD) was organized in December 2006 and is located in the City of Columbia in Boone County. The qualified voters of the TDD never approved a sales tax, and no retail establishments ever operated within the TDD boundaries. Only a portion of the projected transportation construction projects were completed, but the TDD signed several promissory notes. In August 2010, the property owner/developer lost the land within the TDD through foreclosure. The ultimate purchaser of the land also purchased all outstanding TDD promissory notes and canceled them. On March 17, 2011, the TDD Board of Directors approved a resolution formalizing its intent to dissolve the TDD, and the State Auditor's office was notified.
Statutory Requirement	Section 238.275, RSMo, requires the State Auditor to determine the financial status of a TDD before it may be abolished. The law prohibits the abolition of a TDD while there are outstanding claims or causes of action pending against it, if its liabilities exceed its assets; or while the TDD is insolvent, in receivership or under the jurisdiction of a bankruptcy court.
Financial Status	The Gans Road and U.S. 63 TDD had a zero cash balance at March 17, 2011. The only known outstanding liability of the TDD is the cost of this audit, estimated to be $5,000. The current property owner and the subsequent purchaser of the land within the TDD will share this cost, since the TDD lacks sufficient funds. Based upon our audit, the Board of Directors may proceed with the abolishment of the Gans Road and U.S. 63 TDD.

Because of the limited objective of this audit, no overall rating is provided.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The Gans Road and U.S. 63 TDD did not receive any federal stimulus monies during the audited time period.

State Auditor's Report 2

Management Advisory Report - State Auditor's Findings

Financial Status 4

Thomas A. Schweich
Missouri State Auditor

Elvin Sapp, Chairman
and
Board of Directors
Gans Road and U.S. 63 Transportation Development District
Columbia, Missouri

The State Auditor is required under Section 238.275, RSMo, to audit a transportation development district prior to the question of abolishment being submitted to a vote. On March 17, 2011, the Board of Directors of the Gans Road and U.S. 63 Transportation Development District (TDD) approved a resolution of its intent to dissolve the district and request an audit as required by statute. The State Auditor was subsequently notified of this resolution.

The scope of our audit included, but was not necessarily limited to, January 1, 2011, to March 17, 2011, and the 2 years ended December 31, 2010. The objective of our audit was to evaluate the financial status of the TDD and determine whether it may be abolished pursuant to law.

Our methodology included reviewing minutes of meetings, financial records, and other pertinent documents; and interviewing various personnel of the TDD, as well as certain external parties. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The audit determined the Board of Directors can proceed with abolishment of the TDD in accordance with Section 238.275, RSMo.

The accompanying Management Advisory Report presents our finding arising from our audit of the Gans Road and U.S. 63 Transportation Development District.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
In-Charge Auditor:	Robert L. McArthur II

Financial Status

Our audit of the Gans Road and U.S. 63 Transportation Development District (TDD) indicates the financial condition of the TDD is such that the TDD may be abolished.

The Gans Road and U.S. 63 Transportation Development District was organized in December 2006 by petition of the owner/developer of property within the proposed district. Shortly after the TDD was established, the property owner/developer sold the property to another developer. The Board of Directors and officers included various employees of the property owner/developer, as well as relatives of the former property owner/developer.

The qualified voters of the TDD, in this case the property owner, never approved the imposition of a sales tax within the boundaries of the district. No retail establishments were ever established in the development to charge such a tax.

The TDD is located in the City of Columbia, in Boone County, near the intersection of Discovery Parkway (Gans Road) and U.S. Highway 63. The TDD has a fiscal year end of December 31. The TDD elected not to have separate financial audits of the TDD conducted beyond the periodic audits performed by the SAO pursuant to Section 238.272, RSMo.

The TDD was formed for the purpose of acquiring property (right-of-way and/or easements) and constructing transportation projects with a total estimated cost of approximately $29 million. However, only a portion of the proposed transportation projects was completed.

The developer advanced the cost of the TDD share of the completed transportation projects. As of August 1, 2010, the TDD had signed promissory notes totaling approximately $4.49 million for repayment of project costs plus accrued interest. MoDOT and the City of Columbia were responsible for the remaining costs of the completed projects. They were also the public entities with jurisdiction over the state and local projects, respectively, and accepted dedication of the completed projects.

In August 2010, the property owner/developer lost the land within the boundaries of the TDD through foreclosure. The land was purchased by various creditors of the former property owner/developer. In December 2010, one of these creditors purchased or secured an interest in all 22 TDD promissory notes issued to the former property owner/developer. The sale was contingent upon the resignation of TDD board members associated with the former property owner/developer. The resigning TDD board members were then replaced with members of this creditor's organization.

In March 2011, the same creditor that owned or held secured interest in the TDD promissory notes, purchased the remaining tracts of land within the

boundaries of the TDD (the current property owner). As a result, as of March 2011, all the land within the boundaries of the TDD is owned by this entity. In addition, the remaining TDD promissory notes in which the current property owner had previously acquired a secured interest were purchased by this entity at public auction on April 11, 2011, and on April 14, 2011, all 22 TDD promissory notes were canceled.

On March 17, 2011, the Gans Road and U.S. 63 TDD Board approved a resolution formalizing its intent to dissolve the TDD, authorizing legal counsel and the State Auditor to proceed with all necessary actions as required pursuant to Section 238.275, RSMo.

The State Auditor has performed an audit of the Gans Road and U.S. 63 TDD as required by Section 238.275, RSMo. That statute requires the State Auditor to audit the TDD to determine its financial status, and determine whether the TDD may be abolished pursuant to law. That law also states the board shall not propose the question to abolish the TDD while there are outstanding claims or causes of action pending against it, if its liabilities exceed its assets, or while the TDD is insolvent, in receivership, or under the jurisdiction of a bankruptcy court.

The following table presents the financial activity and cash balances of the TDD for the period January 1, 2011, to March 17, 2011, and the 2 years ended December 31, 2010 (as presented on the cash basis):

	Period January 1, 2011 - March 17, 2011	Year Ended December 31, 2010	Year Ended December 31, 2009
RECEIPTS			
Developer advances	$ 0	289,016	166,285
Total Receipts	0	289,016	166,285
DISBURSEMENTS			
Streets and roads	0	288,013	166,285
Accounting and auditing	189	0	929
Insurance	0	1,370	1,333
Bank service charges	0	39	80
Total Disbursements	189	289,422	168,627
RECEIPTS OVER (UNDER) DISBURSEMENTS	(189)	(406)	(2,342)
BEGINNING CASH	189	595	2,937
ENDING CASH	$ 0	189	595

Based on our audit, the cash balance of the TDD at March 17, 2011, was zero. In addition, both MoDOT and the City of Columbia confirmed the TDD has no outstanding liabilities due their entities. The TDD's legal counsel indicated the only known outstanding liability of the TDD is the cost of the State Auditor's audit (estimated at approximately $5,000). Because the TDD has no funds to cover this final expense, the cost will be shared between the current property owner and the subsequent purchaser of the land within the boundaries of the TDD. This real estate closing is contingent upon the State Auditor's recommendation that the TDD be abolished.

Accordingly, based on our audit of the TDD, the Board of Directors can proceed with the abolishment of the TDD in accordance with Section 238.275, RSMo.

Twenty-First Judicial Circuit

Village of Riverview
Municipal Division

June 2011

Report No. 2011-27

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Twenty-First Judicial Circuit, Village of Riverview Municipal Division

Segregation of Duties

The court clerk is responsible for receiving, recording and preparing deposits of fines and court costs, but a documented supervisory or independent review is not performed to ensure all monies received are accounted for properly and deposited. The court clerk is not preparing and filing with the city each month a list of all cases heard, which is a requirement under state law.

In the areas audited, the overall performance of this entity was **Fair**.*

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The Twenty-First Judicial Circuit, Village of Riverview Municipal Division did not receive any federal stimulus monies during the year ended December 31, 2010.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

State Auditor's Report 2

Management Advisory Report - State Auditor's Findings
1. Accounting Controls and Procedures 4

Organization and Statistical Information 5

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Twenty-First Judicial Circuit
and
Municipal Judge
Riverview, Missouri

We have audited certain operations of the Village of Riverview Municipal Division of the Twenty-First Judicial Circuit in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2010. The objectives of our audit were to:

1. Evaluate the municipal division's internal controls over significant financial functions.

2. Evaluate the municipal division's compliance with certain legal provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the municipal division, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) a deficiency in internal controls, and (2) noncompliance with a legal provision. The accompanying Management Advisory Report presents our finding arising from our audit of the Village of Riverview Municipal Division of the Twenty-First Judicial Circuit.

A petition audit of the Village of Riverview, fulfilling our obligations under Section 29.230, RSMo, is still in process, and any additional findings and recommendations will be included in the subsequent report.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Debra S. Lewis, CPA
In-Charge Auditor:	Chris Vetter, CPA

1. Accounting Controls and Procedures

Accounting duties related to fines and court costs receipts are not adequately segregated, and a monthly report of cases heard is not filed with the city.

1.1 Segregation of duties

The duties of receiving, recording, and preparing deposits of fines and court costs are not adequately segregated. The Court Clerk performs all of these duties. The city's financial advisor reconciles the bank account; however, no one independent of the collection process ensures all monies received are accounted for properly and deposited.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded against possible loss or misuse. If proper segregation of duties cannot be achieved, a timely supervisory or independent review of the work performed is necessary.

1.2 Listing of cases

A monthly list of all cases heard is not prepared and filed with the city. Without such as report, the city cannot effectively monitor the municipal division's activity and ensure monies are properly remitted. Section 479.080.3, RSMo, requires the Court Clerk to prepare a monthly list of all cases heard in the municipal division, including the names of the defendants and fines and court costs imposed, to be verified by the Court Clerk or Municipal Judge and filed with the city.

Recommendations

The Village of Riverview Municipal Division:

1.1 Segregate accounting duties to the extent possible and implement appropriate reviews and monitoring procedures.

1.2 Ensure a monthly list of cases heard in the municipal division is prepared and filed with the city in accordance with state law.

Auditee's Response

The Municipal Judge and the Court Clerk provided the following written responses:

1.1 The number of court personnel is dictated by several factors including workload and budgetary restraints. At this time, the Village does not have enough court personnel to achieve proper segregation of duties. In the future, the Village's financial advisor will, on a random basis, select and verify court deposits.

1.2 The court currently prepares such reports and has the reports available for the Board of Trustees to review. The Court Clerk will prepare such a report and file it directly with each member of the Board of Trustees monthly.

Twenty-First Judicial Circuit
Village of Riverview Municipal Division
Organization and Statistical Information

The Village of Riverview Municipal Division is in the Twenty-First Judicial Circuit, which consists of St. Louis County. The Honorable John A. Ross serves as Presiding Judge.

The municipal division is governed by Chapter 479, RSMo, and by Supreme Court Rule No. 37. Supreme Court Rule No. 37.49 provides that each municipal division may establish a violation bureau in which fines and costs are collected at times other than during court and transmitted to the city treasury.

Personnel

At December 31, 2010, the municipal division employees were as follows:

Title	Name
Municipal Judge	W. Christopher McDonough
Court Clerk	Megan Asikainen

Financial and Caseload Information

	Year Ended December 31, 2010
Receipts	$200,699
Number of cases filed	3,694

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The Twenty-First Judicial Circuit, Village of Riverview Municipal Division, did not receive any federal stimulus monies during the year ended December 31, 2010.

CITIZENS SUMMARY

Findings in the audit of the Office of State Treasurer

Background

On January 12, 2009, Clint Zweifel was inaugurated as the forty-fifth Missouri State Treasurer. This audit report is for the year ended June 30, 2010.

The Office of State Treasurer is an elective office as provided in the Missouri Constitution. The duties of the State Treasurer are to be the custodian of all state funds, and determine the amount of state monies not needed for current operating expenses and invest such monies as allowed by state law. The Office of State Treasurer operates in four major functional areas: 1) accounting and banking services, 2) disbursements and records, 3) investments and deposit programs and 4) unclaimed property.

Transition Specialist

After resigning his position as Deputy State Treasurer, a former employee was paid $15,791 for two months' work as a Transition Specialist. In this temporary position, the former employee was responsible for preparing a memorandum describing the status of all current projects, being available to answer questions, and assisting in the transition of duties to other personnel. Although the former employee reported eight hours per day of work on his timesheet during this time period, minimal documentation exists to support the work performed or services provided. State Treasurer Office personnel indicated that contact with the former employee during this time consisted primarily of a few emails and approximately 2 to 3 telephone conversations per week.

In the areas audited, the overall performance of this entity was Good.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Office of State Treasurer did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

INDEPENDENT AUDITOR'S REPORT ON
THE FINANCIAL STATEMENTS

Honorable Clint Zweifel, State Treasurer
Jefferson City, Missouri

We have audited the accompanying financial statements of the Treasurer's General Operations Fund, Treasurer's Information Fund, Central Check Mailing Service Revolving Fund, and Abandoned Fund Account Fund of the Office of State Treasurer as of and for the years ended June 30, 2010 and 2009. These financial statements are the responsibility of the office's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and the significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

As discussed in Note 1.A., the financial statements of the Office of State Treasurer are intended to present the financial position, and the changes in financial position and, where applicable, cash flows of only that portion of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the State of Missouri that is attributable to the transactions of the Office of State Treasurer. They do not purport to, and do not, present fairly the financial position of the State of Missouri as of June 30, 2010 and 2009, the changes in its financial position, or, where applicable, its cash flows for the years then ended in conformity with accounting principles generally accepted in the United

P.O. Box 869 • Jefferson City, MO 65102 • (573) 751-4213 • FAX (573) 751-7984

States of America. However, the State of Missouri issued its Comprehensive Annual Financial Report for the years ended June 30, 2010 and 2009, and those reports were prepared in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements referred to previously present fairly, in all material respects, the respective financial position of the Treasurer's General Operations Fund, Treasurer's Information Fund, Central Check Mailing Service Revolving Fund, and Abandoned Fund Account Fund of the Office of State Treasurer, as of June 30, 2010 and 2009, and the respective changes in financial position and, where applicable, cash flows thereof for the years then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued our report dated January 28, 2011, on our consideration of the office's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The management's discussion and analysis and the budgetary comparison information, as listed in the table of contents, are not a required part of the financial statements but are supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements, taken as a whole, that are referred to in the first paragraph. The supplementary information, as listed in the table of contents, is presented for purposes of additional analysis and is not a required part of the financial statements. Such information has been subjected to the auditing procedures applied in the audit of the financial statements and, in our opinion, is fairly stated in all material respects in relation to the financial statements taken as a whole.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the office's management and was not subjected to the auditing procedures applied in the audit of the financial statements referred to above. Accordingly, we express no opinion on the information.

Thomas A. Schweich
State Auditor

January 28, 2011

THOMAS A. SCHWEICH
Missouri State Auditor

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

Honorable Clint Zweifel, State Treasurer
Jefferson City, Missouri

We have audited the financial statements of the Office of State Treasurer as of and for the years ended June 30, 2010 and 2009, and have issued our report thereon dated January 28, 2011. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the Office of State Treasurer's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the office's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the office's internal control over financial reporting.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the office's financial statements will not be prevented, or detected and corrected, on a timely basis.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be deficiencies, significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

P.O. Box 869 • Jefferson City, MO 65102 • (573) 751-4213 • FAX (573) 751-7984

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the financial statements of the Office of State Treasurer are free of material misstatement, we performed tests of the office's compliance with certain provisions of laws, regulations, and contracts, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards.*

However, we noted a certain matter which is described in the accompanying Management Advisory Report. The response of the Office of State Treasurer to the finding identified in our audit is also described in the accompanying Management Advisory Report. We did not audit the office's response, and accordingly, we express no opinion on it.

This report is intended for the information and use of the management of the Office of State Treasurer and other applicable government officials. However, pursuant to Section 29.270, RSMo, this report is a matter of public record and its distribution is not limited.

Thomas A. Schweich
State Auditor

January 28, 2011

Management's Discussion and Analysis

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following is a discussion and analysis of the Office of the Missouri State Treasurer's (the Treasurer's Office) financial activities for the fiscal year ended June 30, 2010.

HIGHLIGHTS

- The assets of the Treasurer's Office exceeded its liabilities by $735,681. Of the $735,681, unreserved and unrestricted net assets total $734,161, which may be used to meet the office's ongoing obligations.
- The office's total net assets increased by $92,965. The increase in net assets was caused by an increase in the revenues received in fiscal year 2010 as compared to revenues from fiscal year 2009.
- As of the close of the current fiscal year, the Treasurer's Office governmental funds reported combined ending fund balances of $697,200, an increase of $107,512 in comparison with the prior year. The total amount is available for spending as of July 1, 2010, at the discretion of the Treasurer's Office within the purposes and limits of the office's appropriation authority.

OVERVIEW OF THE FINANCIAL STATEMENTS

The Treasurer's Office basic financial statements comprise two components: 1) fund financial statements, and 2) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Fund Financial Statements:

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The Treasurer's Office, like the State of Missouri, uses fund accounting to ensure and demonstrate compliance with statutory requirements. All of the funds of the Treasurer's Office can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental funds. Governmental funds are used to account for most of the basic services provided by the Treasurer's Office. Unlike the government-wide financial statements prepared by the State of Missouri, governmental fund financial statements focus on short-term inflows and outflows of current financial resources and utilize the modified accrual basis of accounting. This presentation focuses on when cash will be received and disbursed making the statements useful in evaluating a government’s financing requirements in the near future.

The Treasurer's Office maintains two individual governmental funds, a general fund and a special revenue fund. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the State Treasurer's General Operations Fund and the State Treasurer's Information Fund.

Proprietary funds. Proprietary funds are used to account for activities similar to private businesses in which goods and services are sold for specified fees and utilize the full accrual

basis of accounting. The Treasurer's Office maintains one proprietary fund, the Central Check Mailing Service Revolving Fund. This fund is an internal service fund, used as an accounting device to accumulate and allocate costs for centralized check mailing services provided by the Treasurer's Office to other state agencies.

Fiduciary funds. Fiduciary funds are used to account for resources held for the benefit of parties outside the state government and also utilize the full accrual basis of accounting. The Treasurer's Office maintains one fiduciary fund, the Abandoned Fund Account Fund, to account for unclaimed property turned over to the state in accordance with state statute.

Notes to the financial statements. The notes provide additional information that is essential to a full understanding of the data provided in the fund financial statements.

Other information. In addition to the basic financial statements and accompanying notes, this report also presents required supplementary information (RSI) including a budgetary comparison schedule for the Treasurer's General Operations Fund and the Treasurer's Information Fund.

FUND STATEMENT ANALYSIS

Governmental Funds:

At the end of fiscal year 2010, the Treasurer's Office governmental funds reported combined ending fund balances of $697,200, an increase of $107,512 from fiscal year 2009. This entire amount is available for spending at the discretion of the Treasurer's Office within the purposes and limits of the office's appropriation authority.

Fund balances for the governmental funds are as follows:

	Treasurer's General Operations Fund	Treasurer's Information Fund	Total
Unreserved	$694,409	$2,791	$697,200

The Treasurer's General Operations Fund was the primary operating fund for the Treasurer's Office in fiscal year 2010. At the end of fiscal year 2010, the Treasurer's General Operations Fund reported a total fund balance of $694,409. The net increase in fund balance during fiscal year 2010 was $107,604. Revenues of the Treasurer's General Operations Fund totaled $2,668,995, and expenditures of the Treasurer's General Operations Fund totaled $2,561,391. Contributing factors follow:

- In fiscal year 2010, the Treasurer's Office revised the calculations used when depositing a portion of the state's interest earnings into the Treasurer's General Operations Fund pursuant to Section 30.605, RSMo, and subsequently increased the amount of revenues to the fund to compensate for the prior year fund balance and to more closely match the expenditure authority from the fund.

The Treasurer's Information Fund was a supplemental operating fund for the Treasurer's Office in fiscal year 2010. At the end of fiscal year 2010, the Treasurer's Information Fund reported a total fund balance of $2,791. The net decrease in fund balance during fiscal year 2010 was $92. Revenues of the Treasurer's Information Fund totaled $852. Expenditures of the Treasurer's Information Fund totaled $944 in fiscal year 2010. Contributing factors follow:

- In fiscal year 2010, the Treasurer's Information Fund collections were less than amounts spent for the preparation, reproduction, or dissemination of information or publications of the State Treasurer's Office.

Proprietary Funds:

The Treasurer's Office has one proprietary fund, the Central Check Mailing Service Revolving Fund. This fund is an internal service fund, used as an accounting device to accumulate and allocate costs for centralized check mailing services provided by the Treasurer's Office to other state agencies.

The Central Check Mailing Service Revolving Fund's net assets decreased by $14,547. This is primarily due to a decrease in operating revenues.

NEXT YEAR'S BUDGET

The Treasurer's Office budget for fiscal year 2011 received a decrease from the appropriation levels in the fiscal year 2010 budget by one and one-fourth percent in the State Treasurer's General Operations Fund. A core reallocation of appropriations totaling $45,069 from the Second Injury Fund was approved.

On June 29, 2009, Governor Nixon signed the Invest in Missouri legislation that reinvests $1 billion in Missouri communities. Beginning January 1, 2010, the legislation began phasing out the statutory interest rate cap that tied state time deposits to the return of short-term U.S. Treasury securities. January 1, 2011 begins the second year of the phase-out period and financial institutions with time deposits totaling over $5 million of state funds shall pay the state a market rate of interest on the amount on deposit exceeding $5 million.

Notes to the Fund Financial Statements

OFFICE OF STATE TREASURER
NOTES TO THE FUND FINANCIAL STATEMENTS

1. Significant Accounting Policies

A. Financial Statements and Reporting Entity

The accompanying fund financial statements of the Office of State Treasurer have been prepared in conformity with generally accepted accounting principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB). The State Treasurer's Office has elected not to follow the Financial Accounting Standards Board's pronouncements issued after November 30, 1989, for proprietary activities.

The financial statements present the financial position, and the changes in financial position and where applicable, cash flows, of only the transactions of the Office of State Treasurer. They do not present the financial position of the State of Missouri as of June 30, 2010, the changes in its financial position, or, where applicable, its cash flows for the year then ended in conformity with GAAP. However, the State of Missouri issued a Comprehensive Annual Financial Report for the State of Missouri for the fiscal year ended June 30, 2010, in conformity with GAAP.

B. Fund Financial Statements

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds.

The governmental fund financial statements are presented using the current financial resources measurement focus and modified accrual basis of accounting. With the current financial resources measurement focus, only current assets and current liabilities are included on the balance sheet. Under the modified accrual basis of accounting, revenues are recognized in the accounting period in which they become both measurable and available to pay current period liabilities. Operating statements of governmental funds present increases (i.e., revenues and other financing sources) and decreases (i.e., expenditures and other financing uses) in fund balance. All major sources of revenue, including taxes, licenses, fees, permits, and governmental contributions are susceptible to accrual when available within 60 days. Expenditures are recognized when the related fund liability is incurred except for compensated absences (accumulated vacation and compensatory time) and sick pay which are recorded as expenditures when paid.

The proprietary and private-purpose trust fund financial statements are presented using the economic resources measurement focus and accrual basis of accounting. With the economic resources measurement focus, assets and liabilities associated with the operation of these funds are included on the Statement of Net Assets.

Under the accrual basis of accounting, revenues are recognized in the period earned and expenses are recognized in the period incurred. Proprietary fund-type operating statements present revenues and expenses in total net assets. Operating revenues and expenses in proprietary funds are classified as those activities that make up the primary ongoing operations associated with those funds. Non-operating revenues and expenses in proprietary funds are classified as those activities that are deemed incidental or unusual for those funds.

C. Basis of Presentation

The Office of State Treasurer's financial practices are based upon fund accounting concepts. A fund is defined as a fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, together with all related liabilities and fund balances, and changes therein, that are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions, or limitations.

The accompanying financial statements are structured into three categories of funds:

1) Governmental Funds include the general funds and the special revenue funds. These funds account for the revenues and expenditures, capital outlay, and certain debt service of the state. The Treasurer's General Operations Fund and the Treasurer's Information Fund are governmental funds.

2) Proprietary Funds include internal service funds. These funds account for the cost of certain services provided by the state. The Central Check Mailing Service Revolving Fund is a proprietary fund.

3) Fiduciary Funds include private-purpose trust funds. These funds account for assets held by the state in a trustee capacity or as an agent for individuals, other governments, and other funds. The Abandoned Fund Account Fund is a fiduciary fund.

D. Cash and Cash Equivalents

For reporting purposes, cash and cash equivalents include bank accounts, petty cash, and all investments with an original maturity of 3 months or less, such as repurchase agreements. Cash balances of the Treasurer's General Operations Fund, Treasurer's Information Fund, Central Check Mailing Service Revolving Fund, and Abandoned Fund Account Fund are pooled with other state funds and invested by the State Treasurer.

E. Investments

These are long-term investments with an original maturity greater than 3 months which are expected to be held to maturity and redeemed at face value. All investments are reported at fair value.

F. Interfund Receivables/Payables

The state makes various transactions between funds to distribute interest earnings, finance operations, provide services, service debt, and acquire capital assets. These receivables at June 30 are classified as "due from other funds" on the Balance Sheet and Statement of Net Assets. Payables are classified as "due to other funds" on the Balance Sheet and Statement of Net Assets. These receivables/payables are due within one year.

G. Capital Assets

Capital assets, which include equipment and software, are valued at historical cost or estimated historical cost if actual historical cost is not available. The estimate of historical cost was based on current appraised value indexed to the date of acquisition. Donated capital assets are reported at estimated fair value at the time received. Capital assets acquired through lease agreements are capitalized at the inception of the agreement.

The capitalization threshold for equipment is $1,000 and for software is $5,000.

Equipment and software are depreciated using the straight-line method of depreciation over a useful life of 5 years for equipment and 3 to 5 years for software.

H. Long-Term Debt

Long-term liabilities that will be financed from governmental funds are not reported on the fund financial statements since they are presented on the modified accrual basis of accounting. These long-term liabilities include the following:

Compensated absences include accumulated unpaid vacation and compensatory time accruals and related employer payroll taxes. These amounts are not accrued in the governmental funds but are recorded as expenditures when paid.

Vacation leave is accumulated at a rate of 10 to 14 hours per month depending on the number of years of employment. Accumulated vacation leave cannot exceed twice the number of vacation hours earned annually. Compensatory time is accumulated as earned by an individual employee.

Sick leave is accumulated at a rate of 10 hours per month with no limit to the amount which can be accumulated. Accumulated sick leave is not paid upon employee termination and does not represent a liability of the state.

2. Deposits, Investments and Securities Lending Program

The Office of State Treasurer maintains a cash and short-term investment pool that is used by substantially all state funds. These funds do not include accrued interest. Described below is the portfolio that represents the "Cash and Cash Equivalents" and "Investments" as reported at June 30, 2010.

A. Deposits

The state minimizes custodial credit risk by restrictions set forth in state law. Custodial credit risk is risk associated with the failure of a depository financial institution. In the event of a depository financial institution's failure, the state would not be able to recover its deposits or collateralized securities that are in the possession of the outside parties. State laws restrict the State Treasurer to deposit funds in financial institutions that are physically located in Missouri which are selected based on financial stability and community involvement. The financial institution’s loan to deposit ratio must exceed 50 percent at the time of deposit and deposits must be collateralized at least 100 percent with approved securities. Deposits must have a maturity of 5 years or less and earn interest at varying rates based on state law.

B. Investments

Statutes authorize the State Treasurer to invest in U.S. Treasury or Agency securities maturing within 5 years, commercial paper and banker's acceptances maturing within 180 days, or repurchase agreements maturing within 90 days secured by U.S. Treasury or Agency securities of any maturity. There have been no violations of these investment restrictions during fiscal year 2010.

The State Treasurer minimizes credit risk, the risk of loss due to the failure of the security issuer or backer, by establishing a pre-approved list of financial institutions and companies that will be used to purchase commercial paper. The State Treasurer also conducts regular credit monitoring, pre-qualifies the financial institutions and brokers/dealers with which the State Treasurer's Office will do business for broker services and repurchase agreements, and diversifies the portfolio to reduce potential losses on individual securities.

Custodial credit risk is the risk that, in the event of failure of the counterparty to a transaction, the state will not be able to recover the value of their investment or collateral securities that are in the possession of an outside party. The State Treasurer minimizes custodial credit risk by requiring that all securities be held in the state's name at the state's custodial bank.

The state's investments include certain short-term cash equivalents, various long-term items, and restricted assets by maturity in years. The State Treasurer minimizes the risk of the market value of securities falling due to changes in interest rates by maintaining an effective duration of less than 1.5 years, and holding at least 40 percent of the portfolio's total market value in securities with a maturity of 12 months or less.

The state minimizes concentration of credit risk, the risk attributed to the magnitude of an investment in a single issuer. State statute prohibits the State Treasurer from investing more than 5 percent of the total investment portfolio into any single financial institution or issuer, excluding U.S. securities and repurchase agreements. There are no restrictions in the amount that can be invested in U.S. securities, however, there can be no more than 15 percent of the total portfolio invested in repurchase agreements with a single counterparty. During fiscal year 2010, the state did not have more than 5 percent of total investments in a single issuer.

The State Treasurer requires investments in commercial paper and bankers' acceptances to have the highest letter and numerical ranking (A1/P1) as rated by Moody's Investor Service, Inc. and Standard & Poor's Corporation. The State Treasurer does not have any additional policies regarding credit ratings of investments.

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The State Treasurer's Office does not have any deposits or investments in foreign currency and therefore does not have a policy regarding foreign currency risk.

C. Securities Lending Program

The State Treasurer's Office participates in a securities lending program to augment investment income. Authority to participate rests in Section 30.260.5, RSMo. For securities which are received as collateral under a bonds borrowed program, at least 75 percent of the collateral received must match the maturities of the securities lent with a maximum duration gap between loans and investments of 15 days. The maximum life of term loans shall be 90 days.

Collateral may be in the form of cash, securities issued or guaranteed by the U.S. government or its agencies, or bank letters of credit or equivalent obligation if pre-approved by the State Treasurer's Office. Collateral must be provided in the amount of 102 percent of the then market value of the loaned securities and accrued interest, if any. The Custodian provides for full indemnification to the State Treasurer's Office for any losses that might occur in the program due to borrower default, insolvency, or failure to return loaned securities.

3. Capital Assets

Capital asset activity for the year ended June 30, 2010, was as follows:

	Balance July 1, 2009	Increases	Decreases	Balance June 30, 2010
Governmental Activities:				
Equipment, Governmental Funds	$ 275,151	$ 26,588	$ (3,819)	$ 297,920
Software, Governmental Funds	10,446	0	0	10,446
Equipment, Proprietary Funds	25,577	0	0	25,577
Total Equipment	311,174	26,588	(3,819)	333,943
Less Accumulated Depreciation for:				
Equipment, Governmental Funds	(163,845)	(60,919)	3,819	(220,945)
Software, Governmental Funds	(1,049)	(3,481)	0	(4,530)
Equipment, Proprietary Funds	(22,450)	(1,607)	0	(24,057)
Total Accumulated Depreciation	(187,344)	(66,007)	3,819	(249,532)
Governmental Activities Capital Assets, Net	$ 123,830	$ (39,419)	$ 0	$ 84,411

4. Changes in Long-Term Liabilities

The following is a summary of changes in long-term liabilities for the year ended June 30, 2010:

	Balance July 1, 2009	Increases	Decreases	Balance June 30, 2010	Due Within One Year
Governmental Activities:					
Compensated Absences	$ 116,463	$ 111,785	$ 120,192	$ 108,056	$ 108,056
Total Governmental Activities	$ 116,463	$ 111,785	$ 120,192	$ 108,056	$ 108,056

5. Payables

A summary of accounts payable at June 30, 2010 is shown below:

	Governmental Funds	Proprietary Fund	Balance June 30, 2010
Accounts Payable:			
Vendors	$ 17,655	$ 244	$ 17,899
Employees	42,473	796	43,269
Total Accounts Payable	$ 60,128	$ 1,040	$ 61,168

6. Interfund Assets and Liabilities

A summary of interfund assets and liabilities at June 30, 2010, is shown below:

Due To/From Other Funds

	Treasurer's General Operations Fund	Central Check Mailing Service Revolving Fund	Totals
Due to Other Funds:			
General Government	$ 44,727	$ 758	$ 45,485
Totals	$ 44,727	$ 758	$ 45,485
Due From Other Funds:			
General Government	$ 0	$ 35,181	$ 35,181
Totals	$ 0	$ 35,181	$ 35,181

Interfund assets do not equal interfund liabilities because only funds related to the State Treasurer's Office are being presented, not all state funds.

OFFICE OF STATE TREASURER
NOTES TO THE REQUIRED SUPPLEMENTARY INFORMATION

The Budgetary Comparison Schedule in Required Supplementary Information (RSI) presents comparisons of the original and revised legally adopted budgets with actual data on a budgetary basis for the Treasurer's General Operations Fund and the Treasurer's Information Fund.

The Budgetary Comparison Schedule reports revenues and expenditures on a budgetary basis where "actual" revenues are recognized when cash is received, and "actual" expenditures are recognized for cash disbursements. The accounting principles applied for reporting on a budgetary basis differ from those used to present the financial statements in accordance with GAAP. A reconciliation of the two for the fiscal years ended June 30, 2010 and 2009, has been presented at the bottom of the Budgetary Comparison Schedule.

The "original budget" expenditures and transfers represent the amounts originally appropriated for each fund. The "final budget" expenditures and transfers include increases and decreases to appropriations during the fiscal year.

In accordance with state statute, all state funds must have an appropriation before amounts can be expended or transferred to another state fund, therefore variances between "budgeted" and "actual" expenditures and transfers on the budgetary schedule will always be positive.

The accompanying Notes to the Supplementary Information are an integral part of this statement.

Notes to the Supplementary Information

OFFICE OF STATE TREASURER
NOTES TO THE SUPPLEMENTARY INFORMATION

1. General Capital Assets

Capital assets, which include equipment and software, are valued at historical cost or estimated historical cost if actual historical cost is not available. The estimate of historical cost was based on current appraised value indexed to the date of acquisition. Donated capital assets are reported at estimated fair value at the time received. Capital assets acquired through lease agreements are capitalized at the inception of the agreement.

The capitalization threshold for all equipment is $1,000 and software is $5,000.

Equipment and software are depreciated using the straight-line method of depreciation over a useful life of 5 years for equipment and 3 to 5 years for software. Accumulated depreciation on general capital assets at June 30, 2010, was $701,763.

2. Basis of Presentation

The amounts presented in Schedules 4 and 5 represent all funds in the state treasury and all trust funds in the custody of the State Treasurer.

State treasury funds are subject to appropriation; trust funds are not. The schedules do not include any funds or investments that are not in the custody of the State Treasurer.

3. Cash and Investments

Article IV, Section 15 of the Missouri Constitution establishes the State Treasurer as custodian of all state funds and funds received from the U.S. government. This section further authorizes the State Treasurer to place all such monies on time deposit, bearing interest, in Missouri banking institutions selected by the State Treasurer and approved by the Governor and the State Auditor, or in obligations of the U.S. government or any agency or instrumentality thereof maturing or becoming payable not more than 5 years from the date of purchase. In addition, the State Treasurer may enter into repurchase agreements maturing and becoming payable within 90 days secured by U.S. Treasury obligations or obligations of U.S. government agencies or instrumentalities of any maturity, as provided by law. The State Treasurer may also invest in banker's acceptances issued by domestic commercial banks possessing the highest rating issued by a nationally recognized rating agency and in commercial paper, issued by domestic corporations, which has received the highest rating issued by a nationally recognized rating agency. Investments in banker's acceptances and commercial paper shall mature and become payable not more than 90 days from the date of purchase, maintain the highest rating throughout the duration of the investment and meet any other requirements provided by law. The State Treasurer shall prepare, maintain, and adhere to a written investment policy which shall include an asset allocation plan limiting the total

amount of state money which may be invested in each investment category authorized by law.

Deposits

The State Treasurer maintains approximately 230 bank accounts throughout the state. These accounts include collection accounts which are demand deposit accounts for various state agencies, and the state's primary operating accounts which are also demand deposit accounts. Cash balances in the state's operating accounts which are not needed for immediate use are invested.

The State Treasurer's deposits at June 30, 2010, were entirely covered by federal depositary insurance or by collateral securities held by the custodial banks in the State Treasurer's name.

To protect the safety of state deposits, Sections 30.270 and 110.020, RSMo, require depositaries to pledge collateral securities to secure deposits not insured by the Federal Deposit Insurance Corporation.

Investments

The State Treasurer's investments at June 30, 2010, are listed by type below to give an indication of the level of risk assumed by the state at year end. All investments are insured or registered, or have collateral held by the State Treasurer or a custodial bank in the state's name.

		Reported Amount	Fair Value
Time deposits	$	589,443,027	589,443,027
U.S. government securities		2,473,096,949	2,479,370,895
Repurchase agreements		705,639,000	705,639,000
Other investments		35,822,610	35,956,498
Total Investments	$	3,804,001,586	3,810,409,420

Investments are recorded at acquisition cost except "other" investments which are recorded at par. Investments in repurchase agreements are acquired at face value and earn a stated interest rate. Investments in U.S. government securities are acquired at fair value and mature at face value.

4. Demand Deposit and Collection Accounts

The demand deposits with US Bank on Schedule 4 consist of two central demand accounts at June 30, 2010, one at June 30, 2009, 2008, and 2007, and two at June 30, 2006. The demand deposits with Central Bank consist of 28 central demand accounts at June 30, 2010, 27 at June 30, 2009, 31 at June 30, 2008 and 2007, and 34 at June 30, 2006. The demand deposits

with Premier Bank consist of no central demand accounts at June 30, 2010 and 2009, and two at June 30, 2008, 2007, and 2006. The demand deposits with Commerce Bank consist of seven central demand accounts at June 30, 2010 and 2009, six at June 30, 2008, and five at June 30, 2007 and 2006. The demand deposits with Bank of New York consist of one central demand account at June 30, 2010, 2009, and 2008, and two at June 30, 2007 and 2006. The demand deposits with UMB Bank consist of five central demand accounts at June 30, 2010, 2009, 2008, and 2007. Demand deposit bank balances were $36,059,240, $25,073,472, $58,220, $17,418, and $200,000 at June 30, 2010, 2009, 2008, 2007, and 2006, respectively, for US Bank; and $9,661,807, $101,388,206, $2,638,669, $13,586,834, and $16,490,088, at June 30, 2010, 2009, 2008, 2007, and 2006, respectively, for Central Bank; and $0 at June 30, 2010 and 2009, and $24,705, $29,362, and $26,347 at June 30, 2008, 2007, and 2006, respectively, for Premier Bank; and $15,083,622, $9,081,750, $1,136,296, $163,448, and $408,003 at June 30, 2010, 2009, 2008, 2007, and 2006, respectively, for Commerce Bank; and $0 at June 30, 2010 and 2009, $253 at June 30, 2008 and 2007, and $0 at June 30, 2006 for Bank of New York; and $55,312,039, $46,778,874, $103,883, and $10,974 at June 30, 2010, 2009, 2008, and 2007, respectively, for UMB Bank.

The collection bank accounts on Schedule 4 consist of three master concentration accounts and their related collection accounts. The General Concentration, Conservation Concentration, and Lottery Concentration Accounts were at Central Bank at June 30, 2010, 2009, 2008, 2007, and 2006. Collection account bank balances were $1,990,604, $2,976,740, $3,219,655, $5,107,667, and $4,448,114 at June 30, 2010, 2009, 2008, 2007, and 2006, respectively.

Banking service agreements on the central demand accounts allow the State Treasurer to invest outstanding checks up until the checks clear the bank, thereby investing an amount in excess of book balances. The negative balances at June 30 (Schedule 4) for the appropriated funds demand deposits represent the book balance net of amounts invested.

5. Special Fund Dedicated Investments

The State Treasurer is assigned the authority for recording direct investments of special funds in the accounting system. The amounts presented as special fund dedicated investments in the appropriated funds on Schedule 4 represent specific investments made or held by the State Treasurer on behalf of the Pansey Johnson-Travis Memorial State Gardens Trust Fund and the State Public School Fund. The State Treasurer is responsible for purchasing, custodial, income collection, distribution, and record-keeping duties related to the investments of these funds.

The investments of the Pansey Johnson-Travis Memorial State Gardens Trust Fund are maintained in the instruments which were transferred to the State Treasurer from the previous trustee of the fund. The investment purchases for the State Public School Fund are made in accordance with the instructions of the State Public School Fund investment committee.

MANAGEMENT ADVISORY REPORT -
STATE AUDITOR'S FINDINGS

Transition Specialist

The former Deputy State Treasurer resigned his position on January 19, 2010, but continued to receive the same salary and benefits through March 15, 2010, in the temporary position of Transition Specialist. Although the former employee was paid a total of $15,791 during this time period, minimal documentation was available to support the work performed.

We discussed the position with personnel of the State Treasurer's Office (STO) and reviewed the job description developed for the new position of Transition Specialist. According to those sources, the responsibilities of this position were to prepare a memorandum describing the status of all current projects, be available to answer questions from STO staff, and assist in the transition which included the training of recently hired personnel. The former employee was no longer located in the STO offices and had no direct access to STO systems, records, or resources.

Timesheets for the period January 19 through March 15, 2010, reported 8 hours per day had been worked by the former employee. However, other than the brief project status memorandum, there is minimal documentation to support the work performed or services provided. STO personnel indicated the former employee was available for questions and contact consisted primarily of a few emails and telephone conversations occurring approximately 2 to 3 times per week between the former employee and a designated staff person.

Based on the minimal contact and the insufficient documentation, it does not appear the responsibilities of this position and the services provided justified the salary paid. A more economical option may have been to compensate the former employee using an hourly wage based on actual services provided to the STO.

WE RECOMMEND the STO ensure employees are compensated based on services performed. Compensation should be made according to time spent and actual services provided, and documentation should be maintained to support the work performed.

AUDITEE'S RESPONSE

As this audit states, the Office of State Treasurer received its second consecutive clean audit. The Auditor has found no instances of noncompliance or other matters required to be reported under Government Auditing Standards.

The Office of State Treasurer complied with every internal policy and procedure, provided every employee with job descriptions, required all employees to abide by office policies, compensated

all employees based on services performed and compensated employees based on time spent working. The transition specialist met all expectations of work performed.

Independent approval of all time sheets and compensation was performed according to office policy and the Auditor has found no fault with those policies. Reconciliation and expenditure of funds was done in complete compliance with statute, policy, procedure and Government Auditing Standards.

The Office of State Treasurer will continue to implement professional and sound human resource practices, including the best private-market practices, which may utilize telecommuting to ensure the safe, secure and accountable management of taxpayer dollars especially through periods of transition where possible conflicts of interest may easily arise.

This audit confirms the Office of State Treasurer met all constitutional duties and all duties set forth in statute exactly as prescribed.

AUDITOR'S COMMENT

The State Auditor's Office does not endorse the characterization of audit contents made by subjects of the audit.

STATISTICAL SECTION

Organization and Statistical Information

OFFICE OF STATE TREASURER
ORGANIZATION AND STATISTICAL INFORMATION

The State Treasurer is an elective office as provided in the Missouri Constitution. The duties of the State Treasurer as defined by Article IV Section 15 are to be the custodian of all state funds; to determine the amount of state monies not needed for current operating expenses; and to invest such monies in interest-bearing time deposits, in Missouri banking institutions selected by the State Treasurer and approved by the Governor and State Auditor, in short-term U.S. government securities, or in certain allowable commercial paper and banker's acceptances.

The Office of State Treasurer operates in four major functional areas: 1) accounting and banking services, 2) disbursements and records, 3) investments and deposit programs, and 4) unclaimed property.

The accounting and banking services area 1) maintains a fund accounting system to fulfill a statutory responsibility to keep separate accounts of the funds of the state and to allocate investment interest to funds, 2) maintains ledger controls on fund balances and appropriations to assure that no check is issued that exceeds the lawful appropriated balances, 3) controls receipt of state monies collected by state agencies and deposited in local banks throughout the state, 4) reconciles bank activity to receipt and disbursement activity reflected on the state books, 5) determines the amount of state monies not needed for current operating expenses, and 6) confirms daily disbursements with the bank as certified by the Office of Administration.

The disbursements and records area provides processing support to other departments of the State Treasurer's Office, as follows: 1) provides retrieval of state checks, and 2) controls and processes outlawed checks and processes and verifies claims for replacement checks.

The investments area places state monies not needed for current operating expenses in interest-bearing time deposits, U.S. government and agency securities, commercial paper, banker's acceptances, and repurchase agreements. This area also administers the State Treasurer's statutory linked deposit program and monitors and accounts for the collateralization of state funds.

The Unclaimed Property Division administers Missouri's Unclaimed Property Act (Chapter 447 RSMo). The Unclaimed Property Division is responsible for 1) ensuring unclaimed property is reported, 2) receiving and recording reports of unclaimed property, 3) depositing unclaimed funds to the Abandoned Fund Account Fund, 4) maintaining custody and safekeeping of abandoned or unclaimed physical property, and 5) processing owner claims for abandoned funds or physical property.

Clint Zweifel became Missouri's forty-fifth State Treasurer when he took the oath of office on January 12, 2009. His term will expire in January 2013.

As of June 30, 2010, the office had 44 full-time positions and 3 part-time positions to assist in the accomplishment of its mission.

Thomas A. Schweich

Missouri State Auditor

Lathrop R-II School District

May 2011

Report No. 2011-25

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Lathrop R-II School District

Fuel

The Lathrop R-II School District does not adequately monitor its diesel fuel usage. The district uses a contractor for bus services, but the contractor uses the district's diesel fuel tank to fuel the buses. Although the contractor submits mileage reports for each bus, until January 2011 the district was not tracking the amount of fuel pumped into each bus, so it was impossible to compare the miles driven to the fuel used to make sure they matched up. The district also does not track any district fuel that gets pumped into the contractor's spare buses, so district fuel could be used to transport others. Finally, the district does not compare the amount of diesel pumped from the tank to the amount of diesel purchased for the tank to make sure that all of the district's fuel is accounted for.

Additional Comments

We evaluated the school district's internal controls over significant functions and compliance with certain legal provisions, including those specifically raised by petitioners. For the areas audited, no significant deficiencies, other than those noted above, were identified. The school district is to be commended for taking the proactive step of establishing a fraud committee which meets twice a year to discuss risk areas and the resolution of problems within the district.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Lathrop R-II School District was awarded $992,460 in federal stimulus funding for the fiscal year ended June 30, 2010 and $16,425 for the fiscal year ended June 30, 2011. Well over $900,000 of these funds went toward teacher compensation and development, with the remaining funds expended on technology, bus transportation, supplies, security, and bathroom updates. A detailed listing of the awards is included on the Organization and Statistical Information page following the audit report.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 6

THOMAS A. SCHWEICH
Missouri State Auditor

To the Board of Education
Lathrop R-II School District

The State Auditor was petitioned under Section 29.230, RSMo, to audit the Lathrop R-II School District. We have audited certain operations of the district in fulfillment of our duties. The district engaged Westbrook & Co., P.C., Certified Public Accountants (CPAs), to audit the district's financial statements for the year ended June 30, 2010. To minimize duplication of effort, we reviewed the report and substantiating working papers of the CPA firm. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2010. The objectives of our audit were to:

1. Evaluate the district's internal controls over significant management and financial functions.

2. Evaluate the district's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the district, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the school district's management and was not subjected to the procedures applied in our audit of the school district.

For the areas audited, we identified (1) deficiencies in internal controls, (2) no significant noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our finding arising from our audit of the Lathrop R-II School District.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditor:	Richard Stuck
Audit Staff:	Richard Mosha, MBA

Fuel

Controls over diesel fuel purchased by the district and used for transportation of students are in need of improvement.

The Lathrop School District uses a contractor to provide bus service, but maintains a bulk diesel tank for the drivers to fuel buses. The district purchased $47,330 in diesel fuel during the year ended June 30, 2010, and $19,954 during the period July 1, 2010, to December 31, 2010. As required by contract, the provider maintains mileage records for each bus route, showing the beginning and ending miles for each route and the total route miles driven by each bus. Our review of the mileage reports and fueling procedures revealed the following concerns:

- The usage/fuel reports are submitted to the district, but there is no evidence they are reviewed for reasonableness.

- Beginning in January 2011, the drivers began posting the number of gallons of diesel dispensed into each bus on the mileage report. Prior to this time, no record of the fuel usage was maintained, and thus, the district was unable to compare fuel usage to miles driven for reasonableness.

- The contractor indicated he occasionally uses his spare buses to provide services to other districts or to substitute for a Lathrop route when necessary. The district has not adopted controls over fuel usage by the contractor to ensure district fuel is used only for transportation related to the Lathrop School District. Mileage logs are not kept and submitted for the spare buses.

- The district does not have procedures to compare the number of gallons of diesel dispensed to the gallons purchased for the bulk tank. Rather than the district ordering fuel when needed, the fuel contractor periodically checks the fuel level gauge on the tank. If the tank is less than half full, the tank will be filled and the district billed. Logs were not maintained prior to January 2011 of the gallons dispensed, which could be compared to the gallons purchased to ensure all district fuel is accounted for adequately.

Maintenance and review of mileage/usage logs and bulk fuel inventory records, and comparison of log information and inventory records to fuel purchases, are necessary to ensure vehicles and equipment are properly utilized, prevent paying vendors for improper billing amounts, and decrease the risk of theft or misuse of fuel occurring without detection.

Recommendation

The Lathrop R-II School District Board of Directors develop procedures for reviewing usage/fuel reports submitted by the bus contractor and reconciling the fuel purchases to the amount dispensed.

Auditee's Response

The Lathrop School Board provided the following written response:

We agree to your recommendation and are taking immediate action to ensure internal control by adequately monitoring fuel purchases and usage.

Lathrop R-II School District
Organization and Statistical Information

The Lathrop R-II School District is located 3 miles west of Interstate 35 (25 minutes north of Kansas City) on state highway 116 and encompasses 104 square miles in Clinton County and 9 square miles in Caldwell County.

The district operates a senior high school (grades 9-12), a middle school (grades 6-8), and an elementary school (grades K-5**)**. Enrollment was 892 for the 2009-2010 school year. The district employed 125 full-time and 9 part-time employees as of June 30, 2010, including 1 superintendent, 3 principals, 1 assistant principal, 1 special services director, and 78 certified and 50 non certified employees.

The Lathrop R-II School District has been classified under the Missouri School Improvement Program as "Accredited" by the Missouri Department of Elementary and Secondary Education.

School Board

An elected board acts as the policy-making body for the district's operations. The Board's seven members serve 3-year terms without compensation. Members of the board at June 30, 2010, were

Jeff Wright, President
Ray Sellers, Vice -President
Kelly Butler, Treasurer
Virginia Barrett, Member
Robin Douglas, Member
Teona Harris, Member
Jerry Archer, Member

Superintendent

The district's superintendent at June 30, 2010, was Dr. Chris Blackburn and her annual compensation was $105,612. The superintendent's compensation is established by the school board.

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

According to school district personnel, the district was awarded the following American Recovery and Reinvestment Act of 2009 funding:

State Fiscal Stabilization Fund (SFSF) - Education State Grants were awarded by the U.S. Department of Education to the state of Missouri Department of Elementary and Secondary Education (DESE) and $630,956 was passed through to the Lathrop School District during the year ended June 30, 2010. The district expended these funds for teacher salaries.

A SFSF-Government Services Grant was awarded by the U.S. Department of Education to the state of Missouri DESE and $14,349 was passed through to the Lathrop School District during the year ended June 30, 2010. The district expended these funds for bus transportation.

A SFSF-Government Services Grant was awarded by the U.S. Department of Education to the state of Missouri DESE and $103,150 was passed through to the Lathrop School District during the year ended June 30, 2010. The district expended these funds to continue the career ladder program which provides teachers with extra pay for things such as after school tutoring.

A Title I Grant to Local Educational Agencies was awarded by the U.S. Department of Education to the state of Missouri DESE. Through this grant, the state of Missouri DESE reimbursed the Lathrop School District $20,566 during the year ended June 30, 2010, and $16,425 during the year ended June 30, 2011, for $36,991 expended by the district during the year ended June 30, 2010, to assist with teacher salaries and benefits, technology, and teacher development.

Special Education Grants to States were awarded by the U.S. Department of Education to the state of Missouri DESE and $221,950 was passed through to the Lathrop School District during the year ended June 30, 2010. The district expended $179,003 for teacher salaries and benefits, with the remaining $42,947 expended on computer software to assist students, testing supplies, school bathroom updates, computer labs, security, and additional technology.

An Education Technology State Grant was awarded to the state of Missouri DESE by the U.S. Department of Education and $1,489 was passed through to the Lathrop School District during the year ended June 30, 2010. The district expended these funds for additional technology.

City of Pine Lawn
Municipal Division

May 2011

Report No. 2011-24

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Twenty-First Judicial Circuit, City of Pine Lawn Municipal Division

Accounting Controls	Monies received are not always posted and/or deposited in a timely manner. Some monies received were not posted for a week, and some were not deposited for 3 weeks. Failure to promptly post and deposit receipts increases the opportunities for fraud or abuse. A similar finding was noted during a previous audit of the court, but the municipal division has not remedied the problem. The municipal division does not adequately follow-up on outstanding checks. Old outstanding checks should be voided and reissued if the payee can be located.
Traffic Ticket Accountability	Neither the police department nor the municipal division adequately account for the numerical sequence of traffic tickets issued and cannot be assured all tickets are properly submitted for processing.
Computer Controls	Employees are not required to use unique identification to log onto computers, and employees share passwords. Likewise, no user identification or password is required to access the accounting program, making it difficult to control access and maintain accountability.

In the areas audited, the overall performance of this entity was **Fair**.*

American Recovery and Reinvestment Act (Federal Stimulus)	The Twenty-First Judicial Circuit, City of Pine Lawn Municipal Division, did not receive any federal stimulus monies during the audited time period.

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

3. Computer Controls....6

Organization and Statistical Information 7

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Twenty-First Judicial Circuit
and
Municipal Judge
Pine Lawn, Missouri

We have audited certain operations of the City of Pine Lawn Municipal Division of the Twenty-First Judicial Circuit in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2010. The objectives of our audit were to:

1. Evaluate the municipal division's internal controls over significant financial functions.

2. Evaluate the municipal division's compliance with certain legal provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the municipal division, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) deficiencies in internal controls, and (2) noncompliance with legal provisions. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Pine Lawn Municipal Division of the Twenty-First Judicial Circuit.

A petition audit of the City of Pine Lawn, fulfilling our obligations under Section 29.230, RSMo, is still in process, and any additional findings and recommendations will be included in the subsequent report.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Debra S. Lewis, CPA
In-Charge Auditor:	Chris Vetter, CPA

1. Accounting Controls

Deposits are not always made timely and intact. In addition, bank reconciliations for the bond account include many old outstanding checks.

1.1 Deposits

Monies received for fines and court costs are not always deposited to the city bank account timely and intact, which increases the risk of theft or misuse of funds. Receipts collected on court nights, which primarily consist of cash, are typically not posted to the accounting system and deposited until 5 to 7 days after court. Receipts collected at the Traffic Violations Bureau are posted to the accounting system timely, but are not always deposited timely. Receipts collected from November 15 through November 17, 2010, totaling $15,124, were not deposited until December 7, 2010. Receipts collected on November 18, 2010, which included $2,607 in cash collected at court, were not deposited until November 24, 2010.

To ensure monies are accounted for properly, all receipts should be posted to the computerized accounting system when received and deposited intact in a timely manner.

A similar condition was noted in prior audit report No. 2006-82, *City of Pine Lawn, Missouri*, issued in December 2006.

1.2 Outstanding checks

The municipal division does not adequately follow up on outstanding checks. At June 30, 2010, the bond account had 35 outstanding checks totaling $2,140, which had been outstanding for over a year.

To properly monitor disbursements, procedures should be established to routinely investigate any checks remaining outstanding over a specified period of time. Old outstanding checks should be voided and reissued to those payees who can be readily located. If payees cannot be located, amounts should be paid out in accordance with applicable state laws.

Recommendations

The City of Pine Lawn Municipal Division:

1.1 Ensure all receipts are posted to the computerized accounting system when received and deposited to the city bank account intact and in a timely manner.

1.2 Establish procedures to follow up and resolve outstanding checks in a timely manner.

Auditee's Response

The Municipal Judge and the current Court Administrator provided the following written responses:

1.1 The Court will make better efforts to make more timely deposits to the City's bank account following receipts collected on Court nights. Particularly said deposits will focus on receipts in the form of cash and diligent efforts will be made to make all deposits within 24 hours of receipt. Any sums not immediately deposited are to be placed in the Court safe pending deposit the next banking business day. All receipts are to be posted in the Pine Lawn computerized operating system in an intact and timely manner.

1.2 The Court will implement an annual review of checks outstanding over one year. All checks are mailed via U.S. Mail to the most recent address provided to the Court. Stale dated outstanding checks over one year old will be voided and will be deemed unclaimed property according to State Law.

2. Traffic Ticket Accountability

Neither the city police department nor the municipal division adequately account for the numerical sequence of traffic tickets issued. The police department tracks ticket books assigned to each officer on a log; however, this log is not complete. Some ticket books assigned to officers were not posted to the log. Municipal division clerks enter tickets issued into the court computer system. While the computer system has the capability to account for the numerical sequence of tickets issued, the feature is not utilized.

Without a proper accounting of the numerical sequence of tickets issued, the municipal division and the police department cannot be assured all tickets issued are properly submitted for processing.

Recommendation

The City of Pine Lawn Municipal Division work with the police department to ensure the numerical sequence of all tickets issued is accounted for properly.

Auditee's Response

The Municipal Judge and the current Court Administrator provided the following written response:

When the Court is aware of any missing numerical traffic ticket sequences, the Court will advise the police department. The Court, upon request of the Police Department, will work with the Police Department to ensure proper accounting of the numerical sequence of traffic tickets.

3. Computer Controls

Unique user identifications are not required to log on to computers in the municipal division and passwords are shared among employees. In addition, no user identification or password is required to log on to the municipal division accounting program. The lack of an effective system of user identifications and passwords may allow unauthorized access and/or changes to the system. To establish individual responsibility, as well as help preserve the integrity of computer programs and data files, access to information should be limited to authorized individuals. To control access, a unique user identification and password should be assigned to each user of a system. These passwords should be kept confidential and changed periodically to help limit unauthorized access to computer files.

Recommendation

The City of Pine Lawn Municipal Division require unique user identifications and passwords for all employees.

Auditee's Response

The Municipal Judge and the current Court Administrator provided the following written response:

In addition to the password system already incorporated in the Court computers, the Court staff will implement a user identification system to better ensure individual responsibility. It should be noted that efforts are already in place to restrict access to the Court computers by using a password that is only released to Court personnel and is changed periodically.

Twenty-First Judicial Circuit
City of Pine Lawn Municipal Division
Organization and Statistical Information

The City of Pine Lawn Municipal Division is in the Twenty-First Judicial Circuit, which consists of St. Louis County. The Honorable John A. Ross serves as Presiding Judge.

The municipal division is governed by Chapter 479, RSMo, and by Supreme Court Rule No. 37. Supreme Court Rule No. 37.49 provides that each municipal division may establish a violation bureau in which fines and costs are collected at times other than during court and transmitted to the city treasury.

Personnel

At June 30, 2010, the municipal division employees were as follows:

Title	Name
Municipal Judge	Dean Plocher
Court Administrator	Angela Chatman
Court Clerk	Tajuana Clark

Financial and Caseload Information

	Year Ended June 30, 2010
Receipts	$2,080,526
Number of cases filed	18,891

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The City of Pine Lawn Municipal Division of the Twenty-First Judicial Circuit did not receive any federal stimulus monies during the year ended June 30, 2010.

Thomas A. Schweich

Report No. 2011-23

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Forty-Fourth Judicial Circuit, City of Mountain Grove Municipal Division

Accounting Controls and Procedures	The municipal division does not adequately segregate the duties of receiving and depositing monies from those of recording transactions. The Court Clerk collects fines and costs; prepares deposits; and posts fines, court costs, and bonds received. If segregation of duties is not possible, the municipal division should arrange for a documented independent review. The police department does not transmit cash bonds it collects to the municipal division timely.

In the areas audited, the overall performance of this entity was **Fair**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The Forty-Fourth Judicial Circuit, City of Mountain Grove Municipal Division, did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Management Advisory Report - State Auditor's Findings
1. Accounting Controls and Procedures 4

Organization and Statistical Information 6

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Forty-Fourth Judicial Circuit
and
Municipal Judge
Mountain Grove, Missouri

We have audited certain operations of the City of Mountain Grove Municipal Division of the Forty-Fourth Judicial Circuit in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2010. The objectives of our audit were to:

1. Evaluate the municipal division's internal controls over significant financial functions.

2. Evaluate the municipal division's compliance with certain legal provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the municipal division, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) deficiencies in internal controls, and (2) no significant noncompliance with legal provisions. The accompanying Management Advisory Report presents our finding arising from our audit of the City of Mountain Grove Municipal Division of the Forty-Fourth Judicial Circuit.

A petition audit of the City of Mountain Grove, fulfilling our obligations under Section 29.230, RSMo, is still in process, and any additional findings and recommendations will be included in the subsequent report.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Donna Christian, CPA, CGFM
In-Charge Auditor:	Ted Fugitt, CPA

1. Accounting Controls and Procedures

The municipal division lacks adequate segregation of accounting duties and cash bonds are not transmitted to the municipal division by the police department timely.

1.1 Segregation of duties

The duties of receiving and depositing monies are not adequately segregated from recording transactions. The Court Clerk performs all duties related to collection of fines and costs; deposit preparation; and posting fines, court costs, and bonds received. Although the City Clerk signs off on the bank reconciliations prepared by the Court Clerk, neither the Municipal Judge nor other city officials independent of the cash custody and record-keeping functions provide adequate supervision or review of the work performed by the Court Clerk.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls could be improved by segregating duties to the extent possible. If proper segregation of duties is not possible, a documented independent review of the work performed by the Court Clerk, such as a comparison of the composition of receipts to the composition of deposits, is necessary.

1.2 Bond receipts

Cash bonds collected by the police department are not always transmitted to the municipal division timely. For example a $212 cash bond received by the police department on April 6, 2010, was not received by the Court Clerk until May 10, 2010. In addition, cash bonds of $248 and $370 received by the police department on November 16, 2009, and February 22, 2010, respectively, were not received by the Court Clerk until December 11, 2009, and March 8, 2010, respectively. To ensure all bonds are accounted for properly, the police department should transmit monies timely to the municipal division.

Recommendations

The City of Mountain Grove Municipal Division:

1.1 Segregate accounting duties to the extent possible and implement appropriate reviews and monitoring procedures.

1.2 Work with the police department to ensure all bonds collected are transmitted timely.

Auditee's Response

The Municipal Judge provided the following written responses:

1.1 I have issued an operating order directing the Court Clerk to submit court receipt and deposit records and bank reconciliations to the City Clerk monthly for her documented review.

1.2 I have issued an operating order directing police officers to turn cash bonds collected over to the Court Clerk within 24 hours of receipt.

Forty-Fourth Judicial Circuit
City of Mountain Grove Municipal Division
Organization and Statistical Information

The City of Mountain Grove Municipal Division is in the Forty-Fourth Judicial Circuit, which consists of Douglas, Ozark, and Wright Counties. The Honorable John Moody serves as Presiding Judge.

The municipal division is governed by Chapter 479, RSMo, and by Supreme Court Rule No. 37. Supreme Court Rule No. 37.49 provides that each municipal division may establish a violation bureau in which fines and costs are collected at times other than during court and transmitted to the city treasury.

Personnel

At June 30, 2010, the municipal division employees were as follows:

Title	Name
Municipal Judge	Noble Leighton
Court Clerk	Karen Linton

Financial and Caseload Information

	Year Ended June 30, 2010
Receipts	$43,351
Number of cases filed	374

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The Forty-Fourth Judicial Circuit, City of Mountain Grove Municipal Division, did not receive any federal stimulus monies during the year ended June 30, 2010.

Thomas A. Schweich

Missouri State Auditor

Hanley Road and North of Folk Avenue Transportation Development District

May 2011

Report No. 2011-22

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Hanley Road and North of Folk Avenue Transportation Development District

Background

The Hanley Road and North of Folk Avenue Transportation Development District (TDD) was organized in May 2004 and is located in the City of Maplewood, in St. Louis County. This TDD approved a 1-cent sales tax to finance the costs of various transportation projects totaling $13.4 million. This sales tax was expected to remain in effect for 25 years.

In March 2009, the Hanley Road Corridor (HRC) TDD was organized and effectively consolidated the activities of this and four other local TDDs by refinancing or accepting the debt of these TDDs. The Hanley Road and North of Folk Avenue TDD Board voted to repeal its sales tax once the HRC TDD sales tax became effective, and, in November 2010, the TDD Board expressed its intent to dissolve.

Statutory Requirement

Section 238.275, RSMo, requires the State Auditor to determine the financial status of a TDD before it may be abolished. The law prohibits the abolition of a TDD while there are outstanding claims or causes of action pending against it, if its liabilities exceed its assets, or while the TDD is insolvent, in receivership, or under the jurisdiction of a bankruptcy court.

Financial Status

Based upon our audit and an estimate of outstanding liabilities for final administrative costs received from legal counsel, the Hanley Road and North of Folk Avenue TDD assets will be sufficient to pay any remaining costs and the Board of Directors may proceed with its abolishment.

Because of the limited objective of this audit, no overall rating is provided.

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Hanley Road and North of Folk Avenue TDD did not receive any federal stimulus monies during the audited time period.

Hanley Road and North of Folk Avenue Transportation Development District
Table of Contents

State Auditor's Report 2

Management Advisory Report - State Auditor's Findings

Financial Status 4

Thomas A. Schweich
Missouri State Auditor

Shelley Ball, Chairman
and
Board of Directors
Hanley Road and North of Folk Avenue Transportation Development District
Maplewood, Missouri

The State Auditor is required under Section 238.275, RSMo, to audit a transportation development district prior to the question of abolishment being submitted to a vote. In November 2010, legal counsel of the Hanley Road and North of Folk Avenue Transportation Development District (TDD) advised the State Auditor's office of the TDD Board's intent to dissolve the district and requested an audit be performed pursuant to this statute.

The TDD engaged Deborah Loomis, Certified Public Accountant (CPA), to audit the district's financial statements for the year ended December 31, 2009. To minimize duplication of effort, we reviewed the report and substantiating working papers of the CPA firm. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2010. The objective of our audit was to evaluate the financial status of the TDD and determine whether it may be abolished pursuant to law.

Our methodology included reviewing minutes of meetings, financial records, and other pertinent documents; and interviewing various representatives of the TDD, as well as certain external parties. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The audit determined the Board of Directors can proceed with abolishment of the TDD in accordance with Section 238.275, RSMo.

The accompanying Management Advisory Report presents our findings arising from our audit of the Hanley Road and North of Folk Avenue Transportation Development District.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Gregory A. Slinkard, CPA, CIA
In-Charge Auditor:	Robert L. McArthur II

Hanley Road and North of Folk Avenue Transportation Development District Management Advisory Report - State Auditor's Findings

Financial Status

Our audit of the Hanley Road and North of Folk Avenue Transportation Development District (TDD) indicates the financial condition of the TDD is such that the TDD may be abolished since its assets exceed or meet its outstanding liabilities.

The Hanley Road and North of Folk Avenue TDD was organized in May 2004 by petition of the owner/developer of property within the proposed district. The Board of Directors and officers include various employees of the owner/developer.

The qualified voter of the TDD, in this case the property owner/developer, approved the imposition of a 1-cent (1 percent) sales tax on all transactions which are taxable within the boundaries of the district, effective November 2004. The sales tax was expected to remain in effect for 25 years, unless terminated sooner. The retail establishments within the district collected the sales taxes and forwarded the collections to the TDD collection agent, the City of Maplewood.

The TDD is located in the City of Maplewood, in St. Louis County, northeast of the intersection of Hanley Road and Folk Avenue. The Maplewood Commons development includes large retail establishments. The TDD has a fiscal year end of December 31. An annual financial audit of the district was conducted by an independent auditor for 2009.

The TDD was formed for the purpose of acquiring property (right-of-way and/or easements) and constructing various transportation projects with a total cost of approximately $13.4 million. The developer funded the costs of the transportation projects prior to the TDD issuing $13.8 million in revenue bonds in June 2005 and a $1 million subordinate promissory note payable during that year. After the TDD debt was issued, the developer was reimbursed.

The City of Maplewood and St. Louis County were the public entities with jurisdiction over these projects and ownership of the projects was transferred to these entities in June 2006.

In October 2008, the Brentwood Point and Folk Avenue South TDDs jointly filed a petition to create the Hanley Road Corridor (HRC) TDD, which includes the entire area encompassed by the Hanley Road and North of Folk Avenue TDD. The HRC TDD was officially organized in March 2009 for the purpose of paying the cost of financing or refinancing certain transportation-related improvements, including the refinancing of the outstanding debt obligations of the Hanley Road and North of Folk Avenue TDD. The creation of the HRC TDD served to effectively consolidate the activities of the Hanley Road and North of Folk Avenue TDD and four other local TDDs by refinancing and/or accepting the debt of those TDDs and

assuming all other financial responsibilities within the newly-created HRC TDD.

On August 12, 2009, the Hanley Road and North of Folk Avenue TDD Board approved a resolution repealing its sales tax upon the effective date of a sales tax imposed and issuance of obligations by the HRC TDD. The HRC TDD bonds were subsequently issued on August 31, 2009, resulting in the liquidation of over $14.5 million in Hanley Road and North of Folk Avenue TDD debt-related obligations, including debt principal, accrued interest, and other debt refunding expenses. The HRC TDD sales tax became effective September 1, 2009, with the Hanley Road and North of Folk Avenue TDD sales tax being repealed that same date.

In November 2010, the TDD's legal counsel advised the State Auditor's office (SAO) of the Board's intent to dissolve the TDD and requested the SAO proceed with all necessary actions as required pursuant to Section 238.275, RSMo.

The SAO has performed an audit of the Hanley Road and North of Folk Avenue TDD as required by Section 238.275, RSMo. That statute requires the State Auditor to audit the TDD to determine its financial status, and determine whether the TDD may be abolished pursuant to law. That law also states the board shall not propose the question to abolish the TDD while there are outstanding claims or causes of action pending against it, if its liabilities exceed its assets, or while the TDD is insolvent, in receivership, or under the jurisdiction of a bankruptcy court.

The following table presents the financial activity and cash balances of the TDD for the 2 years ended December 31, 2010 (as presented on the cash basis):

	Year Ended December 31,	
	2010	2009
RECEIPTS		
Sales taxes	$ 0	900,930
Interest	3	1,300
Intergovernmental receipt - HRC TDD	15,000	14,616,502
Total Receipts	15,003	15,518,732
DISBURSEMENTS		
Administration	2,964	43,471
Legal costs	9,416	0
Audit	7,500	0
Intergovernmental payment - HRC TDD	0	1,908,866
Debt service	0	15,211,267
Total Disbursements	19,880	17,163,604
RECEIPTS OVER (UNDER) DISBURSEMENTS	(4,877)	(1,644,872)
BEGINNING CASH	26,924	1,671,796
ENDING CASH	$ 22,047	26,924

Note - the ending cash balance at each year end represents the balance of an account maintained on behalf of the Hanley Road and North of Folk Avenue TDD by the HRC TDD under the HRC TDD bond indenture.

Based on our audit, the cash balance of the TDD at December 31, 2010, was $22,047. To cover final expenses of the TDD prior to abolishment, additional funding of $15,000 is to be provided annually by the HRC TDD on behalf of the Hanley Road and North of Folk Avenue TDD in accordance with the HRC TDD bond indenture. As of February 22, 2011, the cash balance of the TDD was $36,211.

The TDD's legal counsel estimates the outstanding liabilities for final administrative costs (legal fees, accounting costs and audit costs) at approximately $17,500. Based on legal counsel's estimate, TDD assets will be sufficient to pay any remaining costs and obligations.

Based on our audit of the TDD, the Board of Directors can proceed with the abolishment of the TDD in accordance with Section 238.275, RSMo.

Missouri State Auditor

City of Chula

May 2011

Report No. 2011-21

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the City of Chula

Audits, Budgets, and Financial Reporting	The city does not obtain required annual audits of its water and sewer systems, properly prepare and monitor budgets, or prepare required financial reports. In order to comply with state statute and the terms of its loan agreement with the U.S. Department of Agriculture Rural Development Agency, the city is required to obtain annual audits of its water and sewer systems. The city's budgets were incomplete and not monitored to actual disbursements, and the city overspent three funds for a total of almost $30,000 in fiscal year 2010. The city failed to publish semiannual financial statements and has not submitted annual financial reports to the State Auditor's office since 2002 as required by state law. Finally, the board should require the Park Board to file financial reports with the city regularly to help ensure funds are used properly.
Accounting Controls and Procedures	Accounting duties are not segregated, and insufficient oversight exists to ensure transactions are properly recorded. The City Clerk prepares utility bills, records utility fees, receives and deposits monies and performs bank reconciliations with little or no oversight. Receipt slips are not always issued and deposits are not timely. The city does not ensure the composition of receipts matches the composition of deposits. Water, sewer and trash transactions are accounted for in the same fund, which makes it difficult to ensure the city is charging appropriate rates. The city is not putting new customer utility deposits into the designated bank account and the list of utility deposits is not reconciled to the bank account, which allows errors to go undetected and makes it difficult to determine if enough monies are available to cover deposits. The city is not following up on insufficient funds checks despite a city ordinance requiring certain actions. Bank accounts are not reconciled promptly, and errors could go undetected.
Disbursements	The city is not documenting the allocation of some disbursements. Restricted funds can only be used for certain expenses, and the city should make sure disbursements are made from the appropriate funds. This also helps the city ensure it is charging the appropriate rates for services and assess the effectiveness of its programs. Some employees do not submit timesheets, so it is difficult to monitor the hours worked and substantiate the payroll.

Legal Issues and Ordinances

The city elects two aldermen from each of the two wards and one at-large; however, state law requires the city to either elect aldermen from wards or at-large, but not both. City ordinances are not complete and up-to-date and are not maintained in a well-organized manner. Some ordinances could not be located, and it was difficult to tell which ordinances had been repealed. Moreover, the city appears to be operating in violation of some ordinances, including the ordinance setting the City Clerk's salary.

In the areas audited, the overall performance of this entity was **Fair**.*

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The City of Chula did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 15

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Chula, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the City of Chula. We have audited certain operations of the city in fulfillment of our duties. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2010. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions.

2. Evaluate the city's compliance with certain legal provisions.

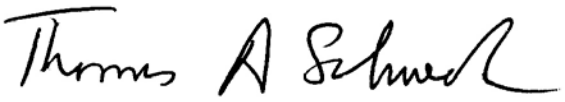
3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Chula.



Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Randall Gordon, M. Acct., CPA, CGAP
In-Charge Auditor:	Lori Bryant

1. Audits, Budgets, and Financial Reporting

The city does not obtain required annual audits, properly prepare and monitor budgets, or prepare required financial reports.

1.1 Audits

The city does not obtain annual audits of its water and sewer systems. Section 250.150, RSMo, requires the city to obtain annual audits of the combined water and sewer system and provides the cost of the audit is to be paid from the monies received from the system. Also, city loan agreements with the United States Department of Agriculture (USDA) Rural Development Agency require the city to obtain annual audits of its water and sewer systems. In addition to being required by state law and loan agreements, annual audits of city funds would help ensure financial transactions are properly recorded.

1.2 Budgets

While annual budgets are prepared and adopted, they do not contain all elements required by state law. Budgets do not include all city funds, a budget message and general budget summary, actual beginning and estimated ending available resources, actual receipts and disbursements for the 2 preceding years, or city indebtedness information.

Section 67.010, RSMo, requires the budget present a complete financial plan for the ensuing budget year and outlines the various information to be included in the budget. A complete and well planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific financial expectations for each area of city operations. It also assists in setting tax levies and utility rates and informing the public about city operations and current finances.

1.3 Budget to actual disbursements

The city has not developed a process to monitor budgeted to actual disbursements. The Board of Aldermen reviews check registers for each city fund; however, reports of budgeted and year-to-date actual disbursements are not prepared. As a result, budgets are not monitored and actual disbursements exceeded budgeted amounts for the year ended June 30, 2010, as follows:

	Year end June 30, 2010		
Fund	Budgeted Disbursements*	Actual Disbursements**	Amount Overspent
General Revenue	$ 10,030	10,194	(164)
Street	15,650	21,790	(6,140)
Water and Sewer	71,585	93,443	(21,858)

* Amounts obtained from the year end June 30, 2010, budget documents.

** Amounts obtained from financial reports generated by the City Clerk.

The city did not prepare amended budgets for these funds or document reasons for exceeding budgets in meeting minutes. To help ensure the city's budget and financial condition are adequately monitored, periodic detailed budget to actual reports should be prepared and reviewed by the Board.

Section 67.040, RSMo, allows for budget increases, but only after the governing body officially adopts a resolution setting forth the facts and reasons. Section 67.080, RSMo, provides that no expenditure of public monies shall be made unless it is authorized in the budget.

1.4 Financial statements

The city has not published semiannual financial statements as required by state law. The City Clerk indicated she was not aware of this requirement. Section 79.160, RSMo, requires the Board of Aldermen to prepare and publish semiannually a full and detailed account of the receipts, disbursements, and indebtedness of the city.

Complete and accurate financial statements are necessary to keep citizens informed of the financial activity and condition of the city. In addition, Section 79.165, RSMo, states the city cannot legally disburse funds until the financial statement is published.

1.5 Financial reporting

The city has not submitted annual financial reports to the State Auditor's office since 2002. Section 105.145, RSMo, requires political subdivisions to file an annual report of financial transactions with the State Auditor's office.

1.6 Park Board

While the Park Board files minutes of its meetings with the city, financial reports are not routinely filed with the city. The Park Board maintains a bank account and receives donations. To ensure funds are used appropriately, the Board of Aldermen should require the Park Board to regularly file financial reports with the city.

Recommendations

The Board of Aldermen:

1.1 Obtain annual audits of the combined water and sewer system as required by state law and loan agreements.

1.2 Ensure annual budgets contain all information required by state law.

1.3 Periodically compare year-to-date disbursements with budgeted amounts to monitor city finances and ensure actual disbursements do not exceed budgeted amounts.

1.4 Ensure semiannual financial statements are published in accordance with state law.

1.5 Submit annual financial reports to the State Auditor's office as required by state law.

1.6 Ensure financial reports of the Park Board are filed with the city.

Auditee's Response

The Mayor and Board of Aldermen provided the following written responses:

1.1 The city was unaware of this requirement. The USDA will be contacted to inquire about obtaining an audit and the estimated cost of an audit. Then we will proceed with obtaining an audit for the year ended June 30, 2011.

1.2 The city has a budget that includes the Water and Sewer Funds, General Fund, and Street Fund that is adopted by the Board of Aldermen yearly before money is spent. The city was unaware of the additional information that is needed to be included in the budgets. The current budget for FY11 will be amended to include actual beginning balances, estimated ending balances, the city's indebtedness information, budget message, general budget summary, and actual income and expenditures for the two preceding years. The city has requested a budget from the Park Board.

1.3 The Board of Aldermen has always amended the budgets each year to reflect actual income and expenditures, but this was not indicated in the minutes and an ordinance was not passed. The City Clerk will start preparing financial reports with the current budget and year-to-date income and expenditures to be presented to the board at least quarterly. The Board of Aldermen will monitor and adjust the budget by ordinance if expenditures are close to budgeted amounts and will include the reason of adjusting the original budget.

1.4 The Board of Aldermen was unaware of this requirement. The City Clerk will prepare a semiannual financial statement with a detailed account of the receipts, disbursements, and indebtedness of the city. The City Clerk will present the report to the Board of Aldermen for approval and then publish the semiannual financial statement in a paper. We anticipate publishing the July 2010 to December 2010 activity in February 2011.

1.5 The City Clerk will complete the financial report. The report will be presented to the Board of Aldermen for approval, then submitted to the State Auditor's office. The Board of Aldermen will ensure that this is done for the year ended June 30, 2011.

1.6 The city has requested that financial reports be prepared by the Park Board monthly and that they turn them into the city. The city has also requested reconciled bank statements along with documentation of all income and expenditures. The city has requested their budget for 2010-2011.

2. Accounting Controls and Procedures

Accounting controls and procedures utilized by the City Clerk need improvement.

2.1 Segregation of duties and oversight

Segregation of duties is not adequate. The City Clerk is responsible for most of the record-keeping duties of the city, and there is minimal oversight by the Board. Duties performed by the City Clerk include billing and recording utility fees, receiving and depositing monies, preparing checks and monthly financial reports, and performing bank reconciliations. While the city has hired someone to take over some duties relating to utilities, there is no evidence the Board provides adequate supervision or review of the work performed by the City Clerk.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. If segregating these duties is not possible, at a minimum, procedures for adequate independent review should be established and documented.

2.2 Receipt procedures

Receipt slips are not issued for some monies received and the method of payment is not always documented. Receipt slips are not issued for franchise fees, state motor vehicle-related sales taxes, and railroad and utility property taxes received from the County Collector-Treasurer. The method of payment is only indicated for property taxes. Without the indication of receipt composition, a reconciliation of the composition of receipts to deposits cannot be performed and the city has less assurance all monies collected are properly recorded and deposited. Additionally, deposits were made only once a month during 6 months of the year ended June 30, 2010, with deposit totals for those months ranging from approximately $1,800 to $8,600.

To properly account for all receipts and ensure they are properly deposited, official prenumbered receipt slips should be issued for all monies received, the method of payment should be recorded on each receipt slip or on the utility billing stubs, and the composition of receipts should be reconciled to the composition of deposits. To minimize the possibility of loss, theft, or misuse of funds, monies received should be deposited intact and in a timely manner.

2.3 Utility operations

The city does not maintain separate funds for the financial activity of its water, sewer, and trash operations. Receipts, disbursements, and accumulated balances of the respective utility operations are not accounted for separately.

The utility operations are separate accounting entities designed to account for specific city activities. Utility receipts should be used only to fund the operations of the respective utility services. Rates for utility services should be set to cover the costs of producing and delivering the service (including administrative costs), repaying debt, if applicable, and repairing and replacing infrastructure.

Receipts, disbursements, and the accumulated balance associated with specific activities should be recorded in separate funds or maintained in a manner to account for those activities. Complete and organized accounting records are necessary to provide accurate and timely financial information to city officials upon which effective management decisions may be made and to assist the city in establishing user fees necessary to meet operating expenses.

2.4 Utility deposits

Refundable utility deposits are not accounted for properly. New customers are required by ordinance to pay a $120 refundable deposit before receiving utility service.

- A bank account was established to account for utility deposits; however, no utility deposits have been deposited into this bank account since it was established. Utility deposits are deposited in the Water and Sewer Bank account. As of June 15, 2010, the utility deposit bank account balance totaled $1,050 and consisted of $1,000 transferred to the bank account from the Water and Sewer Bank account and interest earned.

- Although a liabilities list of customer utility deposits is maintained, this list is not reconciled to the bank account. As of June 30, 2010, this list totaled $8,435.

Utility deposits represent a liability to the city and by not depositing all utility deposits into the bank account established for that purpose, the city is unable to determine if the monies available are sufficient to meet the refundable deposit obligation. Complete and accurate records and reconciliation procedures are necessary to ensure utility deposits are accounted for properly and monies held are sufficient to meet the refundable deposit obligation.

2.5 Non-sufficient funds checks

The city does not always take timely follow up action on non-sufficient funds (bad) checks, or follow policies established by city ordinance. No follow up action was taken on five of six non-sufficient funds checks received, totaling $724, for payment on utility accounts until our audit work began in October 2010. Until then, the customers had not been contacted regarding the bad checks and these monies had not been recovered. In addition, no adjustments were made on subsequent utility bills to include unpaid amounts in balances due. Ordinance number 463 requires the city to notify the customer of the returned check by phone or note on the customer's door. Customers then have 3 days to resolve the bad check and pay the city a bad check fee. Timely action and compliance with city ordinance is necessary to recover unpaid monies and ensure customer account balances are proper.

2.6 Bank reconciliations

Bank reconciliations are not prepared timely for the checking accounts. Bank statements from December 2009 to February 2010 for the General Fund and the Street Fund were not reconciled until March 2010 while the January to May 2010 bank statements for the two Water and Sewer Fund bank accounts were not reconciled until June 2010.

Monthly bank reconciliations are necessary to ensure bank activity and accounting records are in agreement, and to detect and correct errors timely.

Recommendations

The Board of Aldermen:

2.1 Segregate the duties of the City Clerk to the extent possible. If proper segregation of duties cannot be achieved, timely supervision or independent reviews of the work performed and investigation into unusual items and variances is necessary.

2.2 Require receipt slips be issued for all monies received with the method of payment indicated and reconciled to the composition of deposits. Additionally, the Board should ensure deposits are made in a timely manner.

2.3 Establish separate funds to account for the specific utility operations or maintain records in a manner to account for the receipts, disbursements, and accumulated balances of the separate activities. Additionally, the city should determine and establish the proper balance of the separate funds and maintain the separate balances in the future.

2.4 Transfer the utility deposit monies held in the Water and Sewer Fund bank account to the utility deposits bank account, and deposit all subsequent utility deposits received into the utility deposit bank account. In addition, the list of utility deposits should be reconciled

to the bank account balance monthly. Any differences should be investigated.

2.5 Follow up on non-sufficient checks promptly in accordance with city ordinance to ensure monies are recovered.

2.6 Prepare bank reconciliations for checking accounts on a timely basis.

Auditee's Response

The Mayor and Board of Aldermen provided the following written responses:

2.1 Before the audit, the Board of Aldermen received monthly financial reports at each meeting. The bank statements and invoices were also presented at the meeting. However, the review of these documents was not documented. The Board of Aldermen approved bills for payment and there are two signatures on all checks.

Currently, the Board of Aldermen reviews all bank statements at the board meeting and at least two Aldermen initial the actual bank statement and review that they have been reconciled. The Board of Aldermen also initials the financial reports that are included with the minutes. This will document that the Board of Aldermen is providing supervision and is reviewing work done by the City Clerk. Since the city will be having an annual audit, the record keeping will be reviewed by a certified public accountant.

2.2 Receipt slips will be issued for receipts currently not receipted and the receipt slips will indicate the composition of receipts which will be compared to the composition of the deposits and deposits will be made timely.

2.3 We are reviewing records to determine the proper balances of the various utility operations. Once we have the balances, we will determine the best method for maintaining records to ensure information is properly maintained of the separate activities.

2.4 All of the money for the customer deposits is in the Water and Sewer Fund as it just wasn't transferred into the deposit account. The Board of Aldermen will order checks and deposit slips for the deposit account and transfer all customer deposits into the deposit account.

The Board of Aldermen will review the deposit listing at the next meeting (March) and transfer the balance of the deposits to the deposit account. The Board of Aldermen will receive an addendum

to the list when changes occur to ensure that the bank statement equals the amount of customer deposits plus interest. A notebook with the list will be started and the addendums will be added as they are needed.

2.5 The new procedure for non-sufficient checks will be the City Clerk will notify the customer according to ordinance and a copy of the check will be given to the administrative assistant who does the utility billing to add the amount back onto their account.

2.6 Even though the bank statements were not reconciled in the computer, all bank statements were compared to the transaction register. Currently, the City Clerk is formally reconciling the bank statements within 15 days of receipt of the bank statement.

3. Disbursements

Controls and procedures over allocation of city disbursements between funds need improvement, and all employees do not prepare timesheets.

3.1 Allocation of city disbursements

Documentation does not exist to support the allocation of some disbursements to city funds as follows:

- Although wages are paid from three funds (General, Street, and Water and Sewer), all payroll withholdings and payroll taxes are disbursed from the Water and Sewer Fund.

- The city pays for all insurance coverage from the General Fund even though the coverage also relates to assets owned by the Street and Water and Sewer Funds.

- The city paid park expenses totaling $1,103 from the Street Fund for the year ended June 30, 2010. Street Funds are restricted revenues that should be used for street purposes only. The city indicated these costs are paid from franchise taxes which are placed in this fund and are not restricted. Because franchise taxes are unrestricted revenues, the city should consider depositing them in the General Fund and paying the park expenses from the General Fund.

- In August 2010, the city paid $3,003 for the annual payment on the backhoe from the Water and Sewer Fund while the payment the previous year was from the Street Fund. The backhoe is used for a variety of activities so it is questionable that the entire cost be paid from just one fund.

The funds of the city are established as separate accounting entities to account for specific activities of the city. Generally accepted accounting principles and various legal restrictions require receipts and disbursements

associated with specific activities be reflected in the fund established to account for those activities. Reflecting receipts and disbursements in the proper fund is necessary to accurately determine the results of operations and/or specific activities; thus, enabling the city to establish the level of taxation and/or user fees necessary to meet operating costs. To ensure city funds are spent appropriately, documentation should be maintained to support the allocations.

3.2 Timesheets

The City Clerk, water meter reader, and tower meter reader are paid a monthly rate and are not required to submit timesheets or documentation of the number of hours or the dates worked. These employees only submit a paper stating they did the required work. Timesheets are necessary to document hours worked, substantiate payroll disbursements, provide the city with a method to monitor hours worked, and to evaluate pay rates.

Recommendations

The Board of Aldermen:

3.1 Ensure disbursements and salaries are properly allocated to the applicable city funds and allocations are supported by adequate documentation. In addition, consider depositing franchise taxes into the General Fund and paying park expenses from the General Fund.

3.2 Require all city employees to prepare timesheets that reflect actual time worked.

Auditee's Response

The Mayor and Board of Aldermen provided the following written responses:

3.1 The payroll taxes and withholdings will be disbursed from the General Fund, with the amount to be paid from the Street and Water and Sewer Funds transferred into the General Fund to cover each entities payroll obligations.

The Board of Aldermen will review the insurance policy and prorate the amount from each entity to be transferred into the General Revenue Fund to cover that entity's portion of the insurance invoice.

The Board of Aldermen is in the process of getting the franchise taxes directly deposited into the General Fund instead of the Street Fund. We are also changing the park lights and mowing to come out of the General Fund. All park expenses will now come out of the General Fund.

The Board of Aldermen will look at all equipment and keep track of the different allocations for repairs, maintenance, and purchase agreements.

3.2 The Board of Aldermen will discuss with our attorney this issue before determining what to do. We have a couple of questions that we want to find out some information on before making a decision.

4. Legal Issues and Ordinances

Problems were noted with the manner by which aldermen are elected and with ordinances.

4.1 Aldermen

Two aldermen are elected from both the North and South wards and an alderman at large is also elected. While Section 79.060, RSMo, allows for cities with populations of 1,000 or less to choose to elect aldermen at large instead of from wards, it does not provide for the city to do both. No city ordinance could be located to explain the city's procedures regarding the election and number of aldermen.

4.2 Ordinances

City ordinances are not organized and up to date. Additionally, the city has not adopted ordinances required by state law and/or needed to govern the city.

- It is not clear which city ordinances are currently in effect. Ordinances adopted since September 1997 are filed in notebooks and recorded on a list; however, ordinances adopted prior to September 1997 (ordinance number 412) are in a box and not tracked. At our request, the City Clerk was able to locate ordinance number 239 that requires all residences to be hooked up to the public sewer, but she could not locate an ordinance authorizing additional charges of $2 to both water and sewer bills for those residents receiving city services living outside the city limits. The City Clerk was also unable to locate an ordinance establishing penalties for delinquent payment of taxes, although such penalties are charged.

- The city does not have an ordinance establishing the trash service rate.

- While the city has ordinances that establish the compensation for most city officials and employees as required by Section 79.270, RSMo, the Board has hired employees at higher hourly rates than indicated in the ordinances. In addition, the city does not have an ordinance establishing the compensation for the tower meter reader. Ordinance number 466 states the compensation for the city clerk is $300 per month plus 2 percent on collections from the sale of water. The City Clerk, however,

is paid $400 per month and also receives 2 percent of all utility collections, which include sewer and trash service fees.

Since the ordinances represent legislation passed by the Board of Aldermen to govern the city and its residents, it is important the ordinances be maintained in a complete, well-organized, and up-to-date manner. In addition, an index should be maintained documenting all ordinances passed and repealed to keep track of additions and changes made.

Recommendations

The Board of Aldermen:

4.1 Consult with legal counsel to resolve this issue.

4.2 Ensure ordinances are maintained in a complete, well-organized, and up-to-date manner; new ordinances are passed where appropriate; and the index of ordinances is updated.

Auditee's Response

The Mayor and Board of Aldermen provided the following written responses:

4.1 The city is checking on this with our attorney and depending on what is determined will adopt an ordinance to address this issue.

4.2 The city will review the ordinances on employees and update the ordinances to current wages. The city has had to split some of the jobs of the water and sewer operator. An ordinance will be created for the new positions.

The city will review ordinances 412 to 505 and update the ordinances that need to be updated.

The city will start going through the ordinances prior to 1997 and review them as time permits to see if they need to be updated, filed, or rescinded.

City of Chula
Organization and Statistical Information

The City of Chula is located in Livingston County. The city was incorporated in 1885 and is currently a fourth-class city. The city employed six part-time employees on June 30, 2010.

City operations include utilities (water, sewer, and trash), street maintenance, and park services.

Mayor and Board of Aldermen

The city government consists of a mayor and five-member board of aldermen. The members are elected for 2-year terms. The mayor is elected for a 2-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor and Board of Aldermen at June 30, 2010, are identified below. The Mayor and Board of Aldermen serve without compensation.

John Graves, Mayor
Katherine Westcott, Alderman
Benny Simpson, Alderman
John Boyles, Alderman
James Rhodes, Alderman
Robert Triska, Alderman

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The City of Chula did not receive any federal stimulus monies during the year ended June 30, 2010.

Financial Activity

A summary of the city's financial activity for the year ended June 30, 2010, follows:

City of Chula
Year Ended June 30, 2010

	General Fund	Street Fund	Water and Sewer Fund*	Water Bond Reserve Fund	Water Replacement/ Extension Fund	Sewer Bond Reserve Fund	Sewer Replacement/ Extension Fund	Park Board	Collector's Account	Total

Missouri State Auditor

County Collector
Wayne County

May 2011

Report No. 2011-20

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Wayne County Collector

Background

The former Wayne County Collector resigned effective November 10, 2010, and her replacement was sworn in on December 28, 2010. The State Auditor is required by state law to conduct an audit of the County Collector's office after being notified of a vacancy. This audit included the year ended February 28, 2010, and the period from March 1, 2010, through November 10, 2010.

Property Tax System Controls and Procedures

The County Clerk and County Commission do not adequately monitor the County Collector's property tax related activities. The County Clerk should maintain an account book to track property taxes charged, taxes collected, abatements, protested amounts and other tax transactions to verify the County Collector's monthly and annual settlements.

The County Collector over withheld railroad and utility commissions totaling $5,299 for December 2010 and December 2009. Commissions were withheld at 1.5 percent but should have been withheld at 1 percent.

In the areas audited, the overall performance of this entity was **Good**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The Wayne County Collector did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

State Auditor's Report 2

Management Advisory Report - State Auditor's Findings
1. Property Tax System Controls and Procedures 4

Organization and Statistical Information 6

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
County Collector
Wayne County, Missouri

Section 52.150, RSMo, requires the State Auditor to audit the office of the County Collector after being notified of a vacancy in that office. The County Collector of Wayne County resigned effective November 10, 2010. A successor was appointed and sworn into office effective December 28, 2010.

To satisfy our statutory obligation, we have audited the operations of the County Collector of Wayne County. The scope of our audit included, but was not necessarily limited to, the period March 1 to November 10, 2010, and the year ended February 28, 2010. The objectives of our audit were to:

1. Determine the financial condition of the accounts of the office of the County Collector.

2. Evaluate the County Collector's internal controls over significant financial functions.

3. Evaluate the County Collector's compliance with certain legal provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the County Collector, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the County Collector and county's management and was not subjected to the procedures applied in our audit of the County Collector.

Section 52.150, RSMo, requires the County Commission to accept the State Auditor's report and, if necessary, to take certain specific actions if the State Auditor finds any monies owing to the county or the past County Collector. For the areas audited, we identified **(**1) no significant deficiencies in internal control and (2) noncompliance with legal provisions. The accompanying Management Advisory Report presents our findings arising from our audit of the County Collector of Wayne County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Jeannette Eaves, CPA
In-Charge Auditor:	Lori Bryant

1. Property Tax System Controls and Procedures

The County Clerk and the County Commission do not provide adequate monitoring of property tax system activities. Commissions withheld by the County Collector from railroad and utility taxes were incorrectly calculated. For the year ended February 28, 2010, property taxes charged to the County Collector totaled approximately $6 million.

1.1 Review of property taxes

Neither the County Commission nor the County Clerk adequately reviews the property tax collection activities of the County Collector. The County Clerk does not maintain an account book or other records summarizing property tax transactions and changes, and no evidence was provided to indicate procedures are performed by the County Clerk or the County Commission to verify the County Collector's monthly and annual settlements. The County Clerk indicated in the past he had used a computer spreadsheet to summarize activity after the Collector filed her annual settlement. However, this spreadsheet was lost when the County Clerk's office obtained new computers prior to the County Collector filing her annual settlement for the year ended February 28, 2010, and he has not set up a new spreadsheet.

Section 51.150(2), RSMo, requires the County Clerk to maintain accounts with all persons chargeable with monies payable to the county treasury. An account book or other records which summarize all taxes charged to the County Collector, monthly collections, delinquent credits, additions and abatements, and protested amounts should be maintained by the County Clerk. Such records would help the County Clerk ensure the amount of taxes charged and credited to the County Collector each year is complete and accurate and could also be used by the County Clerk and County Commission to verify the County Collector's monthly and annual settlements. Such procedures are intended to establish checks and balances related to the collection of property taxes.

1.2 Commissions

Commissions were calculated incorrectly on railroad and utility taxes, and as a result, a total of $5,299 was over withheld by the County Collector for December 2010 and December 2009. Commissions should have been withheld at the rate of 1 percent; however, 1.5 percent was withheld and paid to the County Treasurer for the General Revenue Fund. The County Collector indicated commissions on railroad and utility taxes have been calculated by the computer using this formula for a number of years. The 1.5 percent is the same commission rate used for all other current tax collections. Section 52.260, RSMo, provides for 1 percent on all tax collections and Section 52.250, RSMo, provides for a .5 percent mailing commission on all current taxes collected; however, this statute specifically excludes all current railroad and utility tax collections from the mailing commission.

Recommendations

1.1 The County Clerk maintain an account book with the County Collector. The County Clerk and County Commission should use the account book to review the accuracy and completeness of the County Collector's monthly and annual settlements.

1.2 The County Collector should ensure commissions are computed correctly in the future and should refund the commissions overwithheld to the various taxing authorities.

Auditee's Response

1.1 The County Clerk provided the following response:

I will establish an account book with the County Collector and will use it to review the accuracy of the collector's monthly and annual settlements.

1.2 The current County Collector provided the following written response:

I have spoken with the computer programmer and he has corrected the railroad and utilities commission percentage. He changed it from the 1.5 percent that was being withheld to the 1 percent that is allowable.

I do not see the county being able to turn over the overwithheld amount due to its poor financial status. Although if the over withheld amount is submitted to me, I will disburse it to the various taxing authorities that it is due to.

Wayne County Collector
Organization and Statistical Information

The County Collector bills and collects property taxes for the county and most local governments. Pursuant to Section 52.015, RSMo, the term for which collectors are elected expires on the first Monday in March of the year in which they are required to make their last final settlement for the tax book collected by them. Annual settlements are to be filed with the county commission for the fiscal year ended February 28 (29).

Mary Hampton served as County Collector until November 10, 2010. Erica Huitt was appointed the Wayne County Collector and sworn into office on December 28, 2010.

The County Collector received compensation of $26,490 for the period March 1 to November 10, 2010. During the year ended February 28, 2010, the County Collector received compensation of $38,147. Compensation was in accordance with statutory provisions.

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The Wayne County Collector did not receive any federal stimulus monies during the period March 1 to November 10, 2010, and the year ended February 28, 2010.

Thomas A. Schweich

Missouri State Auditor

Village of Bull Creek

May 2011

Report No. 2011-19

auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Village of Bull Creek

Village Disbursements

The village did not always comply with its procurement policy, including the $3,905 purchase of a utility meter made without due notice inviting bids. Also, the Board of Trustees needs to improve its disbursement approval process, as some disbursements are approved only as estimates with no later review of the actual amount paid and at least one disbursement was made without Board approval.

In addition, the village hall renovations were not handled properly. First, the bids were opened before being given to the Board of Trustees, but the sealed bids should have been opened in public to make sure no bidder has an unfair advantage over the others, as required by village policy. Second, the scope of the work changed during the renovation, but a quorum of the Board of Trustees did not approve the changes. The changes added $1,041 to the cost of the renovation, a 24 percent increase in the original price, but there is no indication that the Board of Trustees considered bidding the changes.

The village is not properly charging expenses to its restricted funds, making it difficult to determine if the right tax rates or user fees are being charged. Also, the village does not have a written contract with its certified water operator, although state law requires contracts for political subdivisions to be in writing.

Since September 2010, the village has been maintaining a log of fuel purchases for the village truck, but the fuel purchased is not compared to the miles driven to make sure fuel purchases are reasonable. Moreover, the log should include the purpose of miles driven to document that the truck is being used only for village business.

Water and Sewer System

The 2009 cost analysis suggested sewer rates should be lowered, but the rates being charged are not the rates from this analysis, and the city could provide no documentation to support the rates charged. Also, the village should compare the amount of monies in the customer utility security deposit bank account to the list of utility customers with security deposits to make sure the balances agree.

The village is not consistently applying its shutoff policy for delinquent water and sewer accounts. Although the village's written guidelines state service will be shutoff when a bill is delinquent over 40 days, Trustee Woodworth's account was not shutoff despite being 3 months delinquent. Customers have less incentive to pay their bills if they can receive the service without paying, and when village officials are allowed to receive service without paying for it, the public's confidence in its government could be damaged.

Accounting Procedures	The village does not adequately segregate accounting duties, which increases the risk of theft or misuse of funds. If proper segregation is not possible, the Board of Trustees should conduct timely supervisory reviews. The village also needs to improve its procedures for receipts and deposits. Receipts are not always issued for monies received, and the composition of receipts is not always reconciled to the composition of deposits, so errors might not be prevented or detected. In addition, the village should make sure monies collected are deposited promptly and checks and money orders are marked "for deposit only" as soon as they are received. The village should also establish a separate fund for motor vehicle-related revenues, since state law requires that such revenues be spent only on street-related purposes.
Meetings, Minutes, and Ordinances	The village did not always comply with the Sunshine Law when closing meetings. Open meeting minutes should document the vote to close the meeting and the reason for closing it. Minutes of the closed meeting were not taken and kept, and it appears closed meetings were not limited to the topics allowed by law. The village's ordinances are not up-to-date and well-maintained, and it is difficult to determine whether ordinances have been formally approved and are still in effect.
Budgeting and Financial Reporting	The village is not meeting state law requirements for budgets and financial statements. Budgets are missing required content, and semi-annual financial statements are not posted or published and lack sufficient detail.

In the areas audited, the overall performance of this entity was **Fair**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)	The Village of Bull Creek did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent:	The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
Good:	The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
Fair:	The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
Poor:	The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 14

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Chairperson
and
Members of the Board of Trustees
Village of Bull Creek, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the Village of Bull Creek. We have audited certain operations of the village in fulfillment of our duties. The village engaged Decker & DeGood, Certified Public Accountants (CPAs), to audit the village's financial statements for the year ended June 30, 2010. To minimize duplication of effort, we reviewed the report and substantiating working papers of the CPA firm. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2010. The objectives of our audit were to:

1. Evaluate the village's internal controls over significant management and financial functions.

2. Evaluate the village's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the village, as well as certain external parties; and testing selected transactions.

We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the village's management and was not subjected to the procedures applied in our audit of the village.

For the areas audited, we identified (1) deficiencies in internal control, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Village of Bull Creek.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Alice M. Fast, CPA, CGFM, CIA
Audit Manager:	Donna Christian, CPA, CGFM
In-Charge Auditor:	Ted Fugitt, CPA

1. Village Disbursements

Improvements are needed with regard to bidding, approving disbursements, and allocating expenses. Village disbursements total approximately $320,000 annually.

1.1 Bidding

Bids were not solicited for some purchases in compliance with village policy. Only two bids were solicited for water well repairs totaling $2,345, although the village procurement policy states that purchases for this amount require at least three bids be solicited and a record of bids be maintained. There was no documentation to explain why only two bids were solicited and received. Also, the purchase of a utility meter for $3,905 was made without due notice inviting bids, as required by the village purchasing policy, and the only documentation that bids were received was a handwritten note listing four bid amounts dated 6 months before the meter was purchased.

To ensure the village has made every effort to receive the best and lowest price and all interested parties are given an equal opportunity to participate in village business, the village Board of Trustees should ensure compliance with all applicable provisions of its procurement policy.

1.2 Board approval

Approval of disbursements by the Board of Trustees is not adequate. When the Board of Trustees approves bills to be paid at each regularly scheduled monthly meeting many of the disbursement amounts are estimates. The Board does not subsequently see the actual amounts paid as compared to the estimates. In addition, a disbursement for $809 to the certified water operator was not included on the list of bills to be paid and, therefore, was not approved.

To ensure all disbursements are proper, procedures should be developed to ensure estimates of bills to be paid are reasonable by comparing them to actual amounts paid and ensure all disbursements are included for the Board of Trustees review.

1.3 Village Hall

Disbursements to renovate the village hall were not handled properly. In November 2008, the village advertised for sealed bids to renovate the village hall (a mobile home). A low bid of $4,365 was accepted for the work. Personnel indicated the bids were opened prior to submission to the Board of Trustees, and the low bid, submitted last of the three bids, was $35 less than the next lowest bid. Further, the scope of the work changed while the renovation was in progress and the change was agreed to by the Village Clerk and some of the board members but not formally approved by a quorum of the Board. A payment of $4,863 ($498 more than the bid) was made to the construction company on December 12, 2008, and was not documented as approved by the Board. A payment on February 12, 2009, for additional work totaling $543, was approved by the Board.

The procurement policy of the village requires sealed bids to be opened "in public at the time and place stated in the public notices." This is to ensure that no party has an unfair advantage by being aware of the amount of other bids and all interested parties are given an equal opportunity to participate in village business. Further, if the scope of a project changes substantially, consideration should be given to rebidding those parts of the project. Additionally, to ensure all disbursements are proper, changes made to construction projects and the subsequent payment of construction costs should be formally approved by a quorum of the Village Board with the approval process documented.

1.4 Expense allocations

Expenses are not properly allocated to village funds.

- The salaries of both the Village Clerk and the maintenance employee are paid from the Water and Sewer Fund although each employee performs some duties unrelated to the water and sewer system. The salaries totaled approximately $38,000 during the year ended June 30, 2010.

- A check for $2,558 to the Village Clerk to reimburse for supplies purchased for the village on her personal credit card was paid entirely from the Water and Sewer Fund although some of the expenses were unrelated to the water and sewer system. Additionally, checks to reimburse petty cash totaling approximately $1,000 during the year ended June 30, 2010, were also paid entirely from the Water and Sewer Fund.

The funds of the village are established as separate accounting entities to account for specific activities of the village. Reflecting expenses in the proper fund is necessary to accurately determine the results of operations and/or specific activities; thus, enabling the village to establish the level of taxation and/or user fees necessary to meet operating costs. Documentation should be maintained to support the percentages used for allocating the various expenses.

1.5 Contract with water operator

The village does not have a written contract with its certified water operator and does not receive an invoice to support the monthly payment made to this individual. The village paid this individual a total of $1,750 from October 2010 to February 2011. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing. A written contract, signed by the parties involved, should specify the services to be rendered and the manner and amount of compensation to be paid. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to provide protection to both parties.

1.6 Vehicle log

Although a log of fuel purchases and mileage is maintained for the village truck, the purpose of miles driven is not recorded in the log and fuel purchases are not regularly compared to mileage readings. Additionally, the village did not maintain a log prior to September 2010.

Detailed mileage logs are necessary to document the appropriate use of the village truck and support fuel charges. The logs should include the date, purpose and destination of each trip, fuel purchases, and the daily beginning and ending odometer readings. To ensure the reasonableness of fuel disbursements, the village should compare miles driven to fuel purchased.

Recommendations

The Village of Bull Creek Board of Trustees:

1.1 Ensure bids are solicited in compliance with all applicable provisions of the village procurement policy.

1.2 Develop procedures to ensure all disbursements are properly approved and compare estimates of bills to actual amounts paid.

1.3 Ensure the village procurement policy regarding sealed bids is followed and significant changes to construction projects are rebid and formally approved by a quorum of the Village Board of Trustees with the approval process documented.

1.4 Ensure all village expenses are allocated to village funds appropriately.

1.5 Obtain a written contract with the certified water operator.

1.6 Include purpose of miles driven on the vehicle log and compare miles driven to fuel purchased.

Auditee's Response

The Village Board of Trustees provided the following responses:

1.1 We have recently initiated an effort to codify the village's ordinances. Bids have been solicited for this process. During this process, we plan to review all ordinances and update them to ensure they meet the needs of the village. This process will include procurement related ordinances.

1.2 This recommendation has been implemented. We are now reviewing all actual disbursements.

1.3 This recommendation has been implemented. We are now handling the opening of sealed bids differently than prior administrations and all disbursements are approved.

1.4 This recommendation has been implemented. We have taken steps to better allocate expenses.

1.5& 1.6 These recommendations have been implemented.

2. Water and Sewer System

The village has not adequately documented support for its water and sewer rates, and customer utility security deposit records are not reconciled to monies on hand. Additionally, the village needs to develop shutoff procedures for delinquent accounts. The village collects approximately $237,000 in water, sewer, and trash fees.

2.1 User rates

The former Village Administrator performed a cost analysis of sewer rates in 2009 in which he proposed a reduction in rates; however, the Board did not change the rates, and could provide no documentation to support the water or sewer rates charged.

Water and sewer fees are user charges which should cover the cost of providing the related services. Section 67.042, RSMo, provides that fees may be increased if supported by a statement of the costs necessary to maintain the funding of the service. Without a cost study to support the rates charged for water and sewer services, it is unclear whether the rates assessed for these services are set at an appropriate level.

2.2 Utility deposits

The list of customer utility security deposits is not accurate, and the village does not periodically reconcile the list with the balance in the utility deposit bank account. As of February 2011, village records showed $34,335 held in refundable customer security deposits while the bank account had a reconciled balance of $35,068. Some amounts applied to final bills were still on the list, and some amounts deposited were not yet posted to the utility system.

To ensure sufficient funds are on hand to cover the liability for customer utility security deposits and to ensure all amounts in the utility deposit account can be identified, the village should reconcile the amount in the customer utility deposit account with the list of deposits monthly.

2.3 Shutoff procedures

The village does not follow a consistent policy regarding shutoff of water and sewer service when accounts are delinquent. The Village Clerk was unable to locate an ordinance governing shutoff procedures but did provide us with a set of written guidelines for shutoffs. However, she indicated shutoffs are handled on a case by case basis. For example, the written guidelines indicate village citizens will be shutoff when their bill has been delinquent over 40 days; however, Trustee Woodworth was 3 months delinquent in water and sewer charges and service was not shutoff.

Allowing customers to receive utility service without paying reduces the incentive to make payments and may result in a loss of revenue to the village. In addition, village officials serve the village in a fiduciary capacity, and the failure to pay their own utility accounts could harm public confidence and reduce their effectiveness. To ensure all utility customers are treated equitably, the Board of Trustees should develop procedures for shutoff of water and sewer service when accounts are delinquent and ensure the policy is applied consistently.

Recommendations

The Village of Bull Creek Board of Trustees:

2.1 Periodically perform and document a cost study of water and sewer services to ensure rates are set at an appropriate level and to support any rate increases.

2.2 Reconcile monthly the balance in the customer utility security deposit account to the record of customer deposits held, and investigate any differences.

2.3 Develop procedures for shutoff of water and sewer service when accounts are delinquent and ensure the policy is applied consistently.

Auditee's Response

The Village Board of Trustees provided the following responses:

2.1 We will prepare a cost analysis for water and sewer rates during our review and approval of next year's budget.

2.2 The amount in the bank account is more than the list of customer deposits; however, the amounts are very close. We believe the difference relates to records maintained by prior clerks. We will transfer the excess to the Water and Sewer Fund and begin to reconcile the deposit account with the list of customer deposits periodically.

2.3 We recently approved updated shutoff procedures. These new procedures are designed to tighten controls and also address the various customer circumstances that occur in our village. These procedures will be applied consistently.

3. Accounting Procedures

Accounting duties are not adequately segregated and numerous weaknesses exist in the handling of village receipts. During the year ended June 30, 2010, the village's audited financial statements reported revenues of approximately $320,000.

3.1 Segregation of duties

The duties of the Village Clerk are not adequately segregated, and the Board of Trustees does not provide adequate supervision or review of the work performed by the Village Clerk. The Village Clerk is responsible for receiving, recording, and depositing monies; preparing utility bills; adjusting and writing off water and sewer charges; performing bank reconciliations; and preparing financial reports.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. Since the Village Clerk is the only office employee, proper segregation of duties may not be possible; therefore, a timely supervisory review of the Village Clerk's work should be performed and documented by the Board of Trustees.

3.2 Receipts and deposits

We noted numerous weaknesses in the procedures for handling village receipts and deposits.

- Receipt slips are not issued for some monies received. For example, receipt slips are not always issued for franchise fees. During the year ended June 30, 2010, the village received franchise fees totaling $3,813.

- The composition of receipt slips is not reconciled to the composition of deposits. While all utility security deposits are to be recorded in a separate receipt book, a receipt slip was not issued for a $150 check for a security deposit. If receipt slips were reconciled to amounts deposited, this error may have been identified.

- Utility payments (water, sewer and trash) are not posted to the computerized accounting system and deposited timely. For example, cash payments totaling $181 received on November 10, 2010, were not posted until November 13, 2010, and were not deposited until November 15, 2010. Eight checks totaling $8,828 received November 10, 2010, were not posted and deposited until November 15, 2010.

- Some receipts are not deposited intact. For example, a $20 building permit fee received October 29, 2010, was excluded from a deposit of building permit fees on November 3, 2010, and not deposited until November 5, 2010.

- Checks and money orders are not restrictively endorsed for deposit only immediately upon receipt.

To ensure receipts are accounted for properly, receipt slips should be issued for all monies received, all monies should be posted to the accounting system timely, and the composition of receipts should be reconciled to the composition of deposits. Additionally, checks and money orders should be

restrictively endorsed immediately upon receipt, and all monies should be deposited timely and intact.

3.3 Motor vehicle revenues

The village deposits all state motor vehicle-related revenues into its general checking account and does not separately account for these monies. According to the village audit report for the year ended June 30, 2010, the village received approximately $8,000 in state motor vehicle-related revenues and spent approximately $5,500 in street related disbursements; however, a running balance is not maintained of the accumulated unspent balance of motor vehicle revenues.

Article IV, Section 30, Missouri Constitution, requires motor vehicle-related revenues apportioned by the state of Missouri be expended for street-related purposes, including policing, signing, lighting, and cleaning of roads and streets. The village should establish a separate fund or separate accounting to ensure the motor vehicle-related revenues are spent in accordance with the state constitution.

Recommendations

The Village of Bull Creek Board of Trustees:

3.1 Segregate accounting duties to the extent possible and develop procedures to provide adequate oversight of the accounting functions performed by the Village Clerk.

3.2 Ensure all receipts are posted to the accounting records timely and deposited timely and intact. In addition, the Board of Trustees should ensure the composition of receipts is periodically reconciled to the composition of deposits and checks are restrictively endorsed immediately upon receipt.

3.3 Establish a separate fund or separate accounting to ensure motor vehicle-related revenues are spent in accordance with the state constitution.

Auditee's Response

The Village Board of Trustees provided the following responses:

3.1 This recommendation has been implemented. We are currently seeing more detailed financial information which provides better oversight of the duties of the Village Clerk.

3.2 These recommendations have been implemented. We have initiated new receipting and depositing procedures to address all recommendations.

3.3 We will add a street fund to our accounting records and track these monies separately to ensure they are spent appropriately.

4. Meetings, Minutes, and Ordinances

The village did not always comply with Chapter 610, RSMo (the Sunshine Law), and ordinances of the village are not complete, well organized, and up to date.

4.1 Closed meetings

Numerous closed sessions were held by the Board of Trustees, but the various requirements in the Sunshine Law, regarding closed meetings were not always followed.

- Open meeting minutes did not always document the related vote to close the meeting or the section of law which allowed the meeting to be closed. Also, the village did not document how some items discussed in closed session complied with state law. For example, during closed session, the Board discussed such items as the decision to purchase a time clock for employees, estimated payroll, and setting the pay rate of the maintenance employee.

- Minutes were not taken and retained for several closed sessions and some minutes taken lacked adequate detail regarding discussions held. For example, some closed session minutes stated topics such as personnel, management issues, and maintenance were discussed but provided no further detail as to the specifics of the discussions.

The Sunshine Law, Chapter 610, RSMo, states the specific reasons for the closed meeting shall be voted on at an open meeting and provides public governmental bodies shall not discuss any other business during the closed meeting which differs from the specific reason used to justify such meeting, record, or vote. In addition, the Board should restrict the discussions in closed meetings to specific topics listed in Chapter 610, RSMo. Further, Chapter 610, RSMo requires minutes be taken and retained for all closed sessions.

4.2 Ordinances

Ordinances of the village are not complete, well organized, and up to date. In addition, the village ordinance book includes some proposed ordinances that were never formally approved. There is also an old book of ordinances from when the village had a police department. The Village Clerk said she is not sure whether these ordinances are still in effect. Further, the Village Clerk said some ordinances were mistakenly taken out of the ordinance books in an attempt to organize them and are now missing. Since ordinances represent legislation which has been passed by the Board of Trustees to govern the village and its residents, it is important that village ordinances be maintained in a complete and up-to-date manner.

Recommendations

The Village of Bull Creek Board of Trustees:

4.1 Refrain from discussing items in closed session which should otherwise be discussed during an open session, and ensure open

meeting minutes include the specific reason for closing the meeting and a record of the related votes taken. Additionally, the Board of Trustees should ensure minutes are taken and retained for all closed sessions.

4.2 Maintain a complete updated set of village ordinances in an organized manner.

Auditee's Response

The Village Board of Trustees provided the following responses:

4.1 This recommendation has been implemented.

4.2 As mentioned in our response to finding number 1.1, we are in the process of codifying our ordinances and during that process each ordinance will be reviewed and updated and new ordinances will be approved as needed.

5. Budgeting and Financial Reporting

Budgets were not prepared in the required format and financial statements were not published as required by state law.

5.1 Budgets

The 2010 and 2011 budgets did not include a budget message, budget summary, beginning available resources, reasonable estimates of the ending available resources, or comparisons of actual receipts and disbursements for the 2 preceding fiscal years. Additionally, budgets were not prepared for each fund, instead a combined budget for all funds in total was prepared.

Sections 67.010 through 67.080, RSMo, set specific guidelines as to the format, approval, and amendment of the annual operating budget. A complete and well planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific financial expectations for each area of village operations and provides a means to effectively monitor actual costs and receipts.

5.2 Published financial statements

The village did not post or publish semiannual financial statements for the 6 months ended June 30, 2010. Additionally, the financial statements published for the 6 months ended December 31, 2009, only listed total receipts and disbursements and did not provide any detail.

Section 80.210, RSMo, requires the Board of Trustees prepare and publish semiannual financial statements in a local newspaper, or if there is no local newspaper, to post semiannual financial statements in at least six of the most public places in the village. Additionally, to better inform the citizens, the village should consider reporting more detailed financial information.

The publication of such financial statements is intended to provide complete and accurate information to citizens regarding the financial activity and condition of the village.

Recommendations

The Village of Bull Creek Board of Trustees:

5.1 Prepare annual budgets for each village fund that include all information required by state law.

5.2 Publish or post semiannual financial statements as required by state law and consider including more detailed information regarding the types of receipts and disbursements of the village.

Auditee's Response

The Village Board of Trustees provided the following responses:

5.1 In the coming months we will be reviewing and approving a budget for next year and we will prepare a budget for each fund, and ensure our new budget complies with any applicable state laws then in effect.

5.2 Detailed financial statements will be prepared and published as required by state law beginning with the financial statements for the year ended June 30, 2011.

Village of Bull Creek
Organization and Statistical Information

The Village of Bull Creek is located in Taney County. The village was incorporated in 1993. The village employs two full-time employees.

Village operations include utilities (water and sewer), street maintenance, and maintenance of a village park.

Board of Trustees

The village government consists of a five-member elected board of trustees. The members are elected for 2-year terms. The chairperson is appointed by the board from the members. The Board of Trustees at June 30, 2010 are identified below. There was one vacancy. The Board of Trustees members receive no compensation.

Jody LeMaster, Chairperson
William Woodworth, Vice Chairperson
Dixie Henrichson
Una Fullmer

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The Village of Bull Creek did not receive any federal stimulus monies during the year ended June 30, 2010.

DEPARTMENT OF REVENUE

Administrative Functions

May 2011

Report No. 2011-18

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Department of Revenue, Administrative Functions

Sale of Information	The Department of Revenue (DOR) does not maintain adequate documentation to support the rates charged for the sale of Motor Vehicle and Drivers License (MV/DL) records. The Sunshine Law mandates that the cost charged for these public records not exceed the cost of producing the information, and in May 2010, the Missouri Court of Appeals Western District held that the rate DOR was charging for such records violated the Sunshine Law. Although the DOR provided some documentation, it did not provide any support for most of the expense and equipment charges included in the rate calculation. A similar condition was noted in a previous audit, Report Number 2001-08.
Integrated Motor Vehicle Drivers Licensing System	After spending over $6 million for an integrated motor vehicle drivers licensing system and record sales system to replace the 20 various systems being used, the DOR still does not have fully functioning systems and has not developed a plan for completing the systems since canceling the project almost 2 years ago. The DOR should look at its options (finish the started systems, develop new systems, or continue with the current systems) and determine which one makes the most fiscal sense.
Internal Compliance Bureau	The Internal Compliance Bureau (ICB) conducts internal audits of the DOR, but the current structure does not give the ICB complete independence from the activities it audits. The ICB reports to the Director of the Division of Administration rather than the Director of the Department of Revenue. This could prevent the ICB from giving complete and objective audits, especially when auditing programs or offices in the Division of Administration. The current reporting structure does not meet the Institute of Internal Audit standards.
Policies and Procedures	The DOR has not developed a procedure for municipalities to submit excess revenues from traffic violations to the DOR. Since the mid 1990s, state law has required that excess revenues from traffic violations be submitted to the DOR for distribution to the schools, but the DOR has yet to draft a rule and procedures for implementing this law. In a recent audit of one city municipal court, it was estimated approximately $40,000 to $50,000 in excess monies should have been sent to the DOR for distribution to the schools. The audit also found the DOR paid $25,845 in salaries and other costs related to the Governor's office and the Office of Administration (OA). In fiscal year 2009, the funds went toward one staff member in the Governor's office, but in fiscal year 2010, the funding increased to three members of staff in the Governor's office and two in the OA. It appears these employees were located in, and supervised by, the Governor's office and the OA and performed functions related to those offices. The DOR also paid over $9,500 for 35 flights of the Governor's office, only 4 of which included

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

DOR personnel. These practices circumvent the appropriations process and distort the operating costs of the DOR, the OA and the Governor's office.

The DOR lacks adequate procedures for ensuring that businesses are properly registered with the state. The DOR should match its database with those of the Secretary of State and the Department of Labor and Industrial Relations to ensure that businesses are properly registered and the state is receiving the required fees and taxes.

The DOR also lacks an adequate method for updating related parties information to ensure that no employees hire or supervise a related party. New hires are required to disclose any related employees, but this information is not updated periodically.

In the areas audited, the overall performance of this entity was **Fair**.*

American Recovery and Reinvestment Act 2009 (Federal Stimulus)

The DOR was appropriated federal stimulus funds from the Federal Budget Stabilization - Medicaid Reimbursement Fund and expended $2,578,612 of these funds in FY2010 to purchase license plates and tabs from Missouri Vocational Enterprises and reimburse counties for homestead exemption credits. Federal stimulus funds were also transferred from the Federal Budget Stabilization - Medicaid Reimbursement Fund to the General Revenue Fund to pay income tax refunds ($250,000,000 in 2009 and $305,305,975 in 2010).

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Alana M. Barragán-Scott, Director
Department of Revenue
Jefferson City, Missouri

We have audited certain operations of the Department of Revenue, Administrative Functions, in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the years ended June 30, 2010, 2009, and 2008. The objectives of our audit were to:

1. Evaluate the department's internal controls over significant management and financial functions.

2. Evaluate the department's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the department, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the department's management and was not subjected to the procedures applied in our audit of the department.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures.

The accompanying Management Advisory Report presents our findings arising from our audit of the Department of Revenue, Administrative Functions.

Thomas A. Schweich
State Auditor

Department of Revenue - Administrative Functions
Management Advisory Report
State Auditor's Findings

1. Sale of Information

The Department of Revenue (DOR) does not maintain complete and detailed documentation to support the rates charged for the sale of Motor Vehicle and Drivers License (MV/DL) records. As a result, the DOR has limited justification for the rates currently charged, or whether the rates are in compliance with Chapter 610, RSMo (Sunshine Law).

The DOR sells certain MV/DL and other information. Since these MV/DL records are public information, rates charged may not exceed the cost of producing the information as provided in the Sunshine Law. The monies collected from these sales are deposited to the Department of Revenue Information Fund. Over $6.3 million was collected and deposited to this fund during the 3 years ended June 30, 2010, with over 98 percent related to the sale of MV/DL records.

For almost 10 years rates charged for MV/DL information remained unchanged. However, on May 1, 2008, the DOR significantly increased MV/DL rates to help pay for the development of a new integrated vehicle and drivers license system and records sales system. (See MAR finding number 2.) From June 2008 through May 2009, the MV/DL rates were revised several times due to lawsuits and court rulings that the bulk rate charged by the DOR was not in compliance with the Sunshine Law. (See Appendix E for a timeline of various rate changes.) Finally, in May 2010, the Missouri Court of Appeals Western District ruled in *R.L. Polk & Co. v. Missouri Dept. of Rev. 309 S.W.3d 881 (Mo.App. W.D. 2010)* that the bulk rate for MV/DL records set at 3.82 cents per record on December 1, 2008, violated the Sunshine Law, and required the DOR to either charge the rate in effect prior to May 1, 2008, or charge a rate that complied with the Sunshine Law. As a result, the current bulk MV/DL rate has been set at the rate in effect prior to May 2008, and the DOR has not developed new rates for providing the MV/DL information based on current costs.

Although officials told us the DOR developed new batch and individual rates for MV/DL records based on current costs, the DOR has limited documentation for these calculations. Some costs included in the calculations were not supported by complete and detailed documentation.

To ensure justification and reasonableness of the rates charged for the sale of records and compliance with the Sunshine Law, the DOR should periodically review and evaluate MV/DL rates and the current cost of providing this information, and ensure adequate supporting documentation is prepared and retained to support the rate calculations.

A similar condition was noted in a previous audit, Report No. 2001-08, *Department of Revenue, Division of Administration,* issued in February 2001.

Recommendation

The DOR develop a methodology to determine the appropriate rate to charge for the sale of MV/DL information. In addition, adequate documentation to support the rates should be maintained, and the rates should be periodically reviewed for adequacy.

Auditee's Response

Agree in part. As addressed in more detail below, the Department already has a methodology in place to set charges for records; already maintains adequate documentation to support the charges; and has recently reviewed the charges. The Department agrees that charges should be regularly reviewed for adequacy.

The amount the Department charges for a copy of a record depends on the type of record. To set a charge, the Department has since at least 2005 examined staff pay, expenses and equipment involved in providing records. The Department provided detailed documentation to support the current charges for the individual paper record fee and electronic batch record fee, set in 2008 and 2009, respectively, and maintains similar documentation for charges for other types of records.

The Department set charges differently in one instance in 2007, when it determined to charge $7 per record (beginning in the spring of 2008) in connection with the decision to fund the purchase of a new motor vehicle and driver licensing system. The $7 charge applied to copies of any motor vehicle or driver record, including bulk electronic copies of records. The methodology and charge were successfully challenged in court. During the litigation, the Department was ordered to re-impose the charges it had in place prior to May 1, 2008 for bulk electronic records ($.0043 per electronic record for the first 50,000 records, and $.0003 per electronic record for every record over 50,000) or to establish a new charge using the criteria in Section 610.026.1(2), RSMo. The Department attempted to establish a new charge for the electronic bulk records under Section 610.026.1(2), RSMo. It reviewed staff pay, expenses and equipment involved in providing records and set a revised charge of $.0382 per electronic record, which was again successfully challenged in the same court case as excessive. In accordance with the orders and judgment, the Department re-imposed the charges for bulk electronic records that it had in place prior to May 1, 2008, and the court has held that this charge complied with Chapter 610.

The Department agrees that charges for copies of records should be regularly reviewed for adequacy and plans to do so every 3 years or more frequently when appropriate.

Auditor's Comment

The supporting documentation supplied to the State Auditor's office by the DOR for the batch and individual rates for the MV/DL records was not sufficient. There was no documentation to support most of the expense and

equipment charges included in the rate calculations. For example, the DOR furnished no supporting documentation for the information technology expenses (including computers, state data center charges, maintenance, and programming), totaling over $19.5 million, for the individual rate calculation.

2. Integrated Motor Vehicle Drivers Licensing System

Nearly 2 years after canceling the development and implementation of an integrated motor vehicle drivers licensing system and record sales system, the DOR has still not developed a plan regarding the completion of these systems. Cost estimates and funding mechanisms have not been established for use in determining whether to 1) complete the systems, either by internal or external parties, 2) develop an entirely new integrated system, or 3) continue operations with the current system. Additionally, it appears the DOR did not develop adequate plans to fund the development and implementation of these new systems. The DOR will still need to spend a significant amount if the current MV/DL system is upgraded or replaced.

The DOR spent a significant amount on the new integrated/record sales systems; however, these systems were not completed as planned, and limited functionality of the integrated system is currently utilized. During fiscal years 2009 and 2008, the DOR paid over $6 million for the development of the new systems. Approximately 90 percent of the development costs were paid from the General Revenue Fund and 10 percent from the Motor Vehicle Commission Fund. An additional $204,000 for project management was paid from the State Highways and Transportation Department Fund.

To replace the 20 various MV/DL systems being used, the DOR contracted with a company (the contractor) in October 2007 to develop/install an integrated motor vehicle drivers licensing system and record sales system. The integrated system included: 1) planning, 2) infrastructure, 3) customer management, 4) cash management and finance, 5) vehicle management, 6) dealer management, 7) driver services, and 8) work management.

The systems were scheduled to be completed in early 2009, with the maintenance portion of the contract extending to June 2012. The estimated cost of the development and implementation was almost $26 million, with additional maintenance costs of almost $9 million for the period 2009 to 2017. The contract also required the DOR to pay the contractor $1 for every record sale related to the utilization of the records sales system. The total payment for records sales was estimated to be $13 million over the 10 years, from 2007 to 2017. The DOR planned to increase its rates for the sale of MV/DL records to pay some of the project costs; however, this funding did not materialize. (See MAR finding number 1.) Additionally, the DOR contracted with a second firm to serve as the project manager for the project. Although the Office of Administration (OA), Information

Technology Services Division (ITSD) had oversight of the project and approved vendor payments, DOR personnel had final approval/authorization of vendor payments.

From reviews of weekly status reports prepared by the contractor, it appears there were delays in the design and development of the systems, and the contractor was late on project deliverables. For example, the scheduled timeframe required system development to be completed by January 2009; however, at that time, the driver services and vehicle management segments had an estimated completion date of January 2010 and March 2010, respectively. According to DOR personnel, a former Director of Revenue did not believe the project manager's oversight was sufficient, and the project manager was not doing enough to speed up the project progress. Thus, in March 2008, the DOR canceled the project manager's contract, and a DOR employee began serving as the project manager.

In January 2009, a new Director of Revenue was appointed, and the project was stopped in February 2009. This cancellation appears to have been due to the contractor's bankruptcy and DOR project funding issues. When the project was cancelled, the record sales system was completed, but not implemented, and three parts of the integrated system were not completed (vehicle management, driver services, and work management). The other parts of the integrated system were completed and interfaced with the current systems.

To help ensure system development projects are efficiently completed, the project scope and responsibilities should be clearly defined and communicated, and actively managed/monitored to ensure the project contains the required functionality, anticipated completion dates are met, and cost overruns kept to a minimum. In addition, funding sources should be clearly defined and adequate.

Recommendation

The DOR decide how to handle the uncompleted MV/DL systems. To ensure the most effective use of limited resources, the DOR should develop various options regarding 1) completing the systems, 2) developing new systems, or 3) continuing operations with the current systems and/or upgrading the current systems. In addition, costs estimates and funding mechanisms for each option should be prepared.

Auditee's Response

As explained in more detail below, when the funding mechanism for the 2007 contract to install an integrated motor vehicle and driver licensing system was struck down in litigation, the Department began examining other options for completing the project, obtaining a new system, or upgrading the current systems, including applying for grant monies. The Department is mindful of current fiscal constraints and continues to explore feasible funding options. It is also important to note that all of the

infrastructure and programs the contractor was able to install during the short life of the contract are presently being used by the Department to perform its functions and provide services.

In 2007, a state contract was awarded to install an integrated motor vehicle and driver licensing system for the Department. Most of the funding for the contract was planned to be provided by increasing the amount the Department charged for copies of records to $7 per record, including electronic copies of records provided in bulk, and an appropriation was made. As noted in the preceding response, that increased charge was successfully challenged in litigation, and the Department stopped charging the $7 per record. As a result, the amount of charges for records was insufficient to pay for the project. Also, the contractor declared bankruptcy in 2009. While some of the contracts were assumed by another company, that company did not choose to continue to perform the Missouri contract.

Given the existing systems' age and overall limitations, the Department continues to look for ways to complete the project, obtain a different system, or upgrade the existing systems. The Department investigated several alternatives and developed cost estimates for each, but the cost of funding any such alternatives was, and remains prohibitive. Also, in 2009, the Department applied for a federal grant to fund the project, but the application was unsuccessful. The Department has also been exploring with OA-IT how completion of the project, installation of a new system, or upgrade of existing systems could be accomplished by OA-IT, and what funding resources would be necessary. The Department will continue to update existing, and perform additional, cost benefit analyses.

3. Internal Compliance Bureau

The DOR internal audit section, Internal Compliance Bureau (ICB), is not fully independent of the activities it audits.

Under the current organization structure, the ICB does not report directly to the Director of Revenue, but instead is organizationally under and reports to the DOR, Division of the Administration Director. Virtually all DOR financial transactions flow through or are reported to this division. The Director of Revenue does review/approve the ICB annual department-wide risk assessment and audit plan. Currently, the ICB supervisory position is vacant, and the bureau has four staff members.

The Institute of Internal Auditors standards provide that internal audit activity is to be independent and should "report to a level within the organization that allows the internal audit activity to fulfill its responsibilities." In addition, impairments to organizational independence results when an audit function is organizationally located within the reporting line of areas under audit. To ensure complete and objective audit coverage, the internal audit function must be independent of the activities it

audits, through both departmental status and objective performance of its audits.

Internal audits can be a valuable management tool by identifying ineffective or inefficient operations and ensuring that established policies and procedures are followed. Direct communication with the Director of Revenue would help ensure independence and provide a means whereby top management can be kept abreast of current operations and activities.

Recommendation

The DOR require the ICB to report directly to the Director of Revenue.

Auditee's Response

The Internal Compliance Bureau Administrator position reported directly to the Director of Revenue on a monthly basis, about internal audit activity, and more often as appropriate. The administrator position is currently vacant due to the retirement of the last administrator and funding shortfalls sustained by the Division in the FY11 budget. The internal audit staff is presently reporting audit activity directly to the Director of the Division of Administration, who directly reports to the Director of Revenue. Oversight of any internal audit activity concerning the Administration Division is planned to be performed by an independent administrator, who will report directly to the Director of Revenue. The Department agrees that internal audit activity should be independent of the activities it audits and report to a level within the organization that allows the internal audit activity to fulfill its responsibilities, and believes the current operating structure satisfies these criteria.

4. Policies and Procedures

The DOR needs to improve various policies and procedures.

4.1 Collection of excess revenues from municipalities

The DOR has not developed a procedure, as required by state law, for municipalities (cities, towns, and villages) to remit to the DOR excess revenues related to fines and court costs for traffic violations on state or federal highways. As a result, the DOR has less assurance excess revenues have been properly remitted.

Section 302.341.2, RSMo, requires municipalities deriving more than 35 percent of their annual general operating revenue from fines and court costs for traffic violations occurring on a state or federal highway to remit the excess revenue to the DOR to be distributed to schools of the county. This section also provides that the DOR should establish, by rule, a procedure regarding sending the excess revenues to the DOR.

When this law was established in the mid 1990s, the DOR established a bank account for these excess funds; however, the DOR did not establish procedures for municipalities to follow for remitting the excess revenues to

the DOR. According to DOR personnel, as of July 2010, no municipality has remitted funds under this statute. Report No. 2010-108, *Seventh Judicial Circuit, City of Randolph, Municipal Division*, issued in September 2010, estimated, during the year ended December 31, 2009, the city should have remitted excess monies of between $39,575 and $53,878.

DOR personnel told us the DOR is currently establishing a rule to address this issue.

4.2 Costs of other agencies

During the 2 years ended June 30, 2010, the DOR paid salaries and other costs totaling $25,845 related to operations of the Governor's office and the OA, thus circumventing the appropriation process established by the General Assembly, and distorting the actual costs of operating the DOR, the OA, and the Governor's office.

Beginning in February 2009, the OA has notified the DOR of the amounts charged to DOR appropriations for a portion of the salaries of staff in these offices. In fiscal year 2009, this funding related to one staff in the Governor's office and, in fiscal year 2010, the funding increased to three staff in the Governor's office and two staff in the OA. It appears these employees were physically located in and supervised by the Governor's office and the OA, and performed duties attendant to the programs and functions of those offices. If these employees were performing work benefiting the Governor's office or OA, it appears their salaries should be paid from appropriations of that respective office.

In addition, the DOR paid over $9,500 for 35 flights of the Governor's office. The flights typically included the Governor, members of his staff, and his security. Only four of these flights included DOR personnel. It does not appear appropriate for state agencies to bear the cost of flights that provide no clear benefit to the applicable agencies.

4.3 Registering businesses

The DOR does not have adequate procedures in place to ensure businesses are properly registered with the state, and as a result, is unable to inform other state agencies when a business is not registered with other applicable agencies. Significant agencies businesses should be registered with include the DOR, the Secretary of State (SOS), and the Department of Labor and Industrial Relations (DLIR), Division of Employment Security.

Except for certain instances, various state laws require businesses to register with and pay appropriate fees and/or taxes to the SOS, the DOR, and the DLIR. In addition, a business needs to be properly registered with these agencies to furnish goods and services to the state. According to DOR personnel, the DOR periodically matches its information with DLIR information to identify businesses registered with the DLIR and not the DOR. However, the DOR does not share the results of this match with other

state agencies, and does not match its database of registered businesses with the databases maintained by the SOS. Additionally, when a business indicates on the DOR application it is not required to register with the SOS, the DOR does not verify the accuracy of this statement. According to DOR personnel, the DOR has evaluated matching its database with the SOS; however, DOR data is not compatible with SOS data.

To ensure businesses are properly registered with the state and the state receives various fees and taxes mandated by state law, the DOR should match its databases with the data maintained by the SOS and DLIR, and share the results of the matches with other applicable state agencies.

4.4 Related parties

The DOR has not established an adequate method to identify related employees.

Although the DOR nepotism policy provides a related party cannot hire or supervise a related party, the DOR does not maintain a list of related employees. Upon employment, new employees identify all current DOR employees they are related to, and these relationships are considered in hiring and promoting employees. However, the DOR has not established procedures for updating related party information periodically. The absence of data on related employees weaken internal controls and may result in conflicting situations. The DOR should monitor related party situations.

Recommendations

The DOR:

4.1 Establish a rule, as required by state law, for the collection of excess revenues related to fines and court costs for traffic violations on state or federal highways.

4.2 Work with the Governor's office and the OA to discontinue the practice of using DOR appropriations to pay operating costs of other state agencies.

4.3 Establish procedures to periodically match its business entity database with SOS and DLIR databases to identify entities that are not properly registered and paying appropriate fees/taxes. In this regard, the DOR, in conjunction with the SOS and the DLIR, should consider establishing a comprehensive database of businesses registered with the state.

4.4 Establish procedures to update related party information, verify information with each employee periodically, and ensure individuals are not working in conflicting employment capacities.

Auditee's Response

4.1 A rule was already promulgated and it will become effective on March 30, 2011.

The Department initiated the rulemaking process when the proposed rule was filed with the Secretary of State on September 27, 2010. A notice of proposed rulemaking was published in the Missouri Register on November 1, 2010. The final rule, 12 CSR 10-44.100, "Excess Traffic Violation Revenue", was published in the Code of State Regulations on February 28, 2011, and, as noted, becomes effective on March 30, 2011.

The Department also notes that after the State Auditor's audit staff obtained information from the Department about collection of excess revenues from municipalities related to fines and court costs for traffic violations on state or federal highways, the Department in February 2011 received a remittance from a municipality.

4.2 Disagree. The Office of Administration, Division of Budget and Planning determines the allocation of salary and other expenses incurred by the Governor's Office for providing services to state departments. The Division of Budget and Planning informs the Department of the department's share of these expenses. The expenses are properly allocated to the Department.

4.3 These processes are already in place or in development.

The Secretary of State does not presently store business registration data in a form that can be electronically matched with department data. The Department understands that the Secretary of State expects to complete replacement of its current system by the end of calendar year 2011, which will permit data matching, and at that time the Department will initiate the process.

The Department matches information from the Department of Labor and Industrial Relations on a periodic basis. Businesses registered with Labor but not registered with the Department are contacted and brought into compliance, including registration. Using Labor's information, the Department has collected $34.5 million in unpaid taxes over the last five years.

The Department agrees that development of a comprehensive database of businesses registered with the state should be considered. A roadblock to the department's participation in such a database is the existence of extensive federal tax information in the department's antiquated legacy tax systems that cannot be segregated from other information. The registration information the

Department maintains is updated and sometimes created based on the information in those systems. But the Department is prohibited by the Internal Revenue Service (IRS) from sharing federal tax information with other state agencies or statewide offices, including Labor and the Secretary of State. Because the Department cannot segregate the federal information, the Department cannot share business registration data with Labor and the Secretary of State. If the Department were to share federal information, the IRS would prohibit the Department from participating in programs that assist the state in collecting tax delinquencies, including the federal audit and federal match programs which recovered $30.6 million for the state in calendar year 2010. The Governor's FY2012 budget included a request to accomplish replacement of the department's legacy tax systems, through a benefits-based funding model. Modern systems available in the marketplace today facilitate clear identification and segregation of federal tax information.

4.4 *Agree. The Department follows its anti-nepotism policy but agrees that having a formal method in place to track changes in data about related employees is appropriate. The Department has updated its Employee Information form and Change of Personal Information form to capture information about related personnel when an employee is hired or whose personal information changes. The Department began collecting this data on Monday, March 7, 2011 and will maintain it in the Reports Database for tracking. This information will also be added to the annual verification form that the department employees review each October, to ensure information is kept up-to-date. The Department will review the data each month to verify that no conflicts of interest exist in the reporting structure, as provided in its Administrative Policy 1.04 (Nepotism).*

Auditor's Comment

4.3 We did not recommend the DOR share federal tax information with other state agencies. However, we see no reason why the DOR cannot implement the recommendation without disclosing confidential tax information.

Department of Revenue - Administrative Functions
Organization and Statistical Information

The Department of Revenue (DOR) was created by Article IV, Section 12 of the Missouri Constitution as the central collection agency for state revenues. DOR responsibilities include:

1) Administering and collecting state taxes and fees
2) Collecting certain taxes and fees for local governments
3) Titling and licensing motor vehicles, trailers, and boats, and
4) Licensing motor vehicle operators

The Director of Revenue is appointed by the Governor, with the advice and consent of the Senate, and is responsible for all operations and polices of the DOR. The Directors of Revenue from July 2007 to June 2010 include:

Patricia Vincent, January 2005 to November 2007
Omar D. Davis, December 2007 to January 2009
Karen King Mitchell. January 2009 to July 2009
Alana M. Barragán-Scott (Acting) July 2009 - present (officially appointed Director in October 2009)

The Department of Revenue consists of four divisions and the director's office.

Motor Vehicle and Driver Licensing Division: This division consists of three bureaus. 1) The Motor Vehicle Bureau issues titles and registers motor vehicles, trailers, all-terrain vehicles, manufactured homes, and marine craft. In addition, the bureau issues registration certificates to motor vehicle and salvage dealers and leasing companies. 2) The Driver License Bureau issues, renews, suspends, revokes, and reinstates driver and nondriver licenses and driving permits. The bureau also processes and maintains records regarding license issuance, traffic violation point assessments, and failure to appear in court for traffic violations, and the administrative alcohol and abuse laws for alcohol/drug offenders. 3) The License Offices Bureau manages the operations of the contract license offices throughout the state. These local offices provide driver licensing and motor vehicle services.

Taxation Division: This division consists of four bureaus. 1) The Business Tax Bureau administers sales and use, financial institutions, insurance premiums, franchise, excise, cigarette and other tobacco products, motor fuel, corporate income, withholding, and county taxes and fees. 2) The Personal Tax bureau administers individual income, partnership, fiduciary, and estate taxes, plus the property tax credit and homestead preservation credit. 3) The Collections and Tax Assistance Bureau provides tax assistance to individuals and businesses and handles unpaid tax liabilities. 4) The Field Compliance Bureau audits businesses both in-state and out-state to ensure compliance with the state's tax laws.

Administration Division: This division consists of three bureaus. 1) Personnel Services Bureau is responsible for the DOR personnel matters, policies and procedures, training, and written communications. 2) The Financial and General Services Bureau is responsible for accounting, procurement, bank, and general services such as telecommunications, safety issues, and maintenance. 3) The Internal Compliance Bureau reviews and evaluates the DOR administrative, operations, and internal accounting controls.

Legal Services Division: This division ensures the DOR compliance with law and internal policies. The General Counsel's Office advises the director and divisions on legal matters and represents the DOR in court. The Criminal Investigation Bureau investigates and develops information for local prosecution of individuals and businesses suspected of violating the law the DOR administers.

Director's Office: This office includes the Director, deputy director and key administrative staff. The Public Information Office develops and maintains media and public relations. The Legislative Office serves as the DOR liaison to the General Assembly. This office also develops fiscal and revenue estimates on proposed legislation.

The DOR Information Technology (IT) unit is included in the Office of Administration, Division of Technology Services (ITSD). Appropriations for the IT unit are included in the ITSD's budget, and the ITSD has final approval of all IT expenditures.

At June 30, 2010, the DOR had 1,117 full-time and 5 part-time employees.

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

During the year ended June 30, 2010, the DOR spent American Recovery and Reinvestment Act (ARRA) of 2009 monies totaling $2,578,612 to 1) purchase license plates and tabs from Missouri Vocational Enterprises and 2) reimburse counties for homestead exemption credits issued pursuant to Section 137.106, RSMo. These monies were appropriated to the DOR from the Federal Budget Stabilization - Medicaid Reimbursement Fund. (See Appendix B-1.) Additionally, for the years ended June 30, 2010 and 2009, ARRA monies were also transferred from the Federal Budget Stabilization - Medicaid Reimbursement Fund to the General Revenue Fund for the payment of income tax refunds, totaling $305,305,975 and $250,000,000, respectively.

* This amount is the fee for each "batch" of records. All other amounts are the fee for each individual record in the batch.

Thomas A. Schweich

Missouri State Auditor

INSURANCE, FINANCIAL INSTITUTIONS AND PROFESSIONAL REGISTRATION

Division of Finance

May 2011

Report No. 2011-17

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Department of Insurance, Financial Institutions and Professional Registration, Division of Finance

Background

The Division of Finance of the Department of Insurance, Financial Institutions and Professional Registration (DOF) incorporates, regulates and licenses Missouri financial institutions, including residential mortgage brokers, state-chartered banks and savings and loan associations, non-depository trust companies, Missouri Certified Capital Companies and thousands of consumer credit companies. The DOF is required by state law to periodically examine these institutions to assess their solvency and ensure they are abiding by state laws and regulations. The DOF helps protect the financial interests of Missouri's citizens by taking actions to merge, close or otherwise address institutions with severe financial difficulties.

Access to Information

The DOF did not provide the State Auditor's Office access to most financial institution examination records. As such, we could not confirm whether the DOF is properly examining financial institutions and adequately protecting the financial interests of Missourians.

We identified instances of noncompliance from looking at the limited records the DOF did provide, as described below. Auditors need to review the withheld documents to check for other instances of noncompliance.

The State Auditor's Office is confident in its power to compel production of these documents. Because of the significance of the findings, we did not want to delay this audit report, but a subsequent audit will be completed which will pursue the production of these records.

Financial Institution Examinations

Section 369.324, RSMo, suggests the DOF must examine associations every 12 months. The DOF claims, however, that some associations can wait 18 months between examinations. Even using the DOF's more relaxed interpretation, the DOF was late performing association examinations 47 percent of the time.

There is no documentation that the DOF consistently completed all required procedures, employed supervisory reviews or used the most recent version of examination programs when reviewing banks which closed between March 2008 and April 2010. Without documentation it is impossible to know whether all necessary examination procedures are being performed.

The audit also uncovered several errors in the association examination tracking database. Access to the withheld documents is necessary to determine if additional mistakes occurred.

All three written agreements the DOF has with federal agencies for the sharing of examination responsibilities are outdated. The most recent agreement is from 2006, and the other agreements are from 1994 and 1993. Current written agreements are needed to clearly explain each agency's obligations.

Financial Institution Assessments

During the 3 years ended June 30, 2010, the DOF collected $1,546,000 more from banks than necessary to cover actual costs. The DOF is allowed to assess banks the actual costs incurred for conducting examinations, but the amount the DOF assessed for administrative costs exceeded actual costs. The DOF transferred the over-assessments for fiscal years 2008 and 2009 ($956,697) to the General Revenue Fund. After audit staff questioned this practice, however, the DOF used the fiscal year 2010 over-assessment to offset fiscal year 2011 assessments.

The DOF claims that overhead rates for association and trust assessments are reviewed annually, but there is no documentation of such a review and the rates have not changed in several years. The DOF adds a 40 percent overhead rate to association examination costs and a 25 percent overhead rate to trust examination costs to cover personnel costs. The DOF must review these rates for reasonableness each year and adjust them accordingly.

Although the overall performance of this entity in the areas audited was **Fair***, the current rating is **Incomplete**, because the DOF denied auditors access to necessary documents. As noted above a subsequent audit will be completed which will review the requested documents.

American Recovery and Reinvestment Act 2009 (ARRA or Federal Stimulus)

The Department of Insurance, Financial Institutions and Professional Registration, Division of Finance did not receive any federal stimulus monies during the audited time period.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
John M. Huff, Director
Department of Insurance, Financial Institutions and Professional Registration
and
Richard J. Weaver, Commissioner
Division of Finance
Jefferson City, Missouri

We have audited certain operations of the Department of Insurance, Financial Institutions and Professional Registration, Division of Finance, in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the years ended June 30, 2010, 2009, and 2008. The objectives of our audit were to:

1. Evaluate the division's internal controls over significant management and financial functions.

2. Evaluate the division's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain revenues and expenditures.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the division; and testing selected transactions. Citing confidentiality requirements, the division did not permit us full access to listings of completed financial institution examinations, examination reports and related documentation, or consumer complaints filed with the division. We could not audit certain information because of the limitations the division imposed on the scope of our audit.

We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. However, providing an opinion on the effectiveness of internal controls was not an objective of our audit and accordingly, we do not express such an opinion.

We obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions. However, providing an opinion on compliance with those provisions was not an objective of our audit and accordingly, we do not express such an opinion. Abuse, which refers to behavior that is deficient or improper when compared with behavior that a prudent person would consider reasonable and necessary given the facts and circumstances, does not necessarily involve noncompliance with legal provisions. Because the determination of abuse is subjective, our audit is not required to provide reasonable assurance of detecting abuse.

Except as discussed in the second paragraph, we conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the division's management and was not subjected to the procedures applied in our audit of the division.

The accompanying Management Advisory Report presents our findings arising from our audit of the Department of Insurance, Financial Institutions, and Professional Registration, Division of Finance.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Jeannette Eaves, CPA
In-Charge Auditor:	Robyn Lamb
Audit Staff:	Kelli Oldham
	Lacy Miller, M.Acct.

Division of Finance
Management Advisory Report
State Auditor's Findings

1. Access to Information

The Division of Finance (DOF) did not provide access to most financial institution examination records based upon its interpretation of state law. As a result, there is less assurance the DOF is meeting statutory responsibilities and adequately protecting the financial interests of state citizens.

The recent financial crisis that has resulted in the collapse of several Missouri financial institutions amplifies the need for a thorough independent review of financial institution examination procedures to ensure the DOF meets statutory responsibilities and adequately protects the financial interests of state citizens. The DOF should provide access to DOF examination tracking reports, working papers and reports of examinations performed, and consumer complaints to allow the Office of State Auditor to perform an independent review of DOF regulatory procedures.

Section 361.080, RSMo, requires DOF personnel to, "keep secret all facts and information obtained in the course of all examinations and investigations," but says, "except: (1) To the extent that the public duty of the director requires the director to report information to another government official or agency or take administrative or judicial enforcement action regarding the affairs of a financial institution. . . ." The commissioner of the DOF, like the head of every other state agency, has a public duty to cooperate with the state auditor. Section 29.130, RSMo, provides the state auditor with free access to all offices of this state for the inspection of such books, accounts, and papers as concern any of his duties. The DOF has failed to fully comply with the provisions of Section 29.130, RSMo.

Through a confidentiality agreement, the DOF provided examination tracking reports of financial institution examinations (excluding institution names) performed in recent years. The DOF did not provide access to working papers and reports of examinations performed, and most consumer complaints filed with the DOF. As a result, we could not reach conclusions regarding the adequacy of the financial institution examinations performed and the proper resolution of consumer complaints filed with the DOF. The DOF provided examination reports and related examination programs of financial institutions closed between March 2008 and April 2010. In addition, the DOF provided documentation relating to 12 consumer complaints originally received by our office and referred to the DOF, and provided access to a listing of, as well as the corresponding examination history and most recent reports for, consumer credit companies closed during calendar years 2008 and 2009.

The results of tests performed on the limited information provided to us by the DOF disclosed instances of noncompliance with various state laws and internal policies and concerns with the accuracy of the information provided. These findings are presented throughout this report. Had we been able to fully test compliance with regulatory and procedural provisions

applicable to DOF functions and verify the validity of the data provided by the DOF, other instances of noncompliance and concerns might have come to our attention that would have been included in this report.

Recommendation

The DOF reconsider providing the State Auditor the necessary access to division records and personnel to ensure the division is adequately protecting the financial interests of state citizens.

Auditee's Response

The Division disagrees with this audit finding. The Division derives its regulatory authority from Chapter 361. Its employees are "bound under oath to keep secret all facts and information obtained in the course of all examinations and investigations" and are subject to criminal conviction, forfeiture of office and fines for failure to follow this provision. Section 361.080, RSMo Supp. 2010. The Auditor's Office believes Section 361.080.1(1), the first of the enumerated exceptions, allows the Division to release any document requested by the Auditor's Office. That exception allows release of the information to a government official or agency if the Director's public duty requires release of the information. No existing statute requires the Division to release the requested information to the Auditor's Office. Additionally, the Auditor's Office argues that the Division can provide the information when it is "necessary or required" under Section 361.080.1(7). However, despite requests from the Division, the Auditor's Office has not shown a public duty requiring such release or the necessity of the release. The Audit Report's paraphrasing of Section 361.080 is insufficient to persuade the Division that it can release more information than it has, particularly in light of the severe penalties that can be imposed on Division employees in the event of an unauthorized release of information under Section 361.080.3.

The Auditor's Office sought access to all Division documents, including those considered confidential under Section 361.080. To the extent possible, the Division provided the information requested or sufficient information to allow the Auditor's Office to reach conclusions with respect to the issues presented. As an example, the Division provided redacted copies of examinations of banks closed by the Division. Additionally, the Division provided a report containing a list of banks and examination dates so the Auditor's Office could determine if the Division had met its statutory duty to perform examinations timely. The names of the banks were redacted. However, from that report the Auditor's Office could determine if the Division was complying with the timeliness requirements of the examination statute. Not all records requested could be produced and still comply with the Division's confidentially requirement. The Audit Report's statement suggesting that there is a concern about the adequate protection of the financial interests of Missourians as a result of the Division's compliance with its confidentially statute is ill-considered and untrue.

Auditor's Comment

Auditors in the State Auditor's office routinely review confidential information of governmental entities, and are legally obligated, under the threat of a possible felony conviction and up to 5 years imprisonment, to keep confidential any matters they learn during the audit. Currently, the DOF does not receive any independent review of the timeliness of financial institution examinations or the working papers prepared during financial institution examinations. The DOF must be subject to oversight to ensure it is meeting its obligations to the citizens of Missouri.

2. Financial Institution Examinations

The DOF did not always perform association examinations in accordance with the internal examination frequency policy, and has not considered possible statutory requirements to determine the required frequency of association examinations. In addition, bank examination procedures performed and supervisory review of this work were not always documented. Also, the association examination tracking database was not always accurate or updated for examinations performed. Furthermore, the DOF does not have current agreements with the federal agencies with which it shares examination responsibilities.

The DOF regulates approximately 280 banks, 6 associations, and 6 trusts by performing examinations of condition and operations. A composite CAMELS rating[1] of 1 to 5 (where 1 is the least degree of supervisory concern and 5 the highest degree of supervisory concern) is assigned to each financial institution.

2.1 Association examinations

DOF personnel did not always ensure association examinations were performed in accordance with internal policies, resulting in untimely examinations.

The DOF performed 15 association examinations between December 2002 and April 2010. In these 15 instances, the DOF was untimely in the performance of the examinations 7 times (47 percent), averaging approximately 50 days late.

According to DOF management, statutes do not specify the frequency with which association examinations are to be conducted. As a result, the DOF has determined associations will be examined at the same frequency as banks. The frequency of bank examinations is governed by Section 361.160, RSMo, which requires banks with a CAMELS rating of 3, 4, or 5 to be examined every 12 months, and banks with ratings of 1 or 2 to be examined every 18 months. The bank examination agreement between the Federal Deposit Insurance Corporation (FDIC) and the DOF further requires a bank

[1] A rating assigned financial institutions based on an evaluation and rating of six components; capital adequacy, asset quality, management, earnings, liquidity, and sensitivity to market risk.

to be examined every 12 months if the bank's total assets are greater than $500 million.

In addition, although the DOF maintains statutes do not require specific frequencies for association examinations, wording in Section 369.324, RSMo, suggests annual examinations may be required. This section provides that associations shall pay for each annual or special examination.

To ensure associations are adequately monitored and supervised, examinations should be performed in accordance with internal frequency requirements. Consideration of all possible statutory language is necessary to ensure compliance with association examination frequency requirements.

2.2 Bank examinations

DOF bank examiners did not always properly document on examination programs whether required examination procedures were performed, and examination programs sometimes lacked evidence of a supervisory review. In addition, the most current version of examination programs was not always used.

Our review of the examination programs for four of five banks closed between March 2008 and April 2010 noted the following:

- For the four bank examination programs reviewed (100 percent), the completion of several required procedures were not documented by examiners.
- For two of the four bank examination programs reviewed (50 percent), there was no evidence a supervisor had reviewed documentation of examination procedures performed.
- For three of the four bank examination programs reviewed (75 percent), the most recent version of the program was not completed by examiners or examiners in-charge.

Internal policies require various procedures to be completed by examination staff and for the examiner in-charge to document the review of procedures performed by staff. Without documentation and supervisory reviews of examination procedures performed, the DOF cannot be assured all necessary and required examination procedures have been properly performed.

2.3 Association examination tracking report

The report of the results of association examinations performed and the frequency of the examinations was not accurate or up-to-date.

Three errors occurred because association examinations performed by the Office of Thrift Supervision (OTS) were not entered in the examination

tracking database. One additional error occurred because the incorrect examination agency was entered into the database. These errors were discovered by the DOF after we had noted potential exceptions related to the frequency of examinations. Had we been provided full access to information contained in the database, (see MAR finding number 1), we may have identified additional erroneous information.

Accurate and reliable reports are needed to ensure the DOF ensures association examinations are conducted within timeframes required by state law.

2.4 Examination agreements

The DOF does not have current written agreements with the federal agencies that also conduct financial institution examinations. The DOF alternates examination responsibilities with the OTS to perform association examinations and the FDIC and Federal Reserve Banks to perform bank examinations. The most recent agreement with the FDIC was entered into in 2006 under the previous commissioner. In addition, the most recent agreement with the OTS was entered into in 1994 and the most recent agreements with the Federal Reserve Banks were entered into in 1993.

Current written agreements are necessary to ensure the current responsibilities of each party are clearly documented.

Recommendations

The DOF:

2.1 Review state law to determine whether annual examinations are required for associations, and monitor scheduled examination dates more closely to ensure compliance with applicable statutes and internal policies.

2.2 Ensure required examination procedures and supervisory reviews are performed and documented, and the most current version of the bank examination program is used.

2.3 Ensure examination tracking reports are accurate and up-to-date.

2.4 Ensure current association and bank examination written agreements are entered into with the applicable federal agencies.

Auditee's Response

2.1 The Division disagrees with the assertion of the Auditor's Office that it has not always performed association examinations in a timely manner. There are no statutory time requirements for association examinations. The Division has established an internal goal utilizing the same time standards used for bank examinations because the institutions present similar safety and soundness issues. The Division certainly strives to complete all examinations within

these time frames. As shown through the information provided to the Auditor's Office, the Division performed 1,821 financial institution examinations during the examined period of December 2002 through April 2010. Of those examinations, 99.62 percent were conducted within the statutory guidelines and internal goals.

Additionally, the Audit Report failed to account for the Division's working relationship with the Office of Thrift Supervision (OTS). The OTS sets the next examination date for associations based on the date of issuance of the prior examination report. The Division sets the date based on the first day of fieldwork. That discrepancy accounts for a portion of the seven timing issues presented in the Audit Report.

2.2 The Division partially agrees with this audit finding. The Audit Report criticized the documentation and supervision of examinations based on review of examination programs of banks that were closed after those examinations. Banks in problem status, as these institutions were, are examined every 6 months. However, the exams performed are limited in scope so not every item on the examination program is required at those examinations. The Division has not created a special examination program for these limited examinations. Additionally, in any examination, the program is merely a guide that is altered as the examination progresses. Nothing in the guide is considered a requirement or required by statute.

Every examination goes through several levels of review before the official report is issued. No report leaves the Division without those reviews. In the case of banks that are closing, the last examination is not intended to follow all the normal examination procedures because the focus is to assure the bank can close in an orderly fashion. The supervisors are active at all times in the end stages of a bank. The lack of supervisor signatures is not an indication that all levels of supervision were not involved.

To the extent that some Division examiners used outdated examination forms, the Division will take steps to assure that examiners use the appropriate form and will improve documentation of supervisory involvement.

2.3 The Division partially agrees with this audit finding. The Division works diligently to assure that its internal reports are accurate and recognizes the need for such accuracy. To the extent errors were found in internal reports, the Division will determine the reason and work to assure those errors are not repeated. However, the Division

disagrees that the Auditor was not provided sufficient information to determine the extent of the errors. The document provided did have redacted information. However, that same document was used to point out the errors contained in the Auditor's Report. Therefore, the Division provided sufficient information from which such errors could be discerned.

2.4 The Division disagrees with this audit finding. The Division operates under several agreements with other financial institution regulators to perform alternating examinations. Those agreements were written so that each regulator can meet its statutory obligations. As neither the state nor federal agencies have had statutory changes necessitating changes to the agreement and those agreements are between the agencies and not the individuals who signed on behalf of the agency, the criticized agreements are still current and valid.

Auditor's Comment

2.3. The errors described above were detected when we presented apparent examination frequency exceptions to the DOF and the DOF determined dates in the examination tracking report were not accurate. Additional errors may have been detected had we been allowed to review documentation to support the report.

3. Financial Institution Assessments

Banks were assessed approximately $1,546,000 more than actual examination costs during the 3 years ended June 30, 2010. In addition, overhead rates used in the calculations of association and trust assessments have not been changed in several years and there is no documentation that rates have been annually reviewed.

3.1 Bank assessments

The DOF misinterpreted statutory requirements when calculating bank assessments and determining transfers to be made to the General Revenue Fund. When calculating annual bank assessments for the 3 years ended June 30, 2010, the DOF assessed banks an additional 15 percent of examination costs to pay for various administrative costs. However, this assessment exceeded actual costs, and resulted in the DOF over-assessing banks $589,335, $484,483, and $472,214 during the years ended June 30, 2010, 2009, and 2008, respectively.

The DOF transferred the amounts related to the over-assessment to the state General Revenue Fund for the 2 years ended June 30, 2009. However, since expenditures paid by the General Revenue Fund were already reimbursed through the state's cost allocation plan, it does not appear appropriate to transfer additional amounts to the General Revenue Fund. After we questioned this practice, the over-assessment related to the year ended June 30, 2010, was not transferred, and was used to offset fiscal year 2011 assessments.

The DOF should assess banks the actual costs incurred by the Division of Finance Fund and only reimburse the state General Revenue Fund for expenditures actually paid by that fund.

3.2 Overhead rates

Overhead rates used when calculating association and trust assessments have not been changed in several years and there is no documentation that rates have been annually reviewed. The DOF adds a 40 percent overhead rate to association examination costs and a 25 percent overhead rate to trust examination costs to determine total costs to be assessed for examinations performed. These rates are intended to cover costs related to personnel who review and process examination reports but do not actually participate in the on-site examination. DOF officials indicated rates were reviewed for reasonableness annually, but no documentation was maintained and the overhead rates had not been changed in several years.

To ensure actual costs of association and trust examinations are assessed to the appropriate institutions, the overhead rates applied to the assessments should be annually reviewed for reasonableness and adjusted as necessary.

Recommendations

The DOF:

3.1 Comply with statutory provisions related to bank assessments. In addition, the DOF should work with the General Assembly to transfer $956,697 from the state's General Revenue Fund to the Division of Finance Fund, and reduce future bank assessments by this amount.

3.2 Re-calculate the overhead rate for association and trust examination assessments on an annual basis and retain documentation.

Auditee's Response

3.1 The Division partially agrees with this audit finding. The Audit Report found issues with respect to the assessments issued to banks that fund the Division's operations. Due to changes in how the Office of Administration reports overhead costs to agencies, the Audit Report concluded that the Division overcharged the assessment. The assessment statute allows the Division to charge "up to fifteen percent of the estimated expenses to pay the costs of rent and other supporting services such as the costs related to the division's services from the state auditor and attorney general and an amount sufficient to cover the cost of fringe benefits furnished by the state." Section 361.170.1 RSMo. The Division's assessment never exceeded the fifteen percent statutory cap. The Division used estimates of these numbers to make the assessment. Recently, the Office of Administration was able to provide actual costs but the Division used the estimate. The Division has altered the assessment methodology, starting with the assessment mailed during the audit,

to address this finding. Of note is the fact that the average rate of assessment is one-half of what it was 10 years ago.

3.2 *The Division partially disagrees with this audit finding. The Audit Report questions the Division's review of its overhead rates. Those rates are reviewed annually as the assessments are calculated. Because the statute requires the Division to base assessments on very specific cost items, those must be reviewed annually. A Division employee calculates the overhead rates and provides them to the Deputy Director who then reviews them again. Hence, the rates are reviewed twice. The Division will attempt to make that process more clear in the future.*

Auditor's Comment

3.1 The DOF response has not addressed the recommendation to reduce future bank assessments to offset over-assessments. In addition, the recent OA change referred to by the DOF actually occurred in 2002.

Division of Finance
Organization and Statistical Information

The Missouri General Assembly created the State Banking Department headed by the Bank Commissioner, in 1907. This department became the Department of Finance in 1921 and was placed under the management and control of the Commissioner of Finance. Effective July 1, 1946, the Missouri Constitution changed the name of the department to the Division of Finance (DOF) and placed it within the Department of Business and Administration. The Reorganization Act of 1974 abolished the Department of Business and Administration and transferred the DOF to the newly created Department of Consumer Affairs, Regulation and Licensing. The passage of Constitutional Amendment No. 6, adopted on August 7, 1984, renamed the Department of Consumer Affairs, Regulation and Licensing to the Department of Economic Development. Under the authority of the Reorganization Act of 1974 and executive order 06-04, effective August 28, 2006, the DOF was transferred from the Department of Economic Development to the Department of Insurance, Financial Institutions and Professional Registration.

The DOF incorporates, regulates, and licenses various financial institutions of the state. As of June 30, 2010, the DOF regulated 2,724 licensed consumer credit companies, 382 licensed residential mortgage brokers, 273 state-chartered banks, 6 state-chartered savings and loan associations, 6 non-depository trust companies, and 4 Missouri Certified Capital Companies. The 2,724 licensed consumer credit companies consisted of 1,046 payday lenders, 610 consumer installment lenders, 427 small loan companies, 274 title lenders, 132 motor vehicle time sales businesses, 77 retail installment businesses, 69 premium finance companies, 57 sale of checks businesses, and 32 credit service organizations.

State statutes provide that each state-chartered bank and trust company be examined by staff of the DOF at least once each year to determine each institution's solvency, safety of operations, and adherence to applicable state laws and regulations, except those institutions receiving a satisfactory examination rating may be reviewed once in an 18 month period. These examinations are accomplished with alternating examination agreements with the Federal Deposit Insurance Corporation and the Federal Reserve Banks. The DOF may also take action to merge, close, or otherwise address institutions with severe financial difficulties. State-chartered savings and loan associations are examined by DOF staff in accordance with the state-chartered bank and trust company statutes. These examinations are accomplished with alternating examination agreements with the Office of Thrift Supervision. Non-depository trust companies are examined by DOF staff in accordance with internal policies requiring a review once in an 18 month period. Consumer credit companies are examined by DOF staff in accordance with internal policies requiring a review once in an 18 month period, except those institutions receiving a non-satisfactory examination rating are reviewed again in either 3 or 6 months depending on the rating.

The DOF is self-supporting through statutory assessments and fees based on the total assets and the relative costs to examine the institutions under its supervision. The DOF is funded by three separate sources, as follows:

The Division of Finance Fund receives monies assessed on banks, trust companies, and other corporations. Expenditures incurred by the DOF for the regulation of banks, trust companies, and other corporations subject to its jurisdiction are paid exclusively from this fund.

The Residential Mortgage Licensing Fund receives fees set and collected for application fees, investigation of license applicant fees, examination fees and contingent fees. Any other miscellaneous fees are also received through this fund. The actual cost of administering the Residential Mortgage Licensing Law is transferred to the Division of Finance Fund, with excess revenues remaining in the Residential Mortgage Licensing Fund.

The Division of Savings and Loan Supervision Fund receives monies assessed on savings and loan associations and other corporations. The actual cost of regulating state chartered savings and loan associations and other corporations is transferred to the Division of Finance Fund. Any amount remaining in the Division of Savings and Loan Supervision Fund which exceeds five percent of the amount assessed to the savings and loan associations and other corporations is transferred to the state General Revenue Fund.

The State Banking Board, Savings and Loan Commission, and Residential Mortgage Board were created to handle appeals from certain decisions and orders of the Commissioner of Finance.

The State Banking Board, a judicial body, was created in 1955 to handle appeals from certain decisions and orders of the Commissioner of Finance. The bipartisan board is comprised of five members; two must be non-bankers, one must be a lawyer and two must be experienced bankers.

State Banking Board Members at June 30, 2010

Member	Term Expires
Glen (Brad) Williams (1)	August 29, 2009
M. Elizabeth Fast (1)	August 29, 2007
Robert M. Robuck (1)	August 28, 2007
Linda G. Renner (1)	August 27, 2005
Vacancy	

(1) Although the member's term has expired, he or she continues to serve on the State Banking Board until a successor is appointed by the Governor.

The Savings and Loan Commission, created in 1957, serves a similar function for state-chartered thrift associations. This bipartisan commission is also comprised of five members, one of whom must be a lawyer.

Savings and Loan Commission Members at June 30, 2010

Member	Term Expires
Richard C. Fellhauer (1)	October 10, 2005
Charles R. (Rick) Butler (1)	October 10, 2003
Bayard C. Plowman (1)	August 29, 2003
Vacancy	
Vacancy	

(1) Although the member's term has expired, he continues to serve on the Savings and Loan Commission until a successor is appointed by the Governor.

The Residential Mortgage Board was created in December 1996 to hear appeals of decisions of the Commissioner of Finance relating to mortgage brokers. This bipartisan board is comprised of five members; one must be a lawyer and three must be experienced in mortgage brokering.

Residential Mortgage Board Members at June 30, 2010

Member	Term Expires
Gregory C. Lucas	October 10, 2010
Richard L. Smith (1)	October 10, 2009
John W. Scates (1)	October 10, 2008
Vacancy	
Vacancy	

(1) Although the member's term has expired, he continues to serve on the Residential Mortgage Board until a successor is appointed by the Governor.

The DOF is organized into several main areas including Fiscal and Administration, Mortgage Licensing, Consumer Credit, and an Examination section. At June 30, 2010, the DOF had 106 full-time employees and 4 part-time employees, with a majority of these consisting of bank and trust examination section employees (83) and consumer credit section employees (16). The DOF maintains five examination field offices in Kansas City, St. Louis, Springfield, Columbia, and Sikeston. The Commissioner is appointed by the Governor with the advice and consent of the Senate. D. Eric McClure served as the Commissioner from January 3, 2003, until January 12, 2009. Richard J. Weaver, the previous Deputy Commissioner of Finance, was appointed Commissioner of Finance on April 17, 2009.

American Recovery and Reinvestment Act of 2009 (Federal Stimulus)

The DOF did not receive any federal stimulus monies during the 3 years ended June 30, 2010.
